Yahoo Group summary: The DXSoft group HAM radio software

These Yahoo Groups messages were archived in WARC format by ArchiveTeam in 2016. This PDF was generated by Digital Library of Amateur Radio & Communications from the WARC files in 2026.

Date span: 1998-09-11 through 2016-08-25

Source WARC: dxsoft.eRdmJnc.warc.gz

Source item: https://archive.org/details/yahoo-groups-2016-09-05T08-41-41Z-4bb31c

Messages included in this PDF: 5897

Message records with no body available in the source archive: 4

Messages omitted as spam from this PDF: 11

Yahoo replaced the domain portions of email addresses with @... in the archived messages. Characters lost in Yahoo's archived text appear as ?.

Messages are presented in ascending Yahoo message-ID order. Gaps indicate records absent from the source WARC or messages omitted from this PDF as spam.

1. Web Site Problems

Yahoo group: dxsoft
Date: 2000-06-04 03:48:54 UTC
From: Durell Smith
Topic: 1 Message: 1

Thanks to all who have emailed me concerning problems with the Web Site. All is well with nl7ds.com and Durell Electronics OnLine will be fully restored soon.
The Arctic QRP Society membership sign up page is working correctly , so those who were trying to join earlier may do so now.
So, please visit again.

2. Pictures with PSK31 by Skip Teller, KH6TY

Yahoo group: dxsoft
Date: 2000-06-04 10:26:28 UTC
From: Andrew Nicholson
Topic: 2 Message: 2

Hello All, Richard Brace are you There?.
Attached is Link for Pictures via PSK, Richard was asking about a file for this Mode, I must say the principle looks interesting.

http://members.home.com/hteller/psk31pictures/

Richard File in this Program is called binhex.exe. but only reference I could find. If you have a problem downloading I can send the file direct, Won't attach it, got in trouble for that before.
Regards and 73
Andy N
PS: If anyone tries this I would be interested to hear the results.

6. TrueTTY 1.51 beta is there!

Yahoo group: dxsoft
Date: 2000-06-05 06:21:16 UTC
From: Sergei Podstrigailo
Topic: 6 Message: 6

Hello All!

I just have uploaded upgrade to TrueTTY 1.51 beta to www.dxsoft.com
and mirrors. You can get it from

http://www.dxsoft.com/truettyb.zip
http://www.hamradio-software.com/truettyb.zip
http://www.8ung.at/dxsoft/download/tty151b.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

TrueTTY Versions History

V1.51
ASCII-7 and ASCII-8 modes were implemented.
I think that modes are not less convenient for QSO than PSK31,
but they are not such sensitive to tuning accuracy and propagation
conditions.
"BACKSPACE" symbols handling was made in PSK and ASCII modes. That feature
can be switched off by "Setup->Backspace Handling" menu.
Support of Swedish version of Baudot code was made in RTTY mode.
It is switched on by "Setup->Swedish Charset" menu.
V1.50
Release version. Documentation was update.
Bug with some Russian letter transmitting in RTTY-mode was fixed.
Minor change in QPSK31-receiving was made.
V1.42
QPSK-31 transmitting was made.
V1.41
In RTTY mode two shift values were added (85 Hz and 22 Hz).
QPSK-31 receiving was made (transmitting is not implemented yet).
V1.39
Submenu "Setup->Time Zone" was made. It is not necessary to
edit "UTCoffset" manually now.
New submenu "Setup->Fonts and Colors" was made.
"File->Open Capture File" command opens capture-file for
received symbols. If file exist, new symbols are appended to it.
"File->Close Capture File" command closes capture-file.
Capture-file state is shown in status-line. Hotkey for
capture on/off commands is Alt-L.
New Alt-S hotkey was made.
New macrosequences were made:

~[crx] - to clear RX buffer;
~[csnt] - to clear sent symbols window.
V1.38
There are 37 keyboard macros now.
Optional "UTCoffset" parameter can be used in [RTTY] section of TRUETTY.INI
file. This parameter define difference between UTC and local time in
minutes. If "UTCoffset" parameter is defined, program ignore information
about Time Zone from operational system.
V1.37
PSK31 decoding procedure were highly changed to improve decoding.
V1.35
Release version. Documentation was update, minor program changes
were made.
V1.33
RTTY symbols with speed above 75 Bd are transmitted correct now.
New macros were made:
~[tl] , `[tl] - local time;
~[tu] , `[tu] - UTC time;
~[dl] , `[dl] - local date;
~[du] , `[du] - UTC date.
V1.32
User can switch off oscillogramm window, macros buttons panel and
edit fields panel now ("Setup->View->...) .
Option "Show Sent Symbols In RX Window" was made
("Setup->View->Show Sent Symbols In RX Window").
V1.31
COM-ports are handled via Windows API now, so COM-port
PTT-interface should work on Windows NT too.
TxD out of COM-port can used for FSK-control of transceiver
(in RTTY mode, surely).
V1.30
Release version. Minor program and documentations changes were made.
V1.29
Beta-version with PSK31 (BPSK mode) support.
V1.26
Problem with Rx buffer overflow was fixed. When Rx buffer are grown to about
20kB, part of data is moved into invisible buffer. By "Save Buffer"
command both part of Rx buffer (invisible and visible) are saved.
Russian code page was corrected.
V1.25
Working sound band is 300...3000 Hz now.
More optimal filters were made.
V1.20
Documentation were updated.
Minor changes were made.
The installer was added.
V1.15
Option "Unshift On Space" was made. In that mode Rx symbol shift
is switched to "Letters" after receiving "Space" or "Line Feed" symbol.
Font parameters and background color of all windows can be changed.

Size of sent symbols window can be changed now.
Used pins of COM-port (RTS, DTR or both) can be changed.
V1.10
Data transfer from TrueTTY to AAlog logger (V1.03 and more new) was made.
Data are transferred from RX-window and "Call", "RST", "Name" edit fields.
To transfer data from RX-window, double-click on word or select words by
mouse. Then select the field from popup-menu. Data from edit field
are transferred after exiting from it.
Once more hotkey for TX/RX was made ("Scroll Lock"). So screen buttons
"TX" and "Pause" were swapped to accord to keyboard.
Hotkeys for manual switching of Rx symbol shift were made.
Gray "*" is Figures and gray "-" is Letters.
Threshold squelch was made.
V1.0
The documentation and on-line help were completed.
Support for N6TR-compatible LPT-interface was added.
Minor reworks were made.
V0.30
Bug in ~[fFileName] macros was fixed.
Macros ~[lf] ("line feed") was added.
Bug with incorrect hints of F1...F12 buttons was fixed.
AFC method was high improved.
V0.20
Program can work both with duplex and non-duplex sound card now.
V0.15
Program can transmit now, but only with
duplex sound cards.
V0.10
The first public version. Receive RTTY only.

Dear Gil, I am AUTHOR of AAVoice and can do everything with my
program. Well I say here what a want.

I need wav-files for AAVoice on different languages. And I give free
key to some people who help me to do this. But key receive only the
first man for every language. Plese contact me before sending any
file.

Best regards,
Alexander

Well sorry, did not realize you were the author. I think that should be clear because I am sick of all the Piracy that goes on.
I think it would be better to make the want clear in the posting. In any case APOLOGIES to you. I should have looked more closely but there is a LOT of this piracy going on and it just takes money form those of us that do coding for a living.

14. TrueTTY 1.51

Yahoo group: dxsoft
Date: 2000-06-05 17:21:41 UTC
From: Jim FitzSimons
Topic: 14 Message: 14

The 8 bit ASCII takes several characters
to get in sync. The first part of a message
is missing.
What character should I send first to get
the 8 bit ASCII in sync?
I tried spaces and that did not work.
Best regards, Jim FitzSimons W7ANF

16. Autobaud detect in TrueTTY possible??

Yahoo group: dxsoft
Date: 2000-06-06 04:42:29 UTC
From: Bob Hale
Topic: 16 Message: 16

Is there anyway that autobaud/shift detect be added to truetty? I
would like to listen to some of the commercial rtty station but it
takes what seems like forever to setup baud rate and proper shift??
It would be nice if there was a way to automatically detect shift and
baudrate for RTTY. I'll volunteer to beta test the feature as well.

Hello Bob,

Tuesday, June 06, 2000, you wrote:

BH> Is there anyway that autobaud/shift detect be added to truetty?
I think about autobaud ...
I think, there is not problem with shift detecting.
There is very easy to learn shift from spectrogramm.

BTW, you can help me with developing,
if send me some somples in wav-files. (11025Hz-16bit-Mono is
preferable).

It is strange ...
TrueTTY is sinchronized with my own signal instantly (on the second char
already).
And it should sinchronize with NILL-symbol (idle char) very fast ...

Best regards,
Sergei mailto:amx@...

Sergei, how do I send a NILL at the beginning of the message.
I tried it several times with spaces. Most of the time it sinchronized
on the second character, but sometimes it does not sinchronize
untill the second word missing all the spaces.
Best regards, Jim FitzSimons W7ANF

Hello Jim,

Wednesday, June 07, 2000, you wrote:

JF> Sergei, how do I send a NILL at the beginning of the message.

TrueTTY send some NILL's at the beginning itself.

JF> I tried it several times with spaces. Most of the time it sinchronized
JF> on the second character, but sometimes it does not sinchronize
JF> untill the second word missing all the spaces.

Can't explain so far ...

PLEASE READ THIS, found on the foot of EVERY posting you read:

To unsubscribe from this group, send an email to:
dxsoft-unsubscribe@egroups.com

You have to unsubscribe yourself. Nobody else can do it for you.

I have nothing to do with the reflector list. I'm just trying to help.

In a message dated 6/7/00 7:43:01 AM Eastern Daylight Time,
ALL of you gentlemen need to understand that ANY message sent to the
dxsoft@egroups.com address is automatically repeated to the whole list. Why
the unsubscribes are not working I cant imagine as this is an automatic
function of their list server. All of you who are seeking to do that should
recheck CAREFULLY what you are doing...

I made a recording and cut off the few leading NILL's. I quess during a
long transmission like the brag tape I should put in a few NILL's at the
beginning of a line to resync if QSB or QRN causes loss of sync.
That is why PSK31 has the double zero at the start of each character.
I have a new FEC code that will correct two errors or will resync
instantly if there is loss of chracter sync. It also has no more than
four zero or one bits so that clock sync is easy. It has eight information
bits per block so it only sends one character at a time. Error correction
is simple since all you need is a 256 element table and pick the code
with the minimum Hamming distance. I will send it to you if you want to
try it. I have no software to send or decode it yet.
Best regards, Jim FitzSimons W7ANF

42. Minor upgrade for TrueTTY

Yahoo group: dxsoft
Date: 2000-06-10 08:26:42 UTC
From: Sergei Podstrigailo
Topic: 42 Message: 42

Hello, All!

I just have uploaded upgrade to TrueTTY 1.52 beta to
the main site and mirrors.

You can get it from
http://www.dxsoft.com/truettyb.zip
http://www.hamradio-software.com/truettyb.zip
http://www.8ung.at/dxsoft/dounload/tty152b.zip

WBR,
Sergei

==========

V1.52
In ASCII-7 and ASCII-8 modes "NIL" symbol is transmitted
before each "SPACE"
or "CR" symbol. It was made for better bit
synchronization.
V1.51
ASCII-7 and ASCII-8 modes were implemented.
I think that modes are not less convenient for QSO than
PSK31,
but they are not such sensitive to tuning accuracy and
propagation
conditions.
"BACKSPACE" symbols handling was made in PSK and ASCII
modes. That feature
can be switched off by "Setup->Backspace Handling" menu.
Support of Swedish version of Baudot code was made in RTTY
mode.
It is switched on by "Setup->Swedish Charset" menu.
V1.50
Release version. Documentation was update.
Bug with some Russian letter transmitting in RTTY-mode was
fixed.
Minor change in QPSK31-receiving was made.

I am thinking to unsubscribe myself and I am also going crazy with these silly requests.

I think we are asking too much of some of the people who either do not know how, or are too lazy to read.

Another thing is possible: they are very new to lists and do not understand them...that is OK to some extent, IF they requested advice from those who would be more than happy to give help and "solve" there problem. (Isn't that part of what a list is about?)

It would appear that this may be a full time job on list list!

Just my 2 cents...not with the intention of being offensive.

TO ALL THAT GET UPSET,

The problem that some people have when the wish to unsubscribe is that they
most likely subscribed with a different E-mail address.
I had a xxxx@... E-mail address and when Geocities was taken over
by Yahoo, THEY not ME, changed my E-mail address to xxxx@....
When I went to unsubscibe from a list I could not, as it was not the address
that I originally subscribed to.
The only way to unsubscribe then is for the owner of the list to do it.
Cool down!
Jerry

You are unfortunately incorrect. I dont know about the 7 others but I actually received the unsubsribe confirmation message which comes back and advises to reply to it to confirm the unsubscribe transaction. Then a day or so later I see Im still on the list. I actually didnt want to unsubscribe until I kept seeing all the unsubscribe complaints and now it makes me wonder about the quality of this software maker who cant seem to run his list properly.. Hi all.
I have just visited dxsoft at e groups.
as it happens I joined that group with my BT address.
I signed in using Freeserve, no DX.
Signed in BT address, DX was there.
Sent an unsubscribe to Dx using BT. 30 seconds later I got a Confirmation,
Sent it straight back using reply to sender (no text).
Went to e-groups Signed in Freeserve address. Subscribed to DX.
Logged out went back in as BTinternet address, No Longer subscribed to DX.
Closed internet, read mail. Welcome to DX came up using my Freeserve
address.
Went back to E-groups Checked BT noDX. Freeserve Yes subscribed to DX.
Took me longer to write this Mail.
It can Be done.
Andy N

Hello,

This is to inform you that your request to unsubscribe from
dxsoft has been completed.

O/K ALL.
I have the Answer for all those not wanting Mail from dxsoft. Outlook Express Only.
Click on a message from DX, this one will do.
Go to Messages at the top of Inbox.
Click on it.
Go Down to block sender.
Click on Block Sender.
Now any Messages will go straight to Deleted File.
Best I can Do.

60. TrueTTY can receive AMTOR-FEC (SITOR-B) now!

Yahoo group: dxsoft
Date: 2000-06-12 09:58:49 UTC
From: Sergei Podstrigailo
Topic: 60 Message: 60

Hello All!

I just have uploaded upgrade to TrueTTY 1.53 beta to the main site and mirrors:

http://www.dxsoft.com/truettyb.zip
http://www.hamradio-software.com/truettyb.zip
http://www.dxsoft.f2s.com/truettyb.zip (The new fast mirror in England)

TrueTTY Versions History

V1.53
AMTOR-FEC (SITOR-B) receiving was made. Try the "Fast Sync" option, you will like it. To receive broadcast FEC, the "Normal/Reverse" button must be in the same position as for RTTY, that is "Normal" in USB and "Reverse" in LSB. To receive SELFEC, switch this button in another position and switch on the "Fast Sync" option.
V1.52
In ASCII-7 and ASCII-8 modes "NIL" symbol is transmitted before each "SPACE" or "CR" symbol. It was made for better bit synchronization.
[...]

Your feedbacks are welcome.

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

Hi Gang
Just got Sergei RTTY and Psk31 program in and is running good...Still
have a lot to learn
about it...But have some of the F keys set up...Have not been on RTTY
for a few years and
is fun to get back...Thanks for the quick return on the program
Sergei...I though with you
beening in Russia it would take a long time to get it back...Have been
running RTTY on
20 mtr but the band is noisey here...Hope to see some traffic on this
group...73...

70. TrueTTY 1.54 beta is there!

Yahoo group: dxsoft
Date: 2000-06-19 06:09:23 UTC
From: Sergei Podstrigailo
Topic: 70 Message: 70

Hello All!

I just have uploaded upgrade to TrueTTY 1.54 beta into the main site
and the mirrors.

See http://www.dxsoft.com/truettyb.zip ,
http://www.hamradio-software.com/truettyb.zip ,
http://www.dxsoft.f2s.com/truettyb.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

TrueTTY Versions History

V1.54
User can edit text on macros buttons via "Edit Macros" menu now.
Font parameters of that text can be changed via
"Setup->Fonts and Colors->Macro Buttons Font Setup" menu.
Macrosequences for CW-ID were made:
`[cwrText] - to sent "Text" sequence by Morse code and switch TX off;
`[cwtText] - to sent "Text" by Morse code and continue transmit with
current mode;
~[cwrText] - to switch TX on, sent "Text" by Morse code and switch TX off;
~[cwtText] - to switch TX on, sent "Text" by Morse code and continue transmit with
current mode;
It is necessary to use underline symbol ("_") in place of space in "Text"
sequence.
When "BACKSPACE" handling is switching on, backspace symbols are right
handled in "Sent" window now.
V1.53
AMTOR-FEC (SITOR-B) receiving was made. Try the "Fast Sync" option, you will
like it. To receive broadcast FEC, the "Normal/Reverse" button must be in
the same position as for RTTY, that is "Normal" in USB and "Reverse" in
LSB. To receive SELFEC, switch this button in another position and
switch on the "Fast Sync" option.
V1.52
In ASCII-7 and ASCII-8 modes "NIL" symbol is transmitted before each "SPACE"
or "CR" symbol. It was made for better bit synchronization.
V1.51
ASCII-7 and ASCII-8 modes were implemented.
I think that modes are not less convenient for QSO than PSK31,
but they are not such sensitive to tuning accuracy and propagation
conditions.

"BACKSPACE" symbols handling was made in PSK and ASCII modes. That feature
can be switched off by "Setup->Backspace Handling" menu.
Support of Swedish version of Baudot code was made in RTTY mode.
It is switched on by "Setup->Swedish Charset" menu.
V1.50
Release version. Documentation was update.
Bug with some Russian letter transmitting in RTTY-mode was fixed.
Minor change in QPSK31-receiving was made.

74. Truetty v. 1.54

Yahoo group: dxsoft
Date: 2000-06-24 08:16:10 UTC
From: David
Topic: 74 Message: 74

Have just downloaded the latest version of Truetty.

Being a bit of a newbie, I find that the option to edit the text
on the macro buttons a really worthwhile improvement.

Keep up the good work Sergei !

73 David

75. TrueTTY 1.55 beta is there!

Yahoo group: dxsoft
Date: 2000-06-26 06:18:55 UTC
From: Sergei Podstrigailo
Topic: 75 Message: 75

Hello All!

I just have uploaded upgrade to TrueTTY 1.55 beta into the main site
and the mirrors.

See http://www.dxsoft.com/truettyb.zip ,
http://www.hamradio-software.com/truettyb.zip ,
http://www.dxsoft.f2s.com/truettyb.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

TrueTTY Versions History

V1.55
Once more speed option (300 Bd) in RTTY and ASCII modes was made.
Frequency resolution (AFC accuracy) is highly improved in BPSK31 and QPSK31
modes. I hope it should improve decoding quality.
V1.54
User can edit text on macros buttons via "Edit Macros" menu now.
Font parameters of that text can be changed via
"Setup->Fonts and Colors->Macro Buttons Font Setup" menu.
Macrosequences for CW-ID were made:
`[cwrText] - to sent "Text" sequence by Morse code and switch TX off;
`[cwtText] - to sent "Text" by Morse code and continue transmit with
current mode;
~[cwrText] - to switch TX on, sent "Text" by Morse code and switch TX off;
~[cwtText] - to switch TX on, sent "Text" by Morse code and continue transmit with
current mode;
It is necessary to use underline symbol ("_") in place of space in "Text"
sequence.
When "BACKSPACE" handling is switching on, backspace symbols are right
handled in "Sent" window now.

81. ALC ? when running RTTY

Yahoo group: dxsoft
Date: 2000-07-05 15:32:35 UTC
From: Bob Raker
Topic: 81 Message: 81

TrueTTY users,

Having started in digital communications with PSK31, I am aware of the rule of "no ALC action" for a clean signal. However, I haven't seen any information concerning the set up for running RTTY. Is there a similar concern with ALC when running RTTY?

Thanks,
Bob w0br

82. Re: ALC ? when running RTTY

From: Jim FitzSimons
Topic: 81 Message: 82

Bob, PSK31 is amplitude and phase modulation so it is distorted if
it is compressed. RTTY is only frequency modulation so compression
does not distort the signal.
Even SSB sounds bad if it is compressed too much.
Best regards, Jim FitzSimons W7ANF

Well, I gotta think about this for a minute. It seems to me that if you are running "FSK" you are indeed "Frequency Shift Keying".
If you are running "AFSK" which is "Audio Frequency Shift Keying" then you are copying the difference in frequency between the "Mark" and "Space" audio tones.

Bud, how can you tell the difference between AFSK and FSK?
Some modern transceivers actually generate AFSK and call it FSK.
Some modern transceivers do it all with DSP.

Just as a note, the Kenwood manual for my TS440S recommends setting the transmit level for a reading of 50% on the ALC range for AFSK. They indicate full power output at that setting. Also, running at that setting there are heat dissipation considerations if you run for more then one hour.

Hi Jim
Well it ain't easy !!!! If you are putting audio into the rig you are running AFSK. Take the TS-440 for instance, they have a jack on the rear panel marked FSK, but it is really an input for audio for AFSK. My TS-450 and 950 both will run FSK. Years ago I had an Omni D and had to build up a little circuit to FSK the VFO. I used to run the Hal ST-6 and an IRL FSK-1000 where you had both FSK and AFSK output. I would have to assume that if DSP was involved it would be AFSK but I would not stake my life on it. The reason that I always preferred FSK was you did not have to worry about overdriving and splattering one that it was setup properly as it was a one time deal. The down side of AFSK is that you must ride herd on the audio going to the rig and with most of the older rigs you could not use your filters when in the SSB mode.
I am not an authority on RTTY or anything else as far as that is concerned but I ran it on many rigs for many years.
Have a good one !!!

Bud

Another way to set the audio gain/ALC (Using a sound card).

I set my mike gain to 5 on my transceiver. I control the sound card output gain with a knob on my monitor front. I increase this until one more notch does not increase power out of the transceiver. Then I back it off one notch. Everyone I qso with indicates my IMD is good.

97. AALog 1.1.2

Yahoo group: dxsoft
Date: 2000-07-12 14:17:11 UTC
From: Alexander Anipkin
Topic: 97 Message: 97

Hello dxsoft,

Just now I upload new version Of AAVoice to the DXsoft site

You can download it from:
http://www.dxsoft.com/aavoice.zip
http://www.aalog.com/aavoice.zip

If you allready have installed aavoice use this URLs:
http://www.dxsoft.com/aavoice112up.zip
http://www.aalog.com/aavoice112up.zip

ver. 1.1.2 beta 12/07/2000

- fixed endless error message when sound file not exists

I give free registration of AAVoice&AALog to man who make for me new set of
wave files with ENGLISH phrases. Please contact me for details

--
Best regards,
Alexander mailto:aia@...

98. OOPS!! Not AALog 1.1.2 - AAVOICE 1.1.2 is right

101. TrueTTY 1.56 beta is there. With AMTOR-FEC RX and TX now!

Yahoo group: dxsoft
Date: 2000-07-18 08:53:48 UTC
From: Sergei Podstrigailo
Topic: 101 Message: 101

Hello, All!

I just have uploaded TrueTTY 1.56 beta to the main site and mirrors:

http://www.dxsoft.com/truettyb.zip
http://www.hamradio-software.com/truettyb.zip
http://www.dxsoft.f2s.com/truettyb.zip
http://www.8ung.at/dxsoft/download/tty156b.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
TrueTTY Versions History

V1.56
AMTOR-FEC transmitting was made.
Extended code table for AMTOR and RTTY (with high and low letters) was made.
Extended table is switched on and off via "Setup->Extended Baudot" menu .
The '}' char doesn't work as `[rx] macrosequence synonym now.
But you can insert this sequence by Alt-] or Ctrl-] keystroke.
Some other minor changes were made.
V1.55
Once more speed option (300 Bd) in RTTY and ASCII modes was made.
Frequency resolution (AFC accuracy) is highly improved in BPSK31 and QPSK31
modes. I hope it should improve decoding quality.
V1.54
User can edit text on macros buttons via "Edit Macros" menu now.
Font parameters of that text can be changed via
"Setup->Fonts and Colors->Macro Buttons Font Setup" menu.
Macrosequences for CW-ID were made:
`[cwrText] - to sent "Text" sequence by Morse code and switch TX off;
`[cwtText] - to sent "Text" by Morse code and continue transmit with
current mode;
~[cwrText] - to switch TX on, sent "Text" by Morse code and switch TX off;
~[cwtText] - to switch TX on, sent "Text" by Morse code and continue transmit with
current mode;
It is necessary to use underline symbol ("_") in place of space in "Text"
sequence.
When "BACKSPACE" handling is switching on, backspace symbols are right
handled in "Sent" window now.
V1.53
AMTOR-FEC (SITOR-B) receiving was made. Try the "Fast Sync" option, you will
like it. To receive broadcast FEC, the "Normal/Reverse" button must be in
the same position as for RTTY, that is "Normal" in USB and "Reverse" in

LSB. To receive SELFEC, switch this button in another position and
switch on the "Fast Sync" option.
V1.52
In ASCII-7 and ASCII-8 modes "NIL" symbol is transmitted before each "SPACE"
or "CR" symbol. It was made for better bit synchronization.
V1.51
ASCII-7 and ASCII-8 modes were implemented.
I think that modes are not less convenient for QSO than PSK31,
but they are not such sensitive to tuning accuracy and propagation
conditions.
"BACKSPACE" symbols handling was made in PSK and ASCII modes. That feature
can be switched off by "Setup->Backspace Handling" menu.
Support of Swedish version of Baudot code was made in RTTY mode.
It is switched on by "Setup->Swedish Charset" menu.
V1.50
Release version. Documentation was update.
Bug with some Russian letter transmitting in RTTY-mode was fixed.
Minor change in QPSK31-receiving was made.

102. Re: TrueTTY 1.56 beta is there. With AMTOR-FEC RX and TX now!

Yahoo group: dxsoft

Topic: 101 Message: 102

Hi Sergei

I downloaded the new upgrade (thank you) and extracted it to the TrueTTY folder as always.

I tried to use it just now and the macros dont work. When I hit a macro the I see one letter of my message on the screen.

If I type something on the bottom screen and hit the TX button no problem. It sends the whole message.

Naturally I shut down and re-started the program, but no chenge.

One thing about this morning when I extracted the download to the truetty directory..... I always get a message asking me if I really want to overwrite truetty.exe or not. This time no message.

I wonder if something went wrong with the extraction?

If I'm the only one this happened to, then I bet its just a fluke and I can re-extract the 1.56 download and try again.

Thank you Jim KJ5TF

Hi Jim

I had the same problem, wrote a note to Sergei.
Went back to 1.55 beta and all works fine.

J> It sends the whole message.

Make sure that you don't use ~[rx] macro in place of `[rx] one.

~[rx] mean "stop TX IMMEDIATELY".

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

106. Re: TrueTTY 1.56

Hello David,

Wednesday, July 19, 2000, you wrote:

DMM> Would you please explain the difference between the two marcosequences;
DMM> what's the difference between ~{rx} and '{rx}??? That is, what is the
DMM> difference between a nested macrosequence and one that expands immediately?

At first, right macros is ~[rx] and `[rx] .

When you press macro buttons, all ~[...] macros are expanded and
executed or placed in the input window.

`[...] macros just are placed in the input window.
They expanded just before they should be "transmitted"

So if you put ~[rx] macros, TX is switched off almost immediately.
When you put `[rx] macros, TX is on till all symbols before this
macros were sent.

Best regards,
Sergei mailto:amx@...

Ok, I changed the ~ to ` and the macros work !

It was this way with the last version, so I didnt believe this was the problem. But now its all ok.

Amtor is cool Sergei, how about Pactor?? Next? ;-)

J> problem. But now its all ok.

If you read documentation, you don't find ~[rx] macro at all,
there is only `[rx] one .

So it was undocumented feature :-)
Surely, undocumented features can be change ...

J> Amtor is cool Sergei, how about Pactor?? Next? ;-)

In PACTOR-FEC the main problem is licensing,
because it is proprietary protocol.
Any ideas?

In PACTOR-ARQ are some technical problems also ...

Best regards,
Sergei mailto:amx@...

Sergei, ARQ is a real waste of time. Those pactor stations waste a lot
of time trying to get every character perfect. We have brains and we can
can loose a few characters and still understand. Just think of getting a
perfect missspelled word. I use VOX so ARQ is a problem. Keep it simple.
Theory says FEC works much better than ARQ. ARQ requires both sides
to be very strong. FEC only requires one side and others can monitor and
enjoy the conversation.
Best regards, Jim FitzSimons W7ANF

110. TrueTTY 1.60 is released

Yahoo group: dxsoft
Date: 2000-07-23 11:44:18 UTC
From: Sergei Podstrigailo
Topic: 110 Message: 110

Hello All!

I just have uploaded TrueTTY 1.60 to the main site and mirrors:

http://www.dxsoft.com/truetty.zip Main site (USA)
http://www.hamradio-software.com/truetty.zip USA mirror
http://www.dxsoft.f2s.com/truetty.zip England
http://www.8ung.at/dxsoft/download/trtty160.zip Austria

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
TrueTTY Versions History
V1.60
Release version. Documentation was update.
"Setup->English/Russian Ext. Charset" option for used alphabet
in RTTY and AMTOR modes was made. When this option is selected,
Russian/English shift is switched by the same way that Russian
commercial station use.
Minor change in upper/lower shift switching (when "Extended Baudot"
is enabled) was made.
More "smart" method of incorrect synchronization detecting in
"AMTOR-Fast Sync" mode was made.
V1.56
AMTOR-FEC transmitting was made.
Extended code table for AMTOR and RTTY (with high and low letters) was made.
Extended table is switched on and off via "Setup->Extended Baudot" menu .
'}' char doesn't work as `[rx] macrosequence synonym now.
But you can insert this sequence by Alt-] or Ctrl-] keystroke.
Some other minor changes were made.
V1.55
Once more speed option (300 Bd) in RTTY and ASCII modes was made.
Frequency resolution (AFC accuracy) is highly improved in BPSK31 and QPSK31
modes. I hope it should improve decoding quality.
V1.54
User can edit text on macros buttons via "Edit Macros" menu now.
Font parameters of that text can be changed via
"Setup->Fonts and Colors->Macro Buttons Font Setup" menu.
Macrosequences for CW-ID were made:
`[cwrText] - to sent "Text" sequence by Morse code and switch TX off;
`[cwtText] - to sent "Text" by Morse code and continue transmit with
current mode;
~[cwrText] - to switch TX on, sent "Text" by Morse code and switch TX off;
~[cwtText] - to switch TX on, sent "Text" by Morse code and continue transmit with

current mode;
It is necessary to use underline symbol ("_") in place of space in "Text"
sequence.
When "BACKSPACE" handling is switching on, backspace symbols are right
handled in "Sent" window now.
V1.53
AMTOR-FEC (SITOR-B) receiving was made. Try the "Fast Sync" option, you will
like it. To receive broadcast FEC, the "Normal/Reverse" button must be in
the same position as for RTTY, that is "Normal" in USB and "Reverse" in
LSB. To receive SELFEC, switch this button in another position and
switch on the "Fast Sync" option.
V1.52
In ASCII-7 and ASCII-8 modes "NIL" symbol is transmitted before each "SPACE"
or "CR" symbol. It was made for better bit synchronization.
V1.51
ASCII-7 and ASCII-8 modes were implemented.
I think that modes are not less convenient for QSO than PSK31,
but they are not such sensitive to tuning accuracy and propagation
conditions.
"BACKSPACE" symbols handling was made in PSK and ASCII modes. That feature
can be switched off by "Setup->Backspace Handling" menu.
Support of Swedish version of Baudot code was made in RTTY mode.
It is switched on by "Setup->Swedish Charset" menu.
[...]

111. WinWarbler - a new PSK31 program

Yahoo group: dxsoft
Date: 2000-07-25 04:52:21 UTC
From: Dave, AA6YQ
Topic: 111 Message: 111

WinWarbler allows you to conduct QSOs using the PSK31 mode developed by Peter Martinez, G3PLX. To aid PSK31 DXers, WinWarbler can simultaneously decode and display PSK transmissions on three separate frequencies. A PC running Windows 95, 98, 2000, or NT is required. WinWarbler is free, and contains no advertising. Commercial use is expressly forbidden.

WinWarbler utilizes the PSK engine developed by Moe Wheatley, AE4JY; by encapsulating his expertise in a reusable component, Moe has reduced the time required to develop a PSK31 application to a few days (including a couple of transatlantic flights). The WinWarbler installation package includes version 1.05 of Moe's PSKCore.DLL.

You can download WinWarbler 1.0 from http://www.qsl.net/winwarbler/ - consider this a beta release, as testing to date has been limited to a dozen QSOs; defect reports, comments, and suggestions will be gratefully accepted. WinWarbler's online help is provided in HTML, which you can evaluate at http://www.qsl.net/winwarbler/Help/ before downloading the entire package.

WinWarbler is written in Visual Basic; source code will be made available for non-commercial use at the completion of the beta period.

73,

Dave, AA6YQ

Hi,

Where exactly PSKCORE.DLL must be located at,
as there's an error message displayed it's not present in my windows
directory despite the fact it's in the windows and windows/system...

Works good for me...does crash a bit more often than I like but that's
to be expected with a Beta......downloaded it this morning after I
saw it in my mail....ran the download as advertised and the program
came up the first time....really like it! work great with my Ten-Tec
Pegasus!
Sure like the multiple screens....already made a couple of contacts
before reading the help files....
Great program!!

Hi
Yes I to think this is a Good piece of Software. Very easy on the Eye,
Appears sensitive, Runs fine and for SWL a nice Job. I for one would
recommend it. And that from a Digipan Convert.

118. WinWarbler version 1.1

Yahoo group: dxsoft
Date: 2000-07-26 00:14:42 UTC
From: Dave, AA6YQ
Topic: 118 Message: 118

When I beat the reflector and newsgroup bushes looking for Pathfinder and CI-V Commander beta testers, I was lucky to find 10 or 15 folks seriously interested in the chore. I don't know how many of you actually downloaded and installed WinWarbler 1.0, but in less than 24 hours there have been more than 500 unique visitors to the download web page. Thanks for your interest!

Several of you reported being unable to get WinWarbler to run at all, and others reporting crashes during operation. So far, two specific sources of WinWarbler crashes have been noted:

1. clicking the Rcv or Xmit buttons in the Soundcard Levels panel (on the configuration screen) -- this functionality has been eliminated in version 1.1, but will be replaced with direct manipulation (and retention) of the soundcard level controls in a future version

2. one user reports that WinWarbler repeatedly to load on a 90mhz Pentium with 32mb RAM -- I will begin testing with a range of lower-power hardware configurations in hope of replicating and then repairing the underlying defect(s).

Since WinWarbler does not crash on any of the four PCs immediately available to me, I'd appreciate the following information from anyone experiencing a WinWarbler crash:
1. operating system version
2. CPU type and speed
3. RAM size
4. free disk space
5. specific action (e.g. clicking on Xmit button in Soundcard Levels panel) that appeared to cause the crash
6. other programs were running

There has also been mention of an error message reporting "CPU too slow in responding; soundcard has been reset" -- if you experience this, I'd appreciate your forwarding the above system configuration information.

New feature requests have also been received, and will be considered as soon as the above stability problems have been rectified. I did take a few minutes to add individual squelch thresholds for each receive channel to version 1.1.

The WinWarbler download package has been updated to version 1.1. If you've already installed version 1.1, you can simply download the 176kb file www.qsl.net/winwarbler/WinWarbler.exe and overwrite your existing WinWarbler.exe file. Doing this will not update your online help with a few small changes, but you can refer to http://www.qsl.net/winwarbler/Help/index.htm if necessary.

Thanks again for your support and encouragement,

73,

Dave, AA6YQ

Several of you reported being unable to get WinWarbler to run at all, and
others reporting crashes during operation. So far, two specific sources of
WinWarbler crashes have been noted:

1. clicking the Rcv or Xmit buttons in the Soundcard Levels panel (on the
configuration screen) -- this functionality has been eliminated in version
1.1, but will be replaced with direct manipulation (and retention) of the
soundcard level controls in a future version

2. one user reports that WinWarbler repeatedly to load on a 90mhz Pentium
with 32mb RAM -- I will begin testing with a range of lower-power hardware
configurations in hope of replicating and then repairing the underlying
defect(s).

I have the reset sound card error several times. I doubt the CPU is unable
to handle it, unless the program is not efficiently using the resources. I
enclose the information.

Since WinWarbler does not crash on any of the four PCs immediately available
to me, I'd appreciate the following information from anyone experiencing a
WinWarbler crash:
1. operating system version
WIN98
2. CPU type and speed
PII 300 Mhz
3. RAM size
64 Meg
4. free disk space
495 Megs
5. specific action (e.g. clicking on Xmit button in Soundcard Levels

panel) that appeared to cause the crash
Not sure, think I was clicking on new receive channels.
6. other programs were running
I was connected to my WIN2000 machine but nor dong anything.

There has also been mention of an error message reporting "CPU too slow in responding; soundcard has been reset" -- if you experience this, I'd appreciate your forwarding the above system configuration information.

New feature requests have also been received, and will be considered as soon as the above stability problems have been rectified. I did take a few minutes to add individual squelch thresholds for each receive channel to version 1.1.

Most important new features are capture file (real capture not just save buffer) and more logging. I did not check the macros but Zakanaka and the other WIN programs set a very high bar for macros, especially Zakanaka.

The WinWarbler download package has been updated to version 1.1. If you've already installed version 1.1, you can simply download the 176kb file www.qsl.net/winwarbler/WinWarbler.exe and overwrite your existing WinWarbler.exe file. Doing this will not update your online help with a few small changes, but you can refer to http://www.qsl.net/winwarbler/Help/index.htm if necessary.

Thanks again for your support and encouragement,

The program crashed after clicking X-mit button in version 1.0. I also recieve " CPU to slow soundcard has been reset" If you could click to delete text in transmit window, like recieve windows it would help too. Also to make waterfall a little higher on the screen. Thank you for a very good program and we all appreciate your time and effort in making these programs.
Good Luck,
William H. Common N8XTR

121. WinWarbler

Yahoo group: dxsoft
Date: 2000-07-26 02:18:48 UTC
From: James Holzbauer
Topic: 114 Message: 121

Dave: here's my #1 operating system: HP 4550 466mc. 10gigs HD,
64 megs RAM...W98...I got the sound card reset fault a couple of
times. Most of the time when the computer would fault, I tried to
copy the fault message..that would cause a hard freeze...would have
to turn the computer off and reset it....wanted to copy the details
of the fault message for you, but have since learned not to do that!!
the only programs running with winwarbler is the Ten-Tec program (got
to have that running for the radio) and maybe a callbook (usually
mininized) However, I've been known to have up to five or six
programs running at any one time....
I have the programs copied to a zip disk and time permitting will
install the program on my second computer...and it's a Packard Bell,
266 mc. 8 gig HD, with about 40 meg of RAM....but that will take a
couple of days...I have a zip drive in it as well, but got to find
another job first....
And glad to hear you corrected the audio level problem. That was my
first crash..had to do it a couple of time before I realized what was
causing the crashes...most of the time, it would just fault.
Click "OK" and restart the program and it would come right back up...
But, I still like the program...keep up the good work..

Why do you discuss WinWarbler THERE ???
WinWarbler is NOT DXSoft group software!
Please, find more appropriate place ...

Best regards,

From: S. Sneidar
Topic: 128 Message: 128

Sergei, I have recently downloaded and installed ver. 1.6 of Truetty.
In that version, the ability to use the metacommand ~[rx] within a
macro and at the end of text has been lost.

~[rx] within a macro and by itself (alone) works OK.

Was this an intentional change? I liked the ability to turn off a
macro with a metacommand within the macro.

Regards, Sid ah6hh in Hawaii

Sergi

Nice job on 1.60... easy to install and worked 100% first time.
Haven't played with Amtor yet but RTTY / PSK is FB.

For those with ~[RX] problems ... don't understand your problems ... all my macros with any ~[] work just fine.

73 and Tnx

SS> ~[rx] within a macro and by itself (alone) works OK.

I wrote about it a couple days ago.
Just replace _undocumented_ sequence ~[rx] by `[rx] one .

SS> Was this an intentional change?

Yes, ~[rx] executes immediately now, as all ~[...] sequences.

SS> I liked the ability to turn off a
SS> macro with a metacommand within the macro.

Use `[rx] for this purpose .

Best regards,

Hello Jim,

You can try to use new beta of AALog contest module for this contest.
It can count points and multipliers now and prepare file in ARRL and
CSV formats.

You can download it from:
http://www.qsl.net/rz4ag/files/contest.zip

NOTE! You need have main aalog package

Good luck Jim. I was never able to get Truetty entries into the "Log"
even after following detailed instructions from Alexander. Asked the
list for help from anyone having success doing this. Got no response.

Oh well, there is still the good old pencil. :-)

What we can do is go over and compare information on how my AALog and TrueTTY are setup.

They work fine - not sure how i got it right, or how u went wrong, but I think if we go over it piece by piece, we can get it straight.

Im sure its a small thing, and you'll be pleased as I am with the combo package of both.

Hope to catch u in the Russian RTTY contest, 15/10 are best for me, but I can also do 20M pretty well.

Jim

When the callsign is in the truetty call box (below F2), you need to highlight it and hit enter. If you have single clicked "Add QSO" button on the aalog left side under File, then there should be a smaller new window open up.

With that done, highlight the callsign in truetty and hit enter. It should show up in the "New QSO" window. The RST, and name work the same way.

Did I explain that right guys? ;-)

Jim
PS - just downloaded the contest beta and might give it a try this weekend.

Topic: 138 Message: 138

I have a registered copy of aalog and downloaded contest bata today.

When I double click the AAL_test.exe I get a message saying General protection falt in module AAL_TEST.EXE at 005:2FCF.

When i click "OK", I get the AALog-Contest program window on screen. A smaller white screen.
And four other windows are at bottom screen, minimalized.

Add/Eddit QSO - CW Interface - Callsign Information - And another window says DXCC, mulit, and CQ. No idea what thats all about.

I looked for a readme about contest, but didnt see one.

There is a Configuration button and maybe if I go there and fill in my General Setup information, this will help. ??

But I dont know why I get the error message on start up like that.

It is a seperate program from AALog so there's no negative effect on that, so no harm done in trying. I hope I can figure out that error message.

Thanks for any help.... Jim KJ5TF

Hello Jim,

Friday, July 28, 2000, 3:54:02 AM, you wrote:

Well, A small instruction for everyone (rules file for RUSDX RTTY also
attached, put it into the \rules directory).

Unzip contest.zip in the directory where aalog.exe located.
You'll see aal_test.exe. Also check is the directory "rules" exists.
In to the directory \db will be added files contest.* and calls.*

Run aal_test.exe you can get error message like Jim describe (sorry,
it's beta-version). Go to "Configuration|Define contest". Press "New" and
describe contest rules an save it.
Then go to "Configuration|General setup" and select this contest. Enter your
station info.
If you get error messages don't worry.
Close program and run it again.

Rules defining (for RUSDX RTTY)

In the field "Contest name" enter name of contest.

On the bookmark "exchange" enter default reports (599) (oops, I see
error, not sended but sent must be , hi) and check the checkboxes "always".
For second group select CQ zone.

On the bookmark "QSO's" select All for "Valid QSOs", "Different bands"
for "Dupes", RTTY for "Valid modes" and 3.5, 7,14,21,28 for valid
bands.

On the bookmark "Multipliers" check "DXCC list" and "by 2nd group".
Press button "List" and check "Any alphabetic" and press button with
Green picture (sorry forget name of this simbol in english, hi)
Check "Count on each band"

On the bookmark "Scoring" press button "New" in continent field select
"Own" and in score field enter 5 and press OK. Then press button "New" in
continent field select "Other" and in score field enter 10. press OK.

That's ALL! You describe contest. Press OK button for save changes.

ABOUT WINDOWS of CONTEST MODULE

Add/Edit QSO - main window for adding info to log.
Fast keys:

ESC - clear all info in window.
Ctrl+Backspace - clear current field
Alt+F1 - band down
Alt+F2 - band up
Enter - it work only for fields Callsign and report rcvd 2nd group.
When you press Enter in "Callsign" field cursor moving to
"report rcvd 2nd group" field. When you press Enter in "report
rcvd 2nd group" field then contact will be saved.
Space - Work in "Callsign" and "report rcvd 2nd group" and moving
cursor to each other.

Use double click on the grid for edit previous contacts info.
Ctrl+Del - delete QSO

Blank white window is for displaying worked callsigns like bottom line in
TRLog. If yoiu can work with this station on this band it callsign
will be blue and bold.

CW interface (and RTTY too) window used for interface with Sergei's
programs. Use F1..F12 keys (work in any window) for send macroses
and Ctrl-X and Ctrl-P for switching TX/RX and pause in transmition.

other windows using for information...

PS Sorry for my English.

Several people have had this experience with 1.3 and 1.3.1. At least one defect remains, and it manifests itself by consuming so much CPU time that little is left to service the program. I'm working on it...

Dr OM Sergei,
I registrated with TrueTTY 1.35 because I liked rtty with it very much. The sensivity was excellent, more than two S-units better than my homemade filter-converter. Very good selectivity. Very good handling: no longer getting nervous by fine-tuning the transceiver because of frequency-change by mouseclick and AFC. It is also nice, that I can use the new releases of TrueTTY with my "old" registration-key. Thanks for that. I just tested and enjoyed version 1.60 in the WW Russian RTTY-Contest!

From: Kosta Popandopoulo
Topic: 166 Message: 166

Hello!

Is there anybody who using/used or testing/tested MMTTY software
by JE3HHT?
I just downloaded V1.5.1. It's realy "RTTY-factory", it's
freeware, but regretfully
having .doc-file on Japanese language. I wondering, wether
already exists english version
of MMTTY manual and convertor from MMTTY-logbook file format to
any popular file format
(.dbf, .adi,... etc)?

73! Kosta de UR5FFC

Sergei;
So far, Version 1.60 of Truertty looks good. I have used RTTY, PSK31 and AMTOR FEC on 10 meters and the emergency nets. The emergency nets also use PACTOR, however I do understand that it is proprietary.

Is there a possibility to make the keyboard hangover time adjustable? I am a slow typist and, at times, need a second or two to think. Thanks and keep up the good work.

181. Sydney Accommodation during the Olympics

Yahoo group: dxsoft
Date: 2000-08-16 03:27:57 UTC
From: Steve Leatheam VK2BGL
Topic: 181 Message: 181

Greetings from down under...

I realise this is somewhat off topic but it may be of interest to
somebody to combine their Sydney trip with amateur radio operation.

We have accommodation available during the Olympic period in the
Lower Blue Mountains just 45mins in fast air-conditioned rail service
from the main Olympic venue or 20mins in the same rail service from
the Rowing, white water, kayaking venue.

The accommodation is a luxury 44 square home with three spare large
size bedrooms. All furniture & bedding will be in place. Two large
screen TV's in the house are available for viewing the Olymics.
As we have recently purchased another home elsewhere and my family
will be in the other house, I will be the only person on the premises
and will be available to drive for siteseeing tours in the Mountains
etc.

The shack is fully equipped on all HF bands including the computer
which has all the digital modes available.

Please email me direct on sleatheam@... for
further information.........

Hello Alexander,
if printing labels, than I use German paper format DIN-A4 which contains 24 labels, divided in 3 x of 8 fields. You find examples for other formats are in:
http://www.zweckform.de/o_office/o_frames.html

There are a lot of sizes available, so I suggest to make also an user defined format. Usually I print the complete card using EXCEL to process the logbook data.

186. CwType 0.25 is there!

Yahoo group: dxsoft
Date: 2000-08-21 06:58:33 UTC
From: Sergei Podstrigailo
Topic: 186 Message: 186

Hello All!

I just have uploaded CwType 0.25 to the main site and mirrors:

http://www.dxsoft.com/cwtype.zip Main site
http://www.hamradio-software.com/cwtype.zip USA 1
http://www.dxsoft.f2s.com/cwtype.zip England
http://www.8ung.at/dxsoft/download/cwtyp025.zip Austria

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
CwType Versions History

V0.25
There are 37 keyboard macros now.
User can edit text on macros buttons via "Setup->Edit Macros" menu.
Font parameters of that text can be changed via
"Setup->Macro Buttons Font Setup" menu.
`[rx] macrosequence can be inserted by Alt-] or Ctrl-]keystroke now.
V0.20
Bug in ~[fFileName] macros was fixed.
Once more hotkey for TX/RX was made ("Scroll Lock"). So screen buttons "TX"
and "Pause" were swapped to accord to keyboard.
Data transfer from CwType to AAlog logger (V1.03 and more new) was made.
Data are transferred from "Call", "RST" or "Name" edit field after exiting
from it.
Data transfer from CwGet program into "Call" and "Name" edit fields was made.
Font parameters and background color of input window and sent symbol
window can be changed.
V0.15
Keyword "Weighting" in CWTYPE.INI file was implemented.
It is used to eliminate morse elements clipping by some
transmitters with QSK .
V0.14
Not only serial (COM), but parallel (LPT) port may be used for
tranceiver control now. See CWT-LPT.GIF for details.
V0.13
User can vary speaker tone now (Keyword "SpeakerTone" in CWTYPE.INI file).
Keying speed can be varied in band of 1...6000 LPM.
MOX with a lot options was made ("Setup->MOX On","Setup->MOX Setup->...").
Options "Setup->Pause On at paddle press" and
"Setup->Pause Off at TX off" were made.
Minor changes in program interface were made.

V0.12
Minor modifications were made to improve co-operation with
programs AAlog and CwGet.
V0.11
The option "to be in front of all windows" was made.
For they operators which don't use good logger (as AAlog) :-)
edit fields "Call", "RST", "Name", "Other" and
macrosequences for its using was made.
V0.10
More adequate behaviour at windows resizing.
V0.09
Macrosequences for control of transmission process
("tx", "rx", "pause", "clear the buffer ") was added.
Sizes and co-ordinates of windows are saving on
the command " Setup- > Save setup ".
Combined two-letter combinations AS, AR, BK, KA, KN, SK are adequately displayed
in the window of the sent characters.
V0.08
The bug was corrected - complementarity of buttons "Yamb" ? "Pause".
V0.07
A possibility to disable iambic mode (memory of a unit of the char) was
added. A regulated dash/dot relation was added.
V0.06
Further development of interaction with the AAlog program was made.
V0.05
The messaging with AAlog logger by RZ4AG (see http://ua9osv.virtualave.net) was realized.
V0.04
The macrosequences was realized.
The bug was corrected - "Save setup" command resulted
that the installations of keyboard macros were lost sometimes.
V0.02
The first public version.

Sergei,

I have registered my copy of CW get and I enjoy using it with CW type.
I'm glad to find you have added more macros, that was important to me.
One bug with CW type, there is some hysteresis on the speed select.
If you increase speed then reduce speed, the speed will continue to increase
until you click the reduce button the second time. Reverse is true also.

Thanks & 73's,

Drew
AF4XO

Too bad it won't run in WIN2000 unless you use a serial port to key. It is impossible to toggle a printer line in WIN2000.

189. TrueTTY 1.61 beta is there!

Yahoo group: dxsoft
Date: 2000-08-22 06:56:42 UTC
From: Sergei Podstrigailo
Topic: 189 Message: 189

Hello All!

I just have uploaded upgrade to TrueTTY 1.61 beta to the main site and mirrors:

http://www.dxsoft.com/truettyb.zip Main site
http://www.hamradio-software.com/truettyb.zip USA 1
http://www.dxsoft.f2s.com/truettyb.zip England
http://www.8ung.at/dxsoft/download/tty161b.zip Austria

Much more convenient Input window was made. Sent symbols are not deleted
from this window immediately now. They just change color to the same
color as Sent window text. Transmitted text are deleted from Input window
after "Line Feed" symbol transmitting.

Best regards,
Sergei mailto:amx@...

Hello, All!

We need a 468*60 banner to promote our site www.dxsoft.com at
qrz.com and another sites.

We can offer registrations for all our programs (AALog, AAVoice,
CwGet, TrueTTY) for nice banner.

Please, send your banners to discount@... .

Take into attention, that we will give registrations ONLY for that
banner we will use.

Best regards,
Sergei mailto:amx@...

J> there. How can I put it back as it was?

It is not bug, is feature:

"Much more convenient Input window was made. Sent symbols are not deleted
from this window immediately now. They just change color to the same
color as Sent window text. Transmitted text are deleted from Input window
after "Line Feed" symbol transmitting."

A lot peoples ask me to do it.

If ALL sent symbols are there, you don't transmit "Enter" at all.
It is bad method, i think.

195. CwGet 1.10 and CwType 0.26 is there!

Yahoo group: dxsoft
Date: 2000-09-04 16:36:58 UTC
From: Sergei Podstrigailo
Topic: 195 Message: 195

Hello, All!

I uploaded CwGet 1.10 and CwType 0.26 on the main site and mirrors.
URL's are:

http://www.dxsoft.com/cwget.zip Main site
http://www.hamradio-software.com/cwget.zip USA 1
http://www.dxsoft.com/cwget.zip England
http://www.8ung.at/dxsoft/download/cwget110.zip Austria

http://www.dxsoft.com/cwtype.zip
http://www.hamradio-software.com/cwtype.zip
http://www.dxsoft.f2s.com/cwtype.zip
http://www.8ung.at/dxsoft/download/cwtyp026.zip

CwGet Versions History.
V1.10
Esc, Ctrl-F1...Ctrl-F12, Alt-F1...Alt-F12 keystrokes
are transferred to CwType now (for CwType 0.26 and later).
Alt-S hotkey for "File->Save Buffer" command was made.
"File->Open Capture File" command opens capture-file for
received symbols. If file exist, new symbols are appended to it.
"File->Close Capture File" command closes capture-file.
Capture-file state is shown in status-line. Hotkey for
capture on/off commands is Alt-L.
The input bandwidth top margin was increased to 3 kHz.
"Setup->Main Filter->Very Narrow Filter" option was added.
It is appropriate for very low manipulation speed only, surely.
The burst filter options "5 LPM", "10 LPM", "25 LPM", "50 LPM"
were added.

CwType Versions History
V0.26
Esc, Ctrl-F1...Ctrl-F12, Alt-F1...Alt-F12 keystrokes
are transferred from CwGet now (for CwGet 1.10 and later).

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

196. CW Type I/O help Please!

Yahoo group: dxsoft
Date: 2000-09-07 11:53:21 UTC
From: Den
Topic: 196 Message: 196

I am on a portable operation and am trying to get CW Type to key my rig:
I am using the 'standard' CT program parallel port interface which does key the rig from CT and Log-EQF programs.
What are the proper "ini' MASK settings to make this work???

Info:
Running full break-in so I do not need to PTT the rig, just need the 'key' setting.
I/O is on LPT1
I/O uses pin 18 as ground and 'keys; the rig using pins 17 and pin 1 through a transistor.
I will NOT be using a paddle, only the computer to send CW

Thanks
Den W2DEN portable 4

Current version of CwType doesn't work with such N6TR-interface.
I plan to implement support for it soon ...

199. TrueTTY 1.62beta is there!

Yahoo group: dxsoft
Date: 2000-09-07 13:05:58 UTC
From: Sergei Podstrigailo
Topic: 199 Message: 199

Hello, All!

I just have uploaded upgrade to TrueTTY 1.62 beta to the main site and
mirrors:

http://www.dxsoft.com/truettyb.zip
http://www.hamradio-software.com/truettyb.zip
http://www.dxsoft.f2s.com/truettyb.zip
http://www.8ung.at/dxsoft/download/tty162b.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

TrueTTY Versions History

V1.62
"Setup->View->Logarithmic Spectrogramm" menu command or
Alt-Z hotkey switch spectrogramm window between linear or logarithmic scale.
V1.61
Much more convenient Input window was made. Sent symbols are not deleted
from this window immediately now. They just change color to the same
color as Sent window text. Transmitted text are deleted from Input window
after "Line Feed" symbol transmitting.
V1.60
Release version. Documentation was update.
"Setup->English/Russian Ext. Charset" option for used alphabet
in RTTY and AMTOR modes was made. When this option is selected,
Russian/English shift is switched by the same way that Russian
commercial station use.
Minor change in upper/lower shift switching (when "Extended Baudot"
is enabled) was made.
More "smart" method of incorrect synchronization detecting in
"AMTOR-Fast Sync" mode was made.
[...]

Date: 2000-09-09 13:11:10 UTC
From: Pat
Topic: 199 Message: 200

Sergei:

I just finished using V1.62 ----

1. There is no scroll bar on the right
side of the Transmit Text window so
you cannot check your typing on any
text that is at the beginning if you
fill up the window. You had a bar on
earlier editions and I sure would like
to see you put it back in the software!!

2. Still would like to see three (3) rows
of macro buttons instead of one (1). Maybe
you could give the user the option to
choose how many rows he wants (1, 2, or 3).
Also think it would be to your advantage
to allow color selection of each button
(multiple colors make it easier to "find"
the button you want to use AND colorful
presentations make the software more
attractive (i.e., more sales for you!!!)

3. Thanks for the outstanding software...I
love TrueTTY and Logger both and tell
everyone during each QSO how much I enjoy
your package.

Bye bye for now

Pat

201. TrueTTY version 1.62b

Yahoo group: dxsoft
Date: 2000-09-09 19:35:31 UTC
From: David
Topic: 201 Message: 201

Hello Alexander,

I have downloaded TrueTTY version 1.62b and it works fine except in AMTOR-FEC mode. When this mode is selected the program locks up and an error message is displayed as follows:-
"Access violation at address 0046B820 in module TRUETTY.EXE. Read of address 00D31E04."

Previous versions worked fine in Amtor mode although I have not actually found any Amtor to copy!

Any ideas?

Regards,

204. Truetty ver 1.6b error message

Yahoo group: dxsoft
Date: 2000-09-10 11:44:15 UTC
From: mforeman
Topic: 204 Message: 204

Hi Alexander,

I seem to have the same problem as David/G3YER when using latest version (1.62b) of Truetty on FEC/AMTOR mode.Comes up with below error message.

< Access violation at address 0046B820 in module TRUETTY.EXE. Read of address 00D31E04.>

By the way anyone looking for a Sitor/FEC station to use Truetty with should check out:-

Szczecinradio/SPB 2829.5 khz
8557 khz
13033 khz
16914.5 khz
19697.5 khz
Blind traffic lists are sent at 0800 1100 1600 1900 2200

This is a commercial marine station,you may well be copying messages before the recipient has seen them,so please exercise some common sense here.(Anything you copy will be in Polish)

May I take this opportunity to thank Ua9osv for producing such a splendid Rtty package.

Regards to all

Mike

208. AALog 2.0

Yahoo group: dxsoft
Date: 2000-09-15 21:06:50 UTC
From: Alexander Anipkin
Topic: 208 Message: 208

Just now I upload new AALog 2.0 beta

yuou can download it (abt 5.1Mb) from

http://www.dxsoft.com/download/aal2-d1.zip - Disk1
http://www.dxsoft.com/download/aal2-d2.zip - Disk2
http://www.dxsoft.com/download/aal2-d3.zip - Disk3
http://www.dxsoft.com/download/aal2-d4.zip - Disk4

http://www.aalog.com/download/aal2.zip - in single file

Attention!
You can receive regkeys for ALL PRODUCTS of THE DXSOFT GROUP!
I need men who help me prepare documentation for this version.
If you want help to me plese drop me e-mail to aalog@...

AALog ver. 2.0 beta

This version of the AALog is dedicated to the memory of
my brother SERGEI POPOV who's life came to a tragic end at
the age of 42.

I present new version of AALog. It's 32-bit application now and work only
Win 9x/NT/2000. It's beta version. It has not any documentation and help files.
If you have qustions send they to me by e-mail.

Setup

Unpack archive with aalog in the temporary directory and run setup.exe

If you use AALog 1.x then you can convert your data into the new format.
Run program "Database converter", enter path to the old AALog (C:\AALog by default)
and press "Start" button. Then in the AALog 2.0 go to Tools|Awards manager and press
"Rescan log set" button.

Brief news

- fixed bug with losing data when PC off.
- statistic for anny mode and band now
- manual change of territory if automatic detection is wrong
- Added WAS, P75P, WAIP, IOTA, WAJA, JCC, Russia awards
- Marker for call/QSO
- Enhanced filter and search functions
- Print your QSL and envelop labels from AALog now
- added RAC(Flying horse) ? Octavia cd-rom support

- Export/import any part of the log
- Import from LOG-EQF
- New QSL status for outgoing QSLs - "Printed"
- Internal "Callbook"
- unlimited number of "Log sets" and you can give own name for your sets (see asets.aal)
- user can edit DXCC-list now

and many other features.

Best regards,
Alexander mailto:aalog@...

210. CwType 0.30 is there!

Yahoo group: dxsoft
Date: 2000-09-20 08:00:50 UTC
From: Sergei Podstrigailo
Topic: 210 Message: 210

Hello All!

I have uploaded CwType 0.30 into the main site and mirrors:

http://www.dxsoft.com/cwtype.zip Main site
http://www.hamradio-software.com/cwtype.zip USA 1
http://www.dxsoft.f2s.com/cwtype.zip England
http://www.8ung.at/dxsoft/download/cwtyp030.zip Austria

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

CwType Versions History
V0.30
More universal transceiver-interface control was made,
so something parameters of INI-files were changed.
Re-read documentation, please!
You can use N6TR-interface now.
Program should work on Windows NT/2000 now (with some limitations).
V0.26
Esc, Ctrl-F1...Ctrl-F12, Alt-F1...Alt-F12 keystrokes
are transferred to CwType now (for CwGet 1.10 and later).
V0.25
There are 37 keyboard macros now.
User can edit text on macros buttons via "Setup->Edit Macros" menu.
Font parameters of that text can be changed via
"Setup->Macro Buttons Font Setup" menu.
`[rx] macrosequence can be inserted by Alt-] or Ctrl-]keystroke now.
[...]

213. Bug in CwType 0.30?

Yahoo group: dxsoft
Date: 2000-09-21 07:57:38 UTC
From: Alan Stevenson
Topic: 210 Message: 213

Hello Sergei

Clicking on the .exe file brings up a "privileged instruction" error message. The program keeps running.
Clicking on any button after that brings up the "division by zero" error message. The program can only be ended by the end task instruction.
Re-reading the documentation isn't helping....
I use NT4SR6.

Hello Sergei
Er, no - I left UseSpeaker on 1, sorry.
I'm not getting the error messages anymore......

Thanks
Alan

216. CQWW contest with TrueTTY

Yahoo group: dxsoft
Date: 2000-09-25 15:38:34 UTC
From: Jim
Topic: 216 Message: 216

Most of us know about the CQWW CW & phone contests. I've played in those many times, but never knew there was a seperate contest for RTTY. After "discovering" PSK31 this spring, and then RTTY I decided to have a good go at this one.

It started out friday evening, but I missed that and got a start saturday morning. I took many breaks saturday, and didnt anything in the evening. Sunday I had a day to myself and stayed with it most of the day.

I got 36 contacts saturday, and 47 more Sunday. All over Europe - HA9, I2, RA3, OM3, RW2, GI0, OK2, S50, GW8, OL5, G5, F5, PA3, EC8, RU1, GM5, DL5, EA8, YL7, SM6, ON4, UT9, OH2, & EA7. South America/Caribbean - CP6, KP2, HO1, HC8, PJ2, 8P6, CO8, HC1, P3A, VP5, P43, HK3, FY5, LT0, & PY2. VE, & VY, ZL2, JH4, AH8, KL7, AH6, and the very cool KH0/JH8 station!

Even the odd ball, 4U1WB, or World Bank! Did you notice the FY5? Thats French Guiana! Ive never seen that country on CW.

I was able to work almost everyone I tried, given enough time. :) I worked up and down the band, and bypassed the bigger pile ups. Comeing back to them only after the pileup deminished.

Afew did get away from me, and I regret that. Noteable are, CN8, 9M2, 9M6, and FR5. On these I wimped out and went "QRO" to 1.5 watts, and still didnt get em.

I ran 750mW from my K2, WM-2 QRP wattmeter, into 10/15 quad at 70FT. The computer is a Toshiba Satellite notebook with soundcard. Running TrueTTY software, and AaLog.

On my webpage you can find links to some digital ham websites, where you can download free software.

Afew times I dipped down to 350-500mW and still was able to make contacts in the clear.

If a person wanted to run 5 watts, no telling what they might do!!

If its true that QRP can give new life & excitement to bored QRO ops, let it be known that the digital modes can also give new life to QRP ops who think they have "done it all".

CW will always be the QRP king, but these digital modes are really fun too. All you need is a sound card on your computer. Even non-pentium computers can do RTTY and PSK.

There's even Field Hell mode that dosnt require a SSB rig! Yeah! You can use a CW only rig!!

Enjoy all the flavors of QRP.

217. CW Type ... Farnsworth ???

Yahoo group: dxsoft
Date: 2000-09-26 12:00:07 UTC
From: Den
Topic: 217 Message: 217

Any plans to incorporate "Farnsworth" keying into CW Type?

It sure would make a nice addition, when I slow down to 10 - 13 wpm for some QSOs it would be nice to hold the character speed @ 18 or so.

D> It sure would make a nice addition, when I slow down to 10 - 13 wpm for some QSOs it would be nice to hold the character speed @ 18 or so.

I understood,
it is keying with LONG pauses between chars.

It is good idea, thanks.

Hi Sergei

The Farnsworth method is very common here in the states. The individual characters are sent at a set speed. This is usually 18 wpm but it can vary. Then to slow down the code speed you increase the spacing between the characters but still send the character at 18 wpm. It was 'invented' as a learning tool by a guy named Farnsworth. The idea is you learn what the charatcers sound like at 18 wpm even though you are copying at 5 wpm. To increase your code speed all you need to do is increase your recognition speed by decreasing the space between the characters.

Most of the Morse code learning programs have this capability built in... you can set the character speed, say to 18 or 20 wpm (actually to any spped you want) then set the actual code speed to anything less than or equal to the character speed, say 5 or 13 wpm.

Our FCC code test to get a license for HF operation is 5 wpm with the character speed of 18 wpm. So most US amateurs have an 'ear' for this type of sending.

I realized the need for this while on portable operation using CWtype, as I slowed down to work slower operators ....

221. AALog 2.0 beta 2

Yahoo group: dxsoft
Date: 2000-10-01 17:51:02 UTC
From: Alexander Anipkin
Topic: 221 Message: 221

Hello!

I just upload new version of AALog2

only updated files:
http://www.dxsoft.com/aalog2b2up.zip
http://www.aalog.com/aalog2b2up.zip

Full installation package:
http://www.dxsoft.com/aal2b2-1.zip - ????1
http://www.dxsoft.com/aal2b2-2.zip - ????2
http://www.dxsoft.com/aal2b2-3.zip - ????3
http://www.dxsoft.com/aal2b2-4.zip - ????4

AALog ver. 2.0 beta 2 - 01 Oct 2000

- fixed bug in Database Convertor
- fixed bugs in the import from text procedure
- fixed bugs in adif import procedure
- fixed "New QSO" window
+ added info about beam heading into "Edit QSO" window
- fixed bug in the QSL labels printing
+ added local time info in the main window

Best regards,
Alexander mailto:aalog@...

Hello,

Seems there are still something wrong on the program.

I cannot type my full name on the log configuration screen.
My name is Makoto Tanaka but I can only type 'Makoto Tan'
where is 'anaka' ????

Award manager does not work. Alway 'Akey not found' is
shown. Why???

I am getting tired to wait to receive complete logging software.
Please expedite. I do not want to waste my money I paid for
this software.

Dear friends!

AALog v.2.x is beta version now. Some troubles are possible.
And I can't make complete product wthout your help.
I publish this version only when I run program on my PC without
troubles. But many peoples - many PC - more troubles and problems.

MT> Seems there are still something wrong on the program.

MT> I cannot type my full name on the log configuration screen.
MT> My name is Makoto Tanaka but I can only type 'Makoto Tan'
MT> where is 'anaka' ????
Well, I increase size for this field.

MT> Award manager does not work. Alway 'Akey not found' is
MT> shown. Why???
It's look like you have not open log in this time.

MT> I am getting tired to wait to receive complete logging software.
MT> Please expedite. I do not want to waste my money I paid for
MT> this software.
I work under it. I wait any suggestions from you. I need it.

Thanks to all.

230. CwType 1.0 is there!

Yahoo group: dxsoft
Date: 2000-10-05 08:10:10 UTC
From: Sergei Podstrigailo
Topic: 230 Message: 230

Hello All!

I have uploaded CwType 1.0 into the main site and mirrors:

http://www.dxsoft.com/cwtype.zip
http://www.hamradio-software.com/cwtype.zip
http://www.dxsoft.f2s.com/cwtype.zip
http://www.8ung.at/dxsoft/download/cwtyp100.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
CwType Versions History

V1.0
The program works on Windows NT/2000 without limitations now.
Inter-letter space can be vary now.
Speed value in status line is calculated with dash/dot ratio
and inter-letter space consideration.
"File->Send Text File" command was added.
Minor bug with speed regulator was fixed.
Hotkeys for speed regulator were made
(Alt-gray plus or Ctrl-gray-plus and Alt-gray minus or Ctrl-gray minus).
V0.30
More universal transceiver-interface control was made,
so something parameters of INI-files were changed.
Re-read documentation, please!
You can use N6TR-interface now.
The program works on Windows NT/2000 now (with some limitations).
V0.26
Esc, Ctrl-F1...Ctrl-F12, Alt-F1...Alt-F12 keystrokes
are transferred to CwType now (for CwGet 1.10 and later).
V0.25
There are 37 keyboard macros now.
User can edit text on macros buttons via "Setup->Edit Macros" menu.
Font parameters of that text can be changed via
"Setup->Macro Buttons Font Setup" menu.
`[rx] macrosequence can be inserted by Alt-] or Ctrl-]keystroke now.
[...]

http://www.8ung.at/dxsoft/download/cwtyp102.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

CwType Versions History

V1.02
A bug in MOX option "TX Off at n dots silence" was fixed.
A bug in Edit Macros procedure was fixed.
A bug in driver installation procedure was fixed.
User can change number of macro buttons now.
("Setup->One Macro Buttons Row","Setup->Two Macro Buttons Row",
"Setup->Three Macro Buttons Row".) Macro buttons labels are
changed when "Ctrl" or "Alt" key is pressed now.
V1.0
The program works on Windows NT/2000 without limitations now.
Inter-letter space can be vary now.
Speed value in status line is calculated with dash/dot ratio
and inter-letter space consideration.
"File->Send Text File" command was added.
Minor bug with speed regulator was fixed.
Hotkeys for speed regulator were made
(Alt-gray plus or Ctrl-gray-plus and Alt-gray minus or Ctrl-gray minus).
V0.30
More universal transceiver-interface control was made,
so something parameters of INI-files were changed.
Re-read documentation, please!
You can use N6TR-interface now.
The program works on Windows NT/2000 now (with some limitations).

Dear Sergei,

I only use your software for receiving and this works great!
Sadly I can't help you. I will scan in a page of a manual to show you how Navtex can be filtered. It's really easy! As Navtex is used worldwide it can be useful for many people worldwide. Making a sorting routine for Navtex, might be a helpful excercise for sorting out. RTTY messages later. Sorting out RTTY weathermesages is more difficult.

Sergei;
I tried to use AMTOR-FEC in a scheduled network and have not been able to Lock-on for a successful xmit. I receive great. I need to test more, but it would be nice to be able to have a setup memory where I could store my settings and recall them when I need them. As it stands now, I have not figured how to come onto the net as net control without waiting to receive a fixed frequency station first over SSB. Equipment is a Kenwood TS440S, with the sound card connected to the "AFSK" send and receive RCA type jacks on the rear and the receiver on "FSK" mode.
Thanks.

239. AALog 2.0 beta 3 here!

Yahoo group: dxsoft
Date: 2000-10-24 18:38:16 UTC
From: Alexander Anipkin
Topic: 239 Message: 239

Hello AALog users,

Just now I upload new version of AALog.
You can download it from:
http://www.aalog.com/aalog2b3up.zip
http://www.dxsoft.com/aalog2b3up.zip

It's only new exe-file and new modes.aal file (psk mode added).

Please send to me you bug reports, questions and ideas for logger.

Also I have one question:

Do you need 2 field for time? "Time on" and "Time off".

AALog ver. 2.0 beta 3 - 24 Oct 2000

- fixed bugs in "Awards manager" window
- fixed date/time bug in New QSO window
- state name field is case-insensitive now
- in the small variant of the "New QSO" window ITU and CQ zone indication
replaced by the beam heading.
- fixed bug in the "DXCC list" window
+ AALog save last values of the band and mode fields in the "New QSO" window
now
+ added information about local time, UTC and time of the remote station
+ "Award statistic" window is non modal if you open it from the main window
+ added option "Display only QSO mode" for the "Award statistic" window
+ updated toolbar and fixed reversed time values
- fixed bug in "Run" config window
- fixed bugs in "Prefix list" window
+ added IOTA search in the "Find QSO" window
+ if grid info is entered in the "New QSO" window then log use it for
beam heading calculation.
+ you can put contacts to the qsl labels queue from "Previous contacts" and
"Find QSO" windows now
+ you can call "Edit QSO" window from the "Previous contacts" window
- more accuracy work with callsigns like FR/F6AAA/T

Best regards,
Alexander mailto:aia@...

Hello - I unziped it to an empty temp directory, and there is no setup.. I
double clicked the aalog2 icon and get a hamcal32.dll is missing message.

Where did i go wrong??

Jim

Ive got aalog 1.3 and 2 in the same directory... (seems odd!) hi hi

Clicking the old one works... but get the Error startintg program,
hamcal32.dll message when i click it.

Jim

Hi,

I am still unable to put my full name in the name column in log
configuration,
which I pointed in B2 and you told you would correct it. Why do I have to
give you bug report although paying money to you? I expected a flawless
product when I paid (even small amount) to you for this software. Your
quick action is badly needed to enable me to use this software worth money.

Hi to all,

I registered TrueTTY ysterday after a two week evalutaion.
I'm located in a condo on the first floor near Antwerp, Belgium.
I use a IC-706MKIIG and soundblaster to work with TrueTTY.

Some few questions already pops up :

- Will there be pactor/gtor support in RX/TX
- Will there be CW support TX/RX (even when gwGet exists)
- Is it possible to program your call somewhere so all macro's can read this call when activated ?

Very nice program !
Best 73 de Philippe

Elliot;
My name is Carlos Santiago - WB2FOZ. You can find some good books on digital systems (RTTY) on the ARRL web site at www.arrl.org . Go to their "Services" directory and select "Digital Systems" and any other area you maybe interested in. Good Luck.

Carlos - WB2FOZ

PS do not hesitate to Email me if you have any questions in connection with RTTY. What ever I don't know I will find out for you.

Hello Elliott,
I don't know what you are looking for but if you need
a good rtty program try to find MMTTY on internet.
It's a great program and free !!
Best regards from Belgium.

255. AALog 2.0 beta 3

Yahoo group: dxsoft
Date: 2000-11-07 13:28:47 UTC
From: Ray
Topic: 255 Message: 255

Name field does not appear to be longer - about 25 characters would be good for most longer names.

How about adding the US Counties for the many stations that are "County Hunters"?

Also agree with adding Time On, Time Off as mentioned in previous posts.

I don't know if it is part of ADIF format, but a place to add the stations email address would be nice since that is often exchanged these days also.

keep up the good work!

257. TrueTTY 1.65 is there!

Yahoo group: dxsoft
Date: 2000-11-08 06:06:33 UTC
From: Sergei Podstrigailo
Topic: 257 Message: 257

Hello, All!

I just have uploaded TrueTTY 1.65 to the main site and
mirrors:

http://www.dxsoft.com/truetty.zip
http://www.hamradio-software.com/truetty.zip
http://www.dxsoft.f2s.com/truetty.zip
http://www.8ung.at/dxsoft/download/trtty165.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
TrueTTY Versions History

V1.65
"File->Send Text File" command was added.
Three pins of LPT-port (D1,D2 and D5) are used to PTT-control now.
This feature permits user to select pin that has low voltage level after
computer reboot and make program compatible with W1GEE interface.
User can change number of macro buttons now.
("Setup->View->One Macro Buttons Row","Setup->View->Two Macro Buttons Row",
"Setup->View->Three Macro Buttons Row".) Macro buttons labels are
changed when "Ctrl" or "Alt" key is pressed.
"Setup->PTT Interface->Produce FSK Output at TxD" menu option permits to
switch off FSK-output at COM-port. This feature was added, because some
recent COM-ports don't support low transmit speed.
'CR' and 'LF' received symbols are shown in more convenient manner now.
The command line argument "/c Filename" can be used to open capture
file at the program startup.
Menu command "Setup->Fonts and Colors->Tx Window Sent Symbols Color"
defines a color of sent symbols in input window now.
The squelch threshold regulator has logarithm scale now.
PTT-control via LPT-port works under Windows NT/2000 now.
COM1...COM9 ports can be used.
When the "Setup->Copy Transferred Data to Clippboard" option is
enabled, data transferred to logger are copied to the Windows clipboard
also.
V1.63
Bug of V1.62 was fixed (program stopped after AMTOR mode selecting).
V1.62
"Setup->View->Logarithmic Spectrogram" menu command or
Alt-Z hotkey switch spectrogram window between linear or logarithmic scale.
V1.61

Much more convenient Input window was made. Sent symbols are not deleted
from this window immediately now. They just change color to the same
color as Sent window text. Transmitted text are deleted from Input window
after "Line Feed" symbol transmitting.

Dear Temp,

download the free version of TrueTTy. It's simple, decodes even weak, noisy
signals.
It decodes all speeds/shifts of plain RTTY and FEC (Navtex, Amtor).
I use it frequently for decoding these signals and I am very happy with this
piece of software. It made me register the pack!

73's

Onderwerp: TrueTTY 1.65 is there!

>Hello, All!

Dear Sergei,

Thanks for all your efforts, and about this complaining Jappanese, just let
him talk, what does he expect for just a few dollars!
You are doiing a fine job!
I'll contact you soon about sorting parametrs for Navtex, but I will have to
sort it out first!

best regards,

Peter van der Wal

PAoWAP

(please forget about the name Kwadraad, it's just my company name...)

Topic: 257 Message: 260

Hi Sergei:

Just installed TRUETTY 1.65 and note that the
SQUELCH is not functioning---the "button"
activates but there is no squelch line, and
from the printing, I would say there is no
squelch function.

Keep up the great work.....TRUETTY is by far
the BEST software available.

you don't see the squelch line until you increment to 50 or so.

Hello Lionel,

Monday, November 13, 2000, you wrote:

LB> you don't see the squelch line until you increment to 50 or so.

... if you use linear spectrogram scale.
When logarithmic spectrogram is used, squelch line is visible at any
squelch level.

263. TrueTTY 1.66 is there!

Yahoo group: dxsoft
Date: 2000-11-14 07:51:15 UTC
From: Sergei Podstrigailo
Topic: 263 Message: 263

Hello, All!

I have uploaded TrueTTY 1.66 to the main site and
mirrors:

http://www.dxsoft.com/truetty.zip
http://www.hamradio-software.com/truetty.zip
http://www.dxsoft.f2s.com/truetty.zip
http://www.8ung.at/dxsoft/download/trtty166.zip

A bug with "Edit macros" command was fixed.
(Labels for Alt- and Ctrl- macro buttons were reset to default when
user call edit macros window.)

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

277. AALog 2.0 beta 4

Yahoo group: dxsoft
Date: 2000-11-22 20:45:42 UTC
From: Alexander Anipkin
Topic: 277 Message: 277

Just now I upload new version of AALog.
You can download it from:

Update pack:
http://www.dxsoft.com/aal_update.zip (1 497 387 bytes)

full install package:
http://www.aalog.com/aal2-d1.zip (1 405 212)
http://www.aalog.com/aal2-d2.zip (1 422 940)
http://www.aalog.com/aal2-d3.zip (1 440 521)
http://www.aalog.com/aal2-d4.zip (1 032 571)
or as single file from
http://www.qsl.net/rz4ag/files/aal2b4full.zip (~5 mb)

Also I upload 32-bit version of contest module with sample rules for
CQ WW DX contest

http://www.dxsoft.com/test.zip
http://www.aalog.com/test.zip

AALog ver. 2.0 beta 4 - 21 Nov 2000

- fixed "Follow" button bug in the "Find QSO" window
- fixed bug in ADIF import when "Convert meters to MHz" option is selected
- fixed some bugs in the territory determination algorithm
+ field length for operator name in config file increased up to 30 chars
+ added DXCC and State search in the "Find QSO" window
+ new design of the "Award tracker" window
+ added "Show QSO's" and "More info" fuctions for selected line in the
"Award tracker" window
+ in the "Import from text" function you can use option "Convert meters to MHz"
+ if you not describe positions for Mode, Band or RST in the "Import from text"
window you will be asked to enter values for this fields

Best regards,
Alexander mailto:aia@...

278. CWType not reacting fast enough

Yahoo group: dxsoft
Date: 2000-11-27 04:57:36 UTC
From: Phil (ON4BAW)
Topic: 278 Message: 278

Hi,

I've been using CWType and CWGet for a while now.
I configured a setup for participating this weekends CQWW CW.
During this contest something came up that was qiet enoying :

When competing the pile-up, you have to be fast enough to respond or break-in.
But a lot of times CWType did'nt react when pushing a F-key.
Sometimes it took MORE THEN 2 to 3 seconds before going ON AIR.

I guess this have to do something with the multitasking of Windows !!
Looking at my W2000 Taskmanager I see that CWGet is mainly occupying (90%) the CPU.
I've tried to releave the CPU as mutch as possible but CWType still ran into troubles.

Doen anybody have a workaround to this problem ?

Phil, ON4BAW
registerd user.

Topic: 278 Message: 279

Phil,

I also used CWType and CWGet in the CQWW CW test and didn't find this problem. As well as these programs I was using my logging program (WriteLog), which was also being used to download Packet spots from a Telnet connect. All of this on a 200mHz Pentium with 64meg of Ram.

The only problems I had was a single computer crash (reason unknown) and a lot of atmospheric noise which played havoc with CwGet. Both programs worked fine and I only wish I new how to integrate then with WriteLog.

Regards

David, VK2DPD

282. TrueTTY 1.68 is there!

Yahoo group: dxsoft
Date: 2000-11-27 06:08:42 UTC
From: Sergei Podstrigailo
Topic: 282 Message: 282

Hello, All!

I just have uploaded TrueTTY 1.68 into the main site and mirrors:

http://www.dxsoft.com/truetty.zip
http://www.hamradio-software.com/truetty.zip
http://www.dxsoft.f2s.com/truetty.zip
http://www.8ung.at/dxsoft/download/trtty168.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
TrueTTY Versions History

V1.68
More accuracy timing control in AMTOR mode was made. So TNC's can
receive TrueTTY's AMTOR transmission without problems.
Two parameters were added to correct sound card sampling rate variation
against nominal frequency (11025 Hz). The first is SamplingFreq parameter of
the TRUETTY.INI file, the second is /s parameter of command line. Any of
these parameters define real sampling frequency. When both parameters are
defined, the command line parameter has priority.
A bug with COM-port FSK output was fixed - some transmitted symbols were lost
before.
V1.66
A bug in the "Edit Macros" procedure was fixed.
V1.65
"File->Send Text File" command was added.
Three pins of LPT-port (D1,D2 and D5) are used to PTT-control now.
This feature permits user to select pin that has low voltage level after
computer reboot and make program compatible with W1GEE interface.
User can change number of macro buttons now.
("Setup->View->One Macro Buttons Row","Setup->View->Two Macro Buttons Row",
"Setup->View->Three Macro Buttons Row".) Macro buttons labels are
changed when "Ctrl" or "Alt" key is pressed.
"Setup->PTT Interface->Produce FSK Output at TxD" menu option permits to
switch off FSK-output at COM-port. This feature was added, because some
recent COM-ports don't support low transmit speed.
'CR' and 'LF' received symbols are shown in more convenient manner now.
The command line argument "/c Filename" can be used to open capture
file at the program startup.
Menu command "Setup->Fonts and Colors->Tx Window Sent Symbols Color"
defines a color of sent symbols in input window now.
The squelch threshold regulator has logarithm scale now.

PTT-control via LPT-port works under Windows NT/2000 now.
COM1...COM9 ports can be used.
When the "Setup->Copy Transferred Data to Clipboard" option is
enabled, data transferred to logger are copied to the Windows clipboard
also.
[...]

From: S. Sneidar
Topic: 278 Message: 283

Phil, I used these programs this weekend to make a few contacts. With both running I clicked cwget "on top".Also I had my function keys for cwtype labeled. Since I did not have to switch between programs, the response to the cwtype F key was almost instantaneous. I an running 233 mhz/pentium computer and have dbase III and dxcc country database running at the same time no problem.

284. Why aren't AALog, DX4WIN or 59+ Software FREE?

Yahoo group: dxsoft

From: Jim Brilly
Topic: 284 Message: 284

Hi everybody,

Why don't we have free HAM radio tools for Win32?

Ok, the products are cool. Say, DX4WIN (www.dx4win.com), DXSoft or the latest smashing log from 59+ Software (http://59soft.members.easyspace.com/) are all fine. But hey, why can't we have it for free? Unix users have loads of free soft. Their MMTTY stuff is just excellent!

Have a look at MMTTY's eGroup. Probably some functionality is not as robust and smooth as in 59+ Log, they don't have the award manager or graphs as in 59+ or AA's morse code recognition is not there but, still, isn't it the greatest value for money?

59+ Log - $25
AALog - $35 (for now)
DX4WIN - almost 100 big ones!!
MMTTY - FREE!!!

Feel the difference!

Jim

Well, you get what you pay for and Logic 5 is a HUGE step over MMTTY. If you like MMTTY, use it, but you cannot come close to the function of programs like Logic5.

Now we DO have LOTS of free win32 software. Look at all the PSK31 programs.

> like MMTTY, use it, but you cannot come close to the function of programs
> like Logic5.

Fine, Logic 5 is a much more advanced product. But isn't it the result of nearly total commercialization of the HAM software? I am pretty sure we would have far better programmes that we could get for free if generally more programmers and HAMs started developping shareware.

No doubts, developers of 59+ Log, for example, certainly can charge $25 per copy - cool log, nice interface and stuff - but doesn't it lead to a situation when HAMs use free tools that are very badly designed. And to me it looks like the beginning of the end. It is possible that in the nearest future we will never see a log that costs less than 100, 200..NN dollars.

> Now we DO have LOTS of free win32 software. Look at all the PSK31 programs.

And do you like any of those programmes? Isn't any commercial product a HUGE step over a similar free tool?

There are many areas in software developing where best products are truly free. Unfortunately, HAM radio is not such an area. And this is very sad.

Really "YOU GET WHAT YOU PAY FOR" is the motto of today's amateur radio software.

Hey, come on guys!
What is all this about "a HUGE step over MMTTY"??????

As far as I am concerned, I am one VERY happy MMTTY user, and it is an excellent tool.
That it is free has nothing to do with it's ability to copy RTTY on my screen. From the usage I have made of it, I can say that it far exceeds most of the commercial RTTY software, both in its ability to copy weak signals, AND its functionality.
It is NOT, and NEVER claimed to be, a station logging program, a PSK engine, CW engine, or anything other than an excellent bit of RTTY software.
Shortly after it was released, there were people complaining that it didn't handle commercial RTTY stations, Amtor, and various other modes. No, it doesn't, and why should it? It is for amateur RTTY, nothing else.

There isn't much other FREE software for RTTY, and most of that was developed some while ago (thinking of the likes of BTL here). I did purchase TrueTTY a couple of months back, and was impressed with that at the time, but since the evolution of MMTTY, I now find TrueTTY quite poor under certain circumstances.

As for $25 or so dollars for software, do you REALLY think that this price covers the cost of development? Of course not! It is a 'token' payment, that is all. Commercial software is going to have "commercial" prices attached, and with that comes the risk of being hacked.

At the end of the day, it is up to the individual to decide what he needs in terms of software in his/her shack, and make a choice based upon expense/needs/availability/updates, etc etc etc.

And finally, if there is so much free software around for Linux, why not give that platform a go? I am surprised you aren't moaning that some of this software isn't available for the MAC!

73 to all, and go and enjoy MMTTY!
Phil GU0SUP

290. Why 59+Soft or DXSoft are not free?

Yahoo group: dxsoft
Date: 2000-11-29 17:46:23 UTC
From: Stan UA1OUT
Topic: 286 Message: 290

Phil, I agree with most things that you said about MMTTY, commercial software and, especially, $25.

Just one comment: Unix rules! It is by far a much better system than Win32. Believe me. Unless I misunderstood you I think you suggested that as long as we want to create free software we should move to Unix. It is completely wrong and even dangerous attitude.

We "gave Unix a go" quite a few years back. As a platform Unix had all features of the modern WinNT in early 1994 when Microsoft was only struggling with Win95.

HOWEVER, Unix (Linux and other dialects) can not be used as an operating system for HAM radio logging software at present. By switching to Unix now we can loose most our users. If we developped 59+ Log under Unix it would probably be a total waste of time. Who would use it?

The problem is that Microsoft comercionalized Windows completely forcing companies and, understandably, programmers to work under Win32.

Everyone wants to make money in Windows trying to fool each other and at the end of the day fooling themselves. You must have certainly seen the infamous blue screen.

You can say that OSes and HAM radio software are too different things. They certainly are. But can't you see the similarity in the approach to the commercialization of the software?
That's why I agree with Jim. If we go "The Great Windows Way" we will end up having loads inferior free logs (RTTY apps etc) and one, may be two clear winners with a log (RTTY app etc) that has a tag with a huge "commercial" price attached to it.

In addition to all of the above I once again salute JE3HHT who is doing a remarkably good job. I wish there were more programmers developping freeware for HAMs like Mr. Mori.

So best 73es and enjoy MMTTY ...while you can.

Stan, UA1OUT
http://59soft.members.easysoft.com

P.S. I don't think DxSoft is the proper eGroup for discussions like this at all. Appologies to the moderator.

P.P.S. Nigel, I just read your comment. As for learning writting software, I have over 10 years of experience of developping software for Unix, Win16 and Win32. Have a look at www.dlubal.de for one of my biggest projects under Win32. 59+ Log took me abt 5 months to write (along with some other guys). Tell me if you can do better.

291. One more and hopefully the final message about free software.

Yahoo group: dxsoft

From: Stan UA1OUT
Topic: 291 Message: 291

I am not quite sure you got my point.

I have nothing (or very little) against the fact that DxSoft, DX4WIN, HoseNose and others ask us to pay. I completely support the idea of "token" price. After all, 59+ Soft also do it. There is no-one to pin the blame to now.

My point is, and I agree here with Jim, if we have more free software or at least encouraged programmers to write soft for free or for, as Phil said, "token" prices we would have a better chance of having faster, nicer and cooler tools after all.

Regards,

Stan

Hello Jim,

JB> Why don't we have free HAM radio tools for Win32?

Dear friends.

Are you ready pay $1000++ for tranceivers, amplifiers, antennas and PCs?

Why you think that software author can't receive some money for his hard work?

Whats the difference between Yeasu and us?

If you like use free software - use it. But support not garanted.

Best regards,
Alexander mailto:aia@...

That is the catch 22. Companies won't create Linux apps because
more of their users are on Windows. Users won't switch to Linux
because there isn't any apps for Linux. I do think that Linux
is about to reach crucial mass. But a software company could
write it in Java for both WinTel and Linux.

You may be surprise at the number of hams that are using Linux
or planing to use it in the next 12 months.

The best freeware projects are the ones where it is open source
with a group working on improve the packages. I have been given
some thought to a freeware logging package myself, but it will
be a while before I can start on it.

True because the best sells more, best can be defined as best marketing too.
A huge part of our system is getting customers, MICROSOFT did it. They also
standardized it for all, makes it so even a 5 year old can use a computer.
NOT something you can do with LINUX.

> The problem is that Microsoft comercionalized Windows completely

Yes and no. I have seen the blue screen in windows, I have ALSO seen it with
LINUX, which I tried. I had more instability with LINUX than WIN98. I have
NEVER had a crash with WINDOWS 2000. It proves Microsoft can do it right.
WIN(* is there because they did a SUPERB job of maintaining hardware access

compatibility. Without that you would not be able to write much Ham Radio software and Games would have gotten nowhere. WIN(* is not perfect, has some crashes, has the resource problem, but is still the best thing out there for the general use. If someone else thinks they can do better, this is the USA, they can try and some day perhaps they will succeed.

WELL MMTTY is a great program for the price but for RTTY the for pay TRUSTY is FAR FAR FAR superior. You get what you pay for.
Programs like Logic 5 which can do a LOT are NOT easy to write and the development tools a re not cheap. There is no reason to expect anyone to write something like this for free.

I just can't understand those that think a programmer should not be ADEQUATELY be compensated for his time? If those that are calling for free software want that they should go ahead and write it. Just don't become and arrogant snob after you do like the developer of ZAKANAKA. He has written a class a (THE BEST FOR PSK31) but his arrogance and patronizing attitude has forced him to withdraw it from public use. He could in no way do that if he were selling it and then we would still have access to it.

> standardized it for all, makes it so even a 5 year old can use a computer.
> NOT something you can do with LINUX.

That statement is totally untrue! Linux can be made just as friendly as
WinTel. In fact it can be made much easier to use than WinTel. The
reason that isn't yet, is because you users haven't had the need to
yet. That is changing.

> Yes and no. I have seen the blue screen in windows, I have ALSO
> seen it with
> LINUX, which I tried. I had more instability with LINUX than WIN98. I have
> NEVER had a crash with WINDOWS 2000. It proves Microsoft can do it right.

Linux crashed? How and why? I have been running Linux hard in production
environments for years and I have only seen them crash because of
hardware problems. Win2k is fairly stable I will admin. When I was
running it would only crash about once a month, mainly because of
a misbehaved program, but this is another design flaw! A user
application should NOT be able to crash a OS! A user application should
NOT be alter any OS files!

I know both OS very, very well! Anyone that claims that WinTel holds a
candle
to Linux/Unix doesn't have a clue what they are talking about. If you
compare
the MS Windows to Linux X-Windows. X wins hands down. If you don't believe
show
how to display a window from a system in Boston on a display in Japan and
other
window on a display in England, and other window on a display in New Zealand
without changing the app or OS. Linux/X can do this out of the box. Oh if
that
isn't enough, show me how to have five users logged in at the same time each
with
their own desktop, with those desktops beginning displayed to other
computers.

Need more. Run your Windows 95/98/NT/2k/ME on a PowerPC, Alpha, MIPS,
Sparc, IBM,
HP processors. Too tough, ok, here is an easy one. Say you find a bug in
Windows 2000, just a small bug in one of the commands. Take a look at the
```

source to make sure it is really a bug - What you mean you don't have source code
for Windows 2000. You are trusting you data, your company, etc logs on a OS that
only a hand full of people have seen the source? Hmmm would you be interested
a bridge I own in England?

I will leave you with one thought. Win95/98/Me are not OS, they are windowing systems.
DOS is the OS. Win2k/NT are, but shouldn't be. Linux is the OS and X-Windows
is the windowing system. Apps like file folders that mount and open floppies and
CD-ROMS are just apps. Just because Windows hides the mount from you doesn't mean
it doesn't happen. Linux can and does the same thing if you want it to. Windows
is just eye candy. In short anything Windows can do, Linux/XWindows can do better.
The other way around isn't true.

To be fair Linux does have a few short comings, that needs and is being address.

1. Needs more applications
2. Needs better development tools like Delphi/C++ Builder
3. Needs better printer support.
4. I think it needs better dialup support, but don't know much about it.

Those 4 things make the system lacking for most people. 3 and 4 is a problem
with Linux and is being actively worked on. They can and will be solved.

WinTel has much worst shorting comings really design flaws that can not be corrected:

1. Win95/98 has no security. NT/2K has a unworkable model.
2. The windows display is tied to the system that app is running on.
3. Single user.
4. It is a resource pig.
5. Applications install all or part of themselves in system directories, must will replace existing files with it's own.
6. It is a single architecture system. All attempts to move it to other processors have failed.

> WIN(* is there because they did a SUPERB job of maintaining
> hardware access
> compatibility. Without that you would not be able to write much Ham Radio
> software and Games would have gotten nowhere. WIN(* is not
> perfect, has some

> crashes, has the resource problem, but is still the best thing
> out there for
> the general use.

This is only because it has more apps than any other OS, but that
too is changing. As far as compatibility, it was done with kludge after
kludge. The refused to accept that the model that had was broken. So
the forced a square peg in a round hole. That compatibility that you
brag about was paid for at a heavy cost in performance and a poor security
model that is the breeding ground for virus. I know of lots of companies
was hit really hard by the "I L*ve you" virus. Microsoft poor design cost
companies billions of dollars in lost productive. This type of virus could
not live in Linux.

>If someone else thinks they can do better, this
> is the USA,
> they can try and some day perhaps they will succeed.

It has already been done better, but the idea didn't come directly
from the USA, it came from Finland. Maybe that is the problem you
have with it?

I have several computers and LINUX will not run on any of them.
I found out that you have to have a special computer designed
to run LINUX. My fast sound card, photo printer, modem, scanner,
and losts of other things are not LINUX compatible. I am not going
to write LINUX drivers just to use LINUX.
I have the same problem with BEOS.
O' what about my CD reader.
Regards, Jim FitzSimons W7ANF

I have the same problem. Not been able to assemble a PC that will run Linux
or BEOS although all run fine with Windows. I now have a hard drive that I
partitrioned for Linux that FDISK refused to play ball with.

Agreed, just does not matter.

> DOS is the OS. Win2k/NT are, but shouldn't be. Linux is the OS and

So what, it wroks, WITH ANY HARDWARE I can buy.

> it doesn't happen. Linux can and does the same thing if you want it to.
> Windows
> is just eye candy. In short anything Windows can do,

> To be fair Linux does have a few short comings, that needs and is being
> address.
>
> 1. Needs more applications

The ultimate and really the ONLY important thing for most users. The
applications do not exist and it is not possible that they ever will . The
incentive to write them is just not there, never will be either. It is what
killed OS/2 and is killing Linux for most users too.
Every LINUX bigot passes this over too lightly. You are one of the few that
at least seems to realize it.

> 2. Needs better development tools like Delphi/C++ Builder

So true, and FOrte and Visual Age for Java and on and on and on.

> 3. Needs better printer support.

True although my printer HP855C works FAIRLY well, no where near as well as
windows but ok for text.

> 4. I think it needs better dialup support, but don't know much
> about it.
>

I don't use dialup so does not matter TO ME, but others it would. The netwroking is VERY GOOD , BUT here we go again, VERY VERY hard to set up compareed to WINDOWS. Most users will NOT put up with that.

> Those 4 things make the system lacking for most people. 3 and 4 is a
> problem
> with Linux and is being actively worked on. They can and will be solved.
>

I agree the windowing system can do better funtions for multiple useres but VERY FEQW peopel are multiple users so all your fancy remtoe operations are of no imp[rotance to them. Even though that is true the Eye Candy of the LINUX Winodwing sytsmes cannot come anything even close to that of windows and that sells windows all by itself.

Another problem with LINUX that totally turned me off is that it does not support MANY computer systems. It has a LOT of regression problems. I was using MANDRAKE 7.0 and got version 7.1 and it is IMPOSSIBLE to install on the same 2 different computers that ran 7.0 perfectly. It cannot find any place to create the file system is the error I get and nobody on any newsgroup or forum ahs been able to help. MANDRAKE does not even respond to request for help even though I am registered on 7.0, not about to buy 7.1 again. I realize you are just in as much trouble getting help form Microsoft but there are many more resources out there and besides I have never found a system that Windows will not install on. If you can't even install it you can't use it. Yes I know you can go to Expert mode and you can compile the Kernel yourself and all that and perhaps I could get it running. NOT what I am about to bother with and neither will most other potential users.

With all of its problems the WINDOWS Plug and Play (same say pray) works very well. For the amount of possibilities out there it is quite amazing how well it does. It used to be bad with the older ISA systems but those are mostly gone now.

CwGET does a great job of decoding HSCW!
I had to get WinMSDSP to encode the HSCW.
It comes from Tihomir Heidelberg in Croatia.
I could not get CWType to do HSCW.

316. RE: Why 59+Soft or DXSoft are not free?

Yahoo group: dxsoft
Date: 2000-12-01 01:03:49 UTC
From: Floyd Larck
Topic: 286 Message: 316

Good Grief!

Another anti-Windows tirade on a ham radio list! Must have got run off of the Linux lists. Just so you know, there are hacks and cracks for your cute little penguin package as well. There are also 'updates' or 'kernel' mods (bugs) as well. Penguin-ware does NOT run on as many of the 'Wintel' machines as is advertised (BTW, what cpu are you running? And, where would it be if not for the need to keep up with the evil 'Wintel' empire?). The world's cutest software suffers from the same thing that Gates is accused of which was that people couldn't afford UNIX so they wrote their own UNIX emulator placed it out as open source and call it the 'UNIX-Killer' or the 'Windows-Killer'. Look around at the packages sold: 27,000 plus packages of Linux sold (ever wonder why people buy 'free' software?) compared to the 7 digit sales of the 800 pound gorilla called 'Windoze'.

Now then, I will apologize to the list moderator for again 'beating a dead horse to death' and to those on the list that look for list-related messages. Wouldn't it be nice to be reading topics related to this list?

Floyd Larck, KK3Q

(BTW, send your flames to MY address and please do not tie up the list.)

> better.
> The other way around isn't true.
>
> To be fair Linux does have a few short comings, that needs and is being
> address.
>
> 1. Needs more applications

The ultimate and really the ONLY important thing for most users. The applications do not exist and it is not possible that they ever will . The incentive to write them is just not there, never will be either. It is what killed OS/2 and is killing Linux for most users too.
Every LINUX bigot passes this over too lightly. You are one of the few that at least seems to realize it.

> 2. Needs better development tools like Delphi/C++ Builder

So true, and FOrte and Visual Age for Java and on and on and on.

> 3. Needs better printer support.

True although my printer HP855C works FAIRLY well, no where near as well as windows but ok for text.

> 4. I think it needs better dialup support, but don't know much
> about it.
>

I don't use dialup so does not matter TO ME, but others it would. The netwroking is VERY GOOD , BUT here we go again, VERY VERY hard to set up compareed to WINDOWS. Most users will NOT put up with that.

> Those 4 things make the system lacking for most people. 3 and 4 is a
> problem
> with Linux and is being actively worked on. They can and will be solved.
>

I agree the windowing system can do better funtions for multiple useres but VERY FEQW peopel are multiple users so all your fancy remtoe operations are of no imp[rotance to them. Even though that is true the Eye Candy of the LINUX Winodwing sytsmes cannot come anything even close to that of windows and that sells windows all by itself.

Another problem with LINUX that totally turned me off is that it does not support MANY computer systems. It has a LOT of regression problems. I was using MANDRAKE 7.0 and got version 7.1 and it is IMPOSSIBLE to install on the same 2 different computers that ran 7.0 perfectly. It cannot find any place to create the file system is the error I get and nobody on any newsgroup or forum ahs been able to help. MANDRAKE does not even respond to request for help even though I am registered on 7.0, not about to buy 7.1 again. I realize you are just in as much trouble getting help form Microsoft but there are many more resources out there and besides I have never found a

system that Windows will not install on. If you can't even install it you can't use it. Yes I know you can go to Expert mode and you can compile the Kernel yourself and all that and perhaps I could get it running. NOT what I am about to bother with and neither will most other potential users.

With all of its problems the WINDOWS Plug and Play (same say pray) works very well. For the amount of possibilities out there it is quite amazing how well it does. It used to be bad with the older ISA systems but those are mostly gone now.

321. RE: Why 59+Soft or DXSoft are not free?

Yahoo group: dxsoft
Date: 2000-12-01 14:36:12 UTC
From: Darryl Wagoner
Topic: 286 Message: 321

Greetings,

To the group. I also apologize for getting this start and continuing it now.
Too that I will keep this very short. I didn't jump on this because I am a Linux zealot which I tend to be be ;-) but because a lot of false statements was being made about Linux. I am a professional software architect for both OS and I know what I am talking about. Linux isn't for everyone yet. It is much like Windows 3.1 with few apps on the market for it. The difference is that Linux is starting with a proven design. Linux doesn't have any major hacks and very few minor ones. The same can't be said about Windos.

The bottom line is that right now, today, most people should be using WinTel. Not because it is a better OS (it isn't) because the applications are there they need to run. Just don't close your eyes to Linux. Things are moving fast. Before you choose Linux make sure you understand what it can and can not do TODAY. Today most folks will pick Windows, because the applications and printer support is there. If you are creating a product, you should do it on Linux. For example if I was going to do a logging program it would be on Linux. Why because there isn't one. There is at least 50 for Wintel. ie There is a pinned up demand for appls for linux.

Also when listening to people claim something about almost anything think about their inventment in it. This is soooo true with OSs because people have years invested in learning them. They get very upset when you threating their understanding of the world.

This is the end of my open comments, the rest the my reply to Floyd.

> Good Grief!
>
> Another anti-Windows tirade on a ham radio list! Must have got run off of
> the Linux lists.

Let see you augments is weak so the first thing you do is start name calling.

>Just so you know, there are hacks and cracks for
> your cute
> little penguin package as well.

If you are talking about security holes name one! If you are talking about kludges I would like to see examples of them as well.

> There are also 'updates' or 'kernel' mods
> (bugs) as well. Penguin-ware does NOT run on as many of the 'Wintel'

Define many! I haven't found one that it wouldn't run on. Still many
devices are not supported. I kept hearing that, but I have never
had a system it would run on. But that isn't the OS fault.
It is the vendors of the hardware. MS doesn't write all or even most
of the drivers for Windows.

> machines as is advertised (BTW, what cpu are you running? And, where would
> it be if not for the need to keep up with the evil 'Wintel' empire?).

I am running a Digital Alpha, Sun Sparc, PII and PIII. What has MS done
for Sparc?

> The
> world's cutest software suffers from the same thing that Gates is
> accused of
> which was that people couldn't afford UNIX so they wrote their own UNIX

First Linux isn't an Unix emulator.
> emulator placed it out as open source and call it the 'UNIX-Killer' or the
> 'Windows-Killer'. Look around at the packages sold: 27,000 plus
> packages of

> digit sales of the 800 pound gorilla called 'Windoze'.

I know why the buy free software, because they don't want to download
the software on 56k modems and go to the trouble of getting it
on something they can boot.

I don't think I every recall that Linux being called a "Unix-Killer" and
it was designed not to be. Even something a big and complex as Oracle 8
was able to be compiled on Linux without source code changes.

+I would like to add my two bits, If it wasn' t for people like Sergeio
writing programs and yes releasing a few free ones then people like me
wouldn't be able to try them out for a long enough period to buy if we need.
At the present time I haven't made up my mind about choices of ham radio
programs, some are more complicated than I need, like a logging program just
to contain the name, call, time, report and maybe a short note, also a count
number. I don't need a lookup for call signs or awards. I stand in awe,
knowing there are people out there that under stand than I cannot write code,
but am able to hit keystrokes, sometimes in the right order. I do have one
request and that is to make the stop, quit, no more key easily available. I
have hit a couple of wrong things and locked the keys and buttons up even
while recieving signals, so no matter how smart writers are, there are dumber
people like me that can mess up the button that says press here. thanks,

Topic: 312 Message: 324

Sergei, the amateurs who do meteor scatter mostly use HSCW.
HSCW is high speed Morse code. It is on/off modulated at
rates up to 1000 WPM. CwGET allows the filters to be wide
enough to decode this high speed CW. A fast sound card is
required and the sample rate is set at 44100.
The best combination of software is WinMSDSP to encode
and transmitt. A recorded message can be transmitted
by any sound application like CoolEdit. CoolEdit is used
to receive and record. CoolEdit can change the speed of
the received code to be copied by ear. CwGet is used to
decode received signals if they are clear enough that the
ear is not required. GwGet can decode fast enough so the
speed does not need to be reduced.
Meteor scatter communications is also done with SSB phone,
packet, and Hellschreiber. There is only 3X Hellschreiber
used since faster encoders are not available.
Here is a link for HSCW:
http://www.qsl.net/w8wn/hscw/hscw.html
HSCW alows communications with short 0.1 second bursts.
Regards, Jim FitzSimons W7ANF

328. COMPOSING ONE'S OWN SOFTWARE

Yahoo group: dxsoft
Date: 2000-12-02 11:27:11 UTC
From: John L. WICKHAM
Topic: 328 Message: 328

2/12/00

Hello one and all

How would one go about composing a piece of software, such as "True TTY?"

How many remember the early '80s, the days of the Z80 and the 6502. If you wanted RTTY back then, IT HAD TO BE WRITTEN ENTIRELY IN ASSEMBLY LANGUAGE!

How about writing such in a Windows 95/98 form. Is it difficult to construct an empty Windows 95/98 window in assembly language? How do you create the menus and their mouse-responsive commands, and how would you put registration-key detection and thirty-day timeouts into the program, when offering same to others as Shareware?

Perhaps Turbo-C or Turbo-Pascal is used as a programming language (the obsolete Atari ST's programs were nearly always written in Turbo-C), or is all Windows 95/98 software written in some arcane, little known programming language, that is known only to select Windows "Gurus?"

It would be interesting if somebody composed a whole CD ROM, for example, to initiate all interested parties into the master programming language used in all Windows 95/98 programs.

Thank you and 73

John VK3ZK

336. request AM RTTY frequencies

Yahoo group: dxsoft
Date: 2000-12-06 21:35:01 UTC
From: Bart W. Tichelaar
Topic: 336 Message: 336

I recently bought a SONY ICF-SW55 and have enjoyed using TrueTTY to decode RTTY transmissions on AM shortwave. Often, however, it appears that the specific station I am tuned in to uses a different coding that I can not decode with TrueTTY.

Is there any list available of AM frequencies for RTTY, BPSK31 or QPSK31 stations with baud rate and normal/reverse tone info, so that I can tune in with a higher "success ratio"?

Many thanks,

Bart

341. CwType 1.04 is there!

Yahoo group: dxsoft
Date: 2000-12-18 10:01:24 UTC
From: Sergei Podstrigailo
Topic: 341 Message: 341

Hello , All!

I have published CwType 1.04 today:

http://www.dxsoft.com/cwtype.zip
http://www.hamradio-software.com/cwtype.zip
http://www.dxsoft.f2s.com/cwtype.zip
http://www.8ung.at/dxsoft/download/cwtyp104.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

CwType Versions History

V1.04
User can select charset of transmitted symbols now.
User-defined charset can be used also ("Setup->User-defined Charset").
In this case charset is defined by simple text file.
See example in SAMPLE.CWT file.
When the "TX On at keyboard press" MOX option is enabled, a transmitter is
switched on if at least two symbols was entered.
Some another minor changes were made.
V1.02
A bug in MOX option "TX Off at n dots silence" was fixed.
A bug in Edit Macros procedure was fixed.
A bug in driver installation procedure was fixed.
User can change number of macro buttons now.
("Setup->One Macro Buttons Row","Setup->Two Macro Buttons Row",
"Setup->Three Macro Buttons Row".) Macro buttons labels are
changed when "Ctrl" or "Alt" key is pressed now.
V1.0
The program works on Windows NT/2000 without limitations now.
Inter-letter space can be vary now.
Speed value in status line is calculated with dash/dot ratio
and inter-letter space consideration.
"File->Send Text File" command was added.
Minor bug with speed regulator was fixed.
Hotkeys for speed regulator were made
(Alt-gray plus or Ctrl-gray-plus and Alt-gray minus or Ctrl-gray minus).
[...]

342. Millenium discount!

Yahoo group: dxsoft

I also reccommend "The Code Machine" which can be found on QRZ cd. Easy, and you can put in whichever letters/numbers/figures you are working on. I use it extensively when teaching code to individuals or to groups.

Hi Mike. Try to find Numorse. It is inexpensive shareware and has many features useful to the new learner. For instance learning just one letter at a time. You can learn the letter E (1 dit). It will play that ovewr and over till you get used to that sound. Then you can add the letter I. (2dits) It will then randomly send e's and i's. Then add S (3 dits) Then add H (4 dits). Then add T (1dah). Then add M (2dahs) Then add O (43 dahs) All easy to learn Only add another letter when you have learned the preceeding ones.

Hey now you have learned 27% of the alphabet and within that percentage are some of the most frequently used letters in the alphabet!

Of course character speed and sending speed are adjustable.

I used NU-Morse to pass my 5 WPM test and wished I had known
about the Koch method. I plan on learning high speed code
but I felt I had to wait to forget all that NU-Morse and
tapes taught me. If your goal is just to pass the test
then maybe NU-Morse is OK, but why not go for high speed
when it is just as quick and much less frustating to use
the Koch method to learn at high speed. Then you haven't
wasted your time. I know Super Morse and Morse Cat supports
Koch indirectly. Look up "Koch method" on your search engine
for details.

366. RE: cw program

Yahoo group: dxsoft
Date: 2000-12-26 01:27:24 UTC
From: Darryl Wagoner
Topic: 351 Message: 366

Hi,

Check out http://www.hfradio.org/koch_1.html for details. It isn't a program but a way of learning code at high speed. I am sure I could have learned the code at 15+ easier with the Koch method than I learned it at 5 wpm with tapes and NU-Morse.

The two programs that I have heard about that used to teach the super morse and morse cat beta version. The release version of morse cat is worst than useless.

The url to Morse cat is: http://www.qsl.net/dk5ci/index.html and it is freeware.

I haven't used super morse so I don't know much about it.

Topic: 351 Message: 367

Actually that TCM porgram will do just that, but not that you want it one way it does it. It puts out audio signal that can be run into the mike connector of your rig, and outputs audio cw. Everyone tells me I have audio on my cw signal. HI. There is also a small circuit that can be built with it, using a relay, which will key the cw input of the rig, and that works very well. I used it a year or so, before I bought a MFJ1278B tnc, and now use "Lan Link" software and can run rtty/amtor etc thru the mike input, and cw thru the cw jack of the rig.

Go to qrz.com and download a program called TCM (the code machine) you can add one or more letters at a time to a group which it will automatically send to you. I swtart newbiews with groups of letters(adding one at a time). First group is E T A I O N S, after they learn that group I go to R U H K V D and then throw other letters into the 3rd and 4th groups(dont have them at hand right now- but use the most used letters and leave the least used such as Q Y X ,as last ones. After each group, I throw letters together to make words of just that group, and they groups previously learned. I.E. after first group of e t a i o n s: use simple words: ate, eat, tea, ton, tone, snot(yuk), tan, test, etc. etc. etc. I have used this method for over 35 years of teaching code, and one 12 year old boy learned entire alfabet in 30 minutes, passing 5 wpm at end of that time.
Throw the numbers in numerically , 1.2.3.4 etc. with ? / , . and you pretty much have the entire code memorized. TCM will send the Farnsworth method (I sorry to say used it before I ever heard of him -whoever he was. And before he patented it. He got rich I guess, and here I sit fat, dumb , and happy. Run the code letters at 20 wpm, and set spacing for 5 wpm and pretty soon you will have the speed back up , probably faster than you were before. Good luck with it.
Danny

Hi all

Please , who can help me with some SSTV-programms ??
About some months i use now my Rigblaster modem on RTTY and when i see that there is not so many people in LX where using SSTV , i will do it in the future .
But i like to use a nice and good working software for it :
Hope that somebody can help me to find a good one and not to much expensif one HI

Tnx in advance and have nice holidays

Joel,

There are a number of SSTV programs available for download. I think
you will find a freebie (EZSSTV, I think) at

www.ultranet.com/~sstv/lite.html

plus there is a "Lite" DOS version for about $35 US, shareware on the
same site.
and then there is a more expensive system on the same site that
includes software and a board.

Two very nice soundcard programs are available at:

www.siliconpixels.com

They are both shareware, the higher priced one at $120 US, but either
one can be downloaded as a demo to see how they work.

There is much more. I have used the Lite DOS program with a serial
modem and it works well. I also have tried both of the soundcard programs and
kept one of them. All good stuff.

Hope this helps -- 73 Jack KB7NO

Joel,
If you haven't already tried it JV Comm works pretty good for me.
You can download the demo version for free at
http://www.jvcomm.de/indexe.html The registered version is $135
but you can use the demo as long as you want.

Look for W95SSTV, probably the best. I can't remember the price for
registration but you can get a demo.
One of the few pieces of shareware I have bought that I never had a serious
problem with.

373. Re: cw program

Yahoo group: dxsoft
Date: 2000-12-27 22:21:54 UTC
From: Brian Heywood
Topic: 351 Message: 373

Here are some notes from the program I learnt Morse from and I can vouch
that the method works.
For those interested email me directly and I will share it with you.

Quote
"TEACH is my implementation of a brilliant computerised morse code
teaching philosophy originally published by Howard Cunningham in
QST, May
1977. There are 3 main ideas:

(a) A computer is non-threatening and neutral. People don't get
upset
by making mistakes if only a computer is listening, whereas
they get
flustered and annoyed making fools of themselves in front of
human
teachers, especially "experts". So a computer is a good tool
for
teaching simple mastery skills.

(b) New code symbols should be introduced ONE AT A TIME, in
"postponed
discrimination order". This means LONG, UNCOMMON symmbols
should be
introduced first, to form the habit of listening to the WHOLE
symbol
before deciding what it was. Also, if the uncommon symbols
are
introduced LAST (as is usually the case) you don't get nearly
as much
practice listening to and decoding them! With TEACH, by the
time
all the symbols have been introduced, you REALLY KNOW all those

"terrible uncommon letters at the end of the alphabet."

(c) The teaching process should be ADAPTIVE. That is, feedback
from the
trainee should be used to modify the teaching process. There
is no
way a taped teaching system can do this. However a computer
can
keep track of all sorts of things. Here, it monitors the
error rate
of each character, the average error rate, the maximum error
rate,

and the response time of the student. Using these parameters, it
decides which characters need to be sent most often, and when new
characters should be introduced. There are an infinite number of
possible ways this can be done. Howard's algorithm was simple and
logical, so I have just adapted it slightly.

(d) The characters should be learned by SOUND, not SIGHT, and indexed the
RIGHT WAY AROUND. Everybody has more trouble READING than SENDING.
Hence the "table lookup" that the mind has to do should be ordered
with the CHARACTERS indexed by their SOUND, not the SOUND or PATTERN
indexed by CHARACTER. For example if you learn that

"C is -.-."

you have learned to relate a CHARACTER to a PATTERN, which has to
be CONVERTED into a SOUND. So your mind conceptually has to do an
ordered search of the table ("is it A? Is it B? Is it C? yes!").
If you learn the characters indexed by sound, your mind is able to do
a "hash table search", (jump straight to the right character) which
is much faster. ("dahdidahdit - that's C") If you don't understand
that, it doesn't matter. Trust me, I still know what I'm doing.
You will learn morse symbols using TEACH in a way that will make it
easier to gain speed later.

3. A COMMENT ON CODE SPEED.

Don't EVER listen to morse characters at less than 12 wpm! If you do,
your brain will hear the individual symbols in the characters, instead of
the "sound pattern" of the whole character. I recommend 14 wpm as

the minimum, and this is what TEACH will send you."

385. CWGet

Yahoo group: dxsoft
Date: 2001-01-01 20:18:14 UTC
From: David Douglass
Topic: 385 Message: 385

Hi all,

When I'm running CW Get and I'm tuned in on a CW signal, the signal appears towards the left hand side of the CWGet window. Is there a way that I can setup CWGet so that a signal tuned to centre of my radio passband is in the centre of the CWGet Screen.

This would be useful as I often minimise the size of the CWGet screen, when running other software and when I shrink the screen down too small, the signal peak disapears off the left end of the screen.

Hope this makes sense

I used NU-Morse to pass my 5 WPM test and wished I had known
about the Koch method. I plan on learning high speed code
but I felt I had to wait to forget all that NU-Morse and
tapes taught me. If your goal is just to pass the test
then maybe NU-Morse is OK, but why not go for high speed
when it is just as quick and much less frustating to use
the Koch method to learn at high speed. Then you haven't
wasted your time. I know Super Morse and Morse Cat supports
Koch indirectly. Look up "Koch method" on your search engine
for details.

396. IC-PCR1000 versus Winradio1550e

Yahoo group: dxsoft
Date: 2001-01-06 21:05:50 UTC
From: Joop Meijer
Topic: 396 Message: 396

Hallo all,

First everybody best wishes and good health for 2001!!!!

My question to all the members of all these newsgroups is:

Is there somebody who knows if there is an independent test between
the Icom PCR1000 and the WinRadio 1550e, so I can chose between those
receivers to bye?

My needs are only to use it as a listener machine and special for meteo and
polar
satallites, but in the future also for other sats and other parts of
interresting radio objects.

Thanks for any reaction,

Joop Meijer

Hi George and others who are also interrested, are these the startpages
to look at.

The same to you old man! We're probably both Dutch, but let's communicate in English for the group.
I have been selling this stuf for about eight years, so 'know something about it. The PCR-1000 has never been modified, while the WinRadio has been modified several times, for instance at strong signal properties. WR is far better there!! If I would have to buy one of them I would defenitely have a WinRadio i.s.o. PCR-1000. Winradio is also offering nice software. It's been described in RAM (Radio Amateur Magazine) -in dutch dear boys... - of last year.
An indication: I think of using WR for semi professional use, (marine telecom is my profession) building them in a different housing, that's how good they are. But for all:
never compare them with a full size receiver with good bandpass or (sub) octave filtering like a NRD 535 or so..

Dr OM.

It's both hardware, so difficult to download. PCR-1000 is Icom, so have a look there, Winradio (Australia) has there own site, so just search for WinRadio

405. NEED HELP FOR CWTYPE PROBLEM!!

Yahoo group: dxsoft
Date: 2001-01-11 09:19:04 UTC
From: ta2le@bupat.com.tr
Topic: 405 Message: 405

First of all thanks for usefull softwares.

Last week i installed cwtype to my pc and i made your simple
interface (Com Port1) for connection.
I found that problem. When i set my output to 10 watts it is working
very fine. but when i set my power more than 10 watts it is starting
to send continuously carrier wave.

I checked the board it is seems like a OK, Do you have any idea about
this problem.

Waiting for your reply.

regards 73 de TA2LE

You are getting rf into your interface. You will need to use shielded cables, ferrite cores, a metal enclosure for the electronics. Also it may help to move the interface and it's cables as far from any transmission lines (coaxial cables) as possible. I hope this helps.

409. CWGet and IC706MkII

Yahoo group: dxsoft
Date: 2001-01-11 12:48:59 UTC
From: plprogers@lineone.net
Topic: 409 Message: 409

I am new to this group and because the 706 has an inherant audio transmit problem that can only be fixed with an illegal mod or an expensive microphone I am going to use the CWGet for the time being.

Has anyone used this program with the 706 and if so did they use the 'phone jack or other method to connect with the PC

ILLEGAL, WHAT do you mean by that, kills warranty, certainly you do not mean illegal as against statute?

I would like to here that one!

Also, what is the inherent problem?

I am just totally surprised at this, not making fun of you, generally surprised and would like to know what this is?

Hi Gilbert

A turn of phrase....The dealer states that he will not honour the warranty if I do any non-Icom mods....

Even at swr 1:1 I can only drive the ssb to 40watts, there is a mod on QRZ.com for it.

Icom changed the set up on the MKIIG, but I am stuck with it till the warranty expires.

I don't know about your state, but here and most any other I have seen, if your mod cannot be proven (up to them) to be the case of the problem then they are obliged to honor the warranty. I would just do it and not say anything.
Warranties are seldom worth anything for Ham Radio anyhow and only last a year. So you want to live with the problem or fix it?
If it were mine I would first demand that they upgrade it, they would not have to, and then go ahead and do it.
I would rather that than wait a year suffering the problem and then have no warranty work and not have had the problem fixed either.

Is it up to the dealer? That is a factory warranty is it not? If so, then
its not up to them, but depends on what the manafacturer gives on his
warranty card. The dealer gets paid not by you, but by the manafacturer.

Topic: 409 Message: 414

I know Kenwood would honor the warranty, I assume that ICOM would also do
so.
In any case I would do it anyway if it were bothering me so much. The
probability of needing warranty service in the first year is so small it
nearly vanishes, or they would not have a warranty.

In Britain, the warranty is legally with the dealer not the manufacturer.

Thanks Peter

I have just spoken to ICOM UK and they are faxing me the mod to
increase the audio gain side of things.

To all who have replied thanks also, if there are any other simple
mods that will improve things please keep them coming

In 1996 Martin Lynch (UK) did a Minor Alt to my New IC-PCR1000 before I took it back to NZ (ZL Land) Icom also said it would not effect the Warranty.....So whats all the Fuss about. Most UK Distributors do Modifacations to New Equipment (Maily to Improve Reception) In fact the PCR 1000 is 200% greater than the WINZ, and a small tip to anyone with QRM etc from either "putter" or Power etc...Eatrh both the airel plug and the earth plug sepetraly. I pick up VHF (AM) Air Trafic in Brisbane (QLD) and NSW fom Australia ath My QTH regualy (No Skip Needed) over 1,000 miles away direct Dallas McKenzie ----- Original Message ----- From: Nigel Gunn Sent: Friday, 12 January 2001 20:59 To: dxsoft@egroups.com Subject: Re: RE: CWGet and IC706MkII In Britain, the warranty is legally with the dealer not the manufacturer. ----- Original Message ----- From: To: Sent: Thursday, January 11, 2001 7:28 PM Subject: Re: RE: CWGet and IC706MkII > Is it up to the dealer? 420. Re: CWGet and IC706MkII

Yahoo group: dxsoft
Date: 2001-01-13 05:42:40 UTC
From: Phil (ON4BAW)
Topic: 409 Message: 420

Hi Paul,

I'm using an 706MKIIG and a registered CWGET program.
I take the AF signal from the ACC connector. I take also ground from it.
I use shielded cable an run it into the LINE IN of my soundblaster pci128 card with a metal jack.
The advantage is that regardless the volume (even none) you have input into the computer.
The AF voltage on the line is enough to drive the input without any problems.

I use the RIGBLASTER for TX when using SSTV or TRUTTY and I've made a small interface for the CWTYPE program witch connects the comport to the key input on the IC706. I have a Y-connector to put also a memory paddle keyer in the transceiver without any problem so I can choose between keying my paddle or typing via the keybord. (depends on the mood or the QSO)

When adjusting the sidetone in CWGET to the tone on the transceiver you can also monitor your own caracters when keying the paddle or typing text. This works nice for me.

Good Luck and 73
Phil, ON4BAW

Paul,

Check your manual for this ...
You need only two pins :

Pin 2 (color red wire) = ground
Pin 12 (light blue) = AF line out

428. TS570S Query

Yahoo group: dxsoft
Date: 2001-01-19 04:42:47 UTC
From: David Douglass
Topic: 428 Message: 428

I'm running TrueTTY with my new TS570SG.

I tried to make a lead to run from my soundcard to the AF input on the 13pin ACC socket on the back of the radio. I could get AF out and key the PTT line, but I couldn't get any transmitted audio.

I then made a lead to go directly into the mic socket of the radio, which worked fine. Before anyone makes the suggestion, I've checked all the wiring and all was OK. Is there something in the set-up on the TS570 that I need to do to allow AF into ACC socket.

Regards

David, VK2DPD

You may have the same problem I do. It does not work on mine (TS-870) either. no matter, I use the RigBlaster now. Kenwood denies the problem. They lie too.

OTOH you may not have the radio set up correctly, need to have regular VOX off or some such thing, don't remember. It does work for some or so I have been told!

Dave,
When I had my ts570 , I had no problems running treutty with it.
This is how I set it up.

For ASFK audio out from the PC sound board, i went thru a radio shack
xformer then to pin 11 of the 13 pinACC socket.
For FSK , I took the txd (pin 2 for 25pin conn, or pin 3 for 9pin conn)
thru a transistor/diode circuit (just like the one used for the PTT line) to
pin 2 of the 13 pinACC socket.
For AUDIO receive, I went from the 13pinACC socket thru another audio
transformer(RS) to the line in or mic in on the sound card in the pc.
For PTT, I took the RTS (pin4 i think) of the 25pin comm connector of the
PC thru another trasistor/diode circuit (like the FSK one) then on to pin 9
of the 13pinACC socket.

If u use FSK (I reccommend)instead of AFSK, u might have to change menu item
30 (keydown polarity) , I forget on this.
And u might have to change menu items 33 and 34(output and input levels).

It does work, if u have anymore questions, ask.

Joel,

It took a while to recall where I had seen this.

This URL has a lot of info :
http://www.packetradio.com/psk31.htm

And the info for the DX70 is a click away on the site at:
http://www.packetradio.com/sb16rads/ISOKITS/isokit_al6a.gif

Good luck

Hallo David,

I just last week have the same problem. But I solve it!

The main problem is settings of Kenwood Ts 570

I dont remember exactly the menu number, but it was "digital modes"
may be Nr 30 ?? I choosed in this menu last one - FSK (?) and all
start to run.

I have not at this moment layout of my connection but after one day I
can send exactly my solderings.

If You have still this problem write me: andris.brunenieks@...

TESTS ARE NEEDED,SORRY, it is the only way to positive test of new filter rules since the list changed.

We all know the list works, we don't know if rules work until tested.

This will stop after the problems caused by the switch to the new lest manager ends.

I do like yahoogroups, lots of nice features.

446. TrueTTY and Navtex

Yahoo group: dxsoft
Date: 2001-01-29 12:18:50 UTC
From: bernd.zwissler@weru.de
Topic: 446 Message: 446

Hello,

I am using TrueTTY since a few days. It works fine on mode RTTY.
My only problem at the moment, I can't decode Navtex stations.
I tune my receiver to 518,6 khz, USB and I see the spectrum of the
signal in the blue window
at 1335 Hz, carrier and 2 sidebands with 172 Hz shift (red lines).
Mode AMTOR-FEC, Fast Syn. The signal ist strong but it is not decoded.
Can anybody help me?

Thanx in advance

Bernd

bzwd> Can anybody help me?

Some people have problems with NAVTEX receiving also.
But another have not such problems.
I didn't figured out problem reason yet.

Probably, sound card properties have meaning ...
Try to play with recording level an /s option ...

If you send me signal sample in wave-file (11025Hz-mono-16bit),
it probably help me to fix problem.

Best regards,
Sergei mailto:amx2@...

Bernd;
Try using "REVERSE" mode when ever tuning a USB AMTOR-FEC signal. The
original signal uses LSB below 8MHz and can be inverted to you.

453. AAVoice 1.2.0 is here

Yahoo group: dxsoft
Date: 2001-01-30 13:24:56 UTC
From: Alexander Anipkin
Topic: 453 Message: 453

Hello dxsoft,

I just upload new version of AAVoice

Full version

http://www.dxsoft.com/aavoice.zip
http://www.aalog.com/aavoice.zip

and update package

http://www.dxsoft.com/aavoiceup.zip
http://www.aalog.com/aavoiceup.zip

In version 1.2.0 added new macros. AAVoice can work as beacon now.

~[rp<pause>:<number>] - repeat macros string for <number> times with
delay on <pause> milliseconds. This macro can be use
on the end of macros string only. If <number> is equal
to zero then macros string repeat permanently until press
ESC or click Stop button.

Thanks Ronald,

I know their software, I used to sell it once. It looks fine and performs
well. It's expensive though and not free of bugs

thank's for the tip anyway

Peter

In a word, "DON'T!" IMHO, it is not yet stable enough. OTOH, some people are using it satisfactorily. It seems to work better on some hardware than others. Why take a chance when you are happy with '98?

Give it another year or so and by then, bugs are more or less resolved.

I used WIN98ME for about two months, after many unexplained problems I switched back to WIN98SE that work almost perfect (we are speaking of Microsoft after all).
Windows millenium is too unstable yet, and drivers for many hardware are not yet available... Stick to Second Edition...

Topic: 467 Message: 467

Hello World,

I have received many requests to change the URL of the new "Hamlinks" to page to a shorter and more easy to remeber URL.
I've also Highlighted the POPULAR AND NEW URL'S in dark red. I did not want to add any Animated GIFS or other webpage icons
like some have suggested. The reason is the more graphics that show up on the page the longer the page will take to load.
This is why I went with the highlight method rather the "New Icon" method.

Here is a easy to remember URL for the "Popular Hamlinks Page"

http://run.to/hamlinks

That was all Greek to Me ....73"s ----- Original Message ----- From: Александр Дубовцев Sent: Wednesday, 7 February 2001 01:08 To: dxsoft@yahoogroups.com Subject: не получилос Hello dxsoft, Вчерась опробовал CWGet. После её включения понял что это то что я искал и о чем я так давно думал, но после первых попыток принять CW ни чего не получилось , и после других попыток тоже ничего. Может я не правильно установил параметры, но мне кажется дело в принципе, пока не возможно программно качественно принять CW. Мои установки : 200 LPM, Narrow , AFC 2 , ну и линию шума менял как автоматически так и в ручную. Слушал на бытовой приемник с широкой полосой SSB на 40м диапазоне. Уровень входного сигнала подбирал, что бы не перегружать вход (как я думаю), т.е. выставлял её по форме амплитудной характеристике третьего окна, стараясь не доводить до ограничения. Кстати эта характеристика идет с подергиванием, но я так думаю , что это так и должно быть. Результаты эксперимента: -слабые сигналы (RS-56) с сильными федингами вообще не читались, -слабые сигналы (56) , которые меньше фединговали, принял процентов 10-20. - самими лучшими результатом был прием сильных сигналов (59) с разбираемостью максимум процентов 60. - искаженные сигналы (39-49) не читались. Если чего не так сделал прошу поправить. Очень понравилась спектральная характеристика. -- Best regards, RN6BN, Александр mailto:sam@... ------------------------ Yahoo! 480. Interface and connection for AOR 2500 or Trident TR-4500

Yahoo group: dxsoft
Date: 2001-02-07 19:10:43 UTC
From: joan
Topic: 431 Message: 480

I have a scanner Trident TR-4500 (same model as AOR-2500), and i'm looking for a software compatible with this scanner. Anyone know how can i connect this scanner with a any PC-Compatible with the rear 9pins Rs232 connector (i think that the pins are not standard).

73's

And you are an authority on Greeks I presume... Before this turns in to a
flame war
I suggest you either drop the thread and stop wasting bandwidth or send your
comments
directly to me for a reply...

Good point Demetre, one wonders why a person would waste so much time broadcasting such nonsense. This is a serious medium provided free for us to discuss a more adult agenda.

Hi,

Sorry I didn't think there were any adults here :-)).

I thought this group was free to discuss DXSOFT and help others trouble
shoot the programs.

How the heck did this get started anyways? :-(No don't answer that.

Has anyone been having problems getting to DXSOFTS'S download area lately?
It's ok you can answer this.

Joan,

It appears Scan Cat Gold for Windows (SE) - Surveillance Edition)
will work with this equipment. They will alsos send you the information
about how to construct, or order, the necessary cables. The information is:

Computer Aided Recieiver/Transceiver Control Software
PO Box 18285
Shreveport, LA 71138

This should do just what you need!

OK Guys,
This crap has gone on long enough! We're all members of an international hobby, participating in an international forum. There is
no place here for cultural, ethnic or racial slurs! If we can't conduct ourselves as gentlemen, then we need to have the point made for
us, I guess.
The derogatory cultural comment was out of place originally, any jokes about it following were even worse. Especially the
comment/joke from a former serviceman was poor. You don't think you'd notice a cultural difference between the Bronx and out here in the
Midwest?? END IT!!
Anyone with an ounce of brains could see the original text was Cyrillic, not Greek. I could make a joke about not having to be a
Rhodes Scholar to recognize that, but I won't! I do have to come down on Demetre's side on this. He has always conducted himself as a
gentleman, on the air and in this forum. And as a fellow 070 club member he has my support in this. The comment was childish and in
extremely poor taste. I don't recall seeing any public apologies, as a gentleman would do. I don't recall the call sign of the original
offender and I don't want to, but I'm sure Demetre does!
END IT!!
'73 all,
Bob Daniel
W9FIF

I really like the group . I am having a hard time learning morse code.
Should I practice more shorter times or longer. I have been going at it for
1 hour at night .

For goodness sake, 15 to 20 min. max should be the norm. Any time spent
past that time is like 'flogging a dead horse'. Concentration is the name
of the game and shorter periods of listening practice will produce the same
or better results. Been there - done that.

Thats the reason the militry only taught it at maximum 4 hours a day, in classes I attended, then the other 4 or so hours was typing classes(at first) and then antenna theory etc. during the latter part of the 6 months. Since I passed my typing test the first day, I had 8 hours of code a day(and already knew it). Maybe thats why I copied 40 wpm at the end of the 6 months? 20-30 minutes a day is quite a satisfactory time for practice, but you could do that number twice a day, for ever better success. I have had youngsters learn 5 wpm in a 2-3 days time, and in fact one did it in 30 minutes TOTAL. Just get in and do it every day, both receive and send, and it wont take long.

Just a note to apologize and any and all....

as to "4 hours a day", at Monterey and Syracuse, we went 8 hours a day 5 or 6 days a week. Had a test every 6 weeks, and did NOTHING but learn the language from native language speakers who were anti communist or anti fundamentalist regime. During duty performance I had to not only know the language, but other things which were tested every six months. If you didn't measure up, you were gone. I had to let a lot of men go because they could NOT pass the tests.

From: n7dc@cs.com
Topic: 314 Message: 520

Im glad to see someone else suggested this. I have been using the unregistered copy for less than a week, along with several other programs, to see which one I will eventually go with. All of them seem to have good points that others dont. For instance, TrueTTY absolutely has the best RTTY copy, including right at startup for each transmission. I also like the ability to just type and have the machine transmit automatically, and swith back to receive when I quit typing. Do any of the other programs have this capability? I havent seen them if they do. I am not impressed with the way it seems you have to type in your info on the f1 thru f12 keys though, looks very difficult. (remember I dont have the paid for copy yet- so havent been able to test that out). I like the way HamScope is laid out and would be a favorite, if it had the keyboard on/off and the ability to copy that TrueTTY does. Hamscopes 3 layers of selected memory is also outstanding. MMTTY has an excellent ! DSP capability, which I wish the others had, but its f1-whatever layout is poor and appears difficult to program also. What we need is the best parts of all of them- anyone up for the challange? Wish I knew programming so I could work on that, but Im afraid my ole Basic isnt up to that challange. I, for one, certainly appreciate the work that has gone into these programs and am certain that even more and better is on the way. Keep it up guys.
Danny

From: D. L. Hemmings
Topic: 314 Message: 521

My sentiments also. As with all digital technology, it seems to be more or less in its adolescnece. Even with such a great RTTY capability os TRUETTY has, there is even better things to come from such a worldwide group of dedicated hams and their many talents. Thanks gentlemen.

>Im glad to see someone else suggested this. I have been using the unregistered copy for less than a week, along with several other programs, to see which one I will eventually go with. All of them seem to have good points that others dont. For instance, TrueTTY absolutely has the best RTTY copy, including right at startup for each transmission. I also like the ability to just type and have the machine transmit automatically, and swith back to receive when I quit typing. Do any of the other programs have this capability? I havent seen them if they do. I am not impressed with the way it seems you have to type in your info on the f1 thru f12 keys though, looks very difficult. (remember I dont have the paid for copy yet- so havent been able to test that out). I like the way HamScope is laid out and would be a favorite, if it had the keyboard on/off and the ability to copy that TrueTTY does. Hamscopes 3 layers of selected memory is also outstanding. MMTTY has an excellen!
> t !
>DSP capability, which I wish the others had, but its f1-whatever layout is poor and appears difficult to program also. What we need is the best parts of all of them- anyone up for the challange? Wish I knew programming so I could work on that, but Im afraid my ole Basic isnt up to that challange. I, for one, certainly appreciate the work that has gone into these programs and am certain that even more and better is on the way. Keep it up guys.

There is not very mach space on tool bar,
but what about ~[cl] and ~[crx] macrosequences?
You can attach them to appropriate macros key ...

Best regards,

The best way to unsubscribe is to go to the groups page on yahoo and select my groups and then do it there. It works , it is easy. It is WRONG to ask in the group, it will get you nothing. The administrators do NOT pay ANY attention to that. > -----Original Message----- > From: Dallas McKenzie [mailto:dalmac@...] > Sent: Tuesday, February 13, 2001 14:42 > To: dxsoft@yahoogroups.com > Subject: Re: unsubscriber > > > Hey OM If you note the Remove address when you try to > unsubscribe it comes back Page Not Found...Its People like you > ASUEMING again that are loosing Group members > > ZL3SWL > > > > > ----- Original Message ----- > From: arussell@... > Sent: Tuesday, 13 February 2001 13:44 > To: dxsoft@yahoogroups.com > Subject: unsubscriber > > > > It is hard to beoieve that peopele can join a > lsit and cannot take the > > trouble to learn how to leave. > > Actually , I believe this is a troll, he can do > it, jsut wants to make > > trouble. > > > > > -----Original Message----- > > > From: Sergei Podstrigailo > [mailto:amx@...]ctually , > > > Sent: Monday, February 12, 2001 10:03 > > > To: vinesl@... > > > Subject: Re[2]: > > > > > > > > > > > > Hello vinesl, > > > > > > Monday, February 12, 2001, you wrote: > > > > > > vac> PLEASE REMOVE ME FROM YOUR MAILING > LIST . I just wanted to say I really enjoy the group. The best thing for all of us is to overlook some things. I have had a lot of help in the past and I hope to pass some of it on. I am going to build a hookup for my pc for psk31. I ordered the kit which was a lot cheaper than the sum of all the parts.

John;
Some nice points about TrueTTY. I thought that the way Sergi has set up the
demo version of the software does not let the user fully appreciate how well
the software works in the registered version. Perhaps a 30 Day or 30 use
version with all the features enabled would be better. Although I had a
couple of minor difficulties getting all of the macros to work the way I
wanted them too I still felt that it was pretty easy to get set up. One of
the reasons I like this software so much is that I have very limited space
in the shack. Therefore I use a 12" IBM vga monitor. This software uses very
little screen real estate when compared with others. (The small screen is
less cluttered.)The addition of a MFSK mode would really complete the job.
You could work all the digital modes without having to chang software. By
the way the PSK31 mode works as well as the RTTY mode. hey catch you later
73 ...Ralph

Hi Robert,

I've been reading 'The Shortwave Magazine' over the past few months and
a couple of frequencies have been mentioned on the old ISS......

143.625 MHz, modulation unknown

259.7 MHz NBFM

Hope this may wet your appetite !!?

Regards

Chris

Hello Sergei,

I've been using both your programs now for ages and am really impressed. However, recently I've changed my PC and Operating System to Windows Millennium Edition (ME) and I've also changed the soundcard from a Soundblaster 16-bit to SB Live.

The problem is that even though my soundcard puts the Line-In audio out to the speakers, the SB Live doesn't seem to deliver the sound bytes to the programs.

Don't get me wrong I'm not blaming your software.......I actually think the problem lies in the ME Operating System in that another Ham radio program I use is Spectrogram and it suffers with the same problem as your software, only it displays an error message something like 'there are four sound input devices' ......one of which is the wave-input device......I'm still looking within Windows ME to see if there is a utility to correct this, but I don't think so.

Anyway, this message was just to inform you about my little problem at the moment.

TrueTTY. How about an automatic speed detector !!?

Many thanks and keep up the good work.

Regards

Chris

Just select signal source (line in or microphone input) and
record level by Windows ("Volume" in tray):

Double click on "Volume" ->Option->Properties->
(Recording;Show the following...;OK)-> ...
^^^^^^^^^^^^

Make sure that you change _Recording_ options, not _Playback_ options.

Best regards,
Sergei mailto:amx@...

Hello dxsoft,

I have 2 news: one is very bad and the next is good

1st bad news:
Today some bastard crack my mailbox and reregister domain aalog.com
to himself.

Please note that you can access to this site using adress
http://aalog.hypermart.net

If anybody can halp me in this situation please contact me.

and 2nd good news:
Tomorrow AALog version 2.0 beta 5 will be uploaded to sites.

I will notify you when it will be available.

Best regards,
Alexander mailto:aia@...

Hello dxsoft,

I just upload new beta version.

Now you can create your own qsl labels and QSL cards

Some user manual for labels creation will be ready shortly.

AALog ver. 2.0 beta 5 - 23 Feb 2001

- fixed some minor bugs
+ added print facilities in the "Award tracker" window
+ if AALog receive callsign from TrueTTY or CwGet in the "New QSO" and
"Previous contacts" window is open then AALog update information in
"Previous contacts" window.
+ key "Pause" in the "New QSO" window clear edit fields.
+ updated QSL and envelop label printing procedure. Now you can create own
format for any size of label.
+ when you minimize main window "New QSO" window stay on the screen
+ new format of modes.aal file. You can add max report value after "=" there.
This value will be placed to the send/rcvd rst field when you change mode
(SSB=59, CW=599 e.t.c.)

download it from

AALog Update pack (2 250 800 bytes)
http://www.dxsoft.com/aal_update.zip
http://aalog.hypermart.net/aal_update.zip

AALog full install single file (6 057 017 bytes)
http://www.qsl.net/rz4ag/files/aal2b5full.zip
http://www.livin4.com/dxsoft/aal2b5full.zip

AALog full install (5 files for floppy disks)

Disk 1 (1?406?140 bytes)
http://www.dxsoft.com/aal2-d1.zip http://aalog.hypermart.net/aal2-d1.zip

Disk 2 (1?419?584 bytes)
http://www.dxsoft.com/aal2-d2.zip http://aalog.hypermart.net/aal2-d2.zip

Disk 3 (1?440?523 bytes)
http://www.dxsoft.com/aal2-d3.zip http://aalog.hypermart.net/aal2-d3.zip

Disk 4 (1?440?543 bytes)
http://www.dxsoft.com/aal2-d4.zip http://aalog.hypermart.net/aal2-d4.zip

Disk 5 (352?127 bytes)
http://www.dxsoft.com/aal2-d5.zip http://aalog.hypermart.net/aal2-d5.zip

Best regards,
Alexander mailto:aia@...

546. Registration file

Yahoo group: dxsoft
Date: 2001-03-02 23:33:04 UTC
From: Jim
Topic: 546 Message: 546

Hi - I am moving my TRUETTY - AALog to a new computer, and need to know what file is the registeration file?
I am going to download the latest versions of truetty and aalog from dxsoft now, and need to know what file I need to put on a floppy from my old computer, and move to the new computer/folder.

Thanks!!!

Jim KJ5TF

One more thing. To get aalog v 2.0 do I have to download each of the 5
install packages? I dont see any other way, but maybe Im wrong.
So Im downloading 1.0 right now. I see there is an upgrade 1.0 to 1.3

But no upgrade from 1.3 to 2.0

How do I go from 1.3 to 2.0 beta?

thanks Jim KJ5TF

J> How do I go from 1.3 to 2.0 beta?

If you didn't work with 1.3 yet,
just install 2.0 .

In another case install 2.0 in _new_ directory (not overwrite 1.3!)
and start "Database converter" to transfer data from 1.3 to 2.0 .

Best regards,
Sergei mailto:amx@...

Hello Jim,

???????, 3 ????? 2001 ?., you wrote to me:

J> Excellent, thats done.
J> Please, how do I import my old aalog data from the old computer?
Two way is possible.

1. Go to menu Configuration|Logs configuration. You see information
for path and file name for your log. Open this directory and copy all
files with the same name to the new PC in to the any directory on new
PC. On new PC create new log and show path to log files.
(it only work for moving data from 2.x to 2.x)
If you move data from 1.x then you need create new log and make
"Tools|Merge another log"
on new pc and select name of the log

2. Export ADIF - Then import ADIF

Best regards,
Alexander mailto:aia@...

552. TrueTTY 1.72 beta is there!

Yahoo group: dxsoft
Date: 2001-03-04 11:15:22 UTC
From: Sergei Podstrigailo
Topic: 552 Message: 552

Hello All!

I just have uploaded upgrade to TrueTTY 1.72 beta to the main site and
mirror:
http://www.dxsoft.com/truettyb.zip
http://www.hamradio-software.com/truettyb.zip

You feedbacks are welcome.

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

TrueTTY Versions History
V1.72
The problem with spontaneous switching of keyboard layout during transmission
was fixed.

Macrosequences for logger control were made:
~[lc] or `[lc] - to clear all fields, except "Date", "Band" and "Mode" in
the "New QSO" window of the AALog;
~[lt] or `[lt] - to set current time and date in the "New QSO" logger
window;
~[ls] or `[ls] - to save QSO into the log;
~[lts] or `[lts] - to set current time and date and save QSO.

Macrosequences for increment of numbers in the edit fields were made:
~[nic] or `[nic] - to increment a number in the "Call" field;
~[nir] or `[nir] - to increment a number in the "RST" field;
~[nin] or `[nin] - to increment a number in the "Name" field;
~[nio] or `[nio] - to increment a number in the "Other" field.

The menu option "Setup->Catch Word by One Mouse Click" was made. When this
option is selected, you can catch a word from RX window by single mouse
click, not double-click. But you still can select the part of the text by
a mouse dragging.
The "-" char is the word delimiter now.
TrueTTY can transfer received symbols to another software and get symbols to
transmit from another software now. Data exchange can be made by
DXSOFTEX.DLL library. See http://www.dxsoft.com/dxs-exch.zip for details.
[...]

565. TrueTTY 1.73 beta is there!

Yahoo group: dxsoft
Date: 2001-03-09 14:01:16 UTC
From: Sergei Podstrigailo
Topic: 565 Message: 565

Hello All!

I just have uploaded upgrade to TrueTTY 1.73 beta to the main site and
mirror:
http://www.dxsoft.com/truettyb.zip
http://www.hamradio-software.com/truettyb.zip

Your feedbacks are welcome.

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

TrueTTY Versions History

V1.73
Macrosequences ~[ce] and `[ce] ("clear edit fields") were added.
After ~[ni...] macro execution new field value is transferred to logger.
After "Clear" button pressing or ~[ce] macro execution new fields values are
transferred to logger.
The "Setup->Use 'Other' Field As" menu assigns alternative meaning to
"Other" edit field. This meaning is used to catch words from RX window and to
transfer data to logger.
V1.72
The problem with spontaneous switching of keyboard layout during transmission
was fixed.

Macrosequences for logger control were made:
~[lc] or `[lc] - to clear all fields, except "Date", "Band" and "Mode" in
the "New QSO" window of the AALog;
~[lt] or `[lt] - to set current time and date in the "New QSO" logger
window;
~[ls] or `[ls] - to save QSO into the log;
~[lts] or `[lts] - to set current time and date and save QSO.

Macrosequences for increment of numbers in the edit fields were made:
~[nic] or `[nic] - to increment a number in the "Call" field;
~[nir] or `[nir] - to increment a number in the "RST" field;
~[nin] or `[nin] - to increment a number in the "Name" field;
~[nio] or `[nio] - to increment a number in the "Other" field.

The menu option "Setup->Catch Word by One Mouse Click" was made. When this
option is selected, you can catch a word from RX window by single mouse
click, not double-click. But you still can select the part of the text by
a mouse dragging.

The "-" char is the word delimiter now.
TrueTTY can transfer received symbols to another software and get symbols to transmit from another software now. Data exchange can be made by DXSOFTEX.DLL library. See http://www.dxsoft.com/dxs-exch.zip for details.

567. AAlog contest module 0.1.1

Yahoo group: dxsoft
Date: 2001-03-09 18:51:16 UTC
From: Alexander Anipkin
Topic: 567 Message: 567

Hello dxsoft,

Try the AALog contest module. You must have aalog 2.x installed.
Download contest module and install it in to the same directory
where AALog installed.

Example of rules for CQ WW DX Contest is attached.

you can download it from
http://www.dxsoft.com/test.zip
http://aalog.hypermart.net/test.zip

Best regards,
Alexander mailto:aia@...

Hello Sergei,

I don't have that many problems with CWGet, but what really is annoying is the fact that the screen isn't really scaling. When I open the program the spectrum part is very much to the left of the screen (small CW filter on the radio) and I have to expand the screen pretty much in width to see the whole spectrum. When resizing the screen the content of the screen isnot proportionally resized with the borders.

Further no problems at all :)

Greetings,

Hans

From: robert dufour
Topic: 572 Message: 572

Y opinion abt Hans's remarks :

1/- Yes, it seems to be an actual problem on CWget (and on TTTY also ?) :
baseline of oscillogramm and spectrum display is really too low, it disappears in the depth of the window and seems to drift deeper in the time (i can be sure since we don't see it at first).
2/- Like we are all in tune ! :
"Keep it simple stupid"
I don't believe that a new look will provide more efficiency, but it will be asking for more ressources like we can see at too many programms in wich widgets=gadgets !
3/- DSP technics supposes that you use all the audio bandwith of one side band since it can offer then a so narrow filter than few herz ! under this conditions why to use a CW IF filter ? Furthermore the action of this filter will be shown on the base of the signal wich appears clipped. In psk31 one can use it to "clean" an audio overdrived signal.

576. re: Waterfall turns white issue (WindowsME !)

Yahoo group: dxsoft
Date: 2001-03-14 16:16:48 UTC
From: Jim
Topic: 576 Message: 576

Johnny, I have the same problem with my new Compaq Presario 800mHz running WindowsME.

It also occurs with Zakanaka, MMTTY, IZ8BLY Hellschreiber, and Stream.

On Digipan1.6 I have a purple horizontal screen, thats acts exactly like the white screen. The color is the only difference.

TrueTTY is the only sound card software I have that works perfectly on my new computer. Oh also DXPSK is 98% perfect, with only afew rare white lines in the waterfall.

When I posted this problem, I only got one response, re: video drivers. So, one thing you might try is seeing if the computer maker has any driver upgrades.

I am doing all my digital hamming my older Toshiba Satellite notebook and disappointed I cant use the new computer for MMTTY, and the rest. I have a CD of driver upgrades on the way from Compaq. Feeling timid about trying it though!!

Every time Windows upgrades, its a nightmare.... if I try to upgrade my drivers on the new computer, I wonder what I might lose in the process. A little fear is a good thing. But not to be paralyzed into no action I guess.

Bottom line, I have my backup computer, and might keep things the way they are.

Note to programmers. 1st of all THANK YOU for this software. There has never been a better time to be a ham. We all owe you so much.

Would it be possible to solve this waterfall problem in the sound card software?

Its early in the game, but I think as more hams upgrade to WindowsME, and the next, we will face these same issues again and again.

Is there a programming solution? Do we all need to search for and install new drivers, until something finally works? Hopefully everything else wont shut down along the way! hi hi

Do other folks with WindowsME have the same problem? Or is Johnny and I the only ones seeing this?
I hope its just us.

Thanks for the thought.

73's Jim KJ5TF

Hello all,
Anyone have any ideas why the waterfall turns all white ?
Anytime that the FIG button depresses,the waterfall changes to all white as it scrolls down.After a short time the waterfall will operate correctly.This happens even when there is no input connected to the sound card.With no input to the sound card there is garbage printing across the receive window.
I am using a 900 mhz pentium with a Creative 16 Bit Sound Blaster sound card.Using Windows ME and MMTTY Ver 1.61. I was using an old pentium 100 and all worked ok except the software ran slow.
I am at a loss now. Does anyone have any ideas or any suggestions ? ? ?
Please help !!
Thanks to all for reading this. I am looking foreward to some responses.
Thanks,
Johnny

577. import log

Yahoo group: dxsoft

From: Mario Munevar
Topic: 577 Message: 577

Hello to all of a new user, AAlog beta 6

Import in format ADIF everything is correct, except for QSLsent and QSLrcvd
(LogWindows doesn't export in format ADIF these two fields)

I try to solve the problem of QSLsent and QSLrcvd ,
using the utility.....import text file,
I create the fields, , callsign, date, time........
I have the correct fields from LogWindows,
I have the correct fields in AALog, text file.

Always seeing this error:

Import errors or duplicate QSOs are found...

then,

import.err for details: wrong date

Some idea, suggestions, ????

By far the best way to use DXCluster on internet is to get DX-Telnet and
DXHUNTER. I do not have the url but you can find it with a search engine.
DX-Telnet is the connection and is a windows program. DXHUNTER runs in DOS
and does not need real mode. It runs in ANY windows including WIN2000 and
WIN98ME. It alerts you to any needed station.
I am just a happy user of these programs.

586. Some ideas

Yahoo group: dxsoft
Date: 2001-03-19 23:13:58 UTC
From: Mario Munevar
Topic: 586 Message: 586

Hello users of AALog 2.0

Some ideas.. HI

In Award Manager.. Award Tracker.
I wanted to be able to list the contacts & Callsign.

In Show QSOs (Award Tracker):

Here I can see previous QSOs in each entity of the DXCC,
I would Applaud for a direct listing in Award Tracker window,
accompanied by previous QSOs and to be able to change the Callsign
one according to some necessity.

Something eats Print & listing.

Print: As a previous one "WKD" (current)
Listing: Generating a report with the Callsign.

Also serious good idea,
That I learned a better English. HI HI
Excuses for all.

Were the problems of general import, solved reinstalling AALog (???).
When using the filters in the bands of 40-80M, inconsistencies are presented
in the registrations of import logs.
If these registrations are created directly in AALog (New QSO),
The filters work correctly.

In general all the import tests were correct,
Except for the import of the fields QSLsent and QSLrcvd with the utility....
Text File.
I have attempted with the variables, T,F, inclusive with the traditional
one, Y,N.
Some suggestion for this problem?

587. rename database

Yahoo group: dxsoft
Date: 2001-03-20 07:15:50 UTC
From: Dieter, DL2RR
Topic: 587 Message: 587

Hi,
is it possible to rename a database? And how can I delete one? I deleted all files with the appropriate name. Now the program shows the name of the logbook still, but cannot not find it however, of course.
While creating a new log: what means 'Log filename' and 'Description'? All files have the name of 'Description' and I don't find anywhere a file with the name 'filename'. Also in the list of the window 'Open log' are only names of 'Description' !

I use a few callsigns and want to use sublogs for each callsign, how can I do that?

Tnx for solutions
73's de Dieter - DL2RR

Hello DL2RR,

Tuesday, March 20, 2001, 10:15:50 AM, you wrote:

DD> is it possible to rename a database?
You want to change name of your data files?
No problems. Rename all files with old name to the new one.
Then run AALog, go to Configuration|Logs configuration and enter new
name for this file.
DD> And how can I delete one? I deleted all files with the appropriate name.
DD> Now the program shows the name of the logbook still, but cannot not find
DD> it however, of course.
Go to Configuration|Logs configuration Select deleted log and press
Ctrl+Del to delete it from list of the log. In future use this way to
delete unused logs
DD> While creating a new log: what means 'Log filename' and 'Description'?
Log filename - name of data files. Description - name of this log.
Here you can use any characters. AALog use this value for log lists
DD> All files have the name of 'Description' and I don't find anywhere a file with
DD> the name 'filename'.
filename name of data files on your hard drive.
DD> Also in the list of the window 'Open log' are only
DD> names of 'Description' !
it'r true/
DD> I use a few callsigns and want to use sublogs for each callsign, how can I
DD> do that?
You need use different log set values for different callsigns. You can
give your own name for log sets (edit your asets.aal)

Sorry. I not sure that understand you right. Please again.

MM> Something eats Print & listing.

MM> Print: As a previous one "WKD" (current)
MM> Listing: Generating a report with the Callsign.
Well. But how much QSOs include in this listing? For example: you have
1000 contacts with US station. Print all of them or only one for each
mode and band?

MM> Were the problems of general import, solved reinstalling AALog (???).
MM> When using the filters in the bands of 40-80M, inconsistencies are presented
MM> in the registrations of import logs.
MM> If these registrations are created directly in AALog (New QSO),

Try Tools|Refresh databases it must help to you.

MM> In general all the import tests were correct,
MM> Except for the import of the fields QSLsent and QSLrcvd with the utility....
MM> Text File.
MM> I have attempted with the variables, T,F, inclusive with the traditional
MM> one, Y,N.
MM> Some suggestion for this problem?
You not describe this field right. Send a part of your file to
aalog@... and I send to you right import format.

590. In a hole

Yahoo group: dxsoft
Date: 2001-03-22 03:00:50 UTC
From: wb4ils@yahoo.com
Topic: 590 Message: 590

I need some advice. Where I live is in a hole. I have 400 ft hills completely around me, and I can't even get satelite tv in here. About the only thing that I have been able to DX with has been the verticle antenna that I scavenged from a mobile and put pu 35ft on a mast. I would love to put up a multi band yagi, but can't seem to come up with anything that might do the trick for me. SUGGESTIONS WOULD BE GREATLY APPRECIATE.

Steve
try a horizontal loop antenna... technically it should go
straight up but it won't... it might be just the ticket.... then u could
slant it , (angle it)and see what happens...
u could also aim a beam at the mountains and see if they will
reflect ur signal in a favorable direction...

good luck
u have a challange on ur hands

I'm looking forward to a solution too. Here similar situation, hills with the same value but in meters, hi. Diameter between them less than 1 km. Looks like a funnel with a broken out part. Only open from North to West. I use horizontal loops with results, so good as possible. Some dipols and a windom does their job also. I got the most parts of the world, but no change while pile up.

Right now no good way for this problem. I must add this countries to
the DXCC-list and prefix list.

Question to all. How do you think AALog must tracing deleted DXCC
countries in the Awards window or not?

Best regards,
Alexander mailto:aia@...

Thanks

Been thinking about that, but I just put up a vertical
today and so far so good, first contact was Nova
Scotia on 10m second was Turks Caicos Is. I just got
a design progam that I'm going to give a shot. Here
to get satelite we have to have a clear 45degree shot
to the south, we can't even do that.

Danny, thanks for the reply. I've tried Yagi's but
just put up a verticle and so far its working
decently. This hole that I am in is something. To
get satelite tv all we need is a 45degree shot to the
south, we can't even do that, and the south is the
lowest hill. Put up the el cheapo Hy-gain AV18VS and
first contact was Nova Scotia and second was Turks
Caicos Is. And Im in Tennessee between nashville and
chatanooga. I got an ARRL design program that I'm
going to play with and see what I can come up with.

600. QSL print - date format

Yahoo group: dxsoft
Date: 2001-03-23 06:34:47 UTC
From: Miran Kokol - S51SK
Topic: 600 Message: 600

Hi there

Can someone help me with printing QSLs with AALog 2.0 beta 6!

When I create in QSL Designer my own design for printing QSOs
direct to card or modify existing form, I want date format like
15.Nov.2000.
When I define field [Master Table."Date-1"] in 'Variable Format' option
I select 'Date format' like 15 nov 1998 but when I printing them,
there is date 23.apr.4999.

What is wrong?

I hope the help file will be avaible soon!

Best 73
Miro - S51SK

kyc> I do not have that.
kyc> Any idea??

Idea is TO READ MANUAL.
If you read readme.txt file, you will know that is UPGRADE.
So you need V1.75 to be installed at first.

J> Any suggestions?

You need V1.75 to be installed at first.
Then just replace old TRUETTY.EXE by new one.

OK, i went to the main site, downloaded 1.75, installed that, and then
1.76b.

Same message as before. Missing dll

Any suggestions?

Jim

Hi Sergei

You did a great Job with this software

Why not ask Sony or one of the commercial guys to integrate it in one of the hot commercial receivers. You and them could make a lot of money.

Regards

Robert

641. AATest

Yahoo group: dxsoft
Date: 2001-04-22 16:59:54 UTC
From: Leo Leisink
Topic: 641 Message: 641

Dear Sergei,

Using AAtest I have the problem in defining
the contest, that I cannot enter the band
when I want to setup de rules for that
particular band or bands (Scoring Row).
It is the section of the Points per QSO in the
contest setup. (See attached BMP-file)

So I can enter the settings for the continent
and the countries as well as the points,
but not the band section.

Is this problem known ?

Kind regards,
Leo Leisink

http://www.dxsoft.com

==========

TrueTTY Versions History

V1.77
The old bug with Alt-T keystroke was fixed. Sometimes it was necessary
to click on them twice to switch transmitter on.
If there are several sound cards in a computer, you can select
the card by the "SoundCardNumber" parameter of [RTTY] section of
TRUETTY.INI file. (SoundCardNumber=0 , SoundCardNumber=1 etc.)
V1.76
HF-PACKET (300 bps) monitoring was made (Mode->AX25).

==========

CwGet Versions History.

V1.20
The "Setup->Logarithmic Spectrogram" menu command or
Alt-Z hotkey switch spectrogram window between linear or logarithmic scale.
Analogously, the "Setup->Logarithmic Oscillogram" menu command or
Ctrl-Z hotkey change oscillogram window scale.
Background colors of spectrogram and oscillogram windows can be changed now.
See "Setup->Spectrogram Background Setup" and
"Setup->Oscillogram Background Setup" menu commands.
CwGet can transfer received symbols to another software now.
Data exchange can be made by DXSOFTEX.DLL library. See
http://www.dxsoft.com/dxs-exch.zip for details.
V1.12
User can change spectrogram center frequency now. Press "Alt" key and
click on the desired frequence by mouse left button to move the frequency
to the window center.
The marker of TX frequency is made to help with zero-beat tuning.
The TX marker is short thick black line. To change the TX marker position,
click on the desired frequency by right mouse button (or by left mouse
button with "Ctrl" key pressed).

Sergei,
I have installed version 1.2 on my PC but found
that the spectrum analyzer was not working.
When I change the color of the analyzer it gives
me a static view. Changing the frequency does not
move the waves in the analyzer at all.
When I change the size of the spectrum window, the
window disappears.

Any sugestion ?

Kind regards,
Leo

Just select signal source (line in or microphone input) and
record level by Windows ("Volume" in tray):

Double click on "Volume" ->Option->Properties->
(Recording;Show the following...;OK)-> ...
^^^^^^^^^^^^

Make sure that you change _Recording_ options, not _Playback_ options.

Dear Sergei,

Which version is the last one, 122 or 122a?

73 de Wim.

Dear Sergei,

Version 1.22a isnot found in the download area.

I still admire your fantastic programme. Some English could be better. So
please change in future versions "contens" into "contents".

73 de Wim, DO1KWM

Dear Per!

I already downloaded 122a and also 122. Question 1 is: 122a not anymore
available. Question 2: is the latest update 122 or 122a? I have now
installed 112a.

Thank you for your message.

Hello Wim,

Wednesday, May 23, 2001, you wrote:

WMN> Which version is the last one, 122 or 122a?

1.22 is later.
But it is really the same.

Letter "a" in RX window is the one difference :-)

1.22a was test version (exe-file only).

1.22 is full release.

667. TrueTTY - Navtex

Yahoo group: dxsoft
Date: 2001-05-26 05:06:35 UTC
From: roland.kollert@t-online.de
Topic: 667 Message: 667

Dear Sergei Podstrigailo,

may I ask you some questions:

1) Last winter I downloaded TrueTTY 1.70. Now I downloaded the new versions,1.75 also 1.78. But they cannot be started. Windows 98 asks for the dxsoftex.dll file. Can you help me? Obviously I miss a certain file.

2) Do you or has anybody experience in using TrueTTY to receive Navtex (Sitor-B) reports on 518 MHz. By now I failed.
As I would like to use TrueTTY on my sailing board it would be great to receive not only the RTTY weather reports but also the Navtex transmittings.
Many other sailors would be very much interested.

Thanks so much for help.

Roland Kollert

rktod> miss a certain file.

You need to install V1.75 at first,
then to upgrade it to 1.78.

rktod> 2) Do you or has anybody experience in using TrueTTY to receive Navtex (Sitor-B) reports on 518 MHz. By now I failed.
rktod> As I would like to use TrueTTY on my sailing board it would be great to receive not only the RTTY weather reports but also the Navtex transmittings.
rktod> Many other sailors would be very much interested.

Some users receive NAVTEX without problem,
but another have troubles.
I thing, difference is sound card used.

Try to play with sound input level ...

669. New user questions & errors

Yahoo group: dxsoft
Date: 2001-05-27 16:00:06 UTC
From: Jacob Tennant
Topic: 669 Message: 669

I am new newly downloaded and yet to be registered user of AALOG,AAVOICE,CWTYPE, and CWGET love the looks of them so far, but have a few problems...

AAVOICE:

The program loads and seems to function properly, except for not having a SOUND CARD YET! However when I try to shutdown the program I get the following error message.

ACCESS VIOLATION AT ADDRESS 0045BB44 IN MODULE 'AAVOICE.EXE'. READ ADDRESS FFFFFFFF.

After cliking "OK" to the above message the program WILL NOT SHUT DOWN. Only if I do a 'Control-Alt-Delete' and tell it to End Task does it shut down after a long wait, approx 30-45 seconds.

CWGET:

When started the program seems to load, however once it loads the blue title bar at the very top starts flashing rapidly and the program shutsdown.

COMPUTER:

486DX2/100Mhz, 16megs RAM, 4gig HD, HOWEVER SOUND CARD IS NOT YET INSTALLED OR PURCHASED!

HELP! ! !

73's Jake K8JWT

Gentlemen;
In my opinion, one ought to get a pentium with addequate memory. You
can't make something work if the equipment isn't there! Finally, you can't
expect a "soundblaster" to work if the card isn't there either - so it has
to be installed!

674. AALog bug report

Yahoo group: dxsoft
Date: 2001-05-27 18:49:55 UTC
From: Joe Singleton
Topic: 674 Message: 674

Hi all,

I seem to have come across some problems with AALog (registered).

When closing the program I am getting error messages and sometimes Windows crashes. I have tried
re-installing but the problem is still there.

I have also come across a problem with the awards system. When listing for WPX for prefix GW0 I also
get W0, DJ4 and J4, etc.

Any ideas anyone.

Cheers - Joe, G4WJR

P.S. Any future updates coming for the contesting add-on?

Just select signal source (line in or microphone input) and
record level by Windows ("Volume" in tray):

Double click on "Volume" ->Option->Properties->
(Recording;Show the following...;OK)-> ...
^^^^^^^^^^^^

Make sure that you change _Recording_ options, not _Playback_ options.

From: Melody Yoon - KF6RMW
Topic: 684 Message: 684

I've noticed that when you make any changes (or even no changes) on the grid properties, but do not change the font size, it always reverts back to 8 point type, even though in the field, it will show the old font size.

For example, I use a 12 point font. It will still show 12 point when I bring up Grid properties, however, if I hit save, it reverts back to 8.

Yahoo group: dxsoft
Date: 2001-05-29 10:47:45 UTC
From: Melody Yoon - KF6RMW
Topic: 685 Message: 685

I recently added additional QSOs with stations in the triple-H net (7235 at 0 UTC), but for some reason awards manager isn't counting them for WAS. Am I doing something wrong? Or is this a bug? Note: If I double click on AL for instance (a new state for me), the QSO does show up, it is also marked as having a QSL card sent, but isn't being counted by Awards Manager.

690. eQSL in AALog

Yahoo group: dxsoft
Date: 2001-05-29 11:51:30 UTC
From: Dieter, DL2RR
Topic: 690 Message: 690

Hello Alexander,

is it possible to add a field to mark received eQSL ?

I usually used the 'QSL rcvd' field only for received "paper"-cards. How shall I mark received eQSL?

As long as the cards are differently analysed, we should have also fields for both types, in order to enter it separately.

73's de Dieter - DL2RR

Hello DL2RR,

DD> is it possible to add a field to mark received eQSL ?
Yes it is possible. I will add this (and graphic field) in the near
future.

Gentelmans. I know you want new features in the log. I will add it. But I
need some time for writing documentation and help file. This takes
many time. The program is very large and has many features. Be
patience please.

Best regards,
Alexander mailto:aia@...

701. TrueTTY 1.79 beta need to be tested!

Yahoo group: dxsoft
Date: 2001-06-03 16:56:23 UTC
From: Sergei Podstrigailo
Topic: 701 Message: 701

Hello All,

I just upload upgrade to TrueTTY 1.79 beta
See http://www.dxsoft.com/truettya.zip .

I change IIR filter used in BPSK decoder to several
FIR filters like used in WinPSK .
I hope BPSK31 decoding should be improved now.

Your reports is very appreciated.

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

703. CW GET

Yahoo group: dxsoft
Date: 2001-06-03 22:30:56 UTC
From: chris
Topic: 703 Message: 703

I am still having problems running CW GET, I have went in and changed the recording options and all just like it says to do, but on my screen when I pull it up, it says use mouse to select sound band and detector threshhold. I see no way to control these options. The RTTY progrma lets you have control but this does not seem to look at all like the setup of that program...Chris in Ft. Worth....I am really not that good and reading morse code and this is going to help me learn, so any help would be appreciated....

It is NOT error message. It is just hint.
You should see spectrogam in top window and oscillogram on buttom
window now.
Just click on peak of spectrogram to select signal to decode,
then select detector threshold by clicking on oscillogram.

Best regards,
Sergei mailto:amx@...

715. AALog 2 beta 7 is published

Yahoo group: dxsoft
Date: 2001-06-11 12:39:11 UTC
From: Alexander Anipkin
Topic: 715 Message: 715

```
Hello dxsoft,

I just upload new version of AALog.

ATTENTION!
New version overwrite files of the QSL queue (Tools|QSL service)
Finish all operation with QSL queue before update.

AALog ver. 2.0 beta 7 - 10 Jun 2001
-----------------------------------
- fixed some minor bugs
+ internal QSL-managers databes is added
+ German DOKs tracking is added
+ you can edit IOTA list and DOK list now
- adif import is much more faster.
+ import from Log-Eqf 9.x is added
- "Show QSO's" button in the "Award Tracker" window show contacts
for selected bands/modes only
- fixed bug with New QSO window
- you can print name of operator on the QSL-labels

You can download it from

Update from AALog 2.x

http://www.dxsoft.com/aal_update.zip

720. AALog-Contest Module

Yahoo group: dxsoft
Date: 2001-06-19 11:26:35 UTC
From: Bruce Beresford
Topic: 720 Message: 720

I have been using AALOG Contest Module during the recent ANARTS RTTY contest. I thought that I would give you some feedback on this program. It was successful however I did have some problems with it.

1. Need the ability to import log in.csv. This will enable the transfer of the log to another computer.
2. Unable to delete a QSO.
3. Unable to delete a log.
4. Unable to edit QSO from the Edit menu option.
5. After operation for some time, unable to access log in config dialog. Had to quit and restart.
6. When starting up at times the Mode and Band windows were empty, requiring quitting and restarting.

Great program anyway. I would be interested in hearing from anyone else that has used the software.

de VK2RT Bruce

From: Alexander Anipkin
Topic: 724 Message: 724

Hello dxsoft,

I just finish first beta of control module. It work only with
Kenwood now.
I ask Kenwood owner to test it.

You can download it from http://www.hamport.com/download/hamport.zip
Unzip itin any folder and run hamport.exe

Turn on you tranceiver.
Click on Port settings text and enter settings of your com-port.
(use "hardware" value for Flow control field)
Click on the 'OFF' text.
Now program must show current freq and mode of you transceiver.
Try to change freq and mode by transceiver.
Try to enter freq from keyboard, try to change mode from Hamport
(click on mode name text)

Please reeport me about results and your kenwood model.

Thanks advance.

PS I need beta-testers who can test HamPort with ICOM tranceivers.

Best regards,
Alexander mailto:aia@...

I just tested the program and it does not work.

4800 8Bit 1 Stop COM1 and Hardware. Windows 98 P2 300Mhz 256Megs RAM.
The program simply stops responding after setting up the port and trying to
read a frequency or do anything else.
The radio is a TS870.
It works fine with Zakanaka and all my other programs.

Sorry!

728. Abt AALog

Yahoo group: dxsoft
Date: 2001-06-26 13:50:47 UTC
From: Alexander Anipkin
Topic: 728 Message: 728

Hello dxsoft,

I want to ask users of AALog write some words about it on the eHam.net website

http://www.eham.net/reviews/detail/149

Thank you advance.

Best regards,
Alexander mailto:aia@...

729. Fwd: CWGET and volume

Yahoo group: dxsoft
Date: 2001-07-03 17:58:30 UTC
From: Sergei Podstrigailo
Topic: 729 Message: 729

There is not nothing unusually, just FYI ...

This is a forwarded message
From: cpaone@... <cpaone@...>
To: amx@... <amx@...>
Subject: CWGET and volume

===8<==============Original message text===============
Made an interesting discovery with CWGET during the Canada Day contest. I
turned the volume down on my Icom R-75 as low as it would go and still allow
signals to be seen on CWGET. It worked fine and I noticed that the decoding
was cleaner than when I cranked the volume control up. I also didn't use any
of the two preamps on the radio and the signals were very readable. Thought
I would pass this item along for the benefit of the other CWGET users.
Carmen Paone
SWL in Reading, PA

My name is
Rich Nesbitt - N9WPH
Marshfield, WI

I received the following message early this morning:

From: "dxsoft Moderator" <dxsoft-owner@yahoogroups.com>
To: <nesbitt@...>
Sent: Sunday, July 08, 2001 2:35 AM
Subject: Welcome to dxsoft

Hello,

Welcome to the dxsoft group at Yahoogroups, a
free, easy-to-use email group service. Please
take a moment to review this message.

To start sending messages to members of this group,
simply send email to dxsoft@yahoogroups.com
This is international group, so language of this group is English. Please,
don't use another languages there.

I thought I needed to send a message in order to subscribe to the group. I
hope that answers your question.

Rich - N9WPH

OK guys, if you *don't* want to be a part of this list, follow the instructions below:

To unsubscribe from this group, send an email to:
dxsoft-unsubscribe@yahoogroups.com

Stop sending email to dxsoft@yahoogroups.com. There are actually some of us who *want* to be on this list, and are getting tired of all the "unsubscribe" messages we've been getting.

From: Ken
Topic: 747 Message: 754

Hi. I see your point. The problem seems to be mainly
from countries where English is a second language.
The structure of sentences in English is so different
from foreign languages that the unsubscribe process
may be harder than we think. The un-subscribe message
states, "To unsubscribe from this group, send an email
to: dxsoft-unsubscribe@yahoogroups.com". What should
the message say, should the writer say
un-subscribe in the message Subject or in the message
Body, or should they send a blank message?? Maybe hams
who speak and write fluently in a foreign language
could post a message about un-subscribing in the
foreign language. It can't hurt, just my 2 cents
worth, Ken

Did you try to read readme.txt file? :-)

Install TrueTTY 1.75 at first, and then make upgrade.

oeps... you know those amateurs...RTFM!

the latest version I downloaded was version 1.63. It performed very wel for
my prupose, detecting RTTy from the Weater trabsmitter Pinneberg, so I
didn't download newer versios. What can I do do solve this gap?

Download V1.75 and install it over old one.
Than make upgrade to V1.81 (just replace TRUETTY.EXE).

Hello jsilver,

???????, 21 ???? 2001 ?., you wrote to me:

jwn> Can anyone explain to me how aavoice wave files are placed so that
jwn> the program works...
You need prepare file wit names a.wav ... z.vaw, 0.wav...9.wav and
stroke.wav for "/". Alse prepere files for cq and other typical words.

then run aavoice and slect Setup|edit macros. And create macroses.
Examples
~[iCall] say call from the call field AALog letter by letter
~[fcq.wav] say file cq.wav
~[iCall] ~[fgoodluck.wav] say call from the call field AALog
letter by letter an say goodluck.wav
~[tx]~[ec]~[p40]~[er]~[rx] turn TX on, say Call from edit field in AAVoice then
make pause for 0.4 sec. say rst field from
AAVoice and turn TX off

Any other questions?

Best regards,
Alexander mailto:aia@...

You're all proving that Altavista's Bablefish is pretty much just a toy, and not much else.

Want some real fun? Translate something into a second language, and then translate it back. Oh man, what a mess you get.

800. CWType settings for "CT" interface

Yahoo group: dxsoft
Date: 2001-08-03 00:45:05 UTC
From: Den Spiess
Topic: 800 Message: 800

Hi group,
Can anyone give me the ".ini" settings for CWType to send CW using a "CT" type parallel I/O Interface on parallel port # 1?
I tried a number of possibilities with no luck.
Perhaps they could be added to the help file!
Thanks
Den W2DEN

I am just preparing a paper relating experiencies (all of them positive)
done with a group of cw men of mine friends last six months.
CwGet and CwType are very well working programms with wich you can send and
receive CW from few words per minute up to 2 000 words per minute (that is
to say 5 time faster than a laser printer !) without notable decoding error.
File transmission become
easier than by wired internet.
This paper contains all the configuration files (*.ini, *.cwt, *.cwg.....)
plus the diagram and realisation tips for an Universal DSP Interface
allowing to key a transceiver instantaneously from either keyboard or iambic
paddle, through Com port or Parallel port . Trafic in all modes (sstv,
rtty, cw....) is also inherent. Sounds pass by a couple of low noise
transformers. CW speed don't have any effect on the RF signals (tried on
direct SSB transmissions or even FM repeaters) .
again thanks to Sergei for providing us a well working soft.

DS> I tried a number of possibilities with no luck.
DS> Perhaps they could be added to the help file!

As I remember, CT supports N6TR-interface.

So you should use KeyPortType=4 and KeyPortNumber depended on LPT-port base address:

LPT at 378h LPT at 278h LPT at 3BCh

KeyPortType=4 KeyPortType=4 KeyPortType=4
KeyPortNumber=1 KeyPortNumber=2 KeyPortNumber=3

Best regards,

From: Spiess, Dennis
Topic: 800 Message: 806

I am using the "standard" CT parallel I/O interface. Sorry I do not have the schematic as I made it many years ago. If you really need it I can open it up and reverse engineer it... think it is only a transistor and a resistor!

I am using the LPT1: setting : > LPT at 378h KeyPortType=4 KeyPortNumber=1 and it works OK.

If I was to start from scratch I would make a new I/O as per Sergei's diagram in the help file, so I could add a paddle to the circuit. As mine, the CT type, works and I usually travel without the paddle I'll stick with it.

Hope this helps

Hello Joe,

JS> Can anyone tell me if it is possible to add new modes yo AAlog or does this have to be done by the
JS> programmer. I work Hellschreiber, MFSK, etc and have no way of entering these QSO's.
To add new mode simple open file modes.aal (placed in the aalog
folder) in notepad and add new modes to the end of the file (or insert
in any place of the file). One mode - one string. Please note: Max mode name
length is 7 chars.

AALog will tracking this modes in award manager automatically.

Best regards,
Alexander mailto:aia@...

813. dxsoftex.dll and Visual Basic

Yahoo group: dxsoft
Date: 2001-08-11 10:39:17 UTC
From: John Mouncher
Topic: 813 Message: 813

Can anyone help? I'm trying to use Visual Basic 6 to get the data from the TrueTTY receive buffer. I have declared the following in a module:-

```
Declare Function DxsoftExchangeInit Lib "dxsoftex.dll" Alias
"_DxsoftExchangeInit" (ByVal canal As Integer) As Integer

Declare Function DxsoftGetSymFromRxBuffer Lib "dxsoftex.dll" Alias
"_DxsoftGetSymFromRxBuffer" () As Long
```

No errors are reported, but when I try to call them with:-

```
dummy = DxsoftExchangeInit(1)
symbol = DxsoftGetSymFromRxBuffer()
```

I get error 49 - Bad DLL calling convention.

Unfortunately I know very little about C++ to understand how to use the functions in VB.

Any help gratefully received,
John.

816. CwType 1.05 is there!

Yahoo group: dxsoft
Date: 2001-08-12 13:37:35 UTC
From: Sergei Podstrigailo
Topic: 816 Message: 816

Hello , All!

You can download _upgrade_ to CwType 1.05 beta from
http://www.dxsoft.com/cwtypeb.zip and
http://www.hamport.com/cwtypeb.zip

Your feedbacks are welcome ...

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

CwType Versions History

V1.05
A minor bug was fixed. The program did not restored saved speed when
inter-letter space was not equal three.
The "Setup->OnTop" menu item is used in place of "OnTop" button now.
The "Setup->Iambic Mode" menu item is used in place of "OnTop" button now.
New "Beacon" button switch on beacon mode now. In this mode Alt-F12 macro
is executed periodically. The period is defined by the regulator in left of
the "Beacon" button. The shortcuts for "Beacon" button are Alt-B and Ctrl-B.
The macrosequences ~[bon] and `[bon] switch beacon mode on,
the macrosequences ~[boff] and `[boff] switch beacon mode off.
The macrosequences ~[lsN] and `[lsN] can be used to select inter-letter space
now. There N is desured space in dots.

817. Toshiba Satellite 4030CDT with CWType, MIxW, Digipan etc

Yahoo group: dxsoft

From: Adam MAURER, VK4CP
Topic: 817 Message: 817

Hi all

Maybe off topic, but I'm considering buying a 2nd hand Toshiba Satellite 4030CDT laptop.
Main use is to run CWType/CWGet, MixW, Digipan and other ham software packages, as well as the usual MS Office suite.

Anyone else run one of these?
Just wondering what's good and what's bad about them?
Looking at the 4030 specs the in-built sound system seems ok to run the above SoundBlaster based ham software(?)

Any comments appreciated.

Adam MAURER, VK4CP

Adam
I used a Toshiba Satellite Pro 415CS (90 MHz Pentium 24M ram) for CWType, TrueTTY, WinPSK and Digipan for many years without any problems. You just need to make sure that the internal mic is turned off while running PSK but this is required for any laptop.
The soundcard was compatible with anything I tried....
Hope this helps

Hi Adam. Virtually every Toshiba laptop built up to
some date a few years ago has a built in floppy disk
problem, check the Toshiba web site for details and to
see if your model had the problem. They provided
rebates and a free software patch to fix the problem
which involved periodic corruption of saved data, best
wishes, Ken

820. interface for cw type etc

Yahoo group: dxsoft
Date: 2001-08-14 12:43:38 UTC
From: radiofreq2001@yahoo.co.uk
Topic: 820 Message: 820

hi! all,
if anyone is interested pervisell are in the process of
testing an interface for the parallel port using surface mount
components enclosed in a parallel port plug.They can be found on the
web at http://www.pervisell.com. :-dave mm5abx

821. CWtype macros

Yahoo group: dxsoft
Date: 2001-08-15 11:07:27 UTC
From: Luis Lleó
Topic: 821 Message: 821

When I use a User-defined Charset the commands to change to reception in macros ('[rx] or ~[rx]) don't work. It works right when I use the English Charset. Anybody knows how to fix this problem?

Regards.
Luis

Hello Luis,

Wednesday, August 15, 2001, you wrote:

LL> When I use a User-defined Charset the commands to change to reception in macros ('[rx] or ~[rx]) don't work. It works right when I use the English Charset. Anybody knows how to fix this problem?

Wow!
It is really my bug.
To avoid it, add next string to charset file:
} . ?

The last char is a char with F0h code.
It can be entered as Alt-0240 (at numpad keyboard).

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

826. CwType 1.10 is released!

Yahoo group: dxsoft
Date: 2001-08-17 17:05:21 UTC
From: Sergei Podstrigailo
Topic: 826 Message: 826

Hello All,

I just have uploaded CwType 1.10 into the main site and mirrors:

http://www.hamport.com/cwtype.zip
http://www.dxsoft.com/cwtype.zip
http://www.hamradio-software.com/cwtype.zip
http://www.8ung.at/dxsoft/download/cwtyp110.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
CwType Versions History

V1.10
A bug was fixed. ~[rx] , `[rx] and `[pa] macrosequences didn't
work when "User-defined Charset" option was selected.
The "Setup->Beacon Off at Paddle Press" option was made.
CwType can get data from another software to transmit now.
Data exchange can be made by DXSOFTEX.DLL library.
See http://www.dxsoft.com/dxs-exch.zip for details.
V1.05
A minor bug was fixed. The program did not restored saved speed when
inter-letter space was not equal three.
The "Setup->OnTop" menu item is used in place of "OnTop" button now.
The "Setup->Iambic Mode" menu item is used in place of "OnTop" button now.
New "Beacon" button switch on beacon mode now. In this mode Alt-F12 macro
is executed periodically. The period is defined by the regulator on the left
of the "Beacon" button. The shortcuts for "Beacon" button are Alt-B and
Ctrl-B. The macrosequences ~[bon] and `[bon] switch beacon mode on,
the macrosequences ~[boff] and `[boff] switch beacon mode off.
The macrosequences ~[lsN] and `[lsN] can be used to select inter-letter space
now. There N is desured space in dots.

CwType doesn't use soundcard at all!
It use simple interface for transceiver control via COM- or LPT-port ...

And CW is not digital mode :-)

Topic: 830 Message: 833

Larry,

CwType uses the LPT or COM port. The scematic interfaces on the help pages
of the program give you an idea of what you have to do to 'key' your
transceiver like you normally would do whit a paddle or normal keyer. So
the output of the interface goes into the same plug-in on the TRX.

I use the LTP1 port with an interface (commercially) and with an Y-adapter I
have my paddle and the interface sitting on the same input together. I can
'key' the keyboard trough CwType and take over with the paddle any time ...

Good luck !
Phil, ON4BAW

Dear om n7dc, not only you are absolutly right, but Cwtype works well like digital mode , even your rig is set in cw, ssb, fm (on repeater also) mode. However cwget needs some modifications to be a guenuine dsp soft, i hope that it will be highly regarded by Sergei, given at this time the amazing results we got in very high speed Cw (we are not tricky customer knowing well what we talk about !).
73' and cul in digital cw.

837. AAlog 2.0 release is here

Yahoo group: dxsoft
Date: 2001-08-26 19:52:27 UTC
From: Alexander Anipkin
Topic: 837 Message: 837

Hello dxsoft,

I just upload AALog 2.0 release on our websites.

AALog ver. 2.0 release - 26 Aug 2001

- fixed some minor bugs
+ callbook access is rewritten. AALog can automatically insert
callbook info in the Name and QTH fields now.
+ help file is included

you can download it from

update version
ONLY for AALog 2.0 beta 7 !!!
For other versions update coming soon.

http://www.dxsoft.com/aal_update.zip
http://aalog.hypermart.net/aal_update.zip

AALog full install single file (6 616 222 bytes)
http://www.qsl.net/rz4ag/files/aal2full.zip

AALog full install (5 files for floppy disks)

Disk 1 (1?405?310 bytes)
http://www.dxsoft.com/aal2-d1.zip
http://aalog.hypermart.net/aal2-d1.zip

Disk 2 (1?412 808 bytes)
http://www.dxsoft.com/aal2-d2.zip
http://aalog.hypermart.net/aal2-d2.zip

Disk 3 (1?422?117 bytes)
http://www.dxsoft.com/aal2-d3.zip
http://aalog.hypermart.net/aal2-d3.zip

Disk 4 (1?440?547 bytes)
http://www.dxsoft.com/aal2-d4.zip
http://aalog.hypermart.net/aal2-d4.zip

Disk 5 (937 464 bytes)
http://www.dxsoft.com/aal2-d5.zip
http://aalog.hypermart.net/aal2-d5.zip

Subject: Re: cwtype interface

Dear Mr Little

News sure travel fast:-)

We should have them in production by the end of the week. Prices as
follows

UK = £18.99 EU=£21.99 (Includes Swiftair Post) Rest (inc USA) = £17
All prices including Post and Packing.

This is the parallel port version, and now becomes another addition to the
demodulator family, thanks to customer request.

It will be on the website very soon (it will first appear on the order form that
you can reach via www.pervisell.com/ham/maindmdb.htm

(keep refreshing it, else you'll miss it)

All the best

Phil

Hello,
I have my artificial hip now and be at cure for rehabilitation .
At my free time, I played for a long time with AALog. I typed in all my old Logbooks. All the QSOs of the sixties and seventies are now keyed in.
But now for newer contacts, I attempted an import of logfiles in ADIF.
Nevertheless these files do not contain all details. Then I tested it in the 'text' mode. However, an error announcement always comes.
I tried a file, exported from AALog befor, but I got the same message:

from 'import.err':
30.08.2001 14:46:29 - wrong time: 14.11.1976 10:40 GI4AHP 14 RTTY
599 599 Ted Belfast
T T

What happens? Where is the error? Does anyone got the same?

844. TrueTTY 1.83 beta is published !

Yahoo group: dxsoft
Date: 2001-09-09 14:17:01 UTC
From: Sergei Podstrigailo
Topic: 844 Message: 844

Hello All,

I just have upload _upgrade_ to TrueTTY 1.83 beta to the main
site and mirrors:

http://www.dxsoft.com/truettyb.zip
http://www.hamport.com/truettyb.zip
http://www.hamradio-software.com/truettyb.zip

Your feedbacks are welcome.

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

TrueTTY Versions History

V1.83
AFC algorithm was improved for speed above 75 Baud or shift below
85 Hz. This algorithm is used in AMTOR and AX25 modes also.
The "Setup->AFC At Mouse Click" option was made. When is option
is selected TrueTTY make fast AFC to near station after mouse
click on spectrogram regardless of "AFC" button state.
The "Send Whole Word Only" option was made. In this mode software
doesn't start to transmit next word until space symbol or line
feed is entered.
New "Beacon" button switch on beacon mode now. In this mode Alt-F12 macro
is executed periodically. The period is defined by the regulator on the left
of the "Beacon" button. The shortcuts for "Beacon" button are Alt-B and
Ctrl-B. The macrosequences ~[bon] and `[bon] switch beacon mode on,
the macrosequences ~[boff] and `[boff] switch beacon mode off.
The ExCanal parameter of the TRUETTY.INI file defines canal number
for data exchange via DXSOFTEX.DLL library now.
V1.81
Filter parameters were changed for better BPSK and QPSK decoding.
V1.78
An old internal bug was fixed.
V1.77
The old bug with Alt-T keystroke was fixed. Sometimes it was necessary
to click on them twice to switch transmitter on.
If there are several sound cards in a computer, you can select
the card by the "SoundCardNumber" parameter of [RTTY] section of
TRUETTY.INI file. (SoundCardNumber=0 , SoundCardNumber=1 etc.)

Betreff: Re: import text

Hello Alexander, tnx for answer.
Yes, of course. In past I had the same troubble with 'wrong date' till I found the correct format. But I tried several time formats without success. I believe the import format should be the same as the export format, isn't it?
The import from text see at 'Kopie von import.jpg' and the result from 'import.err' is:
02.09.2001 11:25:36 - wrong time: 21.06.1999 09:25:00 14242.000 SSB HB9LSU 59 59 Roger Spreitenbach.

What's wrong there ?

846. Re: TrueTTY 1.83 beta is published !

Yahoo group: dxsoft
Date: 2001-09-09 17:57:22 UTC
From: Serge (UA9OGC)
Topic: 844 Message: 846

Hi, folk!

If you are using the option "Send Whole Word Only" you must insert a space
after the last word in your macros. Differently it cannot be transmitted.
Check your macros!

847. TrueTTY 1.85 was released!

Yahoo group: dxsoft
Date: 2001-09-14 10:53:12 UTC
From: Sergei Podstrigailo
Topic: 847 Message: 847

Hello All,

I have uploaded release of TrueTTY 1.85 at the main site and mirrors:
http://www.dxsoft.com/truetty.zip
http://www.hamport.com/truetty.zip
http://www.hamradio-software.com/truetty.zip

Your feedbacks are welcome!

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

TrueTTY Versions History

V1.85
Release version. Documentation was update.
"Setup->View->Logarithmic Spectrogram" menu command or Ctrl-Z hotkey
switch oscillogram window between linear or logarithmic scale.
To avoid problems with macrosequences, the ']' symbol is treated as
word separator in the "Send Whole Word Only" mode.
Minor bug with macro button drawing in system with "large" font was fixed.
V1.83
AFC algorithm was improved for speed above 75 Baud or shift below
85 Hz. This algorithm is used in AMTOR and AX25 modes also.
The "Setup->AFC At Mouse Click" option was made. When is option
is selected TrueTTY make fast AFC to near station after mouse
click on spectrogram regardless of the "AFC" button state.
The "Send Whole Word Only" option was made. In this mode software
doesn't start to transmit next word until space symbol or line
feed is entered.
New "Beacon" button switch on beacon mode now. In this mode Alt-F12 macro
is executed periodically. The period is defined by the regulator on the left
of the "Beacon" button. The shortcuts for "Beacon" button are Alt-B and
Ctrl-B. The macrosequences ~[bon] and `[bon] switch beacon mode on,
the macrosequences ~[boff] and `[boff] switch beacon mode off.
The ExCanal parameter of the TRUETTY.INI file defines canal number
for data exchange via DXSOFTEX.DLL library now.
V1.81
Filter parameters were changed for better BPSK and QPSK decoding.
V1.78
An old internal bug was fixed.
V1.77
The old bug with Alt-T keystroke was fixed. Sometimes it was necessary

to click on them twice to switch transmitter on.
If there are several sound cards in a computer, you can select
the card by the "SoundCardNumber" parameter of [RTTY] section of
TRUETTY.INI file. (SoundCardNumber=0 , SoundCardNumber=1 etc.)
V1.76
HF-PACKET (300 bps) monitoring was made (Mode->AX25).
[...]

848. K4TCM e-mail?

Yahoo group: dxsoft
Date: 2001-09-22 14:48:59 UTC
From: Sergei Podstrigailo
Topic: 848 Message: 848

Hello All,

Can anybody tell me e-mail of Thomas C. Martindale, K4TCM ?
I can't send reg-code to him for wrong e-mail address.

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

849. W0NLC e-mail?

Yahoo group: dxsoft
Date: 2001-09-30 04:49:39 UTC
From: Sergei Podstrigailo
Topic: 849 Message: 849

Hello All,

Can anybody tell me valid e-mail of W0NLC, Jack M . Walden ?
I can't send reg-code to him because e-mail in order doesn't work :-(

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

850. TrueTTY 1.87 beta is there!

Yahoo group: dxsoft
Date: 2001-10-13 18:16:07 UTC
From: Sergei Podstrigailo
Topic: 850 Message: 850

Hello All,

I just have uploaded TrueTTY 1.87 beta to the main site and mirror:
http://www.dxsoft.com/truettyb.zip
http://www.hamport.com/truettyb.zip

FSK-demodulater was rewritten. So decoding of RTTY, ASCII, AMTOR and AX25
should be vastly improved now.

Your feedbacks are very welcome!

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

851. A new beta-version of TrueTTY is there!

Yahoo group: dxsoft
Date: 2001-10-21 11:37:34 UTC
From: Sergei Podstrigailo
Topic: 851 Message: 851

Hello, all!

TrueTTY 1.88 beta was uploaded to

http://www.hamport.com/truettyb.zip and
http://www.hamport.com/truettyb.zip

Please, test it.
FSK-demodulator was fully rewritten.
So program size was descend more then threefold,
but decoding quality should be improved ...

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

852. A new beta-version of TrueTTY is there!

Yahoo group: dxsoft
Date: 2001-10-23 18:02:32 UTC
From: Sergei Podstrigailo
Topic: 851 Message: 852

Hello, all!

TrueTTY 1.88d was uploaded to

http://www.hamport.com/truettyb.zip and
http://www.hamport.com/truettyb.zip

Filters for FSK-modes were optimized.

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

They can't receive like a human. There is no answer, no program can and
that is the end. CW Type is what he wants but CW GET is good ONLY for well
sent code, mostly by machine,

IT is too bad but that is the way life is,

Not exactly true. Although no program can receive CW as well as the human ear can (at least not yet), CWGet makes a respectable effort at it. Probably among the better computer efforts I've seen. And I've seen it copy less than well sent code under less than perfect conditions quite often.

From: robert dufour
Topic: 858 Message: 858

Once more the newer Hams should serve the stupid glib's convictions. In SSTV, PSK31, CW we got their unanswerable arguments
but collating it shows a lack in true experiencies, that is the way life is !

Nowaday, you probably can't find better soft than CWGET and CWTYPE. The programmer, Sergei, said that CW is not a digital
mode (may be because CWTYPE keys the TX by the old way ?), he is wrong on this point : a small modification allows CWTYPE
to works as a full DSP programm through the sound card with matchless performances.

CWGET decodes perfectly and further more knows its own limits (have you seen what is displayed in parenthesis ?).
Human ear is so far of these performances and its only avantage (helped by our brain !) is to be able to integrate a defectuous CW, wich is unthinkable from a soft.
"I decode better by ears" is bragging and dodging the question.
Recording spectral display of many CW transmissions shows how many 'good' keying is actually "sent with the third feet", especially
among the speed challengers.

Timely words come not from a way-out or senile guy but from a certified First Class Radio Officer (05/05/1951) playing with a vibroplex
(and with CW soft) currently at 50w/m but doing as many keying errors that everybodies do.

At last, old fellows CWMEN, don't close yourself in your ivory tower, it is not the right thing to do for the everlastingness of our Art .

Here's a typical one.. the sender (usually a long time "CW op") whose hand keying sounds just like a string of dots because he doesn't hold the key down long enough to make a proper dash, and instead uses spaces between dits and "dahs" to differentiate between them! Of course, no CW copying program can understand them, and frankly, I can't either.

Recording spectral display of many CW transmissions shows how many 'good' keying is actually "sent with the third feet", especially
among the speed challengers.

From: n7dc@cs.com
Topic: 858 Message: 863

Back to the question at hand. I have tested several cw reader software packages, both with sound cards, and the MFJ1278B tnc.
Of them all, the best response on cw receive was from "Lanlink" software using the MFJ1278b. It copies fairly well, even hand send code. A great way to check your own keying, is having it hooked up and monitoring what you are keying in by hand. It will copy almost 100%, if you send that way. With poorer sending, you get what you get. I have copied electronic keyers, bugs and straight keys with it and am impressed with what it can do. It appears that the faster the code, and of course that code sent by automatic keyers, the better the copy. So far there is only a tnc version of the software, but the author is working on a windows sound card version, and has selected a few of us to be his beta testers, and we are anxiously awaiting the beta discs at this time. After the teststing, and upfixes I will write up a blurb about it.

864. Good Software CWGET and CWTYPE

Yahoo group: dxsoft
Date: 2001-10-24 15:00:19 UTC
From: Junichi Matsuo
Topic: 864 Message: 864

Hello all,

I became a user of CWGET and CWTYPE some months ago, and since then I use those on 144/430 MHz for both
contest and ordinary QSO. Those two software work great in these bands, even though I sometime come across
awful unreadable keying, like someone recently pointed out. However, since I only need to focus on to decode
such awful keying by my brain, and clear keying can be decoded by CWGET, these help me a lot especially
during contest.

I respect such great work done by dxsoft programmers. I have not tested these software on HF or 50MHz which
would have more QRM and QRN than VHF/UHF since I am living in apartment. However, I am planning to buy new
HF/50 rig and compact antenna soon, and I am looking forward to find out the cutting edge of performance of
these extraordinary software.

By the way, I have some requests on these programs. Because I think these are a little bit trivial thins, I
will not be disappointed if you pick up. However, I would be appriciate if you take my suggestion into next
version.

(1) CWTYPE requires to connect PTT line between PC and rig. However, some recent rigs accept PTT ON command
by radio control command, such as ICOM CI-V. Famous MMTTY and MMSSTV by JE3HHT can use such command.
(2) This one might be only for Japanese users. As far as I know, English "A", Swedish "A" and Russian "A" use
the same morse code ".-". Therefore, if you make your CWGET in Russian mode, you could decode both Russian
and English virtually seamlessly. (I am not perfectly sure this, since I could not speak either Swedish or
Russian (To tell the truth, I learnt Russian once, but I have never become to handle it...)) However,
Japanese Katakana CW code use "SHIFT CODE" like baudot RTTY code. When you recieve "-..---" you should change
your brain to "Katakana mode", and ".-" means particular Japanese Katakana character. When you recieve
"-...-"(BT) your brain must be English mode, and ".-" means "A". In addition to these "Shift CW code", there
are some other code which have similar function. Becuase character set change function of CWGET and CWTYPE is

manual function, to decode Japanese CW code needs frequent use of this fuction by hand.
(3) Last one is probably only for me, and it could be probably resolved by making small tool by myself. I am
sorry to say that I am not user of AAlog. Instead of AAlog, I use "Hamlog" which is quite popular for
Japanese amature because it designed particuraly for Japanese users. It means that I should type at least
callsign and RST twice for one QSO, one for CWTYPE, another for hamlog. Since "hamlog" accepts "Windows
messaging"(I forgot the proper name, but OLE?, DDE?..) in its input screen, it would be quite nice to have
programming function on "windows messaging" in CWTYPE or CWGET program.. (I have downloaded dxs-exch.zip and
document similar to dxs-exch.zip of Hamlog software, but I have not analyzed deeply enough both documents
yet.. My programming knowlede is MS-DOS era, I should update my brain to Windows era also...)

Anyway, I have to say again that thank you to distribute such great CWGET and CWTYPE.

Regards,
Junichi Matsuo (JJ1ONR), Tokyo, Japan

There are more bad high speed operators than there are good.
I had a friend W7MME who was a very good high speed operator.
He had lost almost all his hearing in WWII. He would turn the
sound up to his head set and copy just about any speed.
He built a keyboard to send good CW in 1970.
CWTYPE supports the serial port and that is how I use it to get
QSK CW. CWGET has lots of adjustments to copy just about any speed
as long as the other operator sends good Morse code.
I am not a very good CW operator, but I can send very good Morse
code at 20 WPM with a straight key. CWGET can copy my code. If I am
having a bad sending day I will switch to a paddle or keyboard
so the other operator does not have to copy bad CW.
MixW also sends and receives Morse code, but it has no adjustments.

I'm pretty sure that in this case you're not dealing with the capabilities of the software to copy CW, but the capabilities of the TNC. The software just acts as a "dumb terminal" from the TNC to your PC
the best response on cw receive was from "Lanlink" software using the MFJ1278b

I have used other softwar3e on the mfj- and it did not copy cw anywhere as well, so it is not on the tnc, but the software that determines the final copy.

Dear om Junichi, I shall give you elements on some points you mentionned in your post :
Since six months ago we do tests (trying to be meticulously truthful) on high speed CW
(from 200 to 1000 w/m) through dsp mode modulating either on continuous wave channel (actual CW),
SSB channel (usb or lsb), FM channel (like repeater) on all the allowed ham bands. The results are at least surprising.
To get good results (less 5% errors for rx and tx ways) the links between PC and Transceiver must be
as simple and short as possible, this is why we work with sound card and an interface of good performance:
you must avoid damping and long transcient times for all the signals.When using normal CW keying jack
some transceivers presents poor quality even in full break-in CW, they reach their limits soon while others
are truly fast in switching. The best at high speed should work also at lower speed.
Like we transmit by this way files and pictures we had to define our own "morse alphabet set" in respect of the
original, while we use CWGET and CWTYPE simultaneously at "human speed" and sometimes in hand keying
with a ?ambic paddle or a vibroplex keyer. No problem for this, but I am unaware of japanese letter sets.
73' robert f6bed.

lgc> rig control....Larry-K8EJU...

CwType can work with COM1...COM9

Use
KeyPortType=2
KeyPortNumber=5
for COM5 ...

Best regards,
Sergei mailto:amx@...

Hello Dionisio,

Thursday, October 25, 2001, you wrote:

DA> EXPLANATION OF THE SENT MESSAGE
DA> Thank you friends to answer to my consultation application on a program of TX and RX of CW, was the only thing that doesn't specify that I need to use it with the CARD OF SOUND and NOT with modem
DA> ok?.
DA> For I make it again this order but clarifying that it is for their use with CARD OF SOUND, as I use it in all the digital ways.-
DA> A hug of Dion

You don't need modem for CwGet and CwType.
CwGet uses sound card only.
CwType uses a simple interface (a couple of transistors or opto-transistors)
on COM- or LPT-port to keying transceiver. Optionally you can connect paddle to
joystick- or LPT- port.

Best regards,
Sergei mailto:amx@...

Subject: RE: Re: about cw softs.

Back to the question at hand. I have tested several cw reader
software packages, both with sound cards, and the MFJ1278B tnc.
Of them all, the best response on cw receive was from "Lanlink"
software using the MFJ1278b. It copies fairly well, even hand send code. A
great way to check your own keying, is having it hooked up and monitoring
what you are keying in by hand. It will copy almost 100%, if you send that
way. With poorer sending, you get what you get. I have copied electronic
keyers, bugs and straight keys with it and am impressed with what it can do.
It appears that the faster the code, and of course that code sent by
automatic keyers, the better the copy. So far there is only a tnc version
of the software, but the author is working on a windows sound card version,
and has selected a few of us to be his beta testers, and we are anxiously
awaiting the beta discs at this time. After the teststing, and upfixes I
will write up a blurb about it.

876. New software from the DXsoft group

Yahoo group: dxsoft
Date: 2001-10-25 15:39:41 UTC
From: Alexander Anipkin
Topic: 876 Message: 876

Hello dxsoft,

I want to present the first beta-version of the DXsoft cluster
monitor. It program for monitoring OH2AQ web-cluster.

you can download it from
http://www.hamport.com/clmonitor.exe
http://aalog.hypermart.net/clmonitor.exe

All suggestions are welcomed.

Best regards,
Alexander mailto:aia@...

878. Re: New software from the DXsoft group

Yahoo group: dxsoft
Date: 2001-10-25 15:49:19 UTC
From: Louis Sica. Jr.
Topic: 876 Message: 878

Since you're into a rewrite of TrueTTY and are also thinking of new software, how about adding MFSK16 to TrueTTY?

879. Re[2]: New software from the DXsoft group

Yahoo group: dxsoft
Date: 2001-10-25 16:29:31 UTC
From: Sergei Podstrigailo
Topic: 876 Message: 879

Hello Louis,

Thursday, October 25, 2001, you wrote:

LSJ> Since you're into a rewrite of TrueTTY and are also thinking of new
LSJ> software, how about adding MFSK16 to TrueTTY?

I hope to do it, but can't promise nothing ...

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

880. Re[2]: New software from the DXsoft group

Yahoo group: dxsoft
Date: 2001-10-25 16:38:22 UTC
From: Alexander Anipkin
Topic: 876 Message: 880

Hello Louis,

LSJ> Since you're into a rewrite of TrueTTY and are also thinking of new
LSJ> software, how about adding MFSK16 to TrueTTY?
TrueTTY is the product of Sergei, but Cluster monitor is software from
another programmer.

Best regards,
Alexander mailto:aia@...

881. Windows XP and DXSOFT programs

?by the way, there is a south African guy that makes a keyer
with a built in CW reader, allowing you to monitor your own sending and
receive. Nice unit, battery operated. If interested, I can find and send you
the information on it. I used it as a monitor to learn code when I passed my
code test.

Subject: RE: Re: about cw softs.

Back to the question at hand. I have tested several cw reader
software packages, both with sound cards, and the MFJ1278B tnc.
Of them all, the best response on cw receive was from "Lanlink"
software using the MFJ1278b. It copies fairly well, even hand send code. A
great way to check your own keying, is having it hooked up and monitoring
what you are keying in by hand. It will copy almost 100%, if you send that
way. With poorer sending, you get what you get. I have copied electronic
keyers, bugs and straight keys with it and am impressed with what it can do.
It appears that the faster the code, and of course that code sent by
automatic keyers, the better the copy. So far there is only a tnc version
of the software, but the author is working on a windows sound card version,
and has selected a few of us to be his beta testers, and we are anxiously
awaiting the beta discs at this time. After the teststing, and upfixes I
will write up a blurb about it.

Hi,

I installed Beta 0.1

Some remarks :

It would be nice to have new spots on top of the list instead of on the
bottom.
So you can easely follow new DX spots without scrolling the windows ...

887. Problem with: DX Monitor

Yahoo group: dxsoft
Date: 2001-10-27 13:51:05 UTC
From: oe1mww@yahoo.com
Topic: 876 Message: 887

Hello,

I have set the connection properties to LAN, because my dial up
connection is established. After clicking connect I receive a 'Null
remote Address' button.

Same happens if I dial up with DX Monitor.

I left the proxy setting open, because I do not use a proxy -can this
be the problem ?

Just browsing and saw this one.
Not true I'm afraid. What it is is a BINARY signal but binary signals can
be transmitted as analog or digital signals.
The examples you show are all two-state ie binary signals.

A very interesting keyer, which I am using, is the Macrobug 8515 from DK5JG. I use this keyer always in combination with CWget and my TRX (TS2000).

895. New software from the DXsoft group

Yahoo group: dxsoft
Date: 2001-10-31 14:06:26 UTC
From: Alexander Anipkin
Topic: 876 Message: 895

Hello dxsoft,

New beta of DXsoft cluster monitor is ready.

What's new:

-Jump on top after loading was added;

-Null remote address error when time synchronization server is not entered is fixed.

-Windows XP themes support was improved

-Column position storing was added

-New spots window was added. It?s a dockable window. It?s possible to dock window to the all spots tab of main window.

you can download it from
http://www.hamport.com/clmonitor.exe
http://aalog.hypermart.net/clmonitor.exe

All suggestions are welcomed.

Best regards,
Alexander mailto:aia@...

896. dxsoft with on board sound

Yahoo group: dxsoft
Date: 2001-10-31 16:22:54 UTC
From: Louis Sica. Jr.
Topic: 896 Message: 896

Anyone ever run DXSoft programs TrueTTY and CWGet on a machine with the sound built right into the motherboard? I'm looking to upgrade my current PC from a PIII-600 to an Athlon XP 1500+ and the motherboard comes with sound already built in.

897. Re: dxsoft with on board sound

Topic: 896 Message: 898

There are here five homebrew pc, two have QDI Kinetiz 7 Motherboard with
Crystal Semiconducteur 4236 sound chipset
right on the motherboard, CPU AMD athlon 800mhz., one with Windows 98SE ,
one with Linux.
All these programms work perfectly and currently through a simple interface
(schematics here joined) :
Cwget, Cwtype, TrueTTY - MMSSTV - MMTTY- Zakanaka - Logger - WinpskSE -
Pskpal- Hamscope-
Digipan - Dxpsk - Chromapix -
More than eighty differents programms has been tested here for at least one
month without any problem concerning
the hardware : DSP technics are nowaday reliable.

Hello Ed,

Thursday, November 01, 2001, 11:48:40 AM, you wrote:

E> As long as the onboard sound card is duplex, it should work just fine.

It is NOT necessary to have full-duplex sound card for CwGet or
TrueTTY.

E> Anyone ever run DXSoft programs TrueTTY and CWGet on a machine with the
E> sound built right into the motherboard? I'm looking to upgrade my current PC
E> from a PIII-600 to an Athlon XP 1500+ and the motherboard comes with sound
E> already built in.

CwGet and TrueTTY use sound card via Windows API,
so they work with almost any sound card with Windows driver installed.

916. New software from DXSoft

Yahoo group: dxsoft
Date: 2001-11-16 16:12:58 UTC
From: Sergei Podstrigailo
Topic: 916 Message: 916

Hello All!

http://www.dxsoft.com/switcher.zip
http://www.hamport.com/switcher.zip

======
DXSoft Switcher is a simple software to handle devices connected to
an LPT-port (for example, a set of relays for antennas switching).

The "1" button erects a logical one at pin 2 of an LPT-port,
the "2" button sets high level at pin 3 and so on.

The program can be launched with two command line parameters.
An /LPTx parameter defines used LPT-port. (/LPT1 , /LPT2 and so on).
LPT1 is used by default.
An /Ontop parameter puts Switcher in front of all windows.

There is example of command line:

"C:\Program Files\Switcher\Switcher.exe" /LPT2 /Ontop

The program is free of charge.

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

Yahoo group: dxsoft
Date: 2001-11-18 15:27:31 UTC
From: Sergei Podstrigailo
Topic: 919 Message: 919

Hello All,

CwType 1.12 was published. See
http://www.dxsoft.com/cwtype.zip or
http://www.hamport.com/cwtype.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
CwType Versions History
V1.12
A bug was fixed. "OnTop" mode didn't work correctly after "Edit Macros"
command executing.
The "File->Open Capture File" command opens capture-file for
transmitted symbols. If file exist, new symbols are appended to it.
The "File->Close Capture File" command closes capture-file.
Capture-file state is shown in status-line. Hotkey for capture on/off
commands is Alt-L. The command line argument "/c Filename" can be used to
open capture file at the program startup.

I just wrote a little batch file that I can run in a dos window that backs the files up to another directory. Works for me.

```
cls
c:\
cd\progra~1\aalog2\logs
copy *.* c:\progra~1\aalog2\backup
```

You will have to create the directory backup as shown. If you want to copy to a floppy just change the last line as follows
`copy *.* a:`

I put this little batch file in the aalog2 directory and then drug a shortcut out to the desktop.

Hi Robin

Avery Labels L7162 is in fact two column 8 down total 16 labels. the correct label is L7172. That's 2 columns 9 down total of 18 labels

cheers

From: RTrebil640@aol.com
Topic: 922 Message: 927

Hello Chris,
Yes, the point that I was querying is that the drop down menu shows
L7162 2x9, but it actually prints 2x8. I had some J8162 pages in
stock (also 2x8), and the print fitted onto those, so no problem. But
I think there is an error in the drop down menu in the version of
AALog which I have (v2.0)
I have some L7172, but the print doesn't fit onto those!
It would be nice on later versions, Alexander, to be able to
customise the page layout so that we could adjust it to whatever
labels we want to use!!

Yahoo group: dxsoft
Date: 2001-11-21 12:56:29 UTC
From: RTrebil640@aol.com
Topic: 922 Message: 928

Sorry Alexander.....the full name of the printer is
Epson Stylus Color 680. It prints labels from all my other software
as set up in the computer. I think there is a mistake in the drop
down menu in AALog2. If I select the 2 column 9 row option from the
menu, when I look at the preview screen, the spacing of the labels is
for 8 rows to the page, even though I chose 9 from the menu in QSL
Service. But although the spacing is correct for 8 rows per sheet,
only the first 7 rows appear on sheet 1. The last row appears at the
top of a new sheet, page 2 in the Preview
I wonder if the label printing utility has become corrupted in some
way. If so, I could probably extract AALog2 into another directory
and copy the new labels file into my existing directory

933. Cluster monitor 0.3 is here

Yahoo group: dxsoft
Date: 2001-11-23 09:35:00 UTC
From: Alexander Anipkin
Topic: 933 Message: 933

Hello

New beta version of the Cluster monitor is available.

You can download it from
http://www.hamport.com/clmonitor.exe
http://aalog.hypermart.net/clmonitor.exe

Please write bug reports and suggestions to Eugene Danilenko
eugene@...

0.3 beta
- Full DX Atlas support was added. Now it's possible to display point of DX or Spotter on the
map and display last 25 spots.
- Spots validation was added. It's possible to ON/OFF this feature.
When validation is turn on then all spots with time higher
then NOW + {validation interval} minutes would be deleted.
- Possibility of date showing in the Time field was added
- Display DX info was added. It's dockable window too.
- Search menu was added.
0.2 beta
- New spots window was added. It's a dockable window. It's possible to dock window to the
all spots tab of main window.

0.1.2 beta
- Column position storing was added

0.1.1 beta
- Jump on top after loading was added;
- Null remote address error when time synchronization server is not entered is fixed.
- Windows XP themes support was improved

0.1 beta
- first beta version

--
Best regards,
Alexander mailto:aalog@...

939. Viruses

Yahoo group: dxsoft
Date: 2001-11-27 18:23:18 UTC
From: Alexander Anipkin
Topic: 939 Message: 939

Hello dxsoft,

In this mail-list attaches are disabled. You can't receive virus from this mail-list.

BE CAREFUL IF YOU USE M$ OUTLOOK then download patches from www.microsoft.com for it. If you use another mailer or you already patched your Outlook then don't open attached files with strange names.

Best regards,
Alexander mailto:aia@...

Russell, I do not remember the file name and
the e-mail is now deleted. I do not remember
the name of the virus which was attached.
I use F-PROT from command software and there
are updates about once a week. I think the
worm virus was a new one.

Badtrans seems to be the flavor of the day today.
BTOpenworld one of the UK's biggest ISP's unwittingly distributed it to over 1000 of its own customers this morning.

I'd recommend all list members ensure that their anti-virus software is completely upto date.

It's W32.Badtrans.B@mm. If you search for a file kdll.dll and find it on your system, you have the virus, which can send out your credit card and password details. The latest Norton update (after 24 November) detects and can fix this virus. I have been attacked 3 times, in each case using address book data obtained from infected Yahoo Group members

After sending a message inadvertently with an attachment to the reflector, I
received a lot of empty mails to 'dl2rr@...' with an attachment of 0
bytes, from:
Manuala G?ller, cokepeople,Stephan Ruland,dufour, stevenwhite, an empty
sender field and still a couple of others whom I forgot.
with Betreff field 'Re:' or 'Re: Re: need translator'

I forgot to delete one, and it opens a download window and closed it
immediately before I could read it. I read all emails OFFLINE !

Does anyone got the same?

Hello dxsoft,

What you think about integration DXSoft cluster monitor and cellular phones. We can add service for sending short messages from cluster monitor to your phone.

Do you need feature like this?

Thank you.

Hi All !

I've just discovered the DXSoft web site, boy wish I'd found it earlier !

Anyways, I've just downloaded and installed the Beta version of DX Monitor,
excellent package !

When I try and use a few of the facilities in the package I get an error
message saying
class not registered ?

I know this is a beta test version so I don't expect it to perfect, but just
wondered
if there is something I haven't got installed that is required or if this is
a featurette ?

Also, I can't see any registration info on the web site, can anyone shed any
light on
how much it's going to cost ?

I'd like to register and keep using it for as long as possible !

Look forward to some replies ...

Cheers!

These features needs installed DX Atlas (http://www.dxatlas.com).
You could read about it in DXSoft_Cluster_Monitor_readme.rtf file.

This is beta version and it's free in the meantime. We think about
price and when we will roll out the commercial version we say about
registration information without fail.

That is not registration in the sense of buying the code. They are talking about a class in the sense of a programming part for an object oriented program. It is probably C++ and something is missing. The registration is in the system registry. Either the part is missing or the install did not work correctly or it is not supported in your current OS.

962. AALog contest module

Yahoo group: dxsoft
Date: 2001-12-13 19:05:24 UTC
From: Alexander Anipkin
Topic: 962 Message: 962

Hello dxsoft,

First alpha version of the new contest module is ready.
Now it configured only for ARRL 10 meters contest.
you need unzip file in any folder and run AALTest2.exe
Go to Config|station and enter your station information.
In the new QSO window use "Enter" for fast change from call to received
number and from rec. number to save qso. For fast switch between
Call and Rec. Number use 'Spacebar'.

In the calls window you can see callsigns worked in contest. Bold
and Blue - you can work it. Black - already worked.

To clear log delete file aaltest.dat from the program folder.
To delete single record select this record in qso list window and
press Ctrl+Del

This module use CWType and it's macroses for CW manipulation.

After test you can save the log in cabrillo format.

Please fill free to send your bugreports, questions and suggestions to me.

You can download from

http://aalog.hypermart.net/download/aatest.zip
http://www.aalog.com/download/aatest.zip
http://www.dxsoft.com/download/aatest.zip

970. AALog v2.1

Yahoo group: dxsoft
Date: 2001-12-21 21:36:08 UTC
From: cics16
Topic: 970 Message: 970

I'm looking forward to version 2.1 with export in Cabrillo format!!!

The beta contest module is neat, but I'll probably want to keep using the normal log functions. As long as it will export to Cabrillo (so the ARRL is happy), I'll be happy.

Thanks for making excellent logging software!

(Any idea when v2.1 (or v2.1 beta) will be out???)

- Dave, WD0HWX

Hello cics16,

Saturday, Saturday, December 22, 2001, you wrote to me:

c> I'm looking forward to version 2.1 with export in Cabrillo format!!!
Please be patient. ver 2.1 will be released in one or two weeks. Many
new features will be added.
c> The beta contest module is neat, but I'll probably want to keep using
c> the normal log functions. As long as it will export to Cabrillo (so
c> the ARRL is happy), I'll be happy.
Cabrillo export will be included in this version.

Thank you.

972. TrueTTY 1.90 was released!

Yahoo group: dxsoft
Date: 2001-12-24 19:37:35 UTC
From: Sergei Podstrigailo
Topic: 972 Message: 972

Hello All,

I just have uploaded TrueTTY 1.90 to
http://www.dxsoft.com/truetty.zip and
http://www.hamport.com/truetty.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
TrueTTY Versions History

V1.90
UHF-PACKET (1200 Baud) decoding was made.
The "Grid" option was added to context menu to transfer received
QTH-locator to logger.
The 182 Hz shift value was added to the shift menu. This value is optimal for
interchannel crosstalk reducing at 45.45 Baud speed.
V1.88
FSK-demodulator was fully rewritten.
V1.87
FSK-demodulator was rewritten. So decoding of RTTY, ASCII, AMTOR and AX25
should be improved now.
V1.86
A bug was fixed. "OnTop" mode didn't work correctly after "Edit Macros"
command executing.
[...]

Yes, see Setup->Rx Window Font Setup.

JR> Also, can one
JR> adjust the weighting of the dots and dashes?

There are not manual weighting regulators,
but CwGet can decode signals with rather wide weighting.

Its simply a voice keyer program, to be used with a computer interface to the rig. You use it to do CQing, and give responses etc. It cost money, and quite frankly, after testing it out here,,I am not impressed, and continue to use my mfj voice keyer until I can get a freebee from someplace else.

No Alex, the MFJ wasnt free, but it does many things that I wanted, RTTY and CW, and was bought sometime before the first sound card programs started coming out. Its a nice interface, and now there are also programs being written for it to run PSK as well. As to your program, I tested it out sometime ago, and couldnt get it to run on my soundcard, very well. There was too much garble out put from the computer, and would not drive the mike input cleanly. Havent had the problem with any of the PSK /RTTY etc. programs, so dont know what is causing it. I just dont have that much use for the program, other than contests, and then the MFJ keyer is more convienant, with 4 buttons to quickly push, and the rigs mike plugged directly into it so that changes can quickly be made in the memory. I find that is the main problem with most all computer programs for ham radio- too much time and effort to make quick changes.
Danny

993. New version of the contest module

Yahoo group: dxsoft
Date: 2002-01-02 07:39:02 UTC
From: Alexander Anipkin
Topic: 993 Message: 993

Hello dxsoft,

I just upload new version of the AALog contest module.
It support CQ WW DX, ARRL 10 meters, ARRL RTTY roundup contest,
Japan international DX contests (LF CW, HF CW, SSB)

You can download it from
http://www.dxsoft.com/download/aatestb3.zip

Unzip it in any folder and run.

to configure your station select Config|Station
to select contest go to Config|Contest

New QSO window

Enter call and press Enter. Field for received number will be
selected. When you press enter again you store qso in the file.
To select another fields use 'TAB' key. To swich between call field
and received number field use spacebar.

Macroses

To use contest module with truetty/cwget/cwtype you need write
macroses.

see more about Macroses in the documentation.

Contest module use 4 additional macroseqenses

~[iNumberSent] - for sent number
~[isNumberSent] - for sent number (0 like T, 9 like N)
~[iNumberRcvd] - for received number
~[isNumberRcvd] - for received number (0 like T, 9 like N)

This is macroses example for ARRL RTTY

Macro0="~[cl]`[rx]"
Macro1="~[tx]cq test de rz4ag rz4ag test`[rx]"
Macro2="~[tx]de RZ4AG`[rx] "
Macro3="~[tx]ok ur 5nn ~[isNumberSent] ~[isNumberSent]`[rx]"
Macro4="~[tx]~[iCall] 5nn ~[isNumberSent] bk`[rx]"
Macro5="~[tx]OK tu QRZ test de RZ4AG`[rx] "
Macro6="~[tx]QRZ test de RZ4AG RZ4AG bk`[rx] "
Macro7="~[tx]AGN`[rx]"
Macro8="~[tx]~[iCall]?? agn`[rx]"

```
Macro9="~[tx]~[iCall] sri qso b4`[rx]"
Macro10="~[tx]???`[rx]"
```

Best regards,
Alexander mailto:aia@...

999. TrueTTY Wish list

Yahoo group: dxsoft
Date: 2002-01-07 02:05:42 UTC
From: Louis Sica, Jr.
Topic: 999 Message: 999

A few requests for the TrueTTY wish list..

1) MFSK16 mode ;-)

2) An audio filter (as in CWGet)

3) Interoperability with CWGet (so I can run both at the same time).

Thanks for a great program

What do you mean?
Surely, TrueTTY has filters ...

BTW, a new version of CwGet with fully rewritten filters will be published soon
...

Hello Sergei

How narrow is the audio filter in TrueTTY? I guess I mean "adjustable filters". Something that would be useful for those of us using older rigs where we can't use the narrow CW filters when using SSB (for AFSK)

Try HamScope, it has all that plus lots more.
I was truly impressed this weekend with the filter in/out conditions. Had many rtty stations who were literally blocking everyone else on the band (even with my 270hz radio filter) and switching in the filter, made the wanted signals pop out and read 100%, when they were barely readable without the filter in.

LSJ> using SSB (for AFSK)

TrueTTY uses narrowest of possible filter.
Main lobe of filter at 45 Baud is 180 Hz.

More narrow filters will definitely worsen decoding.
You could see it in 1.88x versions. (1.88d had too narrow filters ...)

Near stations don't affect to decoding till them don't affect transceiver
AGC. Surely, software filter can not fix transceiver AGC .

I've played with Hamscope, I find CWGet and TrueTTY do a better job decoding weak and noisy signals. Plus they're much simpler to use, and take up a lot less desktop space than Hamscope.

Carver,

Thanks for the recommendation. I've downloaded the trial version, but have to confess to not being too fond of things that are DOS based. I understand that MixW will do Amtor ARQ mode as well? Do you ever use it in ARQ mode?

Any other MARS specific things I need to know about the software?

Les,

MixW is Windows-based. I used it with Windows 95, 98 and Windows Me. It is limited to AMTOR FEC. It also has PACTOR Receive (including listen mode) but no transmit.

I am not aware of any sound card program which handles the AMTOR ARQ and/or PACTOR ARQ. I still use a TNC for those. I use the ARQ modes extensively in MARS. They are very good in one-on-one operations, especially under adverse conditions. They are not very good for net operations (multiple stations).

Hi Bryon,
2001 ARRL Handbook covers this point on Page 30.04.
You are right.
Grid Squares are the designated by the first 4 characters., ie a 2deg X 1 deg square.
Sub grid squartes in the note to the map are 5 min X 2.5 min sub square

All grid squares and sub squares are defined by latitude and longitude. The sub squares are at a higher resolution. The ARRL member page has a calculator, but you need the Latitude and Longitude of the spot.

Hello Carver,

Tuesday, January 08, 2002, 5:58:24 PM, you wrote:

CW> What is the URL address for downLoading RITTY?

AFAIK, you can not _download_ RITTY now.
You can only _buy_ it for $100.

But take into your attention, that it is DOS software,
it can work in Windows in full-screen mode only (at least in RTTY,
I think it will not work in AMTOR under Windows) and
it needs original Creative SB16 sound card (or _fully_ compatible,
because it doesn't use Windows drivers).

*** Moderator mode on ****

I'd ask all to stop discussion about our competitors there.
There are more appropriate groups, I think.
digitalradio@yahoogroups.com , for example.

While Sergei has the right to request anything he likes as moderator of the
group,
I think that limiting discussions about competitors products is a poor way to
build customer loyalty.

I'm a registered user of TrueTTY,and happy with it's performance on AMTOR in
general. It was purchased just for specifically for use on Navy MARS. While
this mode is considered a bit of a dinosaur by most amateurs (and rightly so)
the military has made a commitment to it and for some of us it is very
important.

For the record, I'm very interested in anything that others have done to
enhance
TrueTTY's performance on AMTOR FEC and also on other products that
may have filled that need better. Please post comments about TrueTTY here
and send any other information to me off the list.

BTW, I spent several hours last week trying to help Alexander de-bug a new rig control program that DX Soft is working on. Without compensation. I was happy to do it, as I doubt that developing software is a very profitable business.
We're all grateful foe work that Sergei puts into this stuff...and I have no great
desire to jump ship to other products.

Keep up the good work.

I think he does have a right to request this. Although it may be OK to discuss programs to use in addition to TrueTTY (for SSTV, MFSK, ARQ, or Packet Xmit, for example) some of the comments made on here pretty much said to throw out TrueTTY and get a competitor's product. While that may be that persons opinion, the question is, why are they even on this reflector? If they don't use the product, why are they posting here?

I have hopes that some day TrueTTY will do ARQ modes. I do not think ARQ modes are of much use because they are limited to two operators. They are only good for sending information. For DX, contest, or chat they are too restrictive. I would like to play with ARQ modes to see how they work under adverse contitions. I have a KAM but it is not as much fun as soundcard software. Maybe somebody will do a Pactor II look alike. I am sure if it is not compatable with Pactor II and is a little different to make it work with windows, that the SCS guys can not complain. Amtor ARQ is very old but there are lots of people still using it. Pactor I is not available since it belongs to SCS.

Sergei,

could you explain in a few words why is is not possible to use pactor or
amtor arq in Windows with soundcard ?
has it to do something with duplex modes or switching, or Windows itself ?

Regards,

Phil, ON4VP

P> has it to do something with duplex modes or switching, or Windows itself ?

AMTOR-ARQ need very hard real-timing.
You must switch between RX and TX during about 50 millisecond.
Windows can not ensure it.

PACTOR-ARQ allow more time, so, I hope, it is possible to make
Windows software for it. But there is licensing problem.
PACTOR is proprietary mode, you know ...

I intend to make TX in AX-25 (PACKET) mode in near months.
It is ARQ mode also :-)

We are _not_ against another software reference there,
but _main_ purpose of this group is our software users support.
There are more appropriate groups for discussions about another software ...

From: GilBaronW0MN
Topic: 1016 Message: 1026

I think the problem is the multitasking of windows will cause timing problems and make the linking a problem. I think a properly written driver could handle this if it got highest priority and you ran no other high priority software at the same time. I think this would get a complex driver to write but I have no doubt it could be down on a reasonably fast machine. The speed needed here is not very great. The system can do a hell of a lot of processing during the time it has control. I could be totally wrong here but I don't think so. I see no reason why other DSP processing can be done but not these modes.

After all, the entire set of processing for telephone modems is often done mostly in software using the infamous WinModem.

The real problem might be the lawsuits for implementing these proprietary modes!

From: h.j.karius@t-online.de
Topic: 1028 Message: 1028

If you look for DOS software with ARQ modes you can try Radioraft by F6FLT - reception only.

http://www.qsl.net/dk5tl/radioraft_de.html

You can also try HamComm by DL5YEC. This is also a DOS based programme and it can decode Amtor, Sitor, Navtex and Pactor 1.

http://www.pervisell.com/ham/hc1.htm

Highly professional Windows based software used for the reception is shown on the Klingenfuss homepage. But it is prohibitive as regards the price. Here the hot frequency page.

http://ourworld.compuserve.com/homepages/Klingenfuss/hotfrequ.htm

So as far as Ham Windows software is concerned, I am satisfied with TrueTTY as it is robust towards QRM, easy to handle and nicely features Navtex, which I like to decode and see how far away DX I can get.

1031. AALog 2.1 is here

Yahoo group: dxsoft
Date: 2002-01-09 18:52:21 UTC
From: Alexander Anipkin
Topic: 1031 Message: 1031

Hello dxsoft,

I just upload new version of AALog to the websites

AALog ver. 2.1 beta - 09 Jan 2002

+ DXAtlas support added
+ spin buttons for time and RST fields in the New QSO window added
+ new one message in the New QSO window added
+ autofinishing QTH and name fields
+ quick incremental search in the open log
+ quick new qso panel in the main window
+ import from EasyLog
+ export to Cabrillo
- Find QSO window is resizable now

Now I will add RIG control in to the AALog

you can dounload it from:

update package from 2.0 to 2.1
http://www.hamport.com/aal_update.zip
http://www.dxsoft.com/aal_update.zip
http://aalog.hypermart.net/aal_update.zip

Full install package (single file)

When I execute CwType, I get an error message:
"Error! DXSOFTIO driver not found!"

I found DXSOFTIO.VXD in WINNT\SYSTEM32 and
DXSOFTIO.SYS in WINNT\SYSTEM32\DRIVERS

Also, the laptop vendor made some "improvements" to the
directory structure so setup scripts don't always work.

Thanks. don p KK6DP

1042. CwGet 1.24 beta is published!

Yahoo group: dxsoft
Date: 2002-01-13 15:30:49 UTC
From: Sergei Podstrigailo
Topic: 1042 Message: 1042

Hello All,

I just have upload CwGet 1.24 beta to the main site and mirror:
http://www.dxsoft.com/cwgetb.zip
http://www.hamport.com/cwgetb.zip

Your feedbacks are very appreciated.

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
V1.24
The main filter and amplitude detector were fully rewritten.
A set of main filter bandwidths was extended.
V1.22
The problem with spectrogram repaint on some computers was fixed.
V1.21
An old internal bug was fixed.
V1.20
The "Setup->Logarithmic Spectrogram" menu command or
Alt-Z hotkey switch spectrogram window between linear or logarithmic scale.
Analogously, the "Setup->Logarithmic Oscillogram" menu command or
Ctrl-Z hotkey change oscillogram window scale.
Background colors of spectrogram and oscillogram windows can be changed now.
See "Setup->Spectrogram Background Setup" and
"Setup->Oscillogram Background Setup" menu commands.
CwGet can transfer received symbols to another software now.
Data exchange can be made by DXSOFTEX.DLL library. See
http://www.dxsoft.com/dxs-exch.zip for details.
V1.12
User can change spectrogram center frequency now. Press "Alt" key and
click on the desired frequence by mouse left button to move the frequency
to the window center.
The marker of TX frequency is made to help with zero-beat tuning.
The TX marker is short thick black line. To change the TX marker position,
click on the desired frequency by right mouse button (or by left mouse
button with "Ctrl" key pressed).
"Speed Lock" button was made. CW speed is fixed when this button is pressed.
Hotkey for this button is Alt-K.
V1.10
Esc, Ctrl-F1...Ctrl-F12, Alt-F1...Alt-F12 keystrokes
are transferred to CwType now (for CwType 0.26 and later).
Alt-S hotkey for "File->Save Buffer" command was made.
"File->Open Capture File" command opens capture-file for

received symbols. If file exist, new symbols are appended to it.
"File->Close Capture File" command closes capture-file.
Capture-file state is shown in status-line. Hotkey for
capture on/off commands is Alt-L.
The input bandwidth top margin was increased to 3 kHz.
"Setup->Main Filter->Very Narrow Filter" option was added.
It is appropriate for very low manipulation speed only, surely.
The burst filter options "5 LPM", "10 LPM", "25 LPM", "50 LPM"
were added.
V1.0
Data transfer from CwGet to AAlog logger (V1.03 and more new) was made.
To transfer data from RX-window, double-click on word or select words by
mouse. Then select the field from popup-menu.
Key "Scroll Lock" is transferred into CwType program as
"TX/RX" command now.
On-line help was made.
Install/uninstall support was made.
[...]

Topic: 1042 Message: 1043

Sergei,

I have just tried to use both 1.24 beta and 1.22 during local contest. I noticed that the changes on main filter and burst filter menu, and it seems that 1.24 beta works fine, except one thing.. I used it with two other software, CwType and computer log software on the same PC. But, when I used 1.24beta, sometimes other software slow down, but with 1.22 such phenomenon does not happen. So, I used 1.22 after I noticed it during the contest. Does it mean 1.24 eats huge CPU time? My pc is Dual Celeron 400Mhz with 512MB, Win 2K Pro.

I will test 1.24 beta furthermore, and I will report if I notice something..

Regards,

Junichi Matsuo

I confirm the same effect using it under heavy load (multiple open windows running apps)
I'm still testing filter settings.
I prefer using a smaller filter inside the TRX, this is easier to tune in on a croudy band.

Since 2GHz class CPUs (Pentium 4 or Athlon XP) are becoming common, I understand the choice to use FIR instead of IIR to get better filter characteristic.

However, since several people, such as me, still are using under 1GHz class CPU, I would like to suggest to put both existing IIR software module and new FIR software module into next CwGet official version, and offer users to switch two modules by themselves. It obviously increases the size of CwGet, but current CwGet execute file only takes 1.2M byte disk space.

Oh!. Those are quite less powerful than mine. (BTW, my machine with CwGet is dual P3 500MHz, not Celeron. Sorry for mistake in my post before. I have two dual CPU machine..)

If so, I am not sure what kind of reason caused the phenomenon.. But, the second suspect should be, of course, Win 2K Pro.. It might not be good at to handle heavy task with other tasks...

Anyway, I will report again when I have more information. (but it would be next weekend..)

It is behavior by design.
CwType doesn't use sound card at all.
It use only internal speaker.

1052. FSK possible ?

Yahoo group: dxsoft
Date: 2002-01-16 11:54:56 UTC
From: Philippe
Topic: 1052 Message: 1052

I use TrueTTY from time to time.
My rig (Kenwood TS570DG) has DSP filtering on the FSK mode.
But in SSB (with soundcard) I can only receive wide (no filter) abt 2.4 Khz.
I tried TrueTTY with FSK receive and it received fine with setting to 500 hz.

Any solutions for using FSK ?

Yes, you can enable FSK in RTTY and ASCII modes.
FSK came out from TxD output of COM-port.

From: n7dc@cs.com
Topic: 1052 Message: 1054

No, I believvbe that is incorrect. You set your rig for usb, go to menu item 32 and select "p" and that puts the rig thru the narrow cw filter (in my case 270cys) the rig still is in usb, but the filter is in and there is an "fsk" readout on the panel. This gives you the narrow cw filter inline for digital modes. It works great, you can see this on the waterfall display on any of the numerous psk/fsk/mshf progarms.

I don't have my 570 anymore(upgraded to a MP), but change the menu setting on the 570. I don't remember which one, but it's the one where you tell the radio which filter you have installed for ssb , I think its set for 1800 put in 500. This fakes out the radio and you can go to the 500 filter with the filter sw on the front panel.
Sorry I can't be more specific. Going by bad memory.

Welcome C.L.,

Some prefer listening to the sidetone on the rig, over listening to the computer's internal speaker.
I suppose you could buffer the keying signal from the computer and use it to switch an AF tone generator connected to a speaker.

LSJ> if a machine has 2 soundcards running in it?

Yes, it is possible.
See help-file about SoundCardNumber parameter of TRUETTY.INI (CWGET.INI)

Best regards,
Sergei mailto:amx@...

If your sound card has "speaker input" you can do it, else, not
If you don't use another sound card input, you can modify it (two capacitors and perhaps one resistor) to conect speaker.
Be carefull, some times one side speaker is conected to +5volts power supply, not to ground

LSJ>> if a machine has 2 soundcards running in it?

SP> Yes, it is possible.
SP> See help-file about SoundCardNumber parameter of TRUETTY.INI (CWGET.INI)

Oh, sorry.
It works with TrueTTY, but not with CwGet .

Welcome C.L.,

Some prefer listening to the sidetone on the rig, over listening to the
computer's internal speaker.
I suppose you could buffer the keying signal from the computer and use it to
switch an AF tone generator connected to a speaker.

1069. 11.690?

Yahoo group: dxsoft
Date: 2002-01-17 20:31:14 UTC
From: Stan Olson
Topic: 1069 Message: 1069

Anyone know what kind of data is on 11.690? It's 20:28 UTC here and the signal is fairly strong here
in Champaign, IL. USA. It sounds like RTTY and I've tried decoding it with TrueTTY, but I just can't
find the right combination. It looks like it has an 850hz shift and possibly there's 2 signals at
once. Any ideas? Thanks!

Many (most?) of the RTTY signals are scrambled these days. Back in the 70s when I used to be on from VK you could go all over the bands and decode, but there are fewe that have open signals any more.

1072. Re: FSK possible ?

Yahoo group: dxsoft
Date: 2002-01-18 10:46:00 UTC
From: André van den Bos
Topic: 1052 Message: 1072

In addition to the solution of N7DC:
For the TS870S the menu-item is 19.

There is another way to do the job also (and better?):

When I am working with PSK, RTTY and these other DIGI's I am working
"split" with my
Kenwood TS870S.

To take full advantage of the DSP-filter I set up my rig as follows,
especially
when in PSK-mode:
In RX the A-VFO in CW-mode and I can use the DSP for filtering as narrow
as
possible
In TX the B-VFO in SSB-mode with an offset of minus (= lower in
frequency) - 80 Hz to transmit on the same frequency. You can use your
XIT-control.

It works great, especially when the band is crowded!

My software is MIXW2.01 and Digipan

Andre, I also tried that method but found it a bit "fiddly" in other words, I had to fiddle too much with the different buttons/menus etc, so wound up using the method I did, which is actually also what the book is trying to say. Thanks for reminding me , and telling the others about that, as they can now take their pick.

Try the RTTY messages of the German Weather services,
info:

www.dwd.de and look for transmissions

Sergei adapted his TrueTTY software for this mode (SEATTY) the shortwave
frequencies can be received almost all over the world.

1075. AALog 2.11 is here

Yahoo group: dxsoft
Date: 2002-01-19 19:52:32 UTC
From: Alexander Anipkin
Topic: 1075 Message: 1075

Hello dxsoft,

I just upload new version 2.11 of AALog to the websites

AALog ver. 2.11 beta - 19 Jan 2001

+ you can customize order of the fields in the New QSO window
(see Configuration|Interface properties)
- all interface settings moved to menu Configuration|Interface properties
- fixed some bugs in the DXAtlas interface
- fixed minor bugs

you can download it from:

If you already download 2.1 then you can download only new exe-file
http://www.hamport.com/download/aalog2.zip
http://www.dxsoft.com/download/aalog2.zip
http://aalog.hypermart.net/download/aalog2.zip

update package from 2.0 to 2.11
http://www.hamport.com/aal_update.zip
http://www.dxsoft.com/aal_update.zip
http://aalog.hypermart.net/aal_update.zip

Full install package (single file)
http://www.hamport.com/aal2.zip

Full install package (5 files for floppy disks)
Floppy 1
http://www.hamport.com/aal2-d1.zip
http://www.dxsoft.com/aal2-d1.zip
http://aalog.hypermart.net/aal2-d1.zip

Floppy 2
http://www.hamport.com/aal2-d2.zip

JR> Anyone with some ideas? James Reed.

Try to change this value to

KeyPortType=2

In WinXP cwttype has not direct access to COM ports. You need use
WinAPI in this case.

PS Read help for program for details.

Best regards,
Alexander mailto:aia@...

Try to change this value to

KeyPortType=2

In WinXP cwttype has not direct access to COM ports. You need use
WinAPI in this case.

PS Read help for program for details.

From: Belford
Topic: 1082 Message: 1082

Hi
I am interested is using the Rigblaster Plus and the TRUETTY software for the Navy Mars Traffic BBS, if Pactor is supported.
If the TRUETTY software will support Pactor do I need a special sound card?
Thanks for any information you can provide

Rick,

Unfortunately, no soundcard software will support Pactor operations (except for receiving it) and I doubt
that any ever will. There are issues with the fast switching required. To do Pactor work, you still need
a TNC.

I do use TruTTY for about 90% of my Navy MARS work and generally am thrilled with it. It's much easier to
use than any software I've found for the TNC and makes day to day AMTOR FEC operation a breeze. It will
not support ARQ mode either, but in my experience I only rarely need that for MARS.

The real answer to this problem is for MARS to adopt one of the newer, more reliable modes like PSK31 or
MSK but you know how the military is...things move very slow UP the chain of command. Best of luck
and thank you for your service to our country.

Besides which, if Navy MARS is anything like Air Force and Army, it is acting as an extension of the Ham bands, not a true or even quasi military communications network. I have belonged to AF MARS since 1950, working all of the operations since that time and now no longer belong because of the embarrassment I feel listening to the nets. They welcome the "new" hams that are getting their licenses in the 2 day memorization courses being held and are putting them on HF with the "training" they receive. The nets sound much more like a Boy Scout exercise than a military organization trained in military communications. I taught military communications from 1950 to 1986 so yes, I think I know what efficient military communications is and can be. MARS is not.

Hi Les

I guess what mislead me was the software CD 4TH edition that came with my
Rigblaster Plus.
If you go to the multimode selection and read the modes listed with the
Truetty selection it has Pactor listed?????
I have been using Amtor to receive traffic on the Mars nets but haven't sent
any yet!
I am also in region 2 South Carolina of the Navy-Marine Corps Mars, I do
check into the 2X9B net from time to time.

Les,

This is a forum for the discussion of software so I don't want to tie it
up debating MARS, ham radio, etc. However, I must say that I was
a submarine Radioman RM1(SS) for years, and have always been
impressed with the professionalism of MARS in general.

Certain local and area nets are more "lax" than others, and perhaps
your experience was shaped from that. However, if you participate
in region nets, I think you'll find some very professional communications.

MARS nets were among the first activated on 9/11 when the Pentagon
required communications support. And personally, my hat is off to
anyone who volunteers hours and hours of their own time in service
to their country.

I respect your service as well...perhaps you should consider rejoining
MARS where your expertise could be put to good use training
people who at least are willing to volunteer their time and equipment.

> I've played with Hamscope, I find CWGet and TrueTTY do a better job decoding weak and noisy signals. Plus they're much simpler to use, and take up a lot less desktop space than Hamscope.

I've also found that TrueTTY works far better than the latest version of MMTTY, especially on my slightly underpowered PC, and covers more modes, as well. MMTTY has a cluttered screen with so many features that it often crashes my video card, yet it doesn't do PSK31, AX25 or AMTOR-FEC. I've now successfully decoded a number of coastal SITOR broadcasts using TrueTTY's AMTOR-FEC option in fast sync mode. I'm an SWL (UTE monitor), not a ham, however, so my needs are bound to be quite different.

I have been with Sergi's group for probably 3 years and been quiet till now. N7DC, I concurr strongly.. As past ASM for youth activities, MI Section, Scoutmaster and Commissioner, and father of Eagles, it is the responsibility of amateurs to get involved with your youth groups. This is MY challenge to you my friends.. Put your Rig where your HEART should be!!
John, K8XD

Scouting is probably OK if they left out all the religious crap. Religious indoctrination of children is extremely detrimental of course.

1105. AAlog contest module for CQ WW WPX RTTY

Yahoo group: dxsoft
Date: 2002-02-07 11:31:02 UTC
From: Alexander Anipkin
Topic: 1105 Message: 1105

Hello dxsoft,

I just upload new version of contest module with cq ww wpx rttty
contest.

you can download it from http://www.hamport.com/download/aatestb6.zip

Unzip it in ANY folder anmd run exe file

for using with TrueTTY just prepare contest macroses and run both
programs together

Here is the example of the macroses in truetty.ini file for this
contest:

```
Macro0="~[cl]`[rx]"
Macro1="~[tx]CQ TEST DE RZ4AG RZ4AG TEST`[rx]"
Macro2="~[tx]DE RZ4AG`[rx] "
Macro3="~[tx]TU UR 599 ~[isNumberSent]-~[isNumberSent]-~[isNumberSent]`[rx]"
Macro4="~[tx]~[iCall] 599 ~[isNumberSent]-~[isNumberSent]-~[isNumberSent] BK`[rx]"
Macro5="~[tx]~[iCall] TU QRZ TEST DE RZ4AG`[rx] "
Macro6="~[tx]QRZ test de RZ4AG RZ4AG bk`[rx] "
Macro7="~[tx]PSE AGN`[rx]"
Macro8="~[tx]~[iCall]?? AGN`[rx]"
Macro9="~[tx]~[iCall] SRI QSO BEFORE`[rx]"
Macro10="~[tx]?`[rx]"
```

Please send you suggestion to me. Thank you.

1106. CWGet

Yahoo group: dxsoft
Date: 2002-02-11 11:21:06 UTC
From: Leo Leisink
Topic: 385 Message: 1106

Hello Alexander,

CWget is working fine.
If possible I have 2 things to add to the wishlist
for the program:

1. The possibility to set a bandwith (user definable)
were the AutoGTM function will search for the
strongest signal.
Currently the program searches the whole band
as displayed, but I like to see this narrowed to a
much smaller section.

The problem with the AutoGTM function is, that
if your station waits too long with an answer, the
program already jumps to another signal.
Narrowing the section this function searches
for the maximum signal, will avaid this problem.

2. AutoThres.
It would be nice if a minimum level could be set
in order to avoid all kind of garbage printing on the
screen if the signal becomes too weak.

Kind regards.
Leo Leisink PA0LSK

1107. CWGET "in debug mode"

Yahoo group: dxsoft
Date: 2002-02-16 15:54:50 UTC
From: Louis Sica, Jr.
Topic: 1107 Message: 1107

Sometimes, CWGET hangs on my computer (usually because the sound card). When I try to stop it under W2K with a ctrl-alt-delete and end task, I get a message that the program can't be terminated because it's "in debug mode". A reboot will of course fix that, but that's a bit inconvienient. I suspect there's a process under task manager I can stop to stop the program, but what is it?

Alexander mailto:aia@...

1110. TrueTTY 1.91 beta is there!

Yahoo group: dxsoft
Date: 2002-02-17 12:44:58 UTC
From: Sergei Podstrigailo
Topic: 1110 Message: 1110

Hello All!

I just have uploaded TrueTTY 1.91 beta to the main site and mirror:
http://www.dxsoft.com/truettyb.zip
http://www.hamport.com/truettyb.zip

Your feedbacks are welcome!

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

TrueTTY Versions History

V1.91
The "Setup->Catch Words in Contest Mode" option was made.
In this mode software doesn't use popup-menu to catch word to logger.
TrueTTY recognize callsign or control number automatically.
The "Setup->Beacon Off At Mouse Click" option was made.
If this option is enabled, beacon is switched off by mouse click on
spectrogram, RX window or input window or by key pressed in the input window.
The "Setup->Continuous Carrier While Idle" option was made.
If this option is enabled, TrueTTY doesn't use idle symbols in RTTY and ASCII
modes. I think, this feature is quite useless, but some users asked about it.
Some minor bugs were fixed.
V1.90
UHF-PACKET (1200 Baud) decoding was made.
The "Grid" option was added to context menu to transfer received
QTH-locator to logger.
The 182 Hz shift value was added to the shift menu. This value is optimal for
interchannel crosstalk reducing at 45.45 Baud speed.
V1.88
FSK-demodulator was fully rewritten.
V1.87
FSK-demodulator was rewritten. So decoding of RTTY, ASCII, AMTOR and AX25
should be improved now.
V1.86
A bug was fixed. "OnTop" mode didn't work correctly after "Edit Macros"
command executing.
[...]

I also have the problem with Win 98 Second Edition (with all
maintenance patches to date). The first ctrl-alt-delete does
nothing. The second ctrl-alt-delete reboots.

the problem you are talking about is typical of running a dos program in windows. the reason it happens is that when you run the program you are not really in dos you are in a shell program of windows. If you do not have a true version of dos and run your program in it you are going to have these problems. Keith cm1910

But the explanation doesn't appear to apply to CwGet. If you try to run CwGet under MS DOS (not under a dos window), you get an error message saying it must be run under Win32.

1119. Hamport program for rig control

Yahoo group: dxsoft
Date: 2002-02-27 18:19:29 UTC
From: Alexander Anipkin
Topic: 1119 Message: 1119

Hello dxsoft,

I just finish alpha testing of the RIG control program HamPort
http://www.dxsoft.com/download/hamport.zip
Unzip it into any folder and run. Select your TRX, setup port
configuration, and click on the OFF text. If you configure you port
properly tou see freq and mode of your TRX.

I test it with Kenwood TS-570 and ICOM-746. Yeasu support will be
added soon (We have not any Yeasu in our city)

If you can test it with other Kenwood and ICOM transceivers and send
results to me.

the list of the "HamPort compatible" ICOM transcever is here
'Icom IC-706'
'Icom IC-706mkII'
'Icom IC-707'
'Icom IC-718'
'Icom IC-725'
'Icom IC-726'
'Icom IC-728'
'Icom IC-735'
'Icom IC-736'

Alexander,

can you please add IC-756PRO II with default addr '64' - Thanks
Prev. version had an INI file, was nice to fidel around. Did you
remove this ?

Alexander,

Is it ment to be interactive with other DXsoft software or ment to be a
stand-alone rig control program ?

It has COM-interface and can work with any program. I adding HamPort support
to AALog now.

P> or ment to be a stand-alone rig control program ?
What purpose of standalone program? (hi)

Hamport is the additional module for the dxsoft programs.

OK. I understand you. But for program debuging better to have tx on
the work table. I will programming Yeasu control with specification
and then will use remote debug on some user PC (hi)

From: Sergei Podstrigailo
Topic: 1139 Message: 1139

Hello All,

I just have uploaded CwGet 1.25 to the main site and mirrors:
http://www.dxsoft.com/cwget.zip
http://www.hamport.com/cwget.zip
http://www.8ung.at/dxsoft/download/cwget125.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
CwGet Versions History.

CwGet Versions History.

V1.25
If there are several sound cards in a computer, you can select the card by
the "SoundCardNumber" parameter of [CwGet] section of the CWGET.INI file.
"SoundCardNumber=0" means a first sound card, "SoundCardNumber=1" means a
second card etc. Negative value means system default sound card.
The command "File->Open Buffer in Notepad" was made. It saves receiving
buffer in a temporary file and opens this file by a text editor. Then you
can view this file or print it. The hotkey of this command is Ctrl-N.
This command is available in registered version of the software only.
V1.24
The main filter and amplitude detector were fully rewritten.
A set of main filter bandwidths was extended.
Alt-D shortcut was made for the "Clear Buffer" command.
V1.22
The problem with spectrogram repaint on some computers was fixed.

Yahoo group: dxsoft
Date: 2002-03-03 14:36:04 UTC
From: James Reed
Topic: 1139 Message: 1140

Good morning Sergei, I downloaded CwGet
version 1.25, installed it but I notice two things, first thing is that the CwGet.ini file
does not contain the new lines for the sound
card(s). Second thing is that under "about" in
the help button, it still lists the version as 1.24
Is that ok? I have a question for you, the
sound level I'm feeding the sound-card is in the
300 to 500 milli-volt level, yet the display seems
to think that the audio level is low. How does
one set the "Program" level? I do know how to
set the input-recording level for the card.

Thanks, James Reed

1150. 20 years DX-Antwerp - special commemorative via Krasnodar Tbilisskaya

Yahoo group: dxsoft
Date: 2002-03-09 19:02:30 UTC
From: John Bernaerts
Topic: 1150 Message: 1150

Subject: [dxa] 20 years DX-Antwerp - special commemorative via Krasnodar Tbilisskaya

On the occasion of its 20th anniversary DX-Antwerp will broadcast a special commemorative programme, via Krasnodar Tbilisskaya in Russia, on the 25th of May 2002 between 08:00 and 09:00 UTC. Frequencies will be 17785 kHz (250 kW) and 9945 kHz (100 kW).

A specially issued and very attractive QSL card will be available for correct reception reports.
During this broadcast five keywords will be given. If you note at least 4 of these keywords, you can send them, together with a reception report to the following address: DX-Antwerp, PO Box 16, B-2660 Hoboken, Belgium or email us at : qsl@.... After verification of your reply, we will send you this special DX-Antwerp QSL card by mail.

DX-Antwerp zal op 25 mei 2002 tussen 08:00 en 09:00 UTC (10:00 en 11:00 MEZT), ter gelegenheid van zijn 20-jarig bestaan een uitzending verzorgen via Krasnodar Tbilisskaya in Rusland. Frequenties voor deze uitzending zijn 17785 kHz (250 kW) en 9945 kHz (100 kW). Een speciale QSL-kaart zal toegezonden worden bij ontvangst van juiste ontvangstrapporten.

Tijdens de uitzending zullen 5 sleutelwoorden gegeven worden. Wanneer je op zijn minst 4 sleutelwoorden genoteerd hebt kan je die, samen met een ontvangstrapport, toezenden aan: DX-Antwerp, Postbus 16, B-2660 Hoboken, Belgi? of via e-mail naar qsl@.... Na verificatie van het ontvangstrapport zullen wij deze speciale QSL-kaart via de post opsturen.

1152. Driver issues with AC97 onboard sound

Yahoo group: dxsoft
Date: 2002-03-14 04:31:35 UTC
From: Louis Sica, Jr.
Topic: 1152 Message: 1152

Thought I'd relay some information to the group.

I have a Biostar M7VKD Motherboard with an Athlon XP 1800 CPU. That board uses VIA AC97 onboard sound. I recently downloaded (from Microsoft Update) the 5.10.0.3800 version of the driver (December 2001) for Windows 2000. With that driver, both CW Get and TrueTTY would often hang, and could only be stopped by rebooting the system. However, when I went to biostar's web page (http://www.biostar.com.tw) and downloaded the latest version of the driver they have there (5.10.0.3622), the problem seems to have gone away.

Now, this problem may be due to a particular configuration issue on my machine. But, if you have VIA AC97 onboard sound, and you happen to be having issues with True TTY or CWGet hanging, you may want to consider trying the 5.10.0.3622 version of the driver instead of the one that Microsoft Windows Update suggests (5.10.0.3800)

I have a satellite tracking program for tracking the
amateur radio satellites. Is that what you are
looking for? I found it on Hand Go forum I believe.
There are several programs out there of various
levels. One such program will tell you when you can
actually see the satellites over head. Pretty Neat.

1171. wpx contest module point computation

Yahoo group: dxsoft
Date: 2002-04-01 16:38:30 UTC
From: cics16
Topic: 1171 Message: 1171

I used latest aatest contest module for CQ WW WPX contest last few days. Perhaps I misunderstand or did something wrong, but...

The points assigned when I worked another station is USA was 2, but according to the rules, I think it should be 1.

Perhaps someone could clarify for me. Thanks!

Dave, N0RQ (ex-WD0HWX)
n0rq@...

From the rules (note subsection "(c)"):

"VI. Points:

(a) Contacts between stations on different continents are worth three (3) points on 28, 21, and 14 MHz and six (6) points on 7, 3.5, and 1.8 MHz.

(b) Contacts between stations on the same continent, but different countries, are worth one (1) point on 28, 21, and 14 MHz and two (2) points on 7, 3.5, and 1.8 MHz. Exception: For North American stations only□contacts between stations within the North American boundaries (both stations must be located in North America) are worth two (2) points on 28, 21, and 14 MHz and four (4) points on 7, 3.5, and 1.8 MHz.

(c) Contacts between stations in the same country are worth 1 point regardless of band."

Jim. Does the Smith Corona have a serial port? If it does you should be able to port the data to the DOS machine in ASCII format, I did this years ago from a Radio Shack color computer to an IBM clone. there are companies that do this type of data transport but they aren't cheap. We did this at work from an old AM Addressograph CPM machine to DOS, cost 3500 USD in 1985 for 100 8" 90kb disks, the company is located in Fresh Meadows New York, just east of New York City, thier web is http://www.dclab.com/ at the least you can find out if it's possible and get an estimate, good luck, Ken on Long Island, NY

If the smith corona typewriter has a serial port, you will need some sort of converter. We still have
one of these typewriters and has a serial port BUT it required a converter before it was usable on a pc.
It may only be a level converter but I never went beyond checking out the price of one of these converters (was about $100CAN)
back in the 80's.
Good Luck

Since this has *nothing* to do with DXSoft programs, can we take this offline, and have responses sent directly to the sender, instead of the group?

No offense meant, but I do already happen to get enough irrelevant email.

Thank you.

1180. Can anybody from France help me?

Yahoo group: dxsoft
Date: 2002-04-05 07:36:32 UTC
From: Sergei Podstrigailo
Topic: 1180 Message: 1180

Hello All,

Can anybody receive file from me by e-mail (or download it from our
site), then write it to 3.5" floppy disk and send it by post mail to
address in France?

You can get registration of one of our software for this service.

One customer had payment for software by mail, but didn't give me e-mail or
phone . It will be too long to send disk from my location ...

Best regards,
Sergei mailto:amx@...

SS> Alexander and group, can you tell me if the contest log can be used by one
SS> person with one computer that is being used to generate contest contact audio
SS> signals with the sound card?
Yes. You run AAtest and truetty.
You write special set of CONTEST macroses. Now you can work by 2 way.
Primary in aatest or in TrueTTY.

if you work in the aates you look to truetty window end wnter infor
manually to log. for transmit you use f1..f10 keys FROM AATEST.

If you use truetty as primary program then you need add save macros to
it. Then you click in the RX window on the word and truetty move it to
AAtest edit fields. after you finish press key with save macros.

That's all. you can log all your contacts using mouse only.

Best regards,
Alexander mailto:aia@...

1187. SeaTTY 1.05 is there!

Yahoo group: dxsoft

Topic: 1187 Message: 1187

Hello All,

I just upload SeaTTY 1.05 to
http://www.dxsoft.com/seatty.zip and
http://www.hamport.com/seatty.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
SeaTTY versions history

V1.05
You can open raw log file in Notepad by double-clicking on date
in the message tree.
You can delete selected message or all messages for selected date
by click on "Delete" key.
To reduce chance to miss message for noise SeaTTY starts to write message
if at least three symbols of "ZCZC" signature is received.

1191. New versions of software AALOG/Custer monitor/Hamport

Yahoo group: dxsoft
Date: 2002-04-07 08:42:50 UTC
From: Alexander Anipkin
Topic: 1191 Message: 1191

Hello dxsoft,

You can find new version of software on the www.dxsoft.com site

AALog ver. 2.2 - 2 Apr 2001

- you can on/off Autocomplete function in New QSO window
+ DX notebook added
+ import from AALog contest module
+ New QSO window changed.
+ Backup/restore logs module added
+ interface with trannsceivers via HamPort program added
- save settings of Previous QSO window
+ COM-interface for statistic and Cluster monitor

DXCluster Monitor

+ Integration with AAlog added

Hamport - free RIG control program

First beta version can control ICOM and Kenwood transceivers.
Minimal set of function.
Can work with AALog.

Best regards,
Alexander mailto:aia@...

I just have uploaded TrueTTY 1.91 beta to the main site and mirror:
http://www.dxsoft.com/truettyb.zip
http://www.hamport.com/truettyb.zip

Your feedbacks are welcome!

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

TrueTTY Versions History

V1.91
The "Setup->Catch Words in Contest Mode" option was made.
In this mode software doesn't use popup-menu to catch word to logger.
TrueTTY recognize callsign or control number automatically.
The "Setup->Beacon Off At Mouse Click" option was made.
If this option is enabled, beacon is switched off by mouse click on
spectrogram, RX window or input window or by key pressed in the input
window.
The "Setup->Continuous Carrier While Idle" option was made.
If this option is enabled, TrueTTY doesn't use idle symbols in RTTY and
ASCII
modes. I think, this feature is quite useless, but some users asked about
it.
Some minor bugs were fixed.
V1.90
UHF-PACKET (1200 Baud) decoding was made.
The "Grid" option was added to context menu to transfer received

QTH-locator to logger.
The 182 Hz shift value was added to the shift menu. This value is optimal
for
interchannel crosstalk reducing at 45.45 Baud speed.
V1.88
FSK-demodulator was fully rewritten.
V1.87
FSK-demodulator was rewritten. So decoding of RTTY, ASCII, AMTOR and AX25
should be improved now.
V1.86
A bug was fixed. "OnTop" mode didn't work correctly after "Edit Macros"
command executing.

Hello Dermot,

Thursday, April 18, 2002, 4:00:07 PM, you wrote:

CD> I have Seatty,is there anyway of selecting the stations that you
CD> want to receive.The programme works very well.

Do you mean a filter of messages?

There is only "Don't receive SYNOP messages" filter in the current
version.

But your suggestions for necessary message filter parameters are
welcome.

1203. A dream for integration of Logging and control

Yahoo group: dxsoft
Date: 2002-04-19 11:41:05 UTC
From: Gil Baron
Topic: 1203 Message: 1203

Pardon for cross-post but this is relevant to all the groups I think.
One of the great features of Logic logging program, which is in my opinion
the best general logger
http://www.hosnose.com
is the ability for it to use OLE to talk to TRX-Manager
which is one of the best general radio control programs.

WIBNI (wouldn't it be nice if} Zakanaka,MMTTY,Digipan,WinWarbler, and other
programs were able to do a similar thing. They could all use the interface
used by Logic or try to get Logic to support their program the way it does
TRX-Manager. I am not sruehow the interface works. Perhasp all the programs
coudl mimic TRX-Manager so that Logic would not have to change anything?

All of these programs have a logging interface but it is not nearly as good
as that in Logic and the need is to transfer with ADIF all the logs from
these programs periodically. When you are running you are locked out of the
features of Logic unless you disable the radio control in logic. If you do
that you have to enter the Station and Frequency information manually.

If the frequency and Call sign could be transferred to Logic and the control
actions still would work in the programs that would be an ideal situation.
For instance, I could use Zakanaka or WinWarbler for PSK31 and it would
control the radio and get the frequency and such but Logic could log the
contact.

I know this is a dream and it would take a lot of work between authors of
the various programs but it would surely be nice. If evened one of these
programs (especially Zakanaka or WinWarbler for PSK31 and Truetty or MMTTY
for RTTY) were to do this it would be a big step.

This is NOT a complaint about any of these programs, just a dream for an
enhancement.

From: Gil Baron
Topic: 1204 Message: 1204

It is http://www.hosenose.com

I have been in communication with DXLABS and they have a public DDE interface. Therefore it is not up to them to do anything here, it is up to the other programs if they wish to interact. I should have checked a bit more before the post.

Nevertheless, Logic is still the best logging program if you are interested, but, a little bit of work to learn. It is also very expensive. I am no longer sure where I would be if the DXLABS suite was known to me and had been available at the time I stared using Logic.

Dear Gil
I may not be that programmer that wrote the particular application you speak of...however as a Software Systems Engineer and as a Software developer myself Yes its not impossible to do...depending upon the language either application is writtain in..it could have those items ported or have a call made to that particular function in the software to do exactly what your asking ...if I had the source code and the particular libraries that created such it would be a mere simple thing to do.

Respectfully

Lucky

1206. 2nd Anatolian WW RTTY Contest

Yahoo group: dxsoft
Date: 2002-04-22 08:38:08 UTC
From: ismail_ta9j
Topic: 1206 Message: 1206

Hello Dear Friend

The will be held May 17-18, 2002
1800-2100 UTC. Individual and Teams are welcome to join.

Contest rules can be seen at http://www.qsl.net/ta9j/anatolian.htm
http://www.sk3bg.se/contest/anwwryc.htm

It can be reached at ta9j@... for further information. Feel
free to pass the information on to other clubs, organizations and
individuals.

We look forward to seeing each and everyone of you at the event.

Thank you,
73 and good luck in the contest
de TA9J ISMAIL CAKMAK

::. RULES

Anatolian WW RTTY Contest

CONTEST PERIOD:

1800 UTC Friday 17 May
to
2100 UTC Saturday 18 May, 2002
(27 hours)

MODE:

RTTY only (45 Baud 170 Hz).

BANDS:

80, 40, 20, 15, 10 m.

CATEGORIES:

A. Single Operator All Band
B. Multi Operator All Band
C. SWL

MESSAGE:

Send RST + QSO number, starting with 001.

POINTS:

QSO with own country, 5 points
QSO with other countries in own continent, 10 points
QSO with other continents, 15 points

MULTIPLIERS:

Count each DXCC country on each band.
Additionally, each call area in TA, VK, VE, JA and W will count as
multiplier on each band.

SCORING:

Total QSO points x total multipliers.

LOGS:

Use seperate log sheets for each band.
Logs must show: Band, Date, Time (UTC), Call sign, Message, Points
and Multiplier.

Deadline is July 1, 2002.

E-mail logs to:

E-mail:
ta9j@...

MANAGER:

Ismail Cakmak, TA9J
P O Box 34
36000 KARS

You do not have to connect the transmit side. Use that which you have,
WinWarbler for instance. It will do fine as a receive only.

AG> Any ideas where I can download some software?

What is problem?
Just don't use transmit part ...

More over, try SeaTTY.
It is receive-only software ...

1216. TrueTTY 1.92 is released !

Yahoo group: dxsoft
Date: 2002-05-02 11:34:30 UTC
From: Sergei Podstrigailo
Topic: 1216 Message: 1216

Hello All,

I just have uploaded TrueTTY 1.92 into the main site and mirror:
http://www.dxsoft.com/truetty.zip
http://www.hamport.com/truetty.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

TrueTTY Versions History

V1.92
The command "File->Open Buffer in Notepad" was made. It saves receiving
buffer in a temporary file and opens this file by a text editor. Then you
can view this file or print it. The hotkey of this command is Ctrl-N.
This command is available in registered version of the software only.
A bug with the "List index of bounds" message appearing during editing of
text to transmit was fixed, I hope.
V1.91
The "Setup->Catch Words in Contest Mode" option was made.
In this mode software doesn't use popup-menu to catch word to logger.
TrueTTY recognize callsign or control number automatically.
The "Setup->Beacon Off At Mouse Click" option was made.
If this option is enabled, beacon is switched off by mouse click on
spectrogram, RX window or input window or by key pressed in the input window.
The "Setup->Continuous Carrier While Idle" option was made.
If this option is enabled, TrueTTY doesn't use idle symbols in RTTY and ASCII
modes.
Some minor bugs were fixed.
V1.90
UHF-PACKET (1200 Baud) decoding was made.
The "Grid" option was added to context menu to transfer received
QTH-locator to logger.
The 182 Hz shift value was added to the shift menu. This value is optimal for
interchannel crosstalk reducing at 45.45 Baud speed.
[...]

1218. New contest module

Yahoo group: dxsoft
Date: 2002-05-02 12:22:59 UTC
From: Alexander Anipkin
Topic: 1197 Message: 1218

Hello dxsoft,

I just upload updated version of contest module.
I add contest of this weekend

- ARI DX contest

New features added

- multipliers list (wkd/not wkd) - Shortcut is Ctrl+M
- you can use "~" key to clear fields in new qso window
- You can edit qso from the previous qso list

http://www.hamport.com/aatest.zip
http://www.dxsoft.com/aatest.zip
http://aalog.hypermart.net/aatest.zip

Best regards,
Alexander mailto:aia@...

1219. Re: TrueTTY 1.92 is released !

Actually, I think it would have been better had you just given the address where
it is, rather than the addy that DOWNLOADS the program.
IOW, , , http://www.dxsoft.com/ will take you to the page, but the one you gave
AUTOMATICALLY downloads it as soon as you click on it.
Reallly bad form, Sergei.

Wac> will I have to register again to make use of all its features? y.

Upgrades are free.
Just install new version over old one.

Hello Sergei,
I was more than glad to vote for your software. I have been using
TrueTTY for a while now and really enjoy it. I have used other software
as well, and TrueTTY seems to be able to properly decode weak and noisy
signals better than anything I've used.(As well as being easy to use.)
You've written some excellent software. Keep up the good work!
Barney Hamlin

1234. 20 years DX-Antwerp - open door + special commemorative broadcast -

Yahoo group: dxsoft
Date: 2002-05-11 11:03:24 UTC
From: John Bernaerts
Topic: 1234 Message: 1234

We wouild like to remind you of this upcoming event.

DX-Antwerp Opendoor
Taverne "De Schorren"
Graspolderlaan 32
B-2660 Hoboken
Antwerp
Belgium

Date: Saturday,May 25,2002 Time: 10.00AM to 8.00PM CEST (GMT+02.00)
Sunday,May 26,2002 10.00AM to 5.00PM CEST

Special commemorative broadcast for the 20th anniversary of DX-Antwerp
Russia - Krasnodar Tbilisskaya: 17785 kHz (250 kW)
Lithuania - Vilnius Sitkunai: 9945 kHz (100 kW)
Germany - J?lich: 7180 kHz (100 kW)

English follows

DX-Antwerp zal op 25 mei 2002 tussen 08:00 en 09:00 utc (10:00 en 11:00 Midden-Europese Zomertijd), ter gelegenheid van zijn 20-jarig bestaan een uitzending verzorgen via de 3 stations die je hier bovenaan terugvindt. Een speciale QSL-kaart zal uitgegeven worden bij ontvangst van juiste ontvangstrapporten.

Tijdens de uitzending zullen 5 sleutelwoorden gegeven worden. Wanneer je op zijn minst 4 sleutelwoorden genoteerd hebt kan je die, samen met een ontvangstrapport, opsturen naar: DX-Antwerp, Postbus 16, B-2660 Hoboken, Belgi? of via e-mail naar qsl@.... Na verificatie van het ontvangstrapport zullen wij deze speciale QSL-kaart via de post toezenden.

On the occasion of its 20th anniversary DX-Antwerp will broadcast a special commemorative programme, on the 25th of May 2002 between 08:00 and 09:00 UTC. The programme will be aired via the 3 stations listed above. A specially issued QSL card will be available for correct reception reports.

During this broadcast five keywords will be given. If you note at least 4 of
these keywords, you can send them, together with a reception report to the following address: DX-Antwerp, PO Box 16, B-2660 Hoboken, Belgium or email us at : qsl@.... After verification of your report, we will send you this special DX-Antwerp QSL card by mail.

DX-Antwerp 20th anniv. px on May 25, 2002 , 0800-0900 UTC.
via Tbilisskaya (RUS) 17785 kHz (250 kW)
Sitkunai (LTU) 9945 kHz (100 kW)
J?lich (D) 7180 kHz (100 kW)

From: riaan greef
Topic: 1239 Message: 1240

Hi to all on the the list.

I think the situation with Manuel is that the antennas and/or transmission lines got fried.

To check this, I suggest checking the whole antenna system with a trusty Bird meter or similar.

In South Africa we got also plenty of electric storms, and a friend of mine lost his antennas this way. He even had to replace the coax. Luckily his radio was out for tuning! What caught our attention was that the antennas looked OK, but when we applied RF, it was totally whacked!

I hope this helps.

v> both are registered

v> can anyone help with this problem?

DXSoft Cluster Monitor use DXAtlas as a COM server. So if DXAtlas is
not registered as COM server in your system then it can not be started
by other application. You can try to register DXAtlas as a COM server
manually. In order to register run dxatlas /regserver in command line
from your DXAtlas directory.

1248. UPDATE:20 years DX-Antwerp - open door + special commemorative broadcast -

Yahoo group: dxsoft
Date: 2002-05-18 14:13:39 UTC
From: John Bernaerts
Topic: 1248 Message: 1248

We would like to remind you of this upcoming event.

DX-Antwerp Opendoor
Taverne "De Schorren"
Graspolderlaan 32
B-2660 Hoboken
Antwerp
Belgium

Date: Saturday,May 25,2002 Time: 10.00AM to 8.00PM CEST (GMT+02.00)
Sunday,May 26,2002 10.00AM to 5.00PM CEST

Special commemorative broadcast for the 20th anniversary of DX-Antwerp
Russia - Krasnodar Tbilisskaya: 17785 kHz (250 kW)
Lithuania - Vilnius Sitkunai: 9945 kHz (100 kW)
Germany - J?lich: 7180 kHz (100 kW)
Great Britain-Skelton: 6015 kHz (300 kW)

English follows

DX-Antwerp zal op 25 mei 2002 tussen 08:00 en 09:00 utc (10:00 en 11:00 Midden-Europese Zomertijd), ter gelegenheid van zijn 20-jarig bestaan een uitzending verzorgen via de 3 stations die je hier bovenaan terugvindt. Een speciale QSL-kaart zal uitgegeven worden bij ontvangst van juiste ontvangstrapporten.

Tijdens de uitzending zullen 5 sleutelwoorden gegeven worden. Wanneer je op zijn minst 4 sleutelwoorden genoteerd hebt kan je die, samen met een ontvangstrapport, opsturen naar: DX-Antwerp, Postbus 16, B-2660 Hoboken, Belgi? of via e-mail naar qsl@.... Na verificatie van het ontvangstrapport zullen wij deze speciale QSL-kaart via de post toezenden.

On the occasion of its 20th anniversary DX-Antwerp will broadcast a special commemorative programme, on the 25th of May 2002 between 08:00 and 09:00 UTC. The programme will be aired via the 3 stations listed above. A specially issued QSL card will be available for correct reception reports.

During this broadcast five keywords will be given. If you note at least 4 of
these keywords, you can send them, together with a reception report to the following address: DX-Antwerp, PO Box 16, B-2660 Hoboken, Belgium or email us at : qsl@.... After verification of your report, we will send you this special DX-Antwerp QSL card by mail.

From: Eugene A. Danilenko
Topic: 1258 Message: 1259

Hello Ian,

Cluster Monitor can get new spots if you press on Connect button or
Cluster monitor is set in automatic mode. In order to run cluster monitor
in Automatic mode set interval in minutes using spin edit field in
tool bar and start automatic load using button with clock picture.

Best regards,
Eugene mailto:eugene@...

1260. Tuning in SSB for Navtex

Yahoo group: dxsoft
Date: 2002-06-03 19:58:17 UTC
From: helmsmatt
Topic: 1260 Message: 1260

I am a new HAM and recently downloaded and registered SeaTTY.
I feed my PC with an ICOM IC M-700. about 9 years old, from the external speaker jack to the microphone jack on the PC. This setup works fine for my WeatherFax software.

My problem is that the SSB won't let me program in 516.1 KHz.
Does anyone have any tips on being able to do this. Apparently I need to enter a digit besides zero for the 1000's digit.
Help!

Thanks in advance,
Matt

1261. turning CWget on & off

Yahoo group: dxsoft
Date: 2002-06-04 02:56:00 UTC
From: waynerhatfield
Topic: 1261 Message: 1261

Downloaded CW Get 1.25 and I would like to know how to turn the program on. Here is what happens. I find a freq I want to listen to in the top window, then I set my noise level in the bottom window, but the program will not start till I push the auto thresh button then I lose my setting in the bottom window for my noise level. If I try to set it again the program stops deciphering and I have to push the auto thresh again.

Hi,

Normally the program should interact with the soundcard if she's not occupied by another program !
I experienced fault readings untill I made some TX on the soundcard, very strange, this happens only with a 'on board' chip on one of my computers.

The same happens with all software, I get no receive (decoding is wrong) but when I first TX and transmit the same audio (f.e. PSK31 or TTY) then all receives fine ???

Never knew what this could be ...

1264. Re: Tuning in SSB for Navtex

Yahoo group: dxsoft
Date: 2002-06-04 06:50:26 UTC
From: david.towers
Topic: 1264 Message: 1264

Hi Helmsmatt
tune your receiver to 516kHz USB, and when you hear the navtex left
click with mouse on the centre of the 2 peaks and it will then decode.
Accurate receiver tuning is not required as the software will auto tune
and follow any slight drift.
Set your squelch level so that random noise without navtex stops
characters appearing, but prints when transmissions start.
Set AFC so that it will tune to the transmission but not wander too far
during quiet periods.
Play with these settings on good signals until you find the settings
that work on progressivly weaker signals as you gain more confidence.
Patience and practice pays dividends.
Trust this helps
regards

From: Matt Salatino
Topic: 1260 Message: 1266

Bob,
Thanks for the reply.
The spec for the M-700 starts at 1.6 Mhz, same as for your 710.
I was told by others to do what you said, but when I punch in the freq.
and press Rx put the freq in memory, the display just goes blank. I can
program any station in when I have four digits ahead of the decimal, but
not three. Is my radio broken?
Thanks,
Matt

Topic: 1261 Message: 1267

So are you telling me that CWGet is suppose to start automatically? If this is the case, mine will not start until I push the Auto Thresh button. This being the case I wonder if you could add a patch to the program that would start the program with a click of a button on say, on the red button and to turn it on and click anywhere in the white area of the top window to turn it off. Thanks Wayne KD5JJP

1268. RE: Tuning in SSB for Navtex

Yahoo group: dxsoft

From: Bob Trenkamp
Topic: 1260 Message: 1268

Matt,

The specs on the 710 are:

General

* Frequency Coverage (MHz):

* Receive: 0.5 - 29.9999
* Transmit: 1.6 - 27.5 MHz, Restrictions may apply depending on
version.

* Mode (varies with version): J3E (USB), H3E, J2B (AFSK), F1B
(FSK), R3E, A1A (CW)

[snip]

Thus, we're able to pick up the 518 kHz SITOR broadcasts just fine.

If your unit has a lower-end receive spec of 1.6 MHz, than I suspect
that's the cause of your problem.

Regards,

Bob

Subject: RE: Tuning in SSB for Navtex

Bob,
Thanks for the reply.
The spec for the M-700 starts at 1.6 Mhz, same as for your 710.
I was told by others to do what you said, but when I punch in the freq.
and press Rx put the freq in memory, the display just goes blank. I can
program any station in when I have four digits ahead of the decimal, but
not three. Is my radio broken?
Thanks,
Matt

Hi Wayne
CWget will auto start but you have to set the threshold level with the
mouse, in the lower pane.
(move the red line to the centre of the received audio, and if the audio
level falls then you will have to reset the manual setting)
This will inform the program at what level to start decoding.
Select Auto thresh and it will do it for you.
(save you having to keep resetting the audio input level)
You can save these settings ,so that the next time it is switched on it
will auto start.(registered version only)
Why the need for extra patches, its all there now?
regards
dave G8SZX UK

Hi Dave
I see from your comment that you are a registered user, here in the UK?
1) Who and how do you register with in the UK?
2) How good is the programme at decoding morse - I contest at VHF and occasionally get someone who is insistant on sending CW - especia;;y when the "A" licencees are asleep!! - Comments and opinions on it's performance will be much appreciated.
3) How easy is it to interface with the radio for send & receive? - I run the lappie mainly for logging.
Thanks for you input
Bob

Probably, the best way is to register CwGet via ShareIt.
They are located in Gemany and have a lot of methods to receive money.
Now they can receive payments by UK debit cards also.

Best regards,
Sergei mailto:amx@...

Hi Robert,
as Sergei said it is very straight forward.
Click on help and the options are before you.
I used my card to complete the transaction. No problems at all.

I find this the best decoder around and I have a good selection on my
PC.
It is the easiest to use and gives a good account on hand sent CW and
this is the most difficult test on any decoder.
regarding TX this is not possible as it is a receive only program but
receive interfacing is simple.
Line out on receiver to line in on PC or mic in on some laptops.
A matching device-(2 resistors to form a voltage divider)- may be needed
if overload problems are encountered but this is most unlikely.
Use your record settings on your audio card to set a suitable level.
trust this helps
regards
dave

Hello Wayne
the display spectrograms can be linear or logrithmic and both do the
same job but look different.
I use standard settings.
My advice is for you to get used to one function at a time before trying
the rest and this will prevent you from getting confused.
Master the tuning of the receiver and ensure that the audio levels are
correct. One step at a time and then you can experiment and try other
functions.
Nothing will replace patience and experience so take it easy =-keep it
simple- soon you will say this program is just right for the job
whether it is CW, RTTY or NAVTEX just relax and have fun
get back if still confused

From: david.towers
Topic: 1278 Message: 1282

Wayne my explanation is for truetty as my version of cwget does not
have window spectrogram as a variable.
perhaps this will make it clearer Wayne as I see it and use it,
the spectrogram is the top window and allows you to click with mouse to
align the received signal within the decode window
Here you see the bandwidth of the signals you wish to decode or in CW
the peak of the audio.
The oscillogram is the lower window that shows the mark/space of the
signal and whether it sine wave -square wave or even distorted.
These should be switched on but can be switched off if you require more
display area for text
I leave these switched on.
hope this helps
dave

What Are you trying to find out about Armed Forces Radio Network? It is a group of U S military transmitters placed mostly in Europe and Asia for use of American Forces overseas persosnnel. Most of the transmitters are quite weak, 250 watts or less. There are also TV stations on some of the bases(the actual AFTN). They carry mostly American shows, news etc. You can get a complete list of stations and frequencies from lthe World Radio TV Handbook, an excellent book to own by any and all shortwave, am broadcast listners.

1288. ? on upgrading

Yahoo group: dxsoft
Date: 2002-06-09 04:06:45 UTC
From: Gary & Angela Belcaster
Topic: 1288 Message: 1288

--
I'm fairly new to dxsoft (and windows machines for that matter). I'm wondering if I am doing the upgrade to developmental releases correctly. Do I just accumulate upgrades (over time) in the parent folder and launch from the upgrade icon ?? I also have a small suggestion for dxkeeper - do the author(s) follow this group? Thanks in advance.

Gary

>correctly. Do I just accumulate upgrades (over time) in the parent
>folder and launch from the upgrade icon ??

If there are not special notes,
you can just download newest upgrade, extract archive to temporary folder
and run setup.exe .

If archive includes only new version of program exe-file (without setup.exe),
replace old file by the new one.

> I also have a small
> suggestion for dxkeeper - do the author(s) follow this group?

No.

Hi Maris,

That's correct; AFTN is the Aeronautical Fixed Telecommunications Network.

Please tell me if you have more info about it...

Regards,

Koen

Hello Koen,
My english is not so good to can explain you abouth,I'm working with AFTN,
is like telex communication, by aeronautical pattern, think you can got more
information in your own country asking at one of your airports or maybe
using Google.
I'm not good enough to explain this in english.
I'm so sorry.
Best regards from Transylvania.

Yes. I found that Hamport Has problems with some Icim models. I
allready fix it for Icom-718. I will notify you when I'll return from
business trip. And we will fix bug with your IC-765.

Hi Val,

The information is very useful for me...
Now I know what AFTN is :)

I'll ask the airport nearby about the system.

Thanks for your reply,

Koen

1295. Minor upgrade of SeaTTY

Yahoo group: dxsoft
Date: 2002-06-12 14:36:53 UTC
From: Sergei Podstrigailo
Topic: 1295 Message: 1295

Hello all,

I just have uploaded SeaTTY 1.06 to the main site and mirror:
http://www.dxsoft.com/seatty.zip
http://www.hamport.com/seatty.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
SeaTTY versions history

V1.06
The "Setup->View->Fonts and Colors->Message Window Font Setup" and
"Setup->View->Fonts and Colors->Message Window Background Setup"
options were made.
V1.05
You can open raw log file in Notepad by double-clicking on date
in the message tree.
You can delete selected message or all messages for selected date
by click on "Delete" key.
To reduce chance to miss message for noise SeaTTY starts to write message
if at least three symbols of "ZCZC" signature is received.
V1.0
FSK-demodulator was fully rewritten.
Help-file was made.
V0.26
The "Setup->Don't Save SYNOP Messages" option was made.
To open message file in editor, make double-click in the message tree or
in the message window.

From: Sergei Podstrigailo
Topic: 1303 Message: 1304

Hello Amit,

Thursday, June 20, 2002, you wrote:

AP> just downloaded cw get today.want to know whether usa1 is enough
AP> or do i have to download the other two as well.

It is enough. There are just different mirrors of our server.

AP> what are the
AP> steps/hardware req for using the software

You need receiver and computer (Pentium-75 or better) with a sound card.

Install software, then read help file ...

Best regards,
Sergei mailto:amx@...

1305. TrueTTY v 1.92

Yahoo group: dxsoft
Date: 2002-06-21 14:24:25 UTC
From: nigelg6bit
Topic: 1305 Message: 1305

During data acquisition I cannot scroll back through the incoming text. It attempts to do it, but the window just 'judders'. Occassionally the slider on the right hand side of this window will enlarge to about 3x the size (incl the arrow of the slider bar). At this point the system may freeze, or self-correct and everthing goes back to normal.

Now here is the interesting bit. When the error is visible, moving the mouse cursor near the acquisition window of TrueTTY causes the database listing window to scroll in AAlog v 2.2 !!!!

I have a number of points on the latter software, but I'll discuss my observations / comments with you one at a time.
PS: TrueTTY & AALog are excellent.

Kindest regards: Nigel Crossley (G6BIT)

Hello nigelg6bit,

Friday, June 21, 2002, you wrote:

n> During data acquisition I cannot scroll back through the incoming
n> text. It attempts to do it, but the window just 'judders'.

I'd suggest you press Ctrl-N to see received text in Notepad.

n> Occassionally the slider on the right hand side of this window will
n> enlarge to about 3x the size (incl the arrow of the slider bar). At
n> this point the system may freeze, or self-correct and everthing goes
n> back to normal.

Yes, I sometimes see it also.
It looks like system bug ...

n> Now here is the interesting bit. When the error is visible, moving
n> the mouse cursor near the acquisition window of TrueTTY causes the
n> database listing window to scroll in AAlog v 2.2 !!!!

I didn't understand what you mean ...

n> I have a number of points on the latter software, but I'll discuss my
n> observations / comments with you one at a time.
n> PS: TrueTTY & AALog are excellent.

Thanks!

1312. New AALog for contest

Yahoo group: dxsoft
Date: 2002-07-05 15:06:14 UTC
From: Alexander Anipkin
Topic: 1312 Message: 1312

Hello dxsoft,

I just upload new version of contest module.

New contest added:

+ Venezuelan Independence Contest
+ IARU HF World championship

+ new "Autosend" feature added
now you can assign CwType/TrueTTY macroses for this events
(Config|Autosend setup):
In CQ mode:
- Press "Enter" on empty call field
- Press "Enter" on non-empty call field
- press "enter" on Rcvd Number field
In search mode
- Press "Enter" call field
- Press "Enter" on Rcvd Number field

Use Ctrl+Enter to save QSO without transmition. Use SpaceBar to
switch between Call and received Number.

In the next version will work AutoCQ mode.

To switch between CQ and search mode press button with Speaker
picture.

1313. LPT pin conection

Yahoo group: dxsoft
Date: 2002-07-11 04:46:23 UTC
From: s51jm
Topic: 1313 Message: 1313

Hi,

I registered yesterday, and took a closer look into CWGet and CWType program, and now of course I have a question. Do you plan to change LPT connection like RCKLog did so that it is now as CT, TRLog or N1MM Logger has? I already change my LPT interface from previous RCKLog, wich was like yours, to new design. Now I would have to build new one or change it back to previous version, just for CWType.

Best 73's de Janez - S51JM

1317. DXsoft news

Yahoo group: dxsoft
Date: 2002-07-12 05:46:27 UTC
From: Alexander Anipkin
Topic: 1317 Message: 1317

Hello dxsoft,

We have several news.

1. We change design of the DXsoft web site.

2. Now you can order CD-ROM with ALL DXsoft products. Cost is $12 +
Shipping
https://www.regsoftsecure.com/regsoft/vieworderpage.php3?productid=39137&rc=DXSOFT-001&c_title=The%20DXsoft%20CD-ROM

3. New version of AALog is uploaded

AALog ver. 2.3 - 5 Jul 2001

+ new awards added (JCG, Worked all Ukraine, Russian Districts Award)
- fixed some New QSO window problems
+ Updating awards statistic when you refresh databases
- fixed problem with RAC callbook
- fixed bugs

Here is links for update version
http://www.hamport.com/aal_update.zip
http://www.dxsoft.com/aal_update.zip
http://aalog.hypermart.net/aal_update.zip

To download full install package go to http://www.dxsoft.com/en/products/aalog/

Russian Districts Award rules http://rx3rc.paints.ru/rda/rda_eng.htm

CQ WW VHF Contest, all modes--sponsored by CQ Magazine from 1800Z Jul 20--2100Z Jul 21. Frequencies: 50 and 144 MHz bands, except 146.52 MHz (and other national simplex calling frequencies) and repeater frequencies. Please avoid the DX windows and international calling frequencies. Categories: SOAB, SOSB, MM, Rover, QRP (<25 W). Exchange: Call sign and four-digit Maidenhead grid. Work Rover stations in each grid. QSO points: 50 MHz--1 pt, 144 MHz--2 pts. Score: QSO points ? Grids counted once per band. (Rovers count grids from each activated grid.) For more information--http://www.cq-amateur-radio.com/VHFRUl02.pdf. Logs due Sep 1 to cqvhf@... or to CQ VHF Contest, 25 Newbridge Rd, Hicksville, NY 11801.

Hallo D. Lee

I suggest you contact the author of the programme and tell about your problem. He surely keeps a record of the registered owners of Truetty and will give you the key again.

Good luck.

This reminds me. I did have to restore and the ini file indeed is what you need. It has the reg data. Be SURE to save a copy of that on the floppy.

I find that TRUETTY is VERY VERY insensitive to the sound card. I have to turn the level WAY WAY WAY up in comparison to MixW. Any idea why this would be. I have to turn it all the way up and to get really good indication need to up the out level from the Kenwood from 1 to 9 on the Menu. Very strange and very disturbing because all the other programs I use do not need that?

I am using 1.92 version, the latest.

Topic: 1323 Message: 1329

That does help. It does make it a bit easier to read when using the lower gain on the sound card but it is still harder than other programs. I think it is the spectrogram type display. It would be MUCH better if you had a Waterfall display.
I do not mean to say that the program does not work well. It is only that it is inconvenient to require that I load a different sound card setting just to use your program.

1332. Contest module

Yahoo group: dxsoft
Date: 2002-08-02 05:32:45 UTC
From: Alexander Anipkin
Topic: 1332 Message: 1332

Hello dxsoft,

I just upload new version of contest module

New features added

1. ']' key in New QSO window - switch to calls list. Select Call and
press Enter. Selected call will enter to Call field of the New
QSO window and cursor moved to received number filed. if you
press ESC key in the Calls window you will return to call field
without changes.

2. ";" - copy FIRST call from calls list to Call field. Cursor move
to received number filed

3. You can use Master.dat file now (list of calls from different
tests).

4. ALt+1...6 switch between windows.

5. Calls window now resizable and automatic number columns.

6. New macroses. You can use new macroses
~[iOldCall] ~[iOldRprtSent] ~[isOldRprtSent]
~[iOldNumberSent] ~[isOldNumberSent]

in Cwtype program

this is values for PREVIOUS QSO

7. 10 min and Hour rate display.

Download it from

http://aalog.hypermart.net/aatest.zip
http://www.hamport.com/aatest.zip
http://www.dxsoft.com/aatest.zip

1333. CwGet wish list.

Yahoo group: dxsoft
Date: 2002-08-10 21:07:45 UTC
From: n9qqk@urbancom.net
Topic: 1333 Message: 1333

1) Make a version of "GoToMax" that keeps the frequency
constant.
I've set my rig up for a Cw offset of 700Hz. If I tune a guy in at
700Hz, I've got him "zero beat". I'd like a GoToMax that will shift
the passband so that the signal I goto will be at 700Hz (or whatever
freq I choose).

2) Option to freeze/un-freeze the oscillogram.

3) Option to define the width of the spectrogram window. This
would allow easier fine tuning, Along with an optional indication of
the # of Hz (ruler type) along the bottom of the window.

Great little program.

Ron - N9QQK

1334. CwGet wish list - 2

Yahoo group: dxsoft
Date: 2002-08-10 21:26:07 UTC
From: n9qqk@urbancom.net
Topic: 1334 Message: 1334

I now realize the my 1st widh item would require CwGet to tune the radio to center the desited signal; not something the pgm should be asked to do. This makes my "fine tuning" wish even more desirable for me.

Thanks for letting me think out loud here.

Ron - N9QQK

From: Hermes Quesada
Topic: 677 Message: 1346

Hello greetings to all of you fron TI4DJ, my name is Hermes. I am
experimenting with the RTTY, it is something totally nev to me and I have
several contact in this mode, my hobbie are the DX and the RTTY opens up
broad spectrun. My equipment is a TS430S
of kenwood antena TA33 Mosley and PK232 with a Pentiun 230MHZ it is working
with Paket 6.2 program.
My other station is IC-706 Icon antena TH6dx-dx and Kam-plus wisth a AMD-500
MHZ procesor it is working the paket 6.2 program. I am thrilled with RTTY I
belive that in my contry (Costa Rica) there aren"t many stations working
wiht it.
My questions are:
What is the best software for the PK232 and Kam_plus in RTTY?
Where can I acquiere this software?

thank you
TI4DJ

HQ> My questions are:
HQ> What is the best software for the PK232 and Kam_plus in RTTY?
HQ> Where can I acquiere this software?

I'd suggest you don't use TNC for RTTY at all.

Modern soundcard RTTY software work better and are mach convenient then hardware TNC.

For example, get our TrueTTY software from http://www.dxsoft.com/truetty.zip

Best regards,
Sergei mailto:amx@...

Topic: 677 Message: 1348

Hi, My name is Manuel Iglesias and my call sign HA2YHN, about a month ago I buy tge Kabtronics KAM XL and with the unit came a disc with a few software but they all has to be Register and paid a fee for I own a Yaesu FT847 and that rig is not included in they radio list I call they and they told me that the radio program was a
preview and they not are responsable of supply anuy other radios type. They was really un cooperative and right a way I pay for they registration when I donload their program. If you have a computer and need a CAT program I recomend you the commcat (www. commcat.com) y download the program and I installed but them I find they don't have my Yaessu FT 847 0n the list I call support on the internet, and Howard Nursea for Technical suppor nad ham radio too. Explained to me that because they don't have all the Rig models units they can't make all the units but, if I was ready to work with him he will try to program a file for my rig and send by email to me and them i will try it. We try for 3 times and finally i get my rig file, and the 3 times was my fault because y forget to tell him that my rig to be used with the computer has to be disconnected from the turner, is not his problem is the Yaesu people. Now the program is beautifull . and you can use it with the DX4WIN software too without any complications or problem, you can set the frequencies of your radio, change bands or change frequency I am old Ham radio (Radioaficionado) but after I get the license I only use the HT a few times , but now I was forced to retired and I star over all againg , I can said my experience is non
I am Cuban american and I came to old to USA with my family and my English is not that good, if you speack espanish me can them speack in Spanish, I f not, we can conected in English. 73 KA2YHN.

1349. TrueTTY 1.93 is published

Yahoo group: dxsoft
Date: 2002-08-24 07:02:29 UTC
From: Sergei Podstrigailo
Topic: 1349 Message: 1349

Hello All,

I just have uploaded TrueTTY 1.93 beta to the main site and mirror:

http://www.dxsoft.com/truettyb.zip
http://www.hamport.com/truettyb.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

TrueTTY Versions History

V1.93
The "File->Open KISS Capture File" command opens capture file to
save all receiving AX-25 packets in KISS-format.
The program behavior at not very vast computer was improved.
Some minor bugs were fixed.
V1.92
The "File->Open Buffer in Notepad" command was made. It saves receiving
buffer in a temporary file and opens this file by a text editor. Then you
can view this file or print it. The hotkey of this command is Ctrl-N.
This command is available in registered version of the software only.
A bug with the "List index of bounds" message appearing during editing of
text to transmit was fixed, I hope.
V1.91
The "Setup->Catch Words in Contest Mode" option was made.
In this mode software doesn't use popup-menu to catch word to logger.
TrueTTY recognize callsign or control number automatically.
The "Setup->Beacon Off At Mouse Click" option was made.
If this option is enabled, beacon is switched off by mouse click on
spectrogram, RX window or input window or by key pressed in the input window.
The "Setup->Continuous Carrier While Idle" option was made.
If this option is enabled, TrueTTY doesn't use idle symbols in RTTY and ASCII
modes.
Some minor bugs were fixed.

Manuel .. I have an FT-847 and I had a similar experience with another company. I sent the unit back and bought a Rascal from BUX Communications (about $50). BUX makes the unit specifically for the FT-847 (the R-3) - http://packetradio.com/psk31.htm. As for software, I use MMTTY and Digipan (both shareware or freeware). As long as you keep the sound card levels low on your PC and the power on the 847 down to about 30 watts, you can work a lot of RTTY and PSK31 with no problem.

1352. AALog for contest

Yahoo group: dxsoft
Date: 2002-08-29 17:04:10 UTC
From: Alexander Anipkin
Topic: 1118 Message: 1352

Hello ,

I just upload new version of contest module

New contest added

- UBA field day

Download it from

http://aalog.hypermart.net/aatest.zip
http://www.hamport.com/aatest.zip
http://www.dxsoft.com/aatest.zip

Best regards,
Alexander mailto:aia@...

1353. Greetings from Canada

Yahoo group: dxsoft
Date: 2002-08-29 17:24:59 UTC
From: David
Topic: 1353 Message: 1353

I have joined and want to start off with a request. Anyone know of a web site to find downloads with AMREG Software for Icom?? Only one I found is.....http://www.halcyon.com/AMREG: .but it's not working!? Anyone know of others? It seems to me there is a limited availability of this software.

If its ok I would like to send an invite to everyone here to my Yahoo Group at.....http://groups.yahoo.com/group/hamradiojunkbox/
Some groups don't permit so feel free to delete this portion if my post is approved. TX

Dave

1354. CWType and LPT reset

Yahoo group: dxsoft
Date: 2002-08-30 18:42:20 UTC
From: oe1mww
Topic: 1354 Message: 1354

Sergei,

I am using CWType from time to time. Therefore I have an interface to the lpt port connected to the tranceiver. Unfortunately after every startup of Windows XP (had the same under NT 4) the LPT port keys up the TX (if its in CW) mode.

A simple and small utility that resets the LPT via the DXSoft driver in the STARTUP (AUTOSTART) group and immediately terminates itself would help. Can you please provide an entry point for the driver (to write something in VBasic or any other language).

Your help is very much appreciated.

73's Wolfgang OE1MWW

It is third-party component, and my licence prohibits me to disclosure details.
But may be Switcher will help so far.
http://www.dxsoft.com/en/products/switcher/
At least, you can fast click on "3" button of Switcher and close it.

I will try to find time to make special utility which you want ...

1357. DXSoft Switcher 2.0 is there

Yahoo group: dxsoft
Date: 2002-09-01 21:11:24 UTC
From: Sergei Podstrigailo
Topic: 1357 Message: 1357

Hello All,

I just have uploaded Switcher 2.0 to the main site and mirror:

http://www.dxsoft.com/switcher.zip
http://www.hamport.com/switcher.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
DXSoft Switcher 2.0

DXSoft Switcher is a simple software to handle devices connected to
an LPT-port.

The "1" button erects a logical one at pin 2 of an LPT-port,
the "2" button sets high level at pin 3 and so on.

The program can be launched with several command line parameters.

An /LPTx parameter defines used LPT-port. (/LPT1 , /LPT2 and so on).
LPT1 is used by default.

An /M parameter enables to switch on several switches at one time.

An /Sx parameter define a switch switched on at the program start
(/S1 ... /S8). /S0 means "all switches are off". To switch on several
switches use several /Sx commands.

An /Ttext parameter defines a title of program window.

An /B1text ... /B8text parameters define text on button 1...8 respectively.

An /Ontop parameter puts Switcher in front of all windows.

An /EX parameter means "to set switches and close program".

There are examples of command line:

"C:\Program Files\Switcher\Switcher.exe" /LPT2 /Ontop
"C:\Program Files\Switcher\Switcher.exe" /LPT1 /M /S3 /S5 /Ontop
"C:\Program Files\Switcher\Switcher.exe" /LPT2 /S0 /EX
"C:\Program Files\Switcher\Switcher.exe" /LPT1 /TMy Antennas /B1dp /B2lw /Ontop
"C:\Program Files\Switcher\Switcher.exe" /LPT1 /TAntenna rotor /B100 /B245 /B390 /B4135
/B5180 /B6225 /B7270 /B8315 /Ontop

The program is free of charge.

Best regards,
Alexander mailto:aia@...

1361. AALog 2.4 is here

Yahoo group: dxsoft
Date: 2002-09-14 18:33:10 UTC
From: Alexander Anipkin
Topic: 1361 Message: 1361

Hello dxsoft,

New version of AALog is uploaded

AALog ver. 2.4 - 14 Sep 2001

- DXAtlas interface improved. You can call DXAtlas from "New QSO" window.
- GRID export to DXAtlas.
- Grid import from RAC.
- you can enter note for all contacts when import data from another
loggers now
- fixed several minor bugs.

Here is links for update version
http://www.hamport.com/aal_update.zip
http://www.dxsoft.com/aal_update.zip
http://aalog.hypermart.net/aal_update.zip

To download full install package go to http://www.dxsoft.com/en/products/aalog/

Best regards,
Alexander mailto:aia@...

Hello!
I have the same problem with DLL, when I have tried to install full 2.41.
And after ignoreing it, when I create a log by Ctrl+N, it was not able save
log configuration
and I see no logs available after restarting AAlog.
I have to install 2.40 and then update it to 2.41.
I am using Windows98.

Date: 2002-10-08 20:11:35 UTC
From: Alexander Anipkin
Topic: 1375 Message: 1375

Hello ,

I just upload updated version of contest module

- fixed bug in the CQ WW/RJ RTTY contest

New contest added

- Oceania DX contest
- Worked All Germany
- RSGB 21/28 contest

Download it from

http://aalog.hypermart.net/aatest.zip
http://www.hamport.com/aatest.zip
http://www.dxsoft.com/aatest.zip

Best regards,
Alexander mailto:aia@...

Topic: 1375 Message: 1376

Alex,
I am trying to start up Hamport. Does it support 756 Pro. I only see 756 and 756 Proii. I have tried both unsucessfully.
Can you comment
Thanks
Bob

1384. Integrating AAVoice with AALog contest

Yahoo group: dxsoft
Date: 2002-10-20 22:28:01 UTC
From: Louis Sica, Jr.
Topic: 1384 Message: 1384

Are there any docs available on how to integrate AAVoice with the AALog Contest module? I'm looking for a way to have one read callsigns off the other, for example.

Thanks to all

Lou Sica AC0X

1386. Re: [dxsoft] Integrating AAVoice with AALog contest

Yahoo group: dxsoft
Date: 2002-10-21 07:34:29 UTC
From: Alexander Anipkin
Topic: 1384 Message: 1386

Hello Louis,

Monday, October 21, 2002, 2:28:01 AM, you wrote:

LSJ> Are there any docs available on how to integrate AAVoice with the AALog
LSJ> Contest module?
yes
LSJ> I'm looking for a way to have one read callsigns off the
LSJ> other, for example.
Interface the same as cwtype and truetty.

For example

Macros in AAVoice

1.
~[tx]~[iCall]~[iReportSent]~[iNumberSent]`[rx]

will switch TRX to transmit mode, say call from Call filed in Contest
module CHAR BY CHAR then Say RST and number Char by char and switch to
RX mode

2.
~[tx]~[iCall]~[fZone.WAV]`[rx]

In this case AAvoice say Call and prerecorded file zone.wav with your
report and zone.

Please note you don't need to swith in AAVoice to say macroses. USe
F-keys in AATest to transmit phrases.

!!!!!!!!!!!!!!
If anybody have another questions about programs fill free to ask it here.
!!!!!!!!!!!!!!

Here is part of readme file from AAVoice distributive

KEYBOARD MACROS AND MACROSEQUENCES

Keyboard macros are inserted into the input window (in a place
indicated by the cursor) by pressing a function key F1... F12 or at a
'click' on the appropriate button. In turn, keyboard macros may contain
macrosequences. Macrosequences start with a character string "~[" and
are ended by the character "]".
Sound files must bases in /sound subdirectory.

Here is list of macrosequences:

~[fFilename] - to insert contents of the file Filename.
~[iField] - to insert value of a field Field from the
additional ini-file. A filename and section
of ini-file are defined by parameters
ExternIniFile and ExternIniSection in the
file AAVOICE.INI .
~[ec] - to insert value of the "Call" edit field.
~[er] - to insert value of the "RS" edit field.

~[tx] - to switch TX on and to switch "pause" off.
~[cl] - to clear the buffer.
`[rx] - to switch TX off.
`[p<number>] - pause on <number> milliseconds.
~[rp<pause>:<number>] - repeat macros string for <number> times with
delay on <pause> milliseconds. This macro can be use
on the end of macros string only. If <number> is equal
to zero then macros string repeat permanently until press
ESC or click Stop button.

Hello again..

Looks like I need some more help...

I have all my voice macros stored in AAVoice, and they seem to work fine
with just AAVoice running.

But when I try to key them from AATest, all that happens is that my rig gets
keyed. No sound gets transmitted, but the name of the wav file appears in
the AAVoice window. It also never un-keys the rig.

Here's the sections from my AAVoice ini file:

[Macroses]
Macro1=~[tx]~[fcq contest.wav]~[rx]
Macro2=~[tx]~[fqrz contest long.wav]~[rx]
Macro3=~[tx]~[fqrz.wav]~[rx]
Macro4=~[tx]~[fthank you.wav]~[rx]
Macro5=~[tx]~[f5904.wav]~[rx]
Macro6=~[tx]~[icall]~[rx]
Macro7=~[tx]~[er]~[rx]
Macro8=~[tx]~[f59.wav]~[rx]
Macro9=~[tx]~[f73.wav]~[rx]
Macro10=~[tx]~[iNumberRcvd]~[rx]
Macro11=~[tx]~[fagain.wav]~[rx]
Macro12=~[tx]~[froger.wav]~[rx]
[Paths]
SoundDir=C:\Documents and Settings\Administrator\My Documents\NEWSOUND\Voice
keyer sounds\\
ExternIniFile=C:\Program Files\AALog Contest\AATest.ini

LSJ> Here's the sections from my AAVoice ini file:

LSJ> ExternIniFile=C:\Program Files\AALog Contest\AATest.ini

Here is one problem. AATest write info into aalog.ini in the Windows folder.

Right value is

ExternIniFile=AALog.ini

LSJ> SoundDir=C:\Documents and Settings\Administrator\My Documents\NEWSOUND\Voice keyer
sounds\\
try to remove the second "\" char from this string.

Best regards,
Alexander mailto:aia@...

1390. AATest and CWType

Yahoo group: dxsoft
Date: 2002-10-21 18:18:08 UTC
From: Alexander Anipkin
Topic: 1390 Message: 1390

Hello dxsoft,

Here is example of my macroses for CWType. I use this macroses in every CW contest.

```
[Cw_Macros]
Macro0="~[cl]"
Macro1="~[tx]test rz4ag rz4ag test"
Macro2="~[tx]de RZ4AG"
Macro3="~[tx]tu 5nn ~[isNumberSent]"
Macro4="~[tx]~[iCall] ge 5nn ~[isNumberSent]"
Macro5="~[tx]tu QRZ test de RZ4AG"
Macro6="~[tx]QRZ test de RZ4AG RZ4AG"
Macro7="~[tx]AGN"
Macro8="~[tx]~[iCall]? agn"
Macro9="~[tx]~[iCall] sri qso b4"
Macro10="~[tx]?"
Macro11=""
Macro12=""
Macro13=""
Macro14="~[tx]de RZ4AG RZ4AG`[rx]"
Macro15="~[tx]ur 5nn ~[isNumberSent] ~[isNumberSent]"
```

I use Macro2 for short call and Macro14 for long call. There are keys F2 and Ctrl+F2

I don't use PA and use semi-brake in TRX. I don't need switch TX off. In other case add `[rx] macro at the end of each string.

I never switch to CwType. All manipulations work from AATest. When you need to transmit some non-standard text from keybord use Ctrl+Z keys.

Thank you

Best regards,
Alexander mailto:aia@...

Hello again

I made the changes you suggested, and I'm still having the same problem. But AAVoice *is* reading the data from AATest. It appears in the text window of AAVoice, and it does key COM3. It just never sends the sound file. Also, AATest and CWType work fine together. So does AATest and TrueTTY.

1393. I would like to know if people on the Net 'chats' using CW

Yahoo group: dxsoft
Date: 2002-10-21 23:54:35 UTC
From: mpadilha@altavista.net
Topic: 1393 Message: 1393

I am going to ask a somewhat unusual question, but it comes
from somebody that spends 8 hours a day working on a computer, loves CW,
but still hasn't money to buy a nice transceiver.

I would like to know if people on the Net 'chats' using CW? I mean, as an IRC
chatting program does, but instead of
exchanging words and phrases, the program exchanges morse code?

Does it exists?

Thanks

From time to time you will find people more interested in a good QSO rather than a '599 and 73'.
I like a good QSO myself and on ocasions I make +20 minutes QSO with a dx station in CW.
I like to talk antenna stuff, culture, etc...

Look for CW on 17 mtrs where some people like a 'chat'.

It sounds as though the sound card frequency is wrong. Do you have a problem with other programs that need accuracy here? If you have SSTV available then try it. If that is slanted then it is sure that you have to adjust the sound card sample rate.
MMTTY is free.

1402. Re: [dxsoft] Fw: HF fax

Yahoo group: dxsoft
Date: 2002-10-25 19:07:05 UTC
From: Chris
Topic: 1400 Message: 1402

Hi Allan,

This skewing effect is due to the difference in clock speeds between your old and new sound cards.

There is a parameter that needs adjusting in the wxsat.dat file called:

fs-Corr

The following text is taken from one of the Wxsat help files :

fs-Corr: If a picture decoded without PLL is tilted, the sampling frequency of the sound card is not on exactly on the spot. To overcome this problem either the local oscillator can be locked to the received subcarrier ("Lock" on) or the sampling frequency of the sound card can be measured and corrected for. (The latter methods also helps when decoding tape recorded signals that suffer from a large difference between recording and playback speed.)

The measurement of the real sampling rate needs an AM signal of known quality. The nominal subcarrier frequency has to be stated in the "Subcarr." field. Then the signal should be decoded with both the "Lock" and the "GenCalibVal" switches on. In "Calibrate - Values" the number "fs Correction" shows the ratio of real to nominal sampling frequency. This number - it should be near "1" - may now be put at the position fs-Corr. in line 3 of WXSAT.DAT. If the deviation is larger, this correction method should be repeated to get optimal results. For this procedure the program must be restarted in order to read the new value now present in WXSAT.DAT. This correction method should yield straight pictures.

NB. Orbiting satellites may display a strong Doppler deviation of the subcarrier. Therefore the results of the described method is only sufficiently exact if the velocity of the satellite relative to the position of the receiving station is low. In no case noise should be present in the signal portions used for this calibration.

I hope this helps !!!

Regards

Chris

1403. AALog 2.41 NEW USER QUESTIONS

Yahoo group: dxsoft
Date: 2002-10-30 05:01:20 UTC
From: Rob Boux
Topic: 1403 Message: 1403

Hello group,

I just installed AALog 2.41(not registered yet)on my Windows XP Pro P-4 computer. I have found the program to have the text cut-off in many spots through-out. Is this normal? I have re-installed the program, but this didn't correct the problem. One such spot is the 'Total QSO area' in the bottom right corner of the main page, The 'o' is half cut-off of QSO. Another area is in the bottom left area...Territory. The 'y' is
disfigured. There are also many other areas in different box's that open up that have either letters missing or crammed together letters. Can someone please offer some help in this matter. I do seem to like this logging program the best from the many I have tried. Other loggers I have used either have weird bugs (Logger), or are not very good(DX4WIN)for my needs.

73
de Rob

And what about a logger program that is capable to make a coffee ? :-)

I think, transmitting and receiving are _not_ purposes of any logger.

But you can use AAlog together with TrueTTY for PSK ...

I just test it and found no problems under XP. Can you send screensot of your
screen?

RB> PS: I do want a logger program that is capable of PSK31.
AALog is logger ONLY. But it use TrueTTY for digital operations,
CwType for CW manipulation and AAVoice as voice keyer.

1407. [dxsoft] AALog 2.41 YV5MBX

Yahoo group: dxsoft
Date: 2002-10-30 11:52:26 UTC
From: Susana de López
Topic: 1407 Message: 1407

Hi,

Just after finished the CQWW last weekend, I have a pair of questions for the community of users:

1.- If there was a contact in progress ex. EA4ED , Zone: 33 and for any reason the QSO could not be completed, then with the back key "<----" (I understand that I must use the "X" clear button) I erased the station name but the zone 33 still was at the screen, then in the next contact ex. W4LTF the software didn?t change the zone, and the 33 was still there, and if I press "Save" then the zone will be wrong saved and the QSO invalid.

2.- CQ magazine asked about cabrillo formats, but it?s not clear for me if I have to save either the contacts and/or the results (points) in this format, so becaue of this will be two files that must be sended. ?Could someone let me know the right procedure?

Note: Instead the little difficulties, the performance and easy of use of the software was extraordinary.

Thanks for help
Javier

I suspect it does this because in *most* contests, the exchange is not automatic. In most contests you receive the exchange from the other station. So you wouldn't want to have the exchange erased just because you have the call incorrect. You might just have the call incorrect, but the exchange correct.

You are right. And I will add more smart system :). If user change
number manually and then clear call by BackSpace then program will not erase number.
But if number was generated automatically program will clear field.

1416. cwtype interface for a Kenwood TS 570

Yahoo group: dxsoft
Date: 2002-11-04 01:17:01 UTC
From: va7s
Topic: 1416 Message: 1416

i need some help;

want to run cwtype on my 570 and not hw to start

need complete schematic for using the acc2 port on the 570 already have a psk and a fsl interface but i guess they will not work as to access the cw on the 570 one needs to use the mini plug at back of radio .

have a little 9 pin interface built for cw but it didnot work naturally

i have very clumsy hands but need a complete words by word description and full schematic for the interface

tnx Ian VA7SW

I don't know details about TS570, but TS870S has not KEY-IN pins in ACC2.
There is separate "KEY" jack near "ACC2" .

Best regards,
Sergei mailto:amx@...

Ian,
I have a 570S working with cw-type from the serial port. From memory I had to sw the keying line phase 180deg with a small transistor. I'll be in touch when the notes are found.

Hi, Alexander.
I use AALOG, three years, the program are pleasant to me, but it would be desirable, which was
autosearch and autofilling of fields QTH, Name etc., from data bases QRZ.com etc.
Whether you plan it to do?
Best regards, Nick, UN7MO.

1421. ITU zones in Kazakhstan

Yahoo group: dxsoft
Date: 2002-11-04 11:31:11 UTC
From: UN8GU
Topic: 1421 Message: 1421

Hello Alexander,

I would like to mark that there is a wrong ITU ZONE number
for Kazakhstan in AAlog database.
Our country has 3 ITU zones (29 - 31) but log shows ITU 29 for all suffixes.
For example, UN_G is ITU 31.

Best regards and 73!
de Andy, UN8GU

1428. TrueTTY 1.95b is there

Yahoo group: dxsoft
Date: 2002-11-07 10:07:04 UTC
From: Sergei Podstrigailo
Topic: 1428 Message: 1428

Hello All,

I just have uploaded TrueTTY 1.95b beta to the main site and mirror:

http://www.dxsoft.com/truettyb.zip
http://www.hamport.com/truettyb.zip

TrueTTY can work as KISS-TNC in AX-25 mode now.
Your reports about software testing are very welcome!

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

TrueTTY Versions History

V1.95
TrueTTY can exchange receiving and transmitting data to another software
via additional COM-port now. So, TrueTTY can emulate hardware modem or TNC.
The "Setup->Data Exchange Interface" menu selects COM-port used for this
purpose. So, with two com ports (in single computer or in two computers)
connected via null-modem cable, you can use TrueTTY with another terminal
software intended for hardware modem using. For example, you can try to use
TrueTTY with WF1B contest software (though I prefer AALog). A speed of
data exchange via COM-port is 9600 bauds. See null-modem cable schematics
in NULL-MOD.GIF file.
If you are using COM-port for PTT interface but don't use it for FSK, you
can use the same port for data exchange also.
Software COM-port emulator can be used also. I have used VSPD virtual
COM-port driver from http://www.mks.zp.ua with success.

In AX25 mode TrueTTY can work (to receive and transmit) as KISS-TNC via
COM-port or DXSOFTEX.DLL interface now. KISS mode is switched on by
"Setup->Data Exchange Interface->KISS Mode in AX25" menu item.

I have successfully tested TrueTTY with great AX25 software Pr4Win
(see http://www.geocities.com/nl3asd/download/pr4win.html ,
http://www.qsl.net/oe8djk/) with hardware COM-ports (USB/COM converters)
or with VSPD driver.
V1.93
The "File->Open KISS Capture File" command opens capture file to
save all receiving AX-25 packets in KISS-format.
The program behavior at not very vast computer was improved.
Some minor bugs were fixed.
V1.92

The "File->Open Buffer in Notepad" command was made. It saves receiving buffer in a temporary file and opens this file by a text editor. Then you can view this file or print it. The hotkey of this command is Ctrl-N. This command is available in registered version of the software only.
A bug with the "List index of bounds" message appearing during editing of text to transmit was fixed, I hope.
[...]

1429. CWtype integration ?

Hello LZ1ZM,

Thursday, November 7, 2002 , you wrote to me:

L> How can I integrate CWtype and AALog contest module ?
L> I've downloaded
L> http://www.dxsoft.com/dxs-exch.zip
you need run both program together
and write macros for cwtype.

Brief documentation for contest module will be ready on the next week.

Here is example of my macroses for CWType. I use this macroses in every CW contest.

```
[Cw_Macros]
Macro0="~[cl]"
Macro1="~[tx]test rz4ag rz4ag test"
Macro2="~[tx]de RZ4AG"
Macro3="~[tx]tu 5nn ~[isNumberSent]"
Macro4="~[tx]~[iCall] ge 5nn ~[isNumberSent]"
Macro5="~[tx]tu QRZ test de RZ4AG"
Macro6="~[tx]QRZ test de RZ4AG RZ4AG"
Macro7="~[tx]AGN"
Macro8="~[tx]~[iCall]? agn"
Macro9="~[tx]~[iCall] sri qso b4"
Macro10="~[tx]?"
Macro11=""
Macro12=""
Macro13=""
Macro14="~[tx]de RZ4AG RZ4AG`[rx]"
Macro15="~[tx]ur 5nn ~[isNumberSent] ~[isNumberSent]"
```

I use Macro2 for short call and Macro14 for long call. There are keys F2 and Ctrl+F2

I don't use PA and use semi-brake in TRX. I don't need switch TX off. In other case
add `[rx] macro at the end of each string.

I never switch to CwType. All manipulations work from AATest. When you need to
transmit some non-standard text from keybord use Ctrl+Z keys.

Thank you

Best regards,
Alexander mailto:aia@...

1431. Re: [dxsoft] TrueTTY 1.95b is there

Yahoo group: dxsoft
Date: 2002-11-07 15:03:41 UTC
From: h.j.karius@t-online.de
Topic: 1428 Message: 1431

Hallo Sergei

And thank you for the new version. TrueTTY is a really robust decoding programme in terms of working under QRM conditions.

I could imagine you would even gain more buyers if you added a feature to decode SYNOP wx messages.

Best regards

Hans-Juergen, DL4YBP

Anatolian ATA PSK31 Contest
---------------------------

This contest is dedicated to
the anniversary dead day (10 November, 1938)
of the Mustafa Kemal ATATURK
who founded the modern Turkey.

CONTEST PERIOD:

1800 - 2400 UTC
Saturday 9 November, 2002

MODE:
PSK31.

BANDS:
80, 40, 20, 15, 10 m.
```

CATEGORIES:
☐ A. Single Operator All Bands
☐ B. Multi Operator All Bands
☐ C. SWL

```
MESSAGE:
Send RST + QSO number, starting with 001.
```

POINTS:
☐ QSO with own country, 5 points
☐ QSO with other countries in own continent, 10 points
☐ QSO with other continents, 15 points

```
MULTIPLIER:
Count each DXCC country on each band.
Additionally, each call area in TA, VK, VE, JA and W will count as
multiplier on each band.

SCORING:
Total QSO points x total multipliers.

LOGS:
Use seperate log sheets for each band.

Logs must show: Band, Date, Time (UTC), Call sign, Message, Points
and Multiplier.

Deadline is December 9, 2002.

I just upload master.dat (more then 110 000 callsigns) to
http://www.hamport.com/download/master.zip

Please note. If you have not very fast computer you will have delay after every
simbol in Call field in the new qso window

Best regards,

1437. CwType 1.20 is released

Yahoo group: dxsoft
Date: 2002-11-09 11:46:28 UTC
From: Sergei Podstrigailo
Topic: 1437 Message: 1437

Hello All,

I just have uploaded CwType 1.20 to the main site and mirror:

http://www.dxsoft.com/cwtype.zip
http://www.hamport.com/cwtype.zip .

Your feedbacks are welcome!

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

CwType Versions History

V1.20
Macrosequences were made:
~[ce] or `[ce] - to clear edit fields;
~[csnt] or `[csnt] - to clear sent symbols window.

Macrosequences for increment of numbers in the edit fields were made:
~[nic] or `[nic] - to increment a number in the "Call" field;
~[nir] or `[nir] - to increment a number in the "RST" field;
~[nin] or `[nin] - to increment a number in the "Name" field;
~[nio] or `[nio] - to increment a number in the "Other" field.

Macrosequences for logger control were made:
~[lgc] or `[lgc] - to clear all fields, except "Date", "Band" and
"Mode" in the "New QSO" window of the AALog;
~[lgt] or `[lgt] - to set current time and date in the "New QSO"
logger window;
~[lgs] or `[lgs] - to save QSO into the log;
~[lgts] or `[lgts] - to set current time and date and save QSO.

The "Setup->Use 'Other' Field As" menu assigns alternative meaning to
"Other" edit field. This meaning is used to catch words from CwGet and to
transfer data to a logger.

V1.13
New macrosecuences were added:
~[su] or `[su] - to increase speed;
~[sd] or `[sd] - to decrease speed;
~[spNNN] or `[spNNN] - to set speed of NNN LPM;
~[ss] or `[ss] - to save current speed to memory;
~[sr] or `[sr] - to restore speed from memory.
Please, think twice before using this macrosequences!

It is too hard to receive morse code with variable speed usually.

Logger can set speed and inter-letter space via special messages now.
V1.12
A bug was fixed. "OnTop" mode didn't work correctly after "Edit Macros"
command executing.
The "File->Open Capture File" command opens capture-file for
transmitted symbols. If file exist, new symbols are appended to it.
The "File->Close Capture File" command closes capture-file.
Capture-file state is shown in status-line. Hotkey for capture on/off
commands is Alt-L. The command line argument "/c Filename" can be used to
open capture file at the program startup.

Please, think twice before using this macrosequences!
It is too hard to receive morse code with variable speed usually.

Logger can set speed and inter-letter space via special messages now.
V1.12

A bug was fixed. "OnTop" mode didn't work correctly after "Edit Macros"
command executing.
The "File->Open Capture File" command opens capture-file for
transmitted symbols. If file exist, new symbols are appended to it.
The "File->Close Capture File" command closes capture-file.
Capture-file state is shown in status-line. Hotkey for capture on/off
commands is Alt-L. The command line argument "/c Filename" can be used to
open capture file at the program startup.

From: Alexander Anipkin
Topic: 1444 Message: 1444

Hello dxsoft,

I just upload new hamport to web sites.

In this version was added protocol for Yaesu FT-840, FT-847, FT-890, FT-900, FT-920, FT-990, FT-1000D (thanks to Andrew A. Zabavnikov, UA3RAW)

Unfortunatelly it tested with FT-900 only. If you hve some of this TRX please test program and send reports about results.

You can download it from
http://www.dxsoft.com/hamport.zip
http://www.hamport.com/hamport.zip
http://aalog.hypermart.net/hamport.zip

Best regards,
Alexander mailto:aia@...

Alexander,
I have just downloaded Hamport and tested it with Yaesu FT920,

Observations
The frequency indicated on the FT920 IE 7.040.27 is displayed on
Hamport as 70.402.70 I think decimals are in the wrong place,
Also I am unable to change the FT920 Frequency using the up/down arrows
within Ham port.
All mode settings work fine.

The config Settings are com3, 4800,8,n,1 no flow control.

Thanks you for some very fine ham Software especially Truetty,

Best regards

Ian G6VGH

PO> Is there any change for making a selection in CWGet for soundcards.
PO> I have two soundcards and the second device is for ham radio.
PO> Some programs support this and is great.

Let's read help-file together :-)

====
If there are several sound cards in a computer, you can select the card
by the "SoundCardNumber" parameter of [CwGet] section of the CWGET.INI file.
"SoundCardNumber=0" means a first sound card,
"SoundCardNumber=1" means a second card etc.
Negative value means system default sound card.
This feature is available in registered version of the software only.
====

If your CWGET.INI doesn't consist this parameter, write it manually.

1458. CwGet 1.27 beta is there!

Yahoo group: dxsoft
Date: 2002-11-22 17:12:12 UTC
From: Sergei Podstrigailo
Topic: 1458 Message: 1458

Hello All,

I just have uploaded CwGet 1.27 beta to the main site and mirror:

http://www.dxsoft.com/cwgetb.zip
http://www.cwget.com/cwgetb.zip

If your sound card supports a full-duplex mode,
you can use CwType as narrow-band sound DSP-filter now.
The bandwidth of a sound filter is selected by
the "Setup->Sound Output" menu.

Best regards,
Sergei mailto:amx@...

1469. CwGet 1.28 beta is there!

Yahoo group: dxsoft
Date: 2002-12-02 17:44:18 UTC
From: Sergei Podstrigailo
Topic: 1469 Message: 1469

Hello All,

I just have uploaded CwGet 1.28 beta to the main site and mirror:

http://www.dxsoft.com/cwgetb.zip
http://www.cwget.com/cwgetb.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

CwGet Versions History.

V1.28
CwGet can decode signals from WAVE-file now.
See the "File->Decode From File" command.
WAVE-file must be Windows PCM file, without compression.
Preferred file parameters are mono, 16 bit, 11025 Hz.
V1.27
If your sound card supports a full-duplex mode,
you can use CwGet as narrow-band sound DSP-filter now.
The bandwidth of a sound filter is selected by
the "Setup->Sound Output" menu.
V1.25
If there are several sound cards in a computer, you can select the card by
the "SoundCardNumber" parameter of [CwGet] section of the CWGET.INI file.
"SoundCardNumber=0" means a first sound card, "SoundCardNumber=1" means a
second card etc. Negative value means system default sound card.
The command "File->Open Buffer in Notepad" was made. It saves receiving
buffer in a temporary file and opens this file by a text editor. Then you
can view this file or print it. The hotkey of this command is Ctrl-N.
This command is available in registered version of the software only.
V1.24
The main filter and amplitude detector were fully rewritten.
A set of main filter bandwidths was extended.
Alt-D shortcut was made for the "Clear Buffer" command.
[...]

1470. AALog labels Printing

Yahoo group: dxsoft
Date: 2002-12-04 06:38:57 UTC
From: Andy Novikov
Topic: 1470 Message: 1470

Hello Dear All,

Sorry for the troubling.
Can anyone advise me how I can print every QSO in New QSL Lable.
Example: I have a lable - One QSO per One lable.
I have 5 QSOs with A61AJ - I'd like to print every QSO in every new lable.
If I create 5 lables in line in Labels Generator Designer - with fields Date-2, Time-2 ... in 2-nd lable and so on up to 5, it prints well, but I cannot use this design for stations with less then 5 QSOs, as it prints empty labels.
If anyone had and solved this problem.
Thanks in advance.

In current version the only way is enter different values to
QSL via field and then remove this value in the QSL service Unit.

I will add max QSO on the label setup in 2.42

1473. Can't get AAvoice to make my xcvr transmitt

Yahoo group: dxsoft
Date: 2002-12-04 15:43:20 UTC
From: Ken Bessler
Topic: 1473 Message: 1473

I can't seem to get aavoice to cause my FT817 to transmit.
Let me answer some obvious questions:

1) Yes, I'm in band
2) My com port interface works just fine with several other
software packages.
3) When I tell AAvoice to change com port settings or to
select rts/dtr/both for tx, the rig transmits for an instant.

When I run AAvoice, I hit F1 (my call) and then click on the
"tx" button. My call is announced but my rig does not transmit.
Real no tx here, my tx light stays green and the rx/tx relay stays
quiet and there is no RF going through my meter.

What am I missing here??

Ken

I'm using a single transistor to pull the ptt line to ground.
Works perfectly with all other programs and like I said,
I get a brief TX when I play with the com port setup.

Wierd, eh?

Just a thought, wrong polarity device?

If incoming signal went to ground level,
it might be biasing the npn to off, causing
the PTT line to release or go positive...

just a thought... Jim Reed

Can you show your _exactly_ schematics ?
Not just "a one transistor", but used com-port pins, resistors, diodes etc.

There can be non-trivial error in schematics ...
In this case schematics behavior depends on state of not-used signals ...

I don't have any pics but it's a simple circuit - the DTR line of Com 2 goes to a 10 k resistor. The output of that resistor goes to the base of a NPN transistor. The collector goes to the PTT line, the Emitter goes to ground. The ground goes to the radio ground and the com line ground.

Ken

1482. CWType with Buxcomm Rascal

Ops!
I just have tested AAVoice 1.45 carefully.
There is a real bug there :-(
The program uses RTS only, ignoring menu setting.
Will be fixed ...

WBR,
Sergei

P.S.
I'd add a diode in parallel of base-emitter of transistor.
(Cathode to base and anode to emitter.)
Most transistor have low maximum of reverce voltage of
base-emitter.

Hello dxsoft,

I Just upload new aatest to websites.

new contest
- ARRL 160 added

Several bugs are fixed, new added (hi)

+ Master.dat included (you need at least Pentium II processor to use it)
+ Interface with hamport added. Now you can control your TRX from
contest module and get TRX state to AAAtest.
+ Interface with dxsoft cluster monitor for cluster window (possible problems on some
computers, not receive spots)
+ new mults window style

Documentation will be ready in several days

Download it from

http://aalog.hypermart.net/aatest.zip
http://www.hamport.com/aatest.zip
http://www.dxsoft.com/aatest.zip

Best regards,
Alexander mailto:aalog@...

SdL> If it?s possible to recover and to avoid more errors in the future how may I
SdL> switch between the data of different contest?????, It?s only possible to
SdL> have data of only one contest and then I have to copy to a regular
SdL> AAlog??????

Javier, Contest module use the single file for storing contest info. You need backup file aaltest.dat if you want save info about some contest. And surely will bw better copy data to the main AALog.

SdL> Cluster Monitor question:
SdL> How may I use the Telnet? / Is there any specific IP address where may I
SdL> contact, if do so wich is it?
What do you mean? To connect some telnet node you need connect to this node, register on it, and then prepare script for automatic connect.

SdL> How do I post a message in the Cluster Monitor????
Automatic posting is not allow now. you can post manually from telnet window.

Best regards,
Alexander mailto:aia@...

Alexander,

Thank you for your clear message, but due my lack of experience with Cluster Monitor, I would like toconnect to some telnet node but I don??t know any.

Could you help me about this????

Hello Susana,

Friday, December 13, 2002, you wrote to me:

First, please exuse me for my English.

And some hints...

SdL> Thank you for your clear message, but due my lack of experience with Cluster
SdL> Monitor, I would like toconnect to some telnet node but I don??t know any.
Go to this link
http://www.cestro.com/pcluster/telnet.html

Select some telnet node. Connect to it. Enter your callsign. Some system ask some additional info. After you enter all info you will receive spots and other info.

Now you are ready to use this cluster in dxcluster monitor. Open Telnet|Script editor and prepare script. Then in the options set this script as default.

Here is sample for rn6bn cluster.

host=195.161.243.116
please enter your call=<you call>

Here is sample for ra3aww cluster.

host=62.118.6.72
Please enter your call:=<you call>

<your call> mean you need type your callsign.
host - ip address or hostname of telnet node
the second line is text from telnet node. If monitor get this text from node it send text after "=" to node.

some nodes ask not only call but the password too. then you need to add line
Password:=<your password>
in the script.

When you prepare script and configure cluster monitor select Telnet|connect and Cluster monitor will collect all spots from cluster for you.

Best regards,
Alexander mailto:aia@...

1505. CwType 1.22 is there!

Yahoo group: dxsoft
Date: 2002-12-14 15:56:57 UTC
From: Sergei Podstrigailo
Topic: 1505 Message: 1505

Hello All,

I just have published CwType 1.22 to the main site and mirror:

http://www.dxsoft.com/cwtype.zip
http://www.hamport.com/cwtype.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
V1.22
The "Tune" command was made.
It sends a continuous key down to tune the transmitter.
Hotkey for this command is Alt-U.
A method to switch beacon from AALog was implemented.
The ButtonsRows, ButtonsColumns, ButtonsHeight parameters
of the [Screen] section of the CWTYPE.INI file define macros buttons
arrangement and size.
Some minor bugs were fixed.
V1.20
Macrosequences were made:
~[ce] or `[ce] - to clear edit fields;
~[csnt] or `[csnt] - to clear sent symbols window.

Macrosequences for increment of numbers in the edit fields were made:
~[nic] or `[nic] - to increment a number in the "Call" field;
~[nir] or `[nir] - to increment a number in the "RST" field;
~[nin] or `[nin] - to increment a number in the "Name" field;
~[nio] or `[nio] - to increment a number in the "Other" field.

Macrosequences for logger control were made:
~[lgc] or `[lgc] - to clear all fields, except "Date", "Band" and
"Mode" in the "New QSO" window of the AALog;
~[lgt] or `[lgt] - to set current time and date in the "New QSO"
logger window;
~[lgs] or `[lgs] - to save QSO into the log;
~[lgts] or `[lgts] - to set current time and date and save QSO.

The "Setup->Use 'Other' Field As" menu assigns alternative meaning to
"Other" edit field. This meaning is used to catch words from CwGet and to
transfer data to a logger.

V1.13
New macrosecuences were added:
~[su] or `[su] - to increase speed;

~[sd] or `[sd] - to decrease speed;
~[spNNN] or `[spNNN] - to set speed of NNN LPM;
~[ss] or `[ss] - to save current speed to memory;
~[sr] or `[sr] - to restore speed from memory.
Please, think twice before using this macrosequences!
It is too hard to receive morse code with variable speed usually.

Logger can set speed and inter-letter space via special messages now.
V1.12
A bug was fixed. "OnTop" mode didn't work correctly after "Edit Macros"
command executing.
The "File->Open Capture File" command opens capture-file for
transmitted symbols. If file exist, new symbols are appended to it.
The "File->Close Capture File" command closes capture-file.
Capture-file state is shown in status-line. Hotkey for capture on/off
commands is Alt-L. The command line argument "/c Filename" can be used to
open capture file at the program startup.

From: Javier Lòpez
Topic: 1506 Message: 1506

Hello Alexander,

I`ll try to be as much specific as I can:

Because the AAtest generate one archive AAltest that is erased each time a new contest is logged I put in a different folder my past CQWW log as AALtestcqww.

Also I have a folder for the Cabrillo`s files that was generated for the different contests.

Then as a security measure in a different folder I made a copy of the logs folder.

While ARRL Test I received a message like "non integer ......"

As result the logs at the AAlog have no data!!!!!!!!! Thanks god the data of the ARRL contest is intact.

I would like to know:

1.- How may I recover the data from the folder that has the logs folder ?????/ I try changing the path of the Logs Configuration menu option to the backup folder without success.

2.- How may I import data from the Cabrillo file

3.- Ideas to recover my logs!!!!!!!!!!!!!!!!!!!!!!

1507. Re: [dxsoft] AALog 2.40 file problem

Yahoo group: dxsoft
Date: 2002-12-17 22:35:34 UTC
From: Dave Dunbar, N0RQ
Topic: 1507 Message: 1507

Hi.
I am running AALog 2.40, and I tried to delete all QSOs for a 2-day period (620 QSOs from the 10 meter contest). I turned FILTER on by date for those 2 days, then did an Edit, Select All, then Ctrl+Del to delete them all. AALog locked up, then wouldn't exit, so I had to use Task Manager to kill it.

The 620 QSOs are still there, but whenever I try to double-click on any of those 620 QSOs, it says "BLOB has been modified". I tried a Tools / Refresh Database, but it failed with the same "BLOB has been modified" message.

What should I do? Can I delete some or all of the index files, and will they be rebuilt automatically?

Thank you!

73 de Dave, N0RQ (ex-WD0HWX)

1508. new Cluster monitor

Yahoo group: dxsoft
Date: 2002-12-19 09:26:13 UTC
From: Alexander Anipkin
Topic: 1508 Message: 1508

Hello dxsoft,

New version of the DXsoft cluster monitor uploaded

1.2.0.30
Filter setting storing is added.
Advanced filter is added

1.2.0.29
New command added to telnet scripts file - "port". This keyword defines port of telnet cluster server. It is optional parameter
Usage:
# Host=(IP address or DNS name of a telnet cluster)
host=rn6bn.73.ru
# port=port number
port=23
#ask=answer
please enter your call=rz4aa

Now all filter parameters stores and applicates to spot list when Cluster Monitor is starting.

download it from

From: Alexander Anipkin
Topic: 1509 Message: 1509

Hello dxsoft,

New version of AALog contest module uploaded

Please note database format changed. Save previous version for access
to old logs. Version 2.41 of AALog can not direct import data from new
version. I will publish 2.42 on this week.

new contests
- Croatian CW contest
- OK RTTY DX Contest

New feature

- In the Tools|autosend setup you can configure macros for Ins key.
When you press Ins program will transmit data from Callsign field
(field change color to green).
You can continie enter data to Callsign field. If you not press keys
more then 1 second then program call configured macros.

download it from

1511. TrueTTY 1.96 beta is published!

Yahoo group: dxsoft
Date: 2002-12-19 17:25:47 UTC
From: Sergei Podstrigailo
Topic: 1511 Message: 1511

Hello All,

I just have uploaded TrueTTY 1.96 beta to the main site and mirror:
http://www.dxsoft.com/truettyb.zip
http://www.truetty.com/truettyb.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

TrueTTY Versions History

V1.96
TrueTTY can decode signals from WAVE-file now.
See the "File->Decode From File" command.
WAVE-file must be Windows PCM file, without compression.
Sample rate must be 11025, 22050 or 44100 Hz.
Preferred file parameters are mono, 16 bit, 11025 Hz.

The ExchangeSpeed parameter of the TRUETTY.INI file defines data exchange
speed via additional COM-port now.

Some minor improvements were made.
V1.95
TrueTTY can exchange receiving and transmitting data to another software
via additional COM-port now. So, TrueTTY can emulate hardware modem or TNC.
The "Setup->Data Exchange Interface" menu selects COM-port used for this
purpose. So, with two com ports (in single computer or in two computers)
connected via null-modem cable, you can use TrueTTY with another terminal
software intended for hardware modem using. For example, you can try to use
TrueTTY with WF1B contest software (though I prefer AALog). A speed of
data exchange via COM-port is 9600 bauds. See null-modem cable schematics
in NULL-MOD.GIF file.
If you are using COM-port for PTT interface but don't use it for FSK, you
can use the same port for data exchange also.
Software COM-port emulator can be used also. I have used VSPD virtual
COM-port driver from http://www.mks.zp.ua with success.

In AX25 mode TrueTTY can work (to receive and transmit) as KISS-TNC via
COM-port or DXSOFTEX.DLL interface now. KISS mode is switched on by
"Setup->Data Exchange Interface->KISS Mode in AX25" menu item.

I have successfully tested TrueTTY with great AX25 software Pr4Win
(see http://www.geocities.com/nl3asd/download/pr4win.html ,
http://www.qsl.net/oe8djk/) with hardware COM-ports (USB/COM converters)

or with VSPD driver.
V1.93
The "File->Open KISS Capture File" command opens capture file to
save all receiving AX-25 packets in KISS-format.
The program behavior at not very vast computer was improved.
Some minor bugs were fixed.
V1.92
The "File->Open Buffer in Notepad" command was made. It saves receiving
buffer in a temporary file and opens this file by a text editor. Then you
can view this file or print it. The hotkey of this command is Ctrl-N.
This command is available in registered version of the software only.
A bug with the "List index of bounds" message appearing during editing of
text to transmit was fixed, I hope.
V1.91
The "Setup->Catch Words in Contest Mode" option was made.
In this mode software doesn't use popup-menu to catch word to logger.
TrueTTY recognize callsign or control number automatically.
The "Setup->Beacon Off At Mouse Click" option was made.
If this option is enabled, beacon is switched off by mouse click on
spectrogram, RX window or input window or by key pressed in the input window.
The "Setup->Continuous Carrier While Idle" option was made.
If this option is enabled, TrueTTY doesn't use idle symbols in RTTY and ASCII
modes.
Some minor bugs were fixed.
V1.90
UHF-PACKET (1200 Baud) decoding was made.
The "Grid" option was added to context menu to transfer received
QTH-locator to logger.
The 182 Hz shift value was added to the shift menu. This value is optimal for
interchannel crosstalk reducing at 45.45 Baud speed.

Operation like deleting/global edit in current version are very slow.
Better solution is turn filter ON, select contacts, turn filter off,
Perform deletion function.

DDN> The 620 QSOs are still there, but whenever I try to double-click on any of those 620
QSOs, it says "BLOB has been modified". I tried a Tools / Refresh Database, but it failed

1515. AALog 2.42 is here

Yahoo group: dxsoft
Date: 2002-12-21 16:51:39 UTC
From: Alexander Anipkin
Topic: 1515 Message: 1515

Hello dxsoft,

I just upload AALog version 2.42 to websites.

NOTE! If you use AALog QSL service with own label format you need open your label file in AALog labels generator and save it. After this manipulation you can select number of max contcts on this format. AALog use 6 contact per label by default.

AALog ver. 2.42 - 21 Dec 2002

+ new awards DPF, DDFM added
+ qsl label format has max number of contacts for this label-type
+ start print from any labels on the first page
- automaximize bug fixed
- update mode for adif import added
- fixed TrueTTY communication in the Pileup mode
- minor bugs fixed

Download it from

Update
http://www.dxsoft.com/aal_update.zip
http://www.hamport.com/aal_update.zip
http://aalog.hypermart.net/aal_update.zip

1516. CwGet 1.30 is released!

Yahoo group: dxsoft
Date: 2002-12-22 16:42:14 UTC
From: Sergei Podstrigailo
Topic: 1516 Message: 1516

Hello All,

I just have uploaded CwGet 1.30 to the main site and mirror:

http://www.dxsoft.com/cwget.zip
http://www.cwget.com/cwget.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

CwGet Versions History.

V1.30
The documentation was update.
Some minor improvements were made.
V1.28
CwGet can decode signals from WAVE-file now.
See the "File->Decode From File" command.
WAVE-file must be Windows PCM file, without compression.
Preferred file parameters are mono, 16 bit, 11025 Hz.
V1.27
If your sound card supports a full-duplex mode,
you can use CwGet as narrow-band sound DSP-filter now.
The bandwidth of a sound filter is selected by
the "Setup->Sound Output" menu.
V1.25
If there are several sound cards in a computer, you can select the card by
the "SoundCardNumber" parameter of [CwGet] section of the CWGET.INI file.
"SoundCardNumber=0" means a first sound card, "SoundCardNumber=1" means a
second card etc. Negative value means system default sound card.
The command "File->Open Buffer in Notepad" was made. It saves receiving
buffer in a temporary file and opens this file by a text editor. Then you
can view this file or print it. The hotkey of this command is Ctrl-N.
This command is available in registered version of the software only.
V1.24
The main filter and amplitude detector were fully rewritten.
A set of main filter bandwidths was extended.
Alt-D shortcut was made for the "Clear Buffer" command.

1522. AALog update suggestions

Yahoo group: dxsoft
Date: 2002-12-24 18:25:39 UTC
From: Dave Dunbar, N0RQ
Topic: 1522 Message: 1522

Greetings!

Here are some things I'd like to mention as possible updates to AALog. I really like the product, but here are some ideas:

* In New QSO window, in lower-left, there is a little box that says "New One" or "Not Confirmed". This is based on country/band/mode. It would be nice to also have a box that says "NEW ONE" to indicate a complete new country, not based on band or mode -- a really important NEW ONE!

* In New QSO window, if I enter a Callsign (that I've worked on 10 meters), and have a band of 28, it might say "Not Confirmed" or not say anything. If I change the band to 21, it will say "New One". This is good. However, when using Hamport, if I change bands on the rig, the little "New One" / "Not confirmed" box does not get updated. I think that AALog doesn't recognize the band change without a TAB button or a mouse click. It would be nice if Hamport could tell AALog to do the "New One" check whenever a band change is done.

* In the FILTER window, I can filter by "Marker" -- but it only looks at the "Mark this QSO" flag, not the "Mark this Call" flag. It would be real nice to be able to filter by the "Mark this Call" checkbox, which I use to lot to mark callsigns to go back and QSL with.

* In the FILTER window, it would be nice if the fields checked for partial strings, not complete strings. In other words, I wish I could filter by callsign and put "A61" or "A61*" so that I could see all the A61 callsigns I've worked. The same is true of many of the other fields, like Name, QTH, QSL Via, and especially the Note field (so I could search for just one word anywhere in the Note field). Requiring an exact character match limits the filtering significantly.

* When I Ctrl+F9 to turn off filters, AALog puts me at the first QSO up at the top instead of the last one at the bottom.

* In the Awards Manager function, it would be nice to have the VUCC (maidenhead grids) listed as an award (for those of us interested in VHF)!!! This would be a real nice addition. (Just the 4-character grid squares would be fine -- no need to have special code for 6-character square names.)

Here are a few callsign/location issues -- perhaps there is a way for me to update these, but I couldn't figure it out. It would be nice for it to be updated in the product for everyone.

* AALog thinks that all KG4* callsigns are Guantamino Bay. Many of them are simply USA 4-land callsigns.

* AALog doesn't seems to know where some of the 4U1* callsigns are -- 4U1ET in East Timor, for example.

* AALog doesn't seems to know that XK0 is Canada, or that R1ANZ is Antarctica.

* AALog seems to be confused about AG1* or AG4* or AG6* callsigns -- I think most of them are just regular USA callsigns.

I really like AALog, and appreciate the improvements that have been made. Maybe some of these ideas are things other people would like as well. Thanks!

I hope you all have (had) a wonderful Christmas, and best wishes for a prosperous and DX-filled 2003!

OK. I like it :)

DDN> * In New QSO window, if I enter a Callsign (that I've worked on 10 meters),
DDN> and have a band of 28, it might say "Not Confirmed" or not say anything.
DDN> If I change the band to 21, it will say "New
DDN> One". This is good. However, when using Hamport, if I change bands on the rig,
DDN> the little "New One" / "Not confirmed" box does not get updated. I think that AALog
DDN> doesn't recognize the band change without a TAB button or a mouse click. It would
DDN> be nice if Hamport could tell AALog to do the "New One" check whenever a band
DDN> change is done.
Thank you. I will fix this.

DDN> * In the FILTER window, I can filter by "Marker" -- but it only looks at the
DDN> "Mark this QSO" flag, not the "Mark this Call" flag. It would be real nice to be
DDN> able to filter by the "Mark this Call" checkbox, which I use to lot to mark
DDN> callsigns to go back and QSL with.
Ok. I will try to add this feature.

DDN> * In the FILTER window, it would be nice if the fields checked for partial strings,
DDN> not complete strings. In other words, I wish I could filter by callsign and put "A61"
or "A61*" so that I
DDN> could see all the A61 callsigns I've worked. The same is true of many of the other
DDN> fields, like Name, QTH, QSL Via, and especially the Note field (so I could search for
DDN> just one word anywhere
DDN> in the Note field). Requiring an exact character match limits the filtering
DDN> significantly.
This feature already included. May be it's not clear defined in Help. You can use "*"
and "?" simbols like in "Find QSO" window

DDN> * In the Awards Manager function, it would be nice to have the VUCC (maidenhead grids)
listed as an award (for those of us interested in VHF)!!! This would be a real nice
addition. (Just the
DDN> 4-character grid squares would be fine -- no need to have special code
DDN> for 6-character square names.)
no problem to add this but the Grid list will be VERY long! 32400 Grids in the list!

Best regards,
Alexander mailto:aia@...

Topic: 1522 Message: 1524

Hear are another suggestions for AAlog. I have really liked AAlog since using it and have decided to stay with it and purchase in the near future.
When filling in the call sign space with a known contact already in-putted into AAlog, all information from previous contact shows up except the 'state' and 'grid' information. Would be nice to have this area filled in as well. Also would be nice to change the 'state' to 'province' for Canada and other countries as well. Would also be a nice touch to have a one touch "hot button" for back-up of all information and settings to a floppy, CDR/W or Zip disc instead of 'copy to another log' which I find looks up AAlog sometimes and more troublesome, at least for me. This feature would be invaluable if ones hard drive falls, system OS up-date, virus problem so you wont lose all your information. I know that 'copy to another log' works, but a one touch hot button would be better and all automatic. Keep up the excellent work Alexander!

You can enter province or any other administrative division here. I
see no reason change text near field. May be better use not "State"
but another word near this field.

RB> Would also be a nice touch to have a

AALog has backup system. Look Start-Program files-AALog-AALog backup
service.

From: Javier Lòpez
Topic: 1527 Message: 1527

Hi,
I`m trying to setup the CwGet thorugh my RigBlaster, after follow-up all the Sergei`s recommendation I make some improvements, but still I have a lot of problems to decode cw signals.

I have improved the reception changing the Burst Filter values along a QSO, but nothing spectacular.

I don`t know if maybe is because I have an old Kenwood TS-820s without filters???

Also once the radio is power off but RigBlaster on, I still receive garbage in my monitor, changing the burst Filter from 200 to 50 the garbage dissapear, Is this normal????

It means that you didn't set detector threshold (in the bottom window)
properly.

Hi Javier,

You could try raising the squelch a little. Just place the red line slightly above the incoming signal (noise) level and this should stop the noise being decoded as valid characters.

Regards

Chris (SWL only)

Topic: 1527 Message: 1530

Javier,

I have had another thought....

Some time ago when I was playing with an old LM567 tone decoder chip....and was using it to decode morse from an old Realistic receiver.....I diagnosed the problem down to noise on the 0volt power supply line.

It was due to the receiver having a split transformer. If you measure the dc volts between the receiver ground and the soundcard/PC ground you may find quite a few volts in potential difference.

The Realistic ground was >50v dc difference than the morse decoder circuit !!!

The solution was to insert a resistor between the two grounds. This reduced the current flow and hence the noise.

However, the best solution would have been to replace/improve the power supply within the receiver.

Just a thought.

Regards

Chris

Hello Sergei,

I`m still unable to make the software run properly eithre at 30% of reliability!!!!!

I solved the problem with the threshold, but the red line that indicates the working frequency of the filter moves from left to right and viceversa??????

The I turned the radio but instead listening good cw signals there was no decoding (The card was in recording mode) either there was no current spectrum signal or Peak Detector????

Because this is the first time that I ever use this kind of software I`ll appreciatte your help.

I had printed your help file and read it few times but the situation is the same.

Could you give me short steps that could let me get some basic Cw?????

Best regards,
Javier

JL> Could you give me short steps that could let me get some basic Cw?????

1. Set up sound card properly to _see_ received signals in top window.
Do you really see signal peaks at spectrogram?
If not, check _recording_ (not _playback_ properties of sound card).

2. Click on desired signal to tune working filter to it.
3. Select appropriate detector threshold in the bottom window.

1535. Re: [dxsoft] AAlog Contest Logger.

Yahoo group: dxsoft
Date: 2002-12-28 08:47:28 UTC
From: Rob Boux
Topic: 1533 Message: 1535

Yes, I'm using RAC - Canada Winter Contest. When I first tried the contest module out it was auto rolling my receive and send numbers. When I accessed it again to use in the contest, it wont auto roll anymore. Did I do something wrong? I only have to give out a serial number to non-Canadian stations plus VE0. Please look at contest rules below for more information. Also you might want to add to the contest logger for this Canada contest that we can use AM, FM SSB, CW. You only have SSB, CW.

Rob
ve4rrb

In December each year, the Radio Amateurs of Canada (RAC) sponsors the Canada Winter Contest. Amateurs all over the world are invited to participate.

Contest Period: 0000 UTC to 2359 UTC, 28 December 2002

Bands and Modes: 160, 80, 40, 20, 15, 10, 6 and 2 metres, CW and phone (SSB, FM, AM, etc.) Suggested frequencies: CW - 25 kHz up from the band edge; SSB - 1850, 3775, 7075, 7225, 14175, 21250, 28500 kHz. Check for CW activity on the half-hour.

Exchange: Stations in Canada send RS(T) and province or territory. VEOs and stations outside Canada send RS(T) and a serial number.

QSOs: Contacts with stations in Canada or VEOs are worth 10 points. Contacts with stations outside Canada are worth 2 points. Contacts with RAC official stations are worth 20 points. RAC official stations are: VA2RAC, VA3RAC, VE1RAC, VE4RAC, VE5RAC, VE6RAC, VE7RAC, VE8RAC, VE9RAC, VO1RAC, VO2RAC, VY0RAC, VY1RAC and VY2RAC. You may work any station once on each of the two modes, on each of the eight contest bands. It is prohibited to make CW contacts in the conventional phone sub-bands, phone contacts in the conventional CW sub-bands, or to make or solicit contest QSOs through a repeater during the contest period.

Multipliers: Canada?s 10 provinces and three territories, and may be counted once on each mode on each of the eight contest bands. The multipliers, with their postal abbreviations and prefixes are:

Nova Scotia [NS] (VE1, VA1, CY9, CYO);
Quebec [QC] (VE2, VA2);
Ontario [ON] (VE3, VA3);
Manitoba [MB] (VE4, VA4);
Saskatchewan [SK] (VE5, VA5);
Alberta [AB] (VE6, VA6);
British Columbia [BC] (VE7, VA7);
Northwest Territories [NT] (VE8);

New Brunswick [NB] (VE9);
Newfoundland and Labrador [NF] (VO1, VO2);
Nunavut [NU] (VYO);
Yukon [YU or YT] VY1; and
Prince Edward Island [PE] (VY2)

Final Score: Total your QSO points from all bands, and multiply by the total multiplier points from all bands.

Categories:

Single Operator All Bands;
Single Operator Low Power (max. 100 W output);
Single Operator QRP (max. 5 W output);
Single Operator Single Band;
Multi-operator.
Multi-Single
Multi-Multi

Single operators who receive assistance from a DX spotting system or PacketCluster network during the contest must classify themselves as Multi-ops. There are no single-mode categories. Multi-operator stations may operate on several bands simultaneously.

Multi-Single category only one transmitter and one band permitted during the same time period (defined as 10 minutes.)
Exception: One, and only one other band may be used during any 10-minute period, if and only if the station worked is a new multiplier. In other words the Multi-Single Transmitter class allows a second station to "hunt" for multipliers only on a separate band. Multi-Multi category stations may operate on several bands simultaneously.

Awards: Plaques will be awarded to the top scoring entrants in each category. Thanks to the following for their sponsorship: Single Operator All Bands - Radioworld
Single Operator Low Power - Durham Radio Sales and Service
Single Operator Single Band - Elkel Products
Single operator QRP - QRP Canada
Single Operator Foreign Entrant - Jorge Bozzo, LU8DQ Memorial by Alan Goodacre VE3HX
Multi-operator - Radioworld
Multi-Single - To be announced

Certificates will be awarded to the top-scoring entrant in each category in each province, territory, USA call area, and DXCC country.

Results: will be published in the May issue of "The Canadian Amateur", and will be sent to certificate winners.

Entries: Send entries by 31 January to:

Radio Amateurs of Canada
720 Belfast Road, Suite 217

Ottawa Ontario Canada
K1G 0Z5

Email entries are encouraged and should be sent to Dave Shipman, RAC Canada Winter Contest Manager, at VE7CFD@....

Entries must contain a summary sheet showing score calculation, a dupe sheet listing calls worked on each mode on each band, a multiplier checksheet and loghsheets. Logs sheets must show time, band, mode, call of station worked, exchanges sent and received and points claimed for each QSO. New multipliers must be clearly marked in the log.

Logs and summary sheets submitted on floppy disk or via e-mail must be in ASCII text format. Name your files with your CALLSIGN (i.e. yourcall.SUM and yourcall.LOG). Cabrillo log format for electronic log submissions is also acceptable. Ensure that you completely fill out the header information in the Cabrillo file. Please do NOT send binary files produced by a contest logging program (i.e. yourcall.BIN, yourcall.QDF, etc.). If you email your log, please send the file(s) as attachments. Do not paste the log file into the text of your message. This is often impossible to extract correctly. Large files may be zipped if necessary. If you need help with preparing or emailing your log, please contact VE7CFD at VE7CFD@... or by phone at 604-926-8170 (evenings only - PST)

I just check it. Number increment for non-VE stations without any problem.
RB> I only have to give out a serial number to non-Canadian
RB> stations plus VE0.
Setup for VE0 (if you are Ve0) have mistake, sorry. It trying to use province.
USe non-VE call in the station config if you are VE0.

I can't find any description for VE0 station. Where stations with such prefix
located?
RB> Please look at contest rules below for more information.
RB> Also you might want to add to the contest logger for this Canada contest

1537. AAlog Contest Logger.

Yahoo group: dxsoft
Date: 2002-12-28 08:56:28 UTC
From: Rob Boux
Topic: 1533 Message: 1537

I just re-read the rules for the RAC - Canada Winter Contest. Stations with-in Canada with exception of VE0 don't need to use a serial number. So I guess being in VE4 land I don't have to log a number. But stations in VE0 and outside of Canada do. My apologies to the group for my oversight.

VE0 is the prefix used for stations at sea. I do not need the corrections
right now, but thanks Alexander. Hope I helped with something here anyway.
The list below might help you out Alexander.

1539. AALog Version 2.42

Yahoo group: dxsoft
Date: 2002-12-30 03:26:43 UTC
From: nd4aa <nd4aa@arrl.net>
Topic: 1539 Message: 1539

I am new to AALog, and just downloaded the Version 2.42 update. It seems to consist of two executable files and 3 sub-directories.

What is the recommended way to install the update? Should I simply delete the two old Version 2.41 executable files and replace them with the new Version 2.42 files? What about the contents of the 3 sub-directories found in the update? Can they simply replace the ones from Version 2.41?

I may be making a simple operation sound difficult, but don't want to throw a wrench into a smooth-running program.

73, Norm ND4AA

you need to install new version into the same folder where previous
version installed. If you install program to another folder then just copy
new files over old ones.

Topic: 1487 Message: 1541

Sir the conversion from cw get and cw type is very simple in fact cw type can be made to put out text files which can be read to Tiny Talk directly. Unless I miss my guess you're chasing your tail for nothing. As far as a braille conversion I'm afraid I can't help much right now but if you want I can contact some friends that may be able to help. I still have addresses for several software programmers that worked for us in the past.

HAPPY NEW YEAR !!!

1542. TrueTTY 1.97 is released!

Yahoo group: dxsoft
Date: 2003-01-03 17:43:04 UTC
From: Sergei Podstrigailo
Topic: 1542 Message: 1542

Hello All,

I just have uploaded TrueTTY 1.97 to the main site and mirror:

http://www.dxsoft.com/truetty.zip
http://www.hamport.com/truetty.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
TrueTTY Versions History

V1.97
The documentation was update.
Some minor improvements were made.
V1.96
TrueTTY can decode signals from a WAVE-file now.
See the "File->Decode From File" command.
A WAVE-file must be Windows PCM file, without compression.
A sample rate must be 11025, 22050 or 44100 Hz.
Preferred file parameters are mono, 16 bit, 11025 Hz.

The ExchangeSpeed parameter of the TRUETTY.INI file defines data exchange
speed via additional COM-port now.

Some minor improvements were made.
V1.95
TrueTTY can exchange receiving and transmitting data to another software
via additional COM-port now. So, TrueTTY can emulate hardware modem or TNC.
The "Setup->Data Exchange Interface" menu selects COM-port used for this
purpose. So, with two com ports (in single computer or in two computers)
connected via null-modem cable, you can use TrueTTY with another terminal
software intended for hardware modem using. For example, you can try to use
TrueTTY with WF1B contest software (though I prefer AALog). A speed of
data exchange via COM-port is 9600 bauds. See null-modem cable schematics
in NULL-MOD.GIF file.
If you are using COM-port for PTT interface but don't use it for FSK, you
can use the same port for data exchange also.
Software COM-port emulator can be used also. I have used VSPD virtual
COM-port driver from http://www.mks.zp.ua with success.

In AX25 mode TrueTTY can work (to receive and transmit) as KISS-TNC via
COM-port or DXSOFTEX.DLL interface now. KISS mode is switched on by
the "Setup->Data Exchange Interface->KISS Mode in AX25" menu item.

I have successfully tested TrueTTY with great AX25 software Pr4Win
(see http://www.geocities.com/nl3asd/download/pr4win.html ,
http://www.qsl.net/oe8djk/) with hardware COM-ports (USB/COM converters)
and with VSPD driver.
V1.93
The "File->Open KISS Capture File" command opens capture file to
save all receiving AX-25 packets in the KISS-format.
The program behavior at not very vast computer was improved.
Some minor bugs were fixed.
V1.92
The "File->Open Buffer in Notepad" command was made. It saves receiving
buffer in a temporary file and opens this file by a text editor. Then you
can view this file or print it. The hotkey of this command is Ctrl-N.
This command is available in registered version of the software only.
A bug with the "List index of bounds" message appearing during editing of
text to transmit was fixed, I hope.

Date: 2003-01-04 01:44:15 UTC
From: nineback <kq5s@arrl.net>
Topic: 1543 Message: 1543

Has anyone gotten Hamport to work with an Icom 756Pro? It will not communicate with mine. I have several other programs that work fine. I tried changing the baud, parity, handshaking, etc but it still does not work.

Is there a way go get AALog to work with the Golist. I see the option but is grey and can not be checked.

1548. notes for qso

Yahoo group: dxsoft
Date: 2003-01-05 11:14:51 UTC
From: on5ao <on5ao@pandora.be>
Topic: 1548 Message: 1548

hi all,
I use the 'notes for qso' field in the 'new qso form' for making
notes about the rig, power and antenna I use for this qso.
For example: ft817 5W fd3 or ts-570 100W yagi etc
I copy and paste text from a textfile so I don't have to type it for
every qso.
It would be nice if there could be set a default value for this
field. I would only have to change the default every time I change
rig or antenna or power.
Could this possibly be done by adding or changing something in the
aalog.ini file???
thanks and a happy new year to all.

I imported my logs into AALog via ADIF. I can not get my awards statistics to show. I rescanned the log set and refreshed the data base but nothing shows on the Award Tracker screen. The data does show up in the Log Summary.

When I click on a spot in CW or Phone spot in DXSoft Cluster Monitor the radio QSY's to the frequency. When I double click on a RTTY spot nothing happens. Am I doing something wrong?

Also in the Cluster is there a way to spot the spots from the OH2AQ and just use the telnet option.

Tom

1550. TrueTTY

Yahoo group: dxsoft

From: Stewart Lewis
Topic: 1550 Message: 1550

Hello all, after getting a new rig, ICOM 756 PRO II, I decided to get back into RTTY. I have tried to run all of the last three releases of TrueTTY, but have a problem with the program locking up. The program stops but all other computer windows can be accessed, opened or closed. I can even run other program. Its just the TrueTTY program that locks up.

I have tried other programs that use the sound card (Digipan6, DxbPSK) and Rigblaster plus with no problems.

I am using Com 1 with PTT on RTS. Nothing else special. If I change to VOX, the transmitter
changes back and forth between TX and RX.

Anyone have any ideas what I am doing wrong??

We will check this.

T> Also in the Cluster is there a way to spot the spots from the OH2AQ
T> and just use the telnet option.
You don't need use OH2AQ. DXCluster can collect spots from telnet nodes only. If you want use only telnet option then don't configure periodical update from web-cluster. Cluster monitor update info automatically when receive new spot from telnet node.

Sergei,
Yes, TrueTTY, freezes up on my computer as well, despite turning off the virus antie-software, I have not been able to discover any particular precipitating factors.
I am running Windows XP, on a 2.2 GHz Pentium 4 processor.
Stuart, G6 YFG.

Check the driver to your sound card. I have a VIA M/B with the sound on the board. If I run Via's latest sound card drivers (from their web site), I'm fine. But if I run the driver from that board from Microsoft, True TTY freezes.

I just upload hamport with added 756PRO settings. Please try it.

Please note you MUST set TRANSCEIVE mode in menu to ON!

Best regards,
Alexander mailto:aia@...

1566. AALog2 and TrueTTY

Yahoo group: dxsoft
Date: 2003-01-07 04:05:43 UTC
From: nineback <kq5s@arrl.net>
Topic: 1566 Message: 1566

When you are using AALog and TrueTTY together and enter a call in TrueTTY it is prpopery transfered to AALog. What is not happening is the mode is not changing from SSB to RTTY. I am using Hamport and the radio is set to SSB for RTTY. If I change the mode to RTTY in AAlog it also changes the radio to RTTY. Also the received report defaults to 59 instead of 599 for RTTY. The sent report correctly shows what I entered in TrueTTY.

I would think that the program knows that it is getting its data from TrueTTY and would know what mode TrueTTY is using (RTTY, PSK, etc).

This makes the combination unuseable for RTTY work.

73,
Tom

1567. Virtual Serial Port Driver TrueTTY edition

Yahoo group: dxsoft
Date: 2003-01-07 15:40:55 UTC
From: Sergei Podstrigailo
Topic: 1567 Message: 1567

Hello All,

VSPD author made special offer to TrueTTY users -
VSPD for Win9x/ME/NT/2000/XP with great discount.

You can purchase it for $29.95 there:
https://secure.shareit.com/shareit/checkout.html?PRODUCT[160577]=1

Trial versions can be downloaded from these URL's:

http://www.mks.zp.ua/vspdxpd.exe - for Windows NT/2000/XP
http://www.mks.zp.ua/vspd2demo.exe - for Windows 95/98/ME

This driver is useful, when you use TrueTTY in KISS-TNC/modem emulation mode.

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

Hi Alexander,
for contesting in the US, it would be great to have 'Field day', and
the September V/UHF QSO party. Also, a vital part would be network
connectivity between operating positions so log can be shared. Chat
capability would extremely useful as well.
Regards, Tom KC2EKI

Glad to hear that worked. My problem was the Windows Automatic Update suggested a driver update to the sound card, which I dutifully loaded. Problem was, it was for a similar, but not quite identical sound card. Simple sound applications seemed to work fine, but programs that required heavier use of the sound card would freeze after time. True TTY, CW Get, and my sound recording programs all demonstrated the problem. Once I went back to the manufacturer's driver from the VIA web site, things worked much better.

1576. ACC 2 connector from KENWOOD

Yahoo group: dxsoft
Date: 2003-01-08 20:30:08 UTC
From: Rudy Walhout
Topic: 1576 Message: 1576

Hello to all

I use TrueTTY for a month , and it's working great no problems.
But there is one thing i tryed , on my KENWOOD TS 950S there is a ACC 2 CONNECTOR with all the pins u need for RTTY.
I try pin 8 GND and pin 9 for PTT. When i put on TX on RTTY TX go on but no output and RTTY sig.
When i used pin 8 and 13 TX go on , no output and a verry verry small RTTY sig .
So maybe there are some hams who have an answer.

Via mic input it works great but , i have to take of the mic when i go to RTTY.

Ok thats all 73 Rudy

RW> Via mic input it works great but , i have to take of the mic when i go to RTTY.

In my TS-870 I use
9 & 8 for PTT,
11 & 12 for sound card output.

Sensitivity of (11-12) input is changed via menu in my Kenwood TS-870 (I don't know about TS950).

Output value of sound card is changed by Volume control of Windows :-)

RW> 9 for PTT. When i put on TX on RTTY TX go on but no output and
RW> RTTY sig. When i used pin 8 and 13 TX go on , no output and a verry
RW> verry small RTTY sig . So maybe there are some hams who have an
RW> answer.

RW> Via mic input it works great but , i have to take of the mic when i
RW> go to RTTY.

In my TS-870 I use
9 & 8 for PTT,
11 & 12 for sound card output.

Sensitivity of (11-12) input is changed via menu in my Kenwood TS-870 (I
don't know about TS950).

Output value of sound card is changed by Volume control of Windows :-)

Sergei;
I remember having problems when using the latest version and enabling
"Send whole words" feature. I was not careful and sometimes I would not
finish my transmission with a space or return and the program would hang
on the last word or character. Corrected my procedure and all OK. Hope
this helps.

1581. AATest bug in ADIF export

Yahoo group: dxsoft
Date: 2003-01-16 18:30:05 UTC
From: Alexander Anipkin
Topic: 1581 Message: 1581

Hello dxsoft,

I found bug in the AATest ADIF-export. It wrote wrong settings for band.
Please download fixed version if you use adif-export feature.

Best regards,
Alexander mailto:aia@...

1582. Hello and My first questions !

Yahoo group: dxsoft
Date: 2003-01-16 20:43:15 UTC
From: Vince
Topic: 1582 Message: 1582

Hello DXsoft Group:

I am new to this group. Hope to be able to obtain and possibly give some infos. I enjoy using Morse code CW mode with a FT1kD radio and fanned dipoles for the 40m/30m/20m bands.

I just downloaded CWGET and CWTYPE. Am trying to learn about CWGET first. But, I am not able to find the CWGET.HLP file on my computer. I thought that it (English) was included.

Where can I find the CWGET.HLP English help file?

Also: What is the length of the demo trial period for these programs?

Thank you.

Click "Start->Programs->CwGet->...".

V> Also: What is the length of the demo trial period for these programs?

CwType is free.
CwGet has unlimited trial period (with "Save Setup" and "Save Buffer" command
disabled).

Hi,
I was looking at the web site for the CWget morse code decoder.
I was wondering if the software would work for adaptive purposes.
For example, I wanted to hook up a morse code paddle straight into
one of the ports of a PC and decode the morse realtime as
someone "types" into it.

I would like to have my dad communicate with us since his speech was
impaired in a stroke and & I'm not sure if he can type as fast as he
used to.

I would like to know if the software can work with an input signal
such as morse paddle or do I need to plug it into the sound card?

Thanks,

Dominic

From: Scott Royall
Topic: 1585 Message: 1588

I'm sure CWget can do this. However, please contact me off-list if you'd like to restore the freedom and power of speech to your father. I have a program coming out specifically designed to do that while addressing the issue of typing speed by learning the word choices he tends to use.

Alex,
I have a registered Analog and something has happened to it. When I try to enter the name of my contact in to the log, I get a message that says "unable to find file".
This can be cleared and then I can enter name. However, I find this awkward. Can I re-download AAlog without losing my log data base and will new download fix this problem?

Hello Robert,

Thursday, January 23, 2003 , you wrote to me:

RB> I have a registered Aalog and something has happened to it. When I try to
RB> enter the name of my contact in to the log, I get a message that says
RB> "unable to find file".
Write full error message please. May be you don't need to reinstall AALog.

RB> This can be cleared and then I can enter name. However, I find this awkward.
RB> Can I re-download AAlog without losing my log data base and will new
RB> download fix this problem?
AALog reinstallation overwrite system AALog's files. You need only backup files with your logs configuration (aconfig.*) and reinstall AALog into the same folder.

Best regards,
Alexander mailto:aia@...

1594. CWType and Win-EQF

1598. AALog 2.43 is here

Yahoo group: dxsoft
Date: 2003-01-26 14:07:57 UTC
From: Alexander Anipkin
Topic: 1598 Message: 1598

Hello ,

I just upload AALog version 2.43 to websites.

AALog ver. 2.43 - 26 Jan 2003

- bug in DPF and DDFM awards fixed
- bug in the QSL service fixed
- some minor bugs fixed

If you have AALog 2.42 installed then you can download only new exe-file
http://www.dxsoft.com/download/aalog243.zip
http://www.hamport.com/download/aalog243.zip
http://aalog.hypermart.net/download/aalog243.zip

For other versions (start from 2.2) update
http://www.dxsoft.com/aal_update.zip
http://www.hamport.com/aal_update.zip
http://aalog.hypermart.net/aal_update.zip

Full version
http://www.dxsoft.com/aal2.zip
http://www.hamport.com/aal2.zip
http://aalog.hypermart.net/aal2.zip

To download 5 floppy disks go to
http://www.dxsoft.com/en/download/
http://www.hamport.com/en/download/

Best regards,
Alexander mailto:aia@...

1599. CwType 1.30 was released!

Yahoo group: dxsoft
Date: 2003-02-01 06:40:46 UTC
From: Sergei Podstrigailo
Topic: 1599 Message: 1599

Hello All,

I just have uploaded CwType 1.30 to the main site and mirror:

http://www.dxsoft.com/cwtype.zip
http://www.cwget.com/cwtype.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
CwType Versions History

V1.30
Manipulation stability at slow computers was improved.
V1.22
The "Tune" command was made.
It sends a continuous key down to tune the transmitter.
The hotkey for this command is Alt-U.
A method to switch beacon from AALog was implemented.
The ButtonsRows, ButtonsColumns, ButtonsHeight parameters
of the [Screen] section of the CWTYPE.INI file define macros buttons
arrangement and size.
Some minor bugs were fixed.
V1.20
Macrosequences were made:
~[ce] or `[ce] - to clear edit fields;
~[csnt] or `[csnt] - to clear sent symbols window.

Macrosequences for increment of numbers in the edit fields were made:
~[nic] or `[nic] - to increment a number in the "Call" field;
~[nir] or `[nir] - to increment a number in the "RST" field;
~[nin] or `[nin] - to increment a number in the "Name" field;
~[nio] or `[nio] - to increment a number in the "Other" field.

Macrosequences for logger control were made:
~[lgc] or `[lgc] - to clear all fields, except "Date", "Band" and
"Mode" in the "New QSO" window of the AALog;
~[lgt] or `[lgt] - to set current time and date in the "New QSO"
logger window;
~[lgs] or `[lgs] - to save QSO into the log;
~[lgts] or `[lgts] - to set current time and date and save QSO.

The "Setup->Use 'Other' Field As" menu assigns alternative meaning to
"Other" edit field. This meaning is used to catch words from CwGet and to
transfer data to a logger.

[...]

1600. Question about CWType affecting system clock

Yahoo group: dxsoft
Date: 2003-02-01 06:38:28 UTC
From: Doug Wilson <wa0vsl@yahoo.com>
Topic: 1600 Message: 1600

Sergei and Group,

I am new to the group and CWType, but it looks to be promising! I have noticed one problem - if I leave the program running on my Win 98 machine (using the LPT interface) my system RTC starts running slow or gets behind somehow.. I left a QSO tonight and left the program running for about an hour and when I got back to it my clock was about an hour slow. Anyone else notice this behavior?

Thank you and 73,
Doug Wilson / WA0VSL

Hello All,

I just have upload TrueTTY 1.98d beta to the main site and mirror:

http://www.dxsoft.com/truettyb.zip
http://www.hamport.com/truettyb.zip

MultiFSK-16 receiving was made.
DTMF-code decoding was made.

Your feedbacks are welcome!

Best regards,
Sergei mailto:amx@...

1602. More on system clock slow down..

Yahoo group: dxsoft
Date: 2003-02-02 18:50:14 UTC
From: Doug Wilson <wa0vsl@yahoo.com>
Topic: 1602 Message: 1602

Sergei and Group,

I have conducted some tests concerning my problem with
CWType slowing down my system clock (also I may have
mis-spoken using the phrase 'RTC' - I meant 'Windows System
Clock').

1. When CWType is launched the clock starts loosing time, 54
minutes in about 2 hours.

2. My parallel port was configured as a 'ECP', I then tried it
configured as a 'plain bi-directional'. Same problem..

3. I tried using 'CWDecoder2' (because it uses the same LPT
pins for xmit) and had no problems with the clock.

4. The clock only lost 1 sec in 10 hours when CWType is not
running.

The system is a Toshiba laptop - Satellite 2515cds running a
266 MHz Pentium with 64Mb RAM and Windows 98. I am
resetting my clock manually with a internet time server via
'TimeRC v1.6' when I need..

I really like the features of CWType, but if I can't solve the
clock
problem it is of little use.. Can anyone help please?

73,
Doug Wilson / WA0VSL

It is very strange.
I never heard about such problem with CwType.

I think the problem is not LPT-port ...
Do you use speaker sound output with CwType?

Best regards,

Sergei,

Thanks for getting back to me. Yes, I have been using speaker output for sidetone (I am also using the key paddles in - a great feature!). I can try shutting it off and use the rig sidetone when I'm actually operating. I have been using the program as a sending monitor to improve my sending spacing - if I can read what I just sent then my timing is doing ok ;-)

73,
Doug Wilson / WA0VSL

Sergei,

I just tried shutting off the speaker output with both the button
and the .ini file - the clock still runs slow, either way.. I forgot to
mention that I noticed this behavior with v 1.22, then I tried v 1.3
that you posted last night with the same results.

Thanks and 73,
Doug Wilson / WA0VSL

1606. CwType 1.20

Yahoo group: dxsoft
Date: 2003-02-03 21:13:51 UTC
From: Stewart Lewis
Topic: 1437 Message: 1606

I have finally got around to trying out CwGet and CwType. No problems with the CwGet program. It copies code very well.

But, I have a question with CwType. I have an ICOM 756 Pro II, using a Rigblaster plus. What changes do I need to make to CwType.ini setting. I am using com port 1 and using the DTR signal for CW keying. The area I have the most concern about is:

KeyOffTxOffByte=??
KeyOnTxOffByte=??
KeyOffTxOnByte=??
KeyOnTxOnByte=??

What should these be set to? I am also interesting in any other changes I should make.

Thanks and 73, Stewart, W0SHL

From: Stewart Lewis
Topic: 1437 Message: 1608

Sergei, thanks for the fast response.

I tried your settings. The radio goes into transmit mode but I get no power out. I doesn't send any CW characters.

If I use the following settings I get the radio to transmit.

KeyPortType=2
KeyPortNumber=1
KeyOffTxOffByte=00
KeyOnTxOffByte=01
KeyOffTxOnByte=03
KeyOnTxOnByte=04

It actually transmits each dot and dash but puts the radio into receive mode between them. Something like this:

{trans)dot(rec)(trans)dot(rec)(trans)dit(rec).............

Any suggestions?

CUL...Stewart

1609. Re: More on system clock slow down..

Yahoo group: dxsoft
Date: 2003-02-04 19:46:07 UTC
From: Doug Wilson <wa0vsl@yahoo.com>
Topic: 1602 Message: 1609

Sergei,

Some more clues:

1. I have realized the CW being sent is about half as fast as
the LPM and WPM indicators say it should be..

2. Your programs TrueTTY and CWGet do not affect my system
clock. I checked this just in case a shared DLL or subroutine
might give a clue as to what is happening.

3. The BIG clue - when CWGet is running with CWType it DOES
NOT affect my system clock. The CW sent is also in line
(speedwise) with the LPM and WPM indicators. As soon as I
shut down CWGet, CWType reverts to the half speed CW and my
system clock starts loosing time as before..

I hope that this helps, I really like the features of CWType - in
fact I'm using it to improve my sending by using the feedback
provided by it reading my paddle sending!

Thank you again and 73,
Doug Wilson / WA0VSL

1610. Need translator

Yahoo group: dxsoft
Date: 2003-02-04 20:19:05 UTC
From: Alexander Anipkin
Topic: 1610 Message: 1610

Hello ,

I need to translate rules for Dutch station in the PACC.

part of the Rules in Dutch to translate is below.

Punten

Een geldige verbinding met een buitenlands of een Nederlands station levert een punt op. Een verbinding is geldig wanneer deze door beide zijden wordt bevestigd. Een station mag slechts een keer per band worden gewerkt. QSOs met stations die kennelijk aan een andere contest meedoen (zoals de RSGB 1,8 MHz contest) tellen gewoon mee voor punten en multiplier.

Multiplier

De multiplier bestaat uit het aantal gewerkte landen volgens de ARRL DXCC-landenlijst, inclusief Nederland en gerekend per band. In de volgende gevallen telt niet het land maar het calldistrict als multiplier: Aziatisch Rusland (UA9 en UAO), Chili (CE), Japan (JA), Argentinie (LU), Brazilie (o.a. PY), Canada (o.a. VE), USA, Australie (VK), Zuid-Afrika (ZS) en Nieuw Zeeland (ZL). De cijfers 1 t/m 0 in de prefix (het niet-persoonlijke gedeelte van de roepnaam zijnde het gedeelte dat het land aanduidt leveren een extra multiplier op. Voorbeeld: PT7, PY2 en PU9 leveren drie extra multipliers op; AA1, K1, en WB1 is maar een multiplierpunt. Wordt er geen cijfer in de prefix vermeld, zoals bij LU/PA3ZZZ, dan geldt dit voor LU0. Wellicht ten overvloede: UA9 en UAO zijn twee verschillende multipliers.

Scoreberekening

De eindscore is het totaal van alle QSO-punten van alle banden, vermenigvuldigd met het totaal van alle multipliers van alle banden.

Afdelingsklassement

Alleen single operators uit een afdeling kunnen meedoen aan het afdelingsklassement. Men kan dit aangeven door het nummer van de afdeling op het summary sheet te vermelden. Dit is uiteraard uw eigen afdelingsnummer. Dus niet alleen de naam van de afdeling vermelden maar ook het afdelingsnummer. Dus geen QSL-regionummer! De punten worden bij elkaar geteld en bepalen de score van de afdeling. Ook de punten van single operator luisterstations

Best regards,
Alexander mailto:aia@...

Make sure that you really connect DTR circuit (via interface) to KEY-IN input.

SL> If I use the following settings I get the radio to transmit.

SL> KeyPortType=2
SL> KeyPortNumber=1
SL> KeyOffTxOffByte=00 ---> all off
SL> KeyOnTxOffByte=01 ---> DTR on
SL> KeyOffTxOnByte=03 ---> DTR and RTS on
SL> KeyOnTxOnByte=04 ---> all off again

What do you want to get with these settings ???

SL> It actually transmits each dot and dash but puts the radio into receive mode
SL> between them. Something like this:

SL> {trans)dot(rec)(trans)dot(rec)(trans)dit(rec).............

Stewart,

I do have the exact same configuration as you have. But I use the LPT port to key the 756proII - and that works superb!. I use an extra LPT card for my printer as LPT3 and use the on board LPT for the key input via a switching transistor.

No more troubles ahead!

1615. All Digital Mode VHF/UHF Contest....Feb 9th...today

Yahoo group: dxsoft
Date: 2003-02-09 13:07:00 UTC
From: Don <dhobson123@aol.com>
Topic: 1615 Message: 1615

Anyone that might be interested that uses digital modes and has a multiband/mode HF/VHF/UHF rigs......there will be an ALL Digital Mode VHF/UHF Contest on February 9th, 2003 and everyone and anyone is Welcome to participate no matter the number of digital contacts made or size of station....ALL are Welcome. This is to promote digital use and experimentation on VHF/UHF and hope it might have some interest to some of you. Thank You....please go to this website for more details:

<http://hometown.aol.com/dhobson123/html/Page_1x.html>

(Wall Certificates will go out to 1st, 2nd, and 3rd place winners of high and low power.....to promote more digital use on VHF/UHF anyone sending in a log will be in a drawing for a registered copy of MIXW softare to the winner)

Thanks for reading......de kb9umt Don EN50dp
(trying to promote experimentation and digital use on VHF/UHF)
<http://groups.yahoo.com/group/PSK_VHF_UHF_HAMRADIO/>

This is NOT an official band plan but a guide for most "normal" digital activity and areas will vary in different places so please use common courtesy and if you are unsure ask local operators and or listen.....but never run digital on the SSB/CW calling frequencies or the EME subbands

6 Meters CW/SSB/Digital
50.060-50.080 CW Beacons (unattended sub-band)
see: <<http://www.keele.ac.uk/depts/por/50.htm>>
50.080-50.100 CW QSO's
50.100-50.125 DX Window
50.110 DX Calling Frequency
50.125 North American SSB Calling Frequency
50.133-50.430 Voice Nets see: <<http://6mt.com/nets.htm>>
<<http://www.google.com>>
50.255 FSK441 lower practical limit for most QSO's
50.270 FSK441 Calling Frequency
50.285 FSK441 upper practical limit for most QSO's
50.290 SSB PSK31
50.291 BEACONet^31 (with +1500hz PSK audio)
50.300 or 50.700 RTTY?
6 Meters
50.680 SSTV

2 Meters CW/SSB/Digital
144.00-144.05 EME (CW)

144.05-144.06 Propagation beacons (old band plan)
144.06-144.10 General CW and weak signals
144.10-144.20 EME and weak-signal SSB
144.140 WSJT FSK441/JT44 calling frequency
144.110 to 144.160 WSJT FSK441 or JT44 (around this area)
144.131 BEACONet^31 (with +1500hz PSK audio)
144.150 SSB PSK/HELL/MFSK16/SSTV
144.200 National SSB calling frequency
144.20-144.30 General SSB operation, upper sideband
144.275-144.300 New beacon band
2 Meters FM Digital modes
145.500 SSTV (National SSTV Simplex FM Frequency)
145.550 PSK31, Hellschreiber

70 Centimeters CW/SSB/Digital
420.00-426.00 ATV repeater or simplex with 421.25 MHz video carrier
control links and experimental
426.00-432.00 ATV simplex with 427.250 MHz video carrier frequency
432.00-432.07 EME (Earth-Moon-Earth)
432.07-432.08 Propagation beacons (old band plan)
432.08-432.10 Weak-signal CW
432.100 70 cm calling frequency
432.11-432.20 WSJT JT44/FSK441 ?
432.150 SSB PSK
432.10-433.00 Mixed-mode and weak-signal work
432.30-432.40 New beacon band

Best regards,
Alexander mailto:aia@...

1617. Hamport and IC-746PRO

Yahoo group: dxsoft
Date: 2003-02-10 23:48:14 UTC
From: Dave Dunbar, N0RQ
Topic: 1617 Message: 1617

Is anyone using Hamport with an Icom IC-746PRO (not just the IC-746)???

I am, and it detects frequency changes, but it does not detect
mode changes. If I change from USB to LSB or AM or CW,
Hamport keeps showing (and AALog keeps logging) USB.

Hamport lets me select IC-746 as TRX type, but there is no
entry for a 746PRO.

Thanks & 73,
Dave N0RQ (ex-WD0HWX)

1627. [dxsoft] Awards manager about JCG

Yahoo group: dxsoft
Date: 2003-02-17 08:42:23 UTC
From: BV2WS
Topic: 1599 Message: 1627

Dear Alexander,

Recently, I have worked with 8N1OGA, its territory belong to JT, but its JCG number is 10007. (so I keyin the 10007 in 'state' field)
The problem is that if I run the the Awards manager statistic for JCG with the 8N1OGA' territory set to JT , the Award tracker showed '10007' is blank.
But after the territory set to JA, then the JCG statistic is OK. But the DXCC statistic will missed the JT.

Hope you can resolve this in future version!

73!

1628. Fw: True tty FSK Operation

Yahoo group: dxsoft
Date: 2003-02-17 10:10:23 UTC
From: Dave Cossar
Topic: 1628 Message: 1628

I have reverted back to the ver 1.97 from the beta ver .
There is still no data out of pin 2 of my 25 pin "d" type.
I have even measured the output of the comport with a breakout box with no other cable attached
Still no serial Data out of pin 2
Has anyone else tried this ?
or am I missing something in the setup ?
Dave

Alexander,

No modes were selected. It had worked well for so long I had
forgotten about that. Somehow the modes had all been reset to
unselected.

It is possible if your sound card and driver support signal input for
two programs in the same time.

Sound card in my computer support multi-output, but not support multi-input ...

From: Chris
Topic: 1642 Message: 1644

Hi Louis,

I have a 1GHz Athlon with a cheap SoundBlaster Live card and I'm able to run both CWGet and TrueTTY at the same time.

I haven't upgrade the SB Live driver in the 1-2 years I've had the machine, but everything seems fine.

In fact, the only problem I have had regarding the SB Live card is the fact that you cannot control its Automatic Gain Control (AGC) settings....which kind of ruins the APT WxSat signals on 137MHz.

Regards

Chris

1646. TrueTTY 2.0 beta is published!

Yahoo group: dxsoft
Date: 2003-02-28 11:51:18 UTC
From: Sergei Podstrigailo
Topic: 1646 Message: 1646

Hello All,

I just have uploaded TrueTTY 2.0 beta to the main site and mirror:

http://www.dxsoft.com/truettyb.zip
http://www.hamport.com/truettyb.zip

Your comments are very welcome!

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

TrueTTY Versions History

V2.0
The "Setup" menu was fully remade. Check "Setup->Interface" options now!
AFC was remade. It works properly at fast AFC speed now.
A problem with RX window scrolling was fixed.
Some minor bugs were fixed.
V1.98
DTMF-code decoding was made.
MultiFSK-16 receiving and transmitting were made.
Alt-D hotkey was made for "Clear Buffer" command.
V1.97
The documentation was update.
Some minor improvements were made.
V1.96
TrueTTY can decode signals from a WAVE-file now.
See the "File->Decode From File" command.
A WAVE-file must be Windows PCM file, without compression.
A sample rate must be 11025, 22050 or 44100 Hz.
Preferred file parameters are mono, 16 bit, 11025 Hz.

The ExchangeSpeed parameter of the TRUETTY.INI file defines data exchange
speed via additional COM-port now.

Some minor improvements were made.

1647. Problems with Aavoice & RigBlaster

Yahoo group: dxsoft
Date: 2003-02-28 12:26:49 UTC
From: Javier Lòpez
Topic: 1647 Message: 1647

Hello All,

I`m having difficulties working with my RigBlaster & AAvoice, so I`ll appreciatte experiences from any of you that could help me to pinpiont the operation problem.

I have recorded in different wav files messages needed for contesting as for example:

MESSAGE ?1: CQ CONTEST CQ CONTEST FROM YV5MBX YV5MBX
MESSAGE 2: QRZ
MESSAGE 3: 591K
MESSAGE 4: YV5MBX

I associatted each of the message to one function key as follows:

F1 call ~[ecall]
F2 Call - TX ~[tx]~[ecall]~[rx]
F3 Test ~[tx]~[test.wav]~[rx]
F4 59yv ~[tx]~[59yv.wav]~[rx]
F5 QRZ ~[tx]~[qrz.wav]~[rx]
F6 YV5MBXQRZ ~[tx]~[yv5mbxqrz.wav]~[rx]
F7 YV5MBX ~[tx]~[yv5mbx.wav]~[rx]
F8 CQCONTEST ~[tx]~[cqcontest.wav]~[rx]
F9 REPORT ~[tx]~[eCall]~[p500]~[59yv.wav]~[rx]
F10 591k ~[tx]~[591k.wav]~[rx]
F11 591krpt ~[tx]~[591krpt.wav]~[rx]

1.- I would like to know what it means ~[ecall]
2.- What it means the CALL & RS / Wich is the purpouse of it
3.- Wich is the purpouse of the typewriting area that I saw displayed from time to time the word RX
4.- Once the keyboard is hooked and if I press F1 there is no voice message but if I write YV5MBX then at the time that F1 is pressed the computer says the message recorded in F7 (yv5mbx.wav) then either of the buttons says nothing except F9 that says the same message instead must be the report???? Also after F9 is pressed just for seconds before the transmission finish apppear the following message and then dissapear: V5MBX [RX]

1649. New contest module

Yahoo group: dxsoft
Date: 2003-02-28 17:50:13 UTC
From: Alexander Anipkin
Topic: 1197 Message: 1649

Dear dxsoft users,

I just upload new contest module.

+ AATest use Master.dta as callsign database now;
+ AutoCQ feature added. If you switch this mode ON then AATest will play CQ message until you press some key in the new qso window;
+ info about DX country, Distance, Beam direction sunrise/sunset time moved to special window.
- fixed ARRL DX rules.
+ Russian PSK contest added (sri to late)

Download it from
http://www.dxsoft.com/aatest.zip
http://www.hamport.com/aatest.zip
http://aalog.hypermart.net/aatest.zip

Best regards,
Alexander mailto:aia@...

Hello N5BRY,

Friday, February 28, 2003 , you wrote to me:

Nac> Alexander -
Nac> I assume this is an update to AALog. Correcto ?
Nac> Being new at this I am not sure of the SUBJECT relationship.
AALog contest module is special revision of AALog for contesting. This is
independed program (but AALog can directly load data from it to the main database)
It has not some fields for general QSOs but very useful in the contests.

Best regards,
Alexander mailto:aia@...

1654. Re[2]: [dxsoft] DXsoft cluster monitor

Friday, February 28, 2003 , you wrote to me:

Nac> Lads -
Nac> Being new at this operation, I assume this DXCluster is NOT related to the
Nac> AALog!
Nac> Am I correct?

You are correct. But this is not DXCluster. This is DXsoft cluster monitor.
This is different programs.

Best regards,
Alexander mailto:aia@...

Nac> Sergei -

Nac> Is this upload related to AALog operation ?

TrueTTY is terminal software for digital modes.

Yes, it can co-operate with AALog , SwissLog and some other
loggers.

But it can work stand-alone also.

Nac> I am new at this and do not know all the module relationships. Thanks,

Good idea is to read help-files :-)

Topic: 1646 Message: 1657

Hello N5BRY,

Friday, February 28, 2003 , you wrote to me:

Nac> Is this upload related to AALog operation ?
Nac> I am new at this and do not know all the module relationships. Thanks,

Some notes for new subscribers.

All DXsoft products can exchange data. For example TrueTTY can read data (CAll, Name, RST, QTH) from AALog and AAlog contest module for use in the own macroses. Also it can send data directly to AALog input fields in the New QSO window.

AALog and AALog Contest module:
Can read data from Hamport (simple TRX control program) and set TRX modes and freq. via Hamport
Can call macroses for TrueTTY, AAVoice, CwType.
Can retrive data from DXsoft cluster monitor (only contest module)

TrueTTY
Can read data from AALog for use in the own macroses
Can send data to AALog New QSO window

CwGet
Can send data to AALog New QSO window

CwType
Can read data from AALog for use in the own macroses

DXsoft cluster monitor
Can retrive information from AALog for colorizing spots in the grid (wkd/cfm/new one)

AAVoice
Voice keyer for AALog

Hamport
Communicate with TRX and send data to other program when they ask them

PS Sorry for my English

Best regards,
Alexander mailto:aia@...

Macro1=~[ecall]

Macro2=~[tx]~[ecall]~[rx]
Ok. Look. You have macro ~[tx]~[eCall]~[rx]
AAVoice switch to tx mode and first serch wav file in the sound directory with
name from call field. If this file found it say this file. Otherwise it will
speak cal letter by letter

Macro3=~[tx]~[test.wav]~[rx]
wrong macros.
Must be
Macro3=~[tx]~[ftest.wav]~[rx]
~[f - is keyword to take wav file

Macro4=~[59yv.wav]~[rx]
the same error

Macro4=~[f59yv.wav]~[rx]
please note this macros do not turn TRX to transmit mode. You need already
have TRX in the transmit mode or turn on this mode manually

wrong
Macro5=~[tx]~[qrz.wav]~[rx]
Right
Macro5=~[tx]~[fqrz.wav]~[rx]

wrong
Macro6=~[tx]~[yv5mbxqrz.wav]~[rx]
Right
Macro6=~[tx]~[fyv5mbxqrz.wav]~[rx]

wrong
Macro7=~[tx]~[yv5mbx.wav]~[rx]
Right
Macro7=~[tx]~[fyv5mbx.wav]~[rx]

wrong
Macro8=~[tx]~[cqcontest.wav]~[rx]
Right
Macro8=~[tx]~[fcqcontest.wav]~[rx]

wrong
Macro9=~[tx]~[eCall]~[p500]~[59yv.wav]~[rx]
Right
Macro9=~[tx]~[eCall]~[p500]~[f59yv.wav]~[rx]
Much better
Macro9=~[tx]~[iCall]~[p500]~[f59yv.wav]~[rx]

wrong
Macro10=~[tx]~[591k.wav]~[rx]
right
Macro10=~[tx]~[f591k.wav]~[rx]

wrong
Macro11=~[tx]~[591krpt.wav]~[rx]
rigth
Macro11=~[tx]~[f591krpt.wav]~[rx]

Macro12=~[tx]~[p100]~[fr.WAV]~[fz.WAV]~[f4.WAV]~[fa.WAV]~[fg.WAV]~[rp10000:0]
this is defautl macros :)

Best regards,
Alexander mailto:aalog@...

1665. yv5mbx - Problems with Aatest

Yahoo group: dxsoft
Date: 2003-03-02 12:15:54 UTC
From: Javier Lopez
Topic: 1665 Message: 1665

Hello Alexander,

Actually I`m using the Aatest v.14 and while the ARRL SSB contest this weekend I found the following problems:

1.- Doesn`t compute the VE prefix as multipliers, for example ve3ret - ON, doen`t appear the multiplier as VE-ON but it appears in the multiplier table but not as worked.

2.- If I have a contact with an station nor NA or Canadian the system assign 3 points, as far as I know must be 0

3.- I was forced to remove the last record of the log and appear a Aalog System Access Violation error, make me impossible to erase it until I add a new one, but after this the log in the Aatest get mixed with prior logs, thanks god I made a backup to ADIF format.

Looking for your comments,
Best regards,
Javier

hi jupe..there's a lot of morse learning software out there. Who knows which
is best, but THIS comes highly recommended.
Also get a good, but cheap straight key.
You're only a couple kliks away from ddownloading a fine program:
http://www.qsl.net/g4fon/CW%20Trainer.htm

(the straight key will take MANY more kliks, hihi)
Best of luck & a lifetime of value..73's Steve KE8PA

1667. Re: [dxsoft] yv5mbx - Problems with Aatest

Yahoo group: dxsoft
Date: 2003-03-02 12:58:15 UTC
From: Alexander Anipkin
Topic: 1665 Message: 1667

Hello Javier,

Sunday, March 2, 2003 , you wrote to me:

JL> Actually I`m using the Aatest v.14 and while the ARRL SSB contest this
JL> weekend I found the following problems:

JL> 1.- Doesn`t compute the VE prefix as multipliers, for example ve3ret - ON,
JL> doen`t appear the multiplier as VE-ON but it appears in the multiplier table
JL> but not as worked.
This bug fixed in beta 18. I upload it before contest.

JL> 2.- If I have a contact with an station nor NA or Canadian the system assign
JL> 3 points, as far as I know must be 0
Oops. Thank you. I will correct this.

JL> 3.- I was forced to remove the last record of the log and appear a Aalog
JL> System Access Violation error, make me impossible to erase it until I add a
JL> new one,
OK. I will check this.

JL> but after this the log in the Aatest get mixed with prior logs,
this is impossible. AALog use single file for all test. before contest you
need clear this file. Look like you do not clear log before test or run
aatest from another folder.

In any case you use very old version of the program.

Best regards,
Alexander mailto:aia@...

Karel,

Change the Characters field (First row of the screen) to 42 and all the characters will appear, it`s important that you apply the concept carefully to see the improvments, in my personal case the results were fantastic.

Good Luck,
Javier

vitn> i am totally lost in setting up cwtype

vitn> i am using com 2 on a 9 pin and would like to use cwtype for sending
vitn> from the keyborad thru the kenwood 570

If you use RTS for PTT and DTR for CW-key ,
use these values of CWTYPE.INI :

KeyPortType=2
KeyPortNumber=2
KeyOffTxOffByte=00
KeyOnTxOffByte=01
KeyOffTxOnByte=02
KeyOnTxOnByte=03

Best regards,
Sergei mailto:amx@...

1675. Transmit Audio Delay With TrueTTY V 2.0

Yahoo group: dxsoft
Date: 2003-03-02 22:38:53 UTC
From: David Buell <davidbuell@attbi.com>
Topic: 1675 Message: 1675

I recently installed TrueTTY v 2.0 and have found that when switching
to transmit, either with the TX button or ~[tx] in a macro,
there is often a considerable (1 - 3 second) delay between when the
PPT is keyed and when audio is sent to the rig from the sound card.
This results in the loss of the first few characters in the XMT
buffer, which are sent from the XMT buffer window to the sent text
window before audio is sent to the rig. Any suggestions?

David - AA6RM
Salt Lake City, UT

What is your computer configuration?

DBdac>
DBdac> This results in the loss of the first few characters in the XMT
DBdac> buffer, which are sent from the XMT buffer window to the sent text
DBdac> window before audio is sent to the rig. Any suggestions?

Generally,
chars are moved from input window _before_ transmitting,
but they are shown in sent window _after_ playing sound buffer.

In another words, chars _can_not_be_sent_ without sound playing.

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

When switched to XMT, some characters are moved from MIT buffer to sent text window BEFORE sound card audio out begins.

DBdac> When switched to XMT, some characters are moved from MIT buffer to
DBdac> sent text window BEFORE sound card audio out begins.

Check again:

Do characters change color before sound starts? It is normal,
because several symbols are place to intermediate buffer.
Do character _appears_ in sent window before sound?
Last case is really wrong...

It can be problem with sound card driver ...

In what mode it happens?

From: wb2foz@juno.com
Topic: 1683 Message: 1683

Sergei;
I downloaded Ver TTY198m and tried the M16 program on one of our nets here in the USA. I may have something set wrong, since I get garbage characters when receiving for the first few seconds of a transmission. Nothing is lost, but it means that I have to clean up the document before using.

Second Item: I have always had problems with my sound card level settings. Since I use the sound card with other applications, the settings do not carry over from the previous TrueRTTY session. I found one application that provides positive control of the sound card levels from inside the application program; presetting the levels on entry and then resetting them on exit. Do you have plans for such a feature? I have downloaded Version 2.00 but have not tested it on the air yet. Thanks, keep up the good work.

It is not bug, it is feature :-)

MFSK16 protocol has a long interleaver.
So some time is needed to clear interleaver from noice.

wjc> Second Item: I have always had problems with my sound card level
wjc> settings. Since I use the sound card with other applications, the

May be ...

I saw simple freeware program which can save sound card setup values
in files and restore them.

I don't remember it's name now.
May be anybody remember it ?

wjc> I
wjc> have downloaded Version 2.00 but have not tested it on the air yet.

Hello:

One such program name is AUDIOSPHERE. If I recall right, it allows for
up to five presets.

1688. Initial setup of AALog

Yahoo group: dxsoft
Date: 2003-03-05 15:48:21 UTC
From: Robin gw3zcf
Topic: 1688 Message: 1688

Can anyone help me with creating a new log in AALog. I have a
registered copy, but failed some months ago, and am now having the
same problem with the latest version which I downloaded.
If I go to Files>New Log, I set up all the boxes, create a new file
and write its address at the top, but when I click create I
get "Can't save Log configuration" There must be something I have
missed, but I have read and reread the Help File and don't know what
I am doing wrong
Robin GW3ZCF

Rg> I am doing wrong
tell me what version of the Windows you have?

What is the path where you create new log?

Try to create log in the folder with short name. And then reconfigure it to
another location later.

Best regards,
Alexander mailto:aia@...

Hi Alexander. I chose the name GW3ZCF.db and I put it in the
directory where AALog is located. I can see the folder if I look
there, and it appears in the window "Log File name" when I browse.I
then complete all the other boxes, but when I press "Create" the error
message "Can't save log configuration" appears. I am using Win98SE
and the version of AALog is 2.43

1692. Importing TRlog or Cabrillo files

Yahoo group: dxsoft
Date: 2003-03-06 02:07:05 UTC
From: Paul B
Topic: 1692 Message: 1692

I have been trying to import some TRlog and Cabrillo files but am having some spacing problems. In the help file for importing text files, there is a picture of a nicely spaced cabrillo file where everything lines up neatly. Obviously, this makes it easy to tell AAlog where the fields are and which ones you want to import. However, when I try it, the spacing in a cabrillo file looks like it is formatted in a true type font with unequal spacing between the fields. I've loaded the exact same file in notepad and everything lines up perfectly. I've tried TRlog files, test files that I've made myself in notepad and even booted to dos and made a small file in the old edit.com editor and it still comes up in the import screen unequally spaced. This makes it impossible to import text files. Help!!!!!

1694. [dxsoft] Contest rule for ALL ASIAN DX CONTEST

Yahoo group: dxsoft
Date: 2003-03-06 01:00:58 UTC
From: BV2WS
Topic: 1694 Message: 1694

Hello,
I tried the AALog contest module v1.0 beta 17 to test the AA
contest. And I found the module now only suite for non-ASIAN
station.
The ASIAN station can contact any station in the World, but the non-
Asian station perfect contact with Asian stations.

You can find the rule for 2003 All Asian Contest in JARL's WEB:
http://www.jarl.or.jp/English/4_Library/A-4-
3_Contests/2003AA_Rule.htm#Points%20and%20Mulitipliers

the CONTEST PERIOD is on June 21-22, 2003 for CW.

Dear Alexander,
The rule in AA contest describe that contact with same entities will neither count as a point nor a multiplier.
But now it do count as a multiplier when I try to log another BV station.

De bv2ws / James Chung

1) For Asian stations:

a: Points.....Perfect contact will be scored as follows. Contact among same entities will neither count as a point nor a multiplier. Duplicate contact with the same station on same band will not count as a point.

1709. SeaTTY 1.10 is published

Yahoo group: dxsoft
Date: 2003-03-09 13:11:03 UTC
From: Sergei Podstrigailo
Topic: 1709 Message: 1709

Hello All,

I have uploaded SeaTTY 1.10 to the main site and mirror:

http://www.dxsoft.com/seatty.zip
http://www.hamport.com/seatty.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

SeaTTY versions history

V1.10
A problem with scrolling of received symbols window was fixed.
The window is not scrolling down now by received symbol if
the last string is not visible.
AFC was remade. It works properly at fast AFC speed now.
V1.06
The "Setup->View->Fonts and Colors->Message Window Font Setup" and
"Setup->View->Fonts and Colors->Message Window Background Setup"
options were made.
V1.05
You can open raw log file in Notepad by double-clicking on date
in the message tree.
You can delete selected message or all messages for selected date
by click on "Delete" key.
To reduce chance to miss message for noise SeaTTY starts to write message
if at least three symbols of "ZCZC" signature is received.
V1.0
FSK-demodulator was fully rewritten.
Help-file was made.
V0.26
The "Setup->Don't Save SYNOP Messages" option was made.
To open message file in editor, make double-click in the message tree or
in the message window.

Characters appear in the sent window before sound starts.

It happens in PSK31 and BAUDOT (have not tried other modes since upgrade), but seems to be worse in PSK31 than BAUDOT.

I have not noticed this problem with earlier versions, only in v 2.0.

It is strange ...
Chars in sent symbols are printed while handling _played_ sound buffers.

DB> It happens in PSK31 and BAUDOT (have not tried other modes since
DB> upgrade), but seems to be worse in PSK31 than BAUDOT.

DB> I have not noticed this problem with earlier versions, only in v 2.0.

Try to setup v1.97 again and compare.

It looks like hardware or sound card driver problem ...

To all - does anybody else have similar problem?

Subject: Re: [dxsoft] AALog 2.43 is here

Hi,

Just now getting around to downloading the 2.43 AALOG due to my illnesses and family illnesses. I have the 2.42 and cannot seem to get the 2.43 to work right once downloading the exe file.

Can you please tell me exactly what I need to do and where to install etc. I must be doing something wrong. Thanks so much.

You need download update and run setup.exe
You need install update into the same folder where AAlog2 installed

Best regards,

I tried to download the 2.43 file into the file where AAlog2 is as you said, and the file would not download. THere were numerous errors and it said access denied.

Please advise.

Elaine

Great. Now I have the download looking like it worked, but it still pulls up only 2.42 and my entire log is gone! JUST help me get back my 2.42 log and I will just forget the update. I use this log all the time and need my log. If you have to send everthing from the beginning to get me back then do so. Just forget the update, it is not worth the time or hassle.

Hello to the AALog group.
I am a new (registered) user of the program, and I really like it. Alexander is in the process of converting my Excel log book so I can use AALog with it. Not an easy task! Thank you Alexander.

I have noticed that a couple of windows are not quite big enough for the data that is in it. Log Summary is one, QSL service is another.

1736. TrueTTY 2.01 is released!

Yahoo group: dxsoft
Date: 2003-03-14 14:33:40 UTC
From: Sergei Podstrigailo
Topic: 1736 Message: 1736

Hello All,

I just have uploaded TrueTTY 2.01 to the main site and mirror:

http://www.dxsoft.com/truetty.zip
http://www.truetty.com/truetty.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
TrueTTY Versions History

V2.01
In MultiFSK mode mouse click at spectrogram defines lowest radio
frequency, not center one.
Documentation was update.
V2.0
The "Setup" menu was fully remade. Check "Setup->Interface" options now!
AFC was remade. It works properly at fast AFC speed now.
A problem with RX window scrolling was fixed.
Some minor bugs were fixed.
V1.98
DTMF-code decoding was made.
MultiFSK-16 receiving and transmitting were made.
Alt-D hotkey was made for "Clear Buffer" command.
V1.97
The documentation was update.
Some minor improvements were made.
V1.96
TrueTTY can decode signals from a WAVE-file now.
See the "File->Decode From File" command.
A WAVE-file must be Windows PCM file, without compression.
A sample rate must be 11025, 22050 or 44100 Hz.
Preferred file parameters are mono, 16 bit, 11025 Hz.

The ExchangeSpeed parameter of the TRUETTY.INI file defines data exchange
speed via additional COM-port now.

Some minor improvements were made.
V1.95
TrueTTY can exchange receiving and transmitting data to another software
via additional COM-port now. So, TrueTTY can emulate hardware modem or TNC.
The "Setup->Data Exchange Interface" menu selects COM-port used for this
purpose. So, with two com ports (in single computer or in two computers)
connected via null-modem cable, you can use TrueTTY with another terminal

software intended for hardware modem using. For example, you can try to use
TrueTTY with WF1B contest software (though I prefer AALog). A speed of
data exchange via COM-port is 9600 bauds. See null-modem cable schematics
in NULL-MOD.GIF file.
If you are using COM-port for PTT interface but don't use it for FSK, you
can use the same port for data exchange also.
Software COM-port emulator can be used also. I have used VSPD virtual
COM-port driver from http://www.mks.zp.ua with success.

In AX25 mode TrueTTY can work (to receive and transmit) as KISS-TNC via
COM-port or DXSOFTEX.DLL interface now. KISS mode is switched on by
the "Setup->Data Exchange Interface->KISS Mode in AX25" menu item.

I have successfully tested TrueTTY with great AX25 software Pr4Win
(see http://www.geocities.com/nl3asd/download/pr4win.html ,
http://www.qsl.net/oe8djk/) with hardware COM-ports (USB/COM converters)
and with VSPD driver.
V1.93
The "File->Open KISS Capture File" command opens capture file to
save all receiving AX-25 packets in the KISS-format.
The program behavior at not very vast computer was improved.
Some minor bugs were fixed.
[...]

1737. kilometers vs. miles in AALog

Yahoo group: dxsoft
Date: 2003-03-14 23:17:49 UTC
From: Dave Dunbar, N0RQ
Topic: 1737 Message: 1737

There is a minor problem in the NEW QSO and EDIT QSO windows in AALog.

Being in the USA, I use miles instead of kilometers (unfortunately), but the miles figures seemed a little low. I changed to kilometers, and entered a 9N (Nepal), giving me 13232 km. When I changed back to miles, AALog said 7145 miles. (I have tried similar tests with prefixes in other directions, and get the same results.)

However, this is not correct. 13232 km = 8222 miles, not 7145. To change from km to miles, you take km * 0.6213712 . AALog seems to be using a conversion of km * 0.54 .

73,
Dave N0RQ

Using AOL for the internet HamCall would not work. You cannot stay connected to AOL long enough to blow your nose.!

What this COM13 is?
It is some USB/COM converter?

s>> 73 de SV2BZQ

I just have setup my USB/COM converter as COM13 and tried to use it.
It works without problem.

Try disable "Produce FSK output at TxD option".
Many USB/COM converters doesn't support slow speed ...

Best regards,
Sergei mailto:amx@...

Bill:
There is an option if you like AOL. Get another ISP, and use it to access AOL. The AOL rate drops to something quite low because you are not using their ISP hardware, and you still have the advantage (if that is what you want) of using AOL.

1748. Problem with TrueTTY

Yahoo group: dxsoft
Date: 2003-03-22 06:31:45 UTC
From: Johnny (KM5IM)
Topic: 1748 Message: 1748

Hi
I am have upgraded to TrueTTY 2.01 and now I am having a problem with program not wanting to execute TrueTTY 2.01 for the Icon. I and copied and paste and still truetty is not executing or opening up. What is the problem. I have download anyother copy and installed it still having the same problem.
Here is the error message that I am getting..

TRUETTY caused an invalid page fault in
module TRUETTY.EXE at 0167:00570009.

1754. cwtype software

Yahoo group: dxsoft
Date: 2003-03-24 00:07:34 UTC
From: kabjkm2002
Topic: 1754 Message: 1754

I built the LPT interface for the software. The instructions list the cwtype.ini values to be configured. Also the diagram shows a paddle connection to the interface and yet further down in the instructions it shows different values to use in cwtype.ini for paddle use. Can anyone explain which vales to use? Needless to say the contraption doesn't work so far; paddles, keying, nor transceiver muting. Any help would be appreciated.

1755. Re: [dxsoft] cwtype software

Yahoo group: dxsoft

If you use schematic from CwType help-file, use these values:

LPT at 378h LPT at 278h LPT at 3BCh

KeyPortType=3 KeyPortType=3 KeyPortType=3
KeyPortNumber=1 KeyPortNumber=2 KeyPortNumber=3
KeyOffTxOffByte=C0 KeyOffTxOffByte=C0 KeyOffTxOffByte=C0
KeyOnTxOffByte=C1 KeyOnTxOffByte=C1 KeyOnTxOffByte=C1
KeyOffTxOnByte=C2 KeyOffTxOnByte=C2 KeyOffTxOnByte=C2

KeyOnTxOnByte=C3 KeyOnTxOnByte=C3 KeyOnTxOnByte=C3
DotPort=379 DotPort=279 DotPort=3BD
DotXorMask=30 DotXorMask=30 DotXorMask=30
DotAndMask=20 DotAndMask=20 DotAndMask=20
DashPort=379 DashPort=279 DashPort=3BD
DashXorMask=30 DashXorMask=30 DashXorMask=30
DashAndMask=10 DashAndMask=10 DashAndMask=10

Switch your LPT-port to SPP-mode in computer BIOS setup.

1756. AALog issues

Yahoo group: dxsoft
Date: 2003-03-27 00:49:12 UTC
From: L. M. Rappaport
Topic: 1756 Message: 1756

Received key ok and copied to directory as instructed. The
"unregistered" dialog disappeared as I'd expect it to, but I still
get an AA Dialog saying "Class not registered" when the program first
starts. Seems to be ok, though. Anyone know what's going on?

Another question: Is it possible to add fields to the log? For
example, power and transmitter location?

Thanks,

Go to Menu Configuration|Interface properties. Select General Settings
and remove mark from "Use DXAtlas for map visualisation" checkbox

LMR> Another question: Is it possible to add fields to the log? For
LMR> example, power and transmitter location?
use the notes for qso field.

You can use Icom's CT-17 (around $130, and IMHO only worth it if you're going to interface multiple Icom radios to your computer). Or, you could use the W1GEE interface for $50

Soundcard ??

If you are using Soundblaster (esp. PCI 512) with W2K(PRO) SP2, your
file DEVLDR.EXE conflicts with unknown resources due to something in SP2.
Two of my computers rendered both of the soundcards virtually useless,
for external radio input. This is the only time I have used any
application that actually crashed W2K, and now have to either uninstall
SP's (bad idea) or trash my SB's.

Does anyone else have any background on this issue ? I would sure like
to hear about it.

From: Louis Sica, Jr.
Topic: 1764 Message: 1772

Matteo.

Is your sound card on the motherboard? If it is, where did you download the last driver for it? If you downloaded it from Microsoft, it may be the wrong driver. Microsoft misidentifies the on-board sound card for some Athlon motherboards, applying a slightly wrong driver that causes hanging sometimes. Go to the web site of the motherboard manufacturer and download the latest drivers from there.

From: matteoneone
Topic: 1764 Message: 1773

thanks everyone for the help - Yes, I do have an Aopen board with onboard audio hardware - I will try to download the latest version of drivers for the board and try how it works. The strange thing is that I have beenusing a bunch of other programs making heavy use of soundcard for other digital modes, and I have run them for days continuously and it neven hang ... I'll let you know as soon as I instll the latest drivers.

thanks again

1777. CWGet/TrueTTY at the same time

Yahoo group: dxsoft
Date: 2003-04-02 18:03:26 UTC
From: Louis Sica, Jr.
Topic: 1777 Message: 1777

When I'm running either CWGet and I try to open on TrueTTY (or when I'm running TrueTTY and try to open CWGet) I get an error:

Device Open Error:
Attempt to open with an unsupported waveform-audio format

If TrueTTY is the second application I'm trying to open, the window stays open but the program is unresponsive to the soundcard. The first program open (CWGet) continues to work fine.

If CWGet is the second application I'm trying to open, CWGet aborts after "flashing and ringing" a few times. TrueTTY (the first program) continues to work fine.

No messages appear in the Windows 2000 Event Viewer

O/S:Windows 2000 Professional, Service Pack 3, all latest updates (as of 2-Apr-2003)

Sound Card: On board Via M7VKD Motherboard, Via AC97 Audio Controller

Sound Card Driver: Via Technologies driver (NOT Microsoft's), 8/30/2001, version 5.1.10.0.3622

System: Athlon XP 1800+CPU, 768MB RAM

CWGet: Version 1.35
TrueTTY Version 2.01

From: Louis Sica, Jr.
Topic: 1777 Message: 1779

Ah.. that explains things.

Then let me offer a suggestion for an enhancement.. add a way to run both programs at the same time for a "multi-mode" solution. Maybe have one program go "idle" and let the other one take control of the soundcard as necessary.

AA> As I know you can't use both program together on the same soundcard.
AA> Sergei will give more detailed answer tomorrow.

It is depends on sound card and sound card drivers.

Some soundcards can record sound for several programs in the same time,
but mass can not ...

This Callsign is very silly. It's impossible determine it
automatically. Use the button with the hand&pencil picture to redefine
country manually.

MFJ 1275 is not very appropriate for CwType, because this interface
has only PTT circuit, but has not KEY-IN circuit.

1795. TrueTTY 2.02 is released

Yahoo group: dxsoft
Date: 2003-04-09 12:57:36 UTC
From: Sergei Podstrigailo
Topic: 1795 Message: 1795

Hello All,

I just have uploaded TrueTTY 2.02 to the main site and mirror:

http://www.dxsoft.com/truetty.zip
http://www.truetty.com/truetty.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
V2.02
A bug was fixed. COM-port speed was set incorrect when the same
port was used for PTT-control and data exchange.
Auto-recognizing of callsigns and control numbers was improved
when "Catch word in contest mode" option is selected.
V2.01
In MultiFSK mode mouse click at spectrogram defines lowest radio
frequency, not center one.
Documentation was update.
V2.0
The "Setup" menu was fully remade. Check "Setup->Interface" options now!
AFC was remade. It works properly at fast AFC speed now.
A problem with RX window scrolling was fixed.
Some minor bugs were fixed.
V1.98
DTMF-code decoding was made.
MultiFSK-16 receiving and transmitting were made.
Alt-D hotkey was made for "Clear Buffer" command.
[...]

Subject: Re: [dxsoft] iam lost

Hello JIM,

Wednesday, April 9, 2003, you wrote:

JM> i have a mfj 1275 radio interface and i can not get it to work with
JM> the type cw program i have hook to the com port (seiral port)in the
JM> computer can anyone help me out here

MFJ 1275 is not very appropriate for CwType, because this interface
has only PTT circuit, but has not KEY-IN circuit.

Jk> ok if the mfj is not a good interface for type cw what would be a good one to use and could you give me a web site to it

If you already have MFJ 1275, you'd better
remove D4 (from DTR circuit) and add one opto-switch as
shown at http://www.qsl.net/wm2u/images/interface_dtr_opto.gif

Jk> MFJ 1275 is not very appropriate for CwType, because this interface
Jk> has only PTT circuit, but has not KEY-IN circuit.

As I know RigBlaster+ (not just RigBlaster) has two switches (for PTT and
KEY-IN).

1805. Cwtype

Yahoo group: dxsoft
Date: 2003-04-19 07:45:13 UTC
From: kabjkm2002
Topic: 1805 Message: 1805

I've been using Cwtype with a QRP rig off and on for the past month. I've noticed I'm unable to make any contacts keying with the software but I make contacts consistently with an external keyer. I use a long wire and random wire tuner. I discovered the reason when I connected an artificial ground to my tuner. With the transceiver connected to the serial port of my computer, the needle of the ground didn't move - without ground current no RF was leaving the transceiver. With the external keyer there is plenty of RF ground current. There seem to be multiple ground paths with rig connected to computer. Does anyone have any suggestions short of giving up on rig controlled software?

You can try opto-coupled interface ...

But in any case there are something wrong in your rig ...

Hi:

Don't give up on it! You have two separate challenges as I see it.

1. Your first challenge is to tame the RF coupling between your rig and antenna. Coupling to a long wire antenna is always a tricky business. You are on the right track with the artificial ground ..... you want to bring your xcvr ground to a neutral level ... for a number of different reasons not the least of which is to avoid some 'tingles' when you touch it hi.

2. The second challenge is to couple your computer to your xcvr with as much isolation as possible. A common method used in computer 'interfaces' such as "Rigblaster" us to use small transformers to isolate audio connections and an 'optical isolation chip' to isolate the 'PTT and/or Keying' lines.

Your situation is common on PSK mode .... especially when ops try to run more power ... eg 30-60 watts output .... I see many on the air that will loose modulation no doubt due to RF getting into their computer and freezing the program .... they get back on by rebooting the program .... they operate for a few minutes then the modulation stops again .... Nine chances out of ten when that happens they have an antenna coupling problem, a computer coupling problem , or both.

In your case you only require isolation of the keying line .... If you purchase an interface .... (some kits are available at a reasonable price) you can use it to provide the optical isolation of your keying line ... (either DTR or RTS) from your computer. The audio isolation won't be used .... but will be available should you want to try PSK31 or RTTY in the future. If you try to build it on your own you will find the optical isolation chip is cheap hi.

I hope that helps

Jim (VE3CI)

Do you mean "TX button" ?

k> The button turns red but the com2
k> port doesnt go high. The rig blaster doesnt work. The other modes IE rtty and psk etc
work fine.
k> I assume a tnc is not needed.

In AX25 TrueTTY can transmit as KISS-TNC emulator only.
So you need to use KISS-TNC-aware terminal software together with TrueTTY.

See "External modem emulation" in help-file for details.

Best regards,
Sergei mailto:amx@...

1815. AALog import

Yahoo group: dxsoft
Date: 2003-04-23 13:05:01 UTC
From: Mogens
Topic: 1815 Message: 1815

Hi

I was looking for a "new" logprogram, and has been playing around with AALog.
It's looking good.

Every thing seems to work fine, except for Log import, where some needed fields
do not exist in my old log.
The result is that I have no confirmed contries even if I have tons of QSL cards.

The problem that when I import an ADIF log, only the QSL sent and/or recieved
fields are importet. But AALog need also the dates for the sent and recieved
to calculate probably the Statistics.
My "old" logprogram has not dates for sent/recieved, so I have to edit every
single QSO, or what do I do?
(Or what did I do wrong?)

73 de oz1akn, Mogens

1817. Finding prefix from country

Yahoo group: dxsoft
Date: 2003-04-25 14:34:13 UTC
From: L. M. Rappaport
Topic: 1817 Message: 1817

I am entering old contacts into my log AALOG v2.43. Occasionally, I am having trouble finding the country. In these cases, I know the name of the country, but you have to scroll through the dialog box to find it. For example, back in 1982, I contacted UK1PGO which is Franz Joseph Land which is now listed as RF1J.

Is there a way to find the prefix when you know the name of the country?

Also, what is Latvia?

Thanks,

Well, for those with MS Access or an ODBC driver for the Borland Database Engine, it apparently can be done. What I did, using Access, was to import Prefix.db into Access and then search on the Country column. I imagine it can be done within an SQL dialog using a select statement.

I'm entering my old logs from 1982 (at the moment). Surprising how many prefixes have changed.

Greetings.. Please excuse me if this has been asked before.. I just signed up. I've been trying out AALog for a while and really, really like it a lot. I've tried countless other log apps and found nothing that compares to AALog. Was just wondering if there was an estimate on when version 3 will be released, or there will be other v2.xx releases?

Tnx,

I can not say date of 3.0 release. Too many work. It will have another
database engine, another awards tracing algorithm and some another
new features. I need to rewrite about 90% of the source code.
Version 2.44 will be released soon.

Best regards,

1825. AALog v2.43 shortcut keys

Yahoo group: dxsoft
Date: 2003-04-27 15:29:08 UTC
From: L. M. Rappaport
Topic: 1825 Message: 1825

When using the new qso window there are a number of shortcut keys.
For example, Alt-1 selects the first dialog tab. Is there a shortcut
key to enter that window from another field on the screen?

I.e., Alt-b selects the "Band" field and puts the cursor in the field
itself. Alt-1 selects the "Notes for QSO" field, but doesn't put the
cursor in the field. How do I do that?

Thanks,

1826. TrueTTY defaults

Yahoo group: dxsoft
Date: 2003-04-27 16:17:08 UTC
From: Modeland
Topic: 1826 Message: 1826

Sergei, is there a setting to fix the size of the blocks on the screen so that they do not have to
be resized each time I fire up the program?

I like the blocks for incoming, outgoing and composing to be about 1/3 screen each and have to reset
them to that every time I get going. It's getting to be a bit annoying.

Otherwise, I couldn't be happier with TrueTTY on RTTY and look forward to your after-beta version of
better PSK-31

Date: 2003-04-28 03:05:11 UTC
From: n0iby
Topic: 1823 Message: 1830

Ok, Alexander, thanks for the info.

I'm only having 3 minor issues with AALog and was wondering if they have been seen before.

1) Occasionally, when adding QSO info in the New QSO dialog, the Save button does not update the main window. Exiting AALog and returning will then show the added QSO.

2) Calling the DX Atlas program from within AALog is quite erratic and crashes DX Atlas frequently. Also, any info entered or saved within DX Atlas is not saved. This only happens when DX Atlas is called from within AALog.

3) The Internal Callbook cannot be cleared and entries made in it cannot be deleted. I've tried the Refresh Databases option but it has no effect on the Internal Callbook.

Tnx,

73

1831. TrueTTY 2.06 beta is published

Yahoo group: dxsoft
Date: 2003-04-28 11:07:12 UTC
From: Sergei Podstrigailo
Topic: 1831 Message: 1831

Hello All,

I just have uploaded TrueTTY 2.06 beta to the main site and mirror:

http://www.dxsoft.com/truettyb.zip
http://www.truetty.com/truettyb.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
V2.06
Phase indicator was made for fine tuning in PSK-31.
It can be switchen on or off via
"Setup / View / Show phase indicator in PSK-31" option.
V2.05
Buttons and hotkeys for fine tuning were made:
"Alt-<" , "Alt-Left" keystrokes and "<" button
move RX frequency to 1 Hz down;
"Alt->" , "Alt-Right" keystrokes and ">" button
move RX frequency to 1 Hz up;
"Alt-Down" keystroke and "<<" button move RX frequency to 5 Hz down;
"Alt-Up" keystroke and ">>" button move RX frequency to 5 Hz up.
V2.04
BPSK-31 decoder quality was improved.
V2.03
The "Setup / View / Spectrogram as waterfall" option
or "Alt-W" hotkey switch spectrogram view to waterfall or
ordinary spectrogram now.
V2.02
A bug was fixed. COM-port speed was set incorrect when the same
port was used for PTT-control and data exchange.
Auto-recognizing of callsigns and control numbers was improved
in contest mode.
[...]

Same problem here. Windows 2000 pro, Pent IV 2.8 ghz, 512 mb ram.
Further info: if you save more than once, the contact will be saved
even though it does not appear in the log. Closing and reopening will
show multiple entries.

1835. new

Yahoo group: dxsoft
Date: 2003-04-29 01:48:56 UTC
From: PAUL PITTENGER
Topic: 1835 Message: 1835

Dear Gentleman at DXsoft,
For about the past 2 years, I have been promising myself
to get a good computer and to find programs to load that
would allow me to interface to my radios and run TTY,
Morse Code, and more.
Then wouldn't you know, when I finally got my computer
and started surfing the web, I found DXsoft. Wow!!!
I'm looking forward to downloading some programs, but I
first need to know the best sound-card recommended.
My 'rig' is a Compaq Presario with an AMD Athlon XP
processor, 256Mb RAM & 120Gb hard drive. I run
Windows XP.
I want to eventually use TTY & code on my ham gear,
but want to listen in first on short wave, until I can get
the code under my belt & upgrade my license. (I'm a no-code
Tech now). I would also like to be able to get Weather Faxes
off the air.
Can you give me some feedback and maybe recommend the
best sound card?
Thankyou
73
Paul

Thanks. V4 is currently listed in AALog as St. Christopher and Nevis.
I assume that's the same as the old VP2K.

TrueTTY have not special requirements to sound card.
Almost any card with properly installed driver should work.

Surely, I'd suggest to not use too cheap card ...

Sound cards by Creative are good usually ...

From: uy2uf@uninet.kiev.ua
Topic: 1840 Message: 1842

Dear Larry.
The main prefix of South Orkney Island is VP8/O.
When you write a call, for VP8SIG (S. Orkney Isl. - AN-008) or LU1ZA (S. Orkney Isl. - AN-008) for example AALog take a VP8 (Falkland Islands) or LU (Argentina) automatically. You may make some changes for this stations manually by clicking on the icon in down left corner in "New QSO" window.

Thanks, Max,

I worked LU5ZA Feb. 6th 1982. He claimed to be on South
Orkney. I sent his manager a card and a "green stamp", but never got
the QSO confirmed. I'm just entering old contacts in a newly
purchased AALOG.

The problem I have with AALog (already mentioned to Alexander)
is that while you can find a country based on prefix, you can't find a
prefix based on country. What I've done to work around it is to open
the prefix table and do a search. I missed South Orkney because I
didn't do a partial search on "Orkney" and "South" is abbreviated
"So". Not sure I missed Pitcairn as well, as the old prefix was VR6
back then, but Pitcairn Island is also listed.

1846. Re: minor bug in AALog (kilometers to miles)

Yahoo group: dxsoft
Date: 2003-04-30 21:34:43 UTC
From: Dave Dunbar, N0RQ
Topic: 1846 Message: 1846

There is a minor problem in the NEW QSO and EDIT QSO windows in AALog (v2.43).

Being in the USA, I use miles instead of kilometers (unfortunately), but the miles figures seemed a little low. I changed to kilometers, and entered a 9N (Nepal), giving me 13232 km. When I changed back to miles, AALog said 7145 miles. (I have tried similar tests with prefixes in other directions, and get the same results.)

However, this is not correct. 13232 km = 8222 miles, not 7145. To change from km to miles, you take
km * 0.6213712 . AALog seems to be using a conversion of km * 0.54
.

73,
Dave N0RQ (ex-WD0HWX)

1851. Key violation message

Yahoo group: dxsoft
Date: 2003-05-01 23:05:56 UTC
From: Paul B
Topic: 1851 Message: 1851

I'm having problems logging anymore contacts. I enter the info in the new qso window, click save and nothing happens. So I click to close the new qso window and when I try to close the program, all I get is "Key violation". I have to use the task manager (I use XP Pro) to end AAlog. I have version 2.43. I'm back to hand logging until this is resolved. HELP!!

1852. I need your suggestions

Yahoo group: dxsoft
Date: 2003-05-02 09:27:08 UTC
From: Alexander Anipkin
Topic: 1852 Message: 1852

Dear dxsoft users,

I will add second time field to the AALog ver.3.0 (you can select
use this feature or not).

The question is: What time I need use as the time of the START QSO?
Time when cursor exit from the call field? Or something other.

I need your suggestions. Thank you.

Best regards,
Alexander mailto:aia@...

Alexander,

Assuming the user opted for real time logging, I'd expect to
see the cursor sitting in the start time field. I'd expect this time
to be changing as it sat there. When the user left the start time
field and entered the call field, I'd save the start time.

My second choice would be when the user exits from call field.
In that scenario, the cursor would be sitting in the call field and
leaving it would auto fill the start time.

If you get a lot of conflicting opinions, you might just want
to make this configurable in the setup dialog.

Another user add another options.
Time must be set when you leave SENT RST field. Motivation: In the
pile-up you enter call and press Enter.
After this you can call DX during very long time.

Another option i've thought about is to have the start time recorded when leaving the Call field (or any user settable field), and have an End Time automatically increment until New QSO is closed (with a save). I'm not a DX'r or contester so i also like to track the length of QSOs, start time and end time.

Tnx,

From: us3qq
Topic: 1860 Message: 1860

Hello dxsoft,
some problem happens when I use AALog 2.43 simultaneously with any programm:
- open Award tracker (F8 or same command in Tools menu)
- select one of worked or confirmed zones/countries/states are displayed in the active Award tracker window
- push Show QSOs button, there is a Previous contacsts window
- activate on a toolbar another programm
- then activate AALog again - it is hanging up now (Award tracker window active, Previous contacsts
window disappear)
- to exit AALog need to use Ctrl+Alt+Del combination.

From: Sergei Podstrigailo
Topic: 1866 Message: 1866

Hello All,

I just have uploaded TrueTTY 2.08 beta to the main site and mirror:

http://www.dxsoft.com/truettyb.zip
http://www.truetty.com/truettyb.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
V2.08
PSK-31 filter bandwidth was changed again.
Phase indicator maximum width is limited to 92 pixels now.
Waterfall colors can be customized via "Setup / Waterfall" options now.
V2.06
Phase indicator was made for fine tuning in PSK-31.
It can be switched on or off via
"Setup / View / Show phase indicator in PSK-31" option.
V2.05
Buttons and hotkeys for fine tuning were made:
"Alt-<" , "Alt-Left" keystrokes and "<" button
move RX frequency to 1 Hz down;
"Alt->" , "Alt-Right" keystrokes and ">" button
move RX frequency to 1 Hz up;
"Alt-Down" keystroke and "<<" button move RX frequency to 5 Hz down;
"Alt-Up" keystroke and ">>" button move RX frequency to 5 Hz up.

I can now reproduce this consistently. It occurs when you enter the
same callsign twice - for example, when you work a guy first on SSB
and then on CW. The time is different, the mode is different, but the
callsign remains the same and this seems to prevent the new qso dialog
and log window from updating.

Thanks.

Actually, it could be done several ways. For example, by adding an additional table (for each award) with a column for the primary key of the log table for the appropriate qso. Another way might be to add a single table for all awards with keys on award, primary key of log table, etc. Or, a link table could be used. Any of those would eliminate modifying the current tables.

I think it might be able to be done now using MS Excel or Access, linking to the log table, since installing AALog installs the BDE (Borland Database Engine) and Paradox tables.

If I get a few minutes, I'll try it.

No problem, Alexander, if I get anything done, I'll send it to you.
You mentioned that you were changing databases - have you selected one
yet? I'm hoping that whichever you pick, it will have an ODBC driver.
It would be nice if you left it open so we can add stuff to it.

1881. SeaTTY 1.15 beta is published

Yahoo group: dxsoft
Date: 2003-05-20 15:28:34 UTC
From: Sergei Podstrigailo
Topic: 1881 Message: 1881

Hello All,

I just have uploaded SeaTTY 1.15 beta to the main site and mirror:

http://www.dxsoft.com/seattyb.zip
http://www.hamport.com/seattyb.zip

SeaTTY can receive HF-FAX images now .
I have tested it with Russian FAX station at 13884 kHz .

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

Sergei, I have tested it on several WE FAX stations and it works.
It loses sync very easily. It looses the scroll bars sometimes.
It does not always start automatically or save and stop automatically.
Jim W7ANF

The black border that should stay on the edge will move
sometimes. It seems like SeaTTY looses some data if
I scroll through the image while it is being recorded.
I can see that SeaTTY does not use the border.

From: Pierre Desseneux
Topic: 1885 Message: 1885

Hello,

I'm using AALog since about one year. It's working very well.
Past days, updating from AALog 2.43 to AALog 2.44, after many attempts and many mistakes.......nothing was running !!!
HELP file has anticipated all... but it was not very easy for me.
After short e-mail exchange with Alexander, RZ4AG, everything is running well now.
For closing this mail:
1°- AALog is very fine when everything is OK
2°- AALog is very very fine when everything is out of order.
3°- Alexander has made a great job.
Thanks Alexander
Pierre / F5JFU

Sergei, SeaTTY seems to do grey also. The pictures seem to
have grey pixels and a white border. If it does, how many shades of grey?
Does SeaTTY cost $35?
SeaTTY is the easiest to use WE FAX /HF-FAX program I have used.
I copied NAVTEX also using SeaTTY. The RTTY usually gets nothing,
except from amatuer radio.

I made 16 grey shades now.
I have tried 256 grey shades also, but picture looks almost the same,
but such 256-color picture is bad compressed to GIF or PNG later ...

JF> Does SeaTTY cost $35?

Ordinary SeaTTY price is $35 .

Another DXsoft software (except TrueTTY) registered user can
register SeaTTY for $25.

Registered TrueTTY user can purchase SeaTTY for $15 .

JF> SeaTTY is the easiest to use WE FAX /HF-FAX program I have used.

Take to attention, that it is the first beta-version.
Not all feature I intend to make is made yet ...

MixW has everything but Navtex. . Is there going to be any reason to purchase this other than Navtex if you own MixW? MixW also gets HfFax reception.

What frequencies do I use for Navtex, that is where is it transmitted as cannot test this one for Navtex without that?

MixW does HF-FAX easier, but it does not save the result.
SeaTTY automatically starts and saves the pictures.
I did not check to see how many shades of grey MixW has.
Do you know how many shades of grey that MixW uses?
It is hard to tell since I do not know how to save pictures in MixW.

Try this base:

http://www.hffax.de/database/stations/frequencies.html

There is short list I get somewhere:

3853 HF Fax Hamburg
7880 HF Fax
8040 HF Fax Northwood England
11085 HF Fax Northwood England
13880 HF Fax
13884 HF Fax RUMS
4610 HF Fax Northwood England
14434 HF Fax

From: Paul B
Topic: 1907 Message: 1907

Hello Sergei,
I just imported my cabrillo file for the WPX contest.
All is fine. In order to get the info into each
contact, I have to edit each qso and click on the disk
icon on the call field. Is there a way to mass edit
the contacts so that the Hamcall info can be imported
into all the contacts in one action?
Thanks for a great program.
Paul NG7Z
BTW, condx were not good on 15 meters. I operated as a
single band entry for 15 meters. Maybe that was a
mistake. But only have 200+ contacts to edit. hi hi.

1908. Seatty new Fax version 116

Yahoo group: dxsoft
Date: 2003-05-25 20:22:07 UTC
From: Roger Proust
Topic: 1908 Message: 1908

Good night Serge and all,

I used registered Seatty with NavTTY for more than one year (particulary during my sailing trip in Greece last year), and I appreciate very much that software wich decodes very easily RTTY and NAVTEX messages even by weak signals of reception.
I have downloaded the new Fax version what I find very simple of utilisation and I shall try it more deeply at sea at the end of june.However I have two questions :

-do you intend to set a button for automatic or manuel reception in Fax mode ?
-Is it possible to set previously the central frequency in RTTY and NAVTEX mode and limit the excursion of the frequency of the AFC to allow an automatic decoding of NAVTEX messages ?

Thanck you

Best greatings

Roger
(France)

RP> I have downloaded the new Fax version what I find very simple of utilisation and I shall try it more deeply at sea at the end of june.However I have two questions :

RP> -do you intend to set a button for automatic or manuel reception in Fax mode ?

Do you want a button to _disable_ autostart?
I am thinking if it is really needed ...

RP> -Is it possible to set previously the central frequency in RTTY and NAVTEX mode

It is good idea, will be fixed

RP> and limit the excursion of the frequency of the AFC to allow an automatic decoding of NAVTEX messages ?

Try set AFC speed to very large value (600).

In this case SeaTTY will search strongest signal at all sound band.

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

Topic: 1908 Message: 1910

Good morning Sergei and all,

Thanck you for your quick answer and the future previous setting of the central frequency in RTTY and NAVTEX mode.
Effectively for the automatic Fax auto start button, I should try deeply Seatty before at sea to appreciate if it is realy needed or no.
Best greatings

Roger

1914. CwGet and AALog

Yahoo group: dxsoft
Date: 2003-05-27 19:42:00 UTC
From: Alexei, RK3TN
Topic: 1914 Message: 1914

Hello, Alexander and Sergei,
At work CW with using CwGet and AALog I have noticed, that some operators, working CW, transmit their callsigns with spaces between signs. So AALog cannot correctly define the country and previous QSO. For example, XX1XX and X X 1 X X (with spaces) AALog perceives as different calls and cannot define the country.
So I must delete spaces manually.
May be it possible in the following versions of the program (AALog or CwGet?) that the spaces in field "Callsign" were delete automatically or ignored (in AALog)?
The same I think about the field "Name".

73!de Alexei (RK3TN)

1921. SeaTTY 1.17 beta is published

Yahoo group: dxsoft
Date: 2003-05-29 10:13:02 UTC
From: Sergei Podstrigailo
Topic: 1921 Message: 1921

Hello All,

I just have uploaded SeaTTY 1.17 beta to the main site and mirror:

http://www.dxsoft.com/seattyb.zip
http://www.hamport.com/seattyb.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
SeaTTY versions history

V1.17
SeaTTY tries to find phasing lines and to detect LPM speed during 20 seconds
after manual start.
The program saves central frequencies for RTTY, NAVTEX and FAX separately.
"Auto S." button was made to enable/disable auto start/stop of FAX receiving.
SeaTTY can decode signals from a WAVE-file now.
See the "File->Decode From File" command.
A WAVE-file must be Windows PCM file, without compression.
A sample rate must be 11025, 22050 or 44100 Hz.
Preferred file parameters are mono, 16 bit, 11025 Hz.
V1.16
Saved images preview was made.
AFC works in FAX mode now (during "LPT speed detected" state).
Squelch prevents auto-start at noise in FAX mode now.
User can select LPM and IOC for manual start now.
V1.15
SeaTTY can receive HF-FAX now.
[...]

From: Jim FitzSimons
Topic: 1918 Message: 1922

It seems that NAVTEX is not much use unless you are close to the coast.
512 kHz and 490 kHz do not go very far over land.
I have been receiving WEFAX pictures for years and SeaTTY does a great job.
I have lots of WEFAX software and hardware and SeaTTY makes it easy.
Thanks Mark for having such a good reference site.

1923. Navtex

Yahoo group: dxsoft
Date: 2003-05-29 14:47:42 UTC
From: h.j.karius@t-online.de
Topic: 1923 Message: 1923

You need not live close to the sea to receive Navtex on 518 kHz.

I live in north DL about 90km west of Bremen, if you want to look it up on a map.
My rx is a commercial Rohde & Schwarz EK 071, the antenna is an open fed 2x40 dipole with the feed point atabout 18m above ground. To improve the received signal I use a Timewave DSP-599zx. So far I have used TrueTTY but SeaTTy does exactly the same job.

The Navtex stations I have received so far range from Iceland to Bahrein in the Persian Gulf with stations mostly of course from West Europe. But Istanbul is frequent and I have also received Egypt and Israel more than once. The best catch so far was from the Canary Islands but only once. Conditions are of course better from autumn to spring. But a few days ago I could receive Iceland at 21.00 local time and it was daylight outside.

So good DX and 73

The manual start LPM detect works good.
SeaTTY still looses data if the scroll is used when it is receiving.
I just received WEFAX from
Pt. Reyes, CA 15:42Z 29 May,2003 at 4.345995 MHz
I switched to 8.682 MHz and there is a strong signal there also.
It is now 16:31Z 29 May,2003.

I also have a NAVTEX page though it doesn't contain as much yet.

http://www.dxradio.co.uk/navtex.html

From London in the UK, I can receive NAVTEX from the obvious local stations in Europe, also from further away such as Saudi Arabia, Israel, Egypt, Bahrain, Astrakhan, Canary Islands, Iceland, Canada and USA East Coast. Obviously just like MW dxing (AM Broadcast Band) conditions vary day-by-day or even hour-by-hour depending on the geomagnetic index and auroral activity.

Some NAVTEX stations also QSL reports ... see the link on my page.

Thanks for the download info. What is the best site to go to for the downloading?
RE the resynch... On the MT63 program there is provision to "resynch" when print comes in all jumbled up. I wondered if there was some feature to the Tru-tty that might get the printing back in sync and printing. Is the Tru-tty program susceptible to certain degrees of QRN? It seems so. Keith - K0MST

1933. HF FAX List

Yahoo group: dxsoft

From: h.j.karius@t-online.de
Topic: 1933 Message: 1933

Hallo Jim and the others,

You may go to Marius Rensen's homepage. There you find FAX lists
downlodable following different criteria, e.g. QRG, time.
The table of content on the left shows 'HF-FAX'. When you follow that
path you immediately find the page with the lists.

Good luck and of course good DX.

From: Mark Hattam
Topic: 1881 Message: 1936

It's normally 1.9 kHz.

But just like Navtex, some stations do wander a bit. Haifa Navtex is
often a bit off channel from 518.0 kHz.

1940. AALog contest module

Yahoo group: dxsoft
Date: 2003-06-10 12:03:49 UTC
From: olenilves
Topic: 962 Message: 1940

Dear Alexander,

For our local contests sometimes is needed to use 15min and 30min
rules.
Please advice me how to configure in the contest section "Short
contest rules" our short contests like 10min 15m....up to 60 min

In the Ini file we can finde following text:

;To set tour length in the Short contests use this values
;for "TourLength" field in the "General" section
; 0 - 1 hour
; 1 - 10 minutes
; 2 - 15 minutes
; 3 - 20 minutes
; 4 - 30 minutes

Let's look what is the General section:

[General]
Contest=82
BandLimit=0

I have changed BandLimit status numbers but seems it does not give
eny help.

and..... it works, thanks a lot!

In the future it is good to know how to create some configurations files for our local not described tests. In case this could be easly done then your instruction is very much appreciated. It could be described as a file for one test.

PB> I know I asked this before but I can't find the
PB> e-mail. How do I add/edit entries in the internal qsl
PB> manager database?
The only way update QSL manager database is create dbf-file with this
structure:

Call - DX call
Manager - Manager Call
Year - Here you can enter notes
Note - field for address
Author - field for information about author of info

You can create in in the MS EXcel for example. First row must have
field names in the cells. Other rows used for data.
Save file as dbf file and import to program.

Best regards,
Alexander mailto:aia@...

Unfortunatelly no way to describe test like in the N6TR. But for new
contest need add several short procedures in source code. If you can
programming on pascal then no problem to add any new test.

Sample code for contests available by request.

Best regards,

Yes, no problems at all !!!

I have an Icom R8500 and simply plug in a stereo 3.5mm jack plug into the socket marked 'REC OUT' on the front panel and feed it into the LINE-IN on my cheap-and-cheerful SB Live Value soundcard. Absolutely no problems!!!

Regards

Chris

1947. Seatty new 1.17

Yahoo group: dxsoft
Date: 2003-06-10 19:59:34 UTC
From: Roger Proust
Topic: 1947 Message: 1947

Hello Sergei,

I have tested new Seatty v 1.17 last weekend, and I have received without problem pictures from Hamburg. The auto/manuel stop/start of the Fax goes very well . However, I have several propositions or remarks :

Fax reception:

- is it possible to have at least zoom : 1/2, 1/1, 2/1, on the Fax window and to have the possibility to call directly the memorised pictures from the tool's bar of Seatty ?
- the AFC does not work when I push on the button AFC, I thinck it is normal ?
- the click stop of the Fax window does not work, is it normal ?

Fax reception, RTTY, NAVTEX:

- I thinck (but I am not very sure...) it would be better to have the possibility to set directly and previously the center demodulator frequency (about 1900 Hz/ 1700 Hz if Fax or RTTY/NATTY) and that the AFC works only around that center demodulator frequency .

Thanck you for your work and your light and very efficient software.

Best greatings

Roger

If you double-click on preview image or image name in tree,
this image will be opened in default image editor.

I'd suggest you to download and install free but excellent IrfanView editor.

RP> - the AFC does not work when I push on the button AFC, I thinck it is normal ?

AFC works during phasing lines receiving, i.e. while "LPM speed detected" is
shown in status line.

RP> - the click stop of the Fax window does not work, is it normal ?

It is strange...
Stop button mast to work.

RP> Fax reception, RTTY, NAVTEX:

Probably you are right.
Will be think about such option.
Some similar "AFC about last mouse click" ...

RP> Thanck you for your work and your light and very efficient software.

Thanks!

To receive amateur RTTY by SeaTTY, set speed to 45 baud and
select "Reverse" if you are using USB or "Normal" if LSB .

Read LOGGER documentation to understand how to export data to ADIF or plain
text (I didn't see LOGGER at all, so I don't know how to fix it).

Then use AALog import feature ...

Hello OM;

With vers 8.07 running, you must use:
Utilities button (upper right-hand corner)
Click on Export Logs
Click Backup Complete logbook
Click on ADIF format
Specify name of File; UA9ORQ.adi

That should do it. I suggest that you start with doing a Recalc first.

Good Luck and Have Fun,

1965. aalog/truetty

Yahoo group: dxsoft
Date: 2003-06-14 15:53:12 UTC
From: wderegt
Topic: 1965 Message: 1965

I upgraded from a HP Omnibook 133MHz with Windows 95 to a Compaq 1234 notebook (AMD 266MHz) with Windows 98. Now I startup Truetty in combination with AAlog contestprogramme. No matter what contest configured. I click on a call in the Rx-window in TrueTty, the call appears in the new qso window of AAlog-contest, but at the same time TrueTtty got frozen, until I press clear in the AAlog-contest window.
Error message is: -- " is not a valid floating point --
Anyone any idea??

From: Paul Beringer
Topic: 1974 Message: 1974

Alexander,
In the next version of AAlog, it would be really helpful to be able to sort contacts in the awards module. For instance, suppose I have 200 contacts with LU land and I want to be sure I have all the bands covered with qsl confirmations. The way is works now is that you have to double click the LU line in awards manager and then carefully scroll thru the contacts looking for the various bands without a qsl sent marker. Very time consuming. Yes, I know you can do a sort in the main window of AAlog after doing a filter. But its much easier to do this checking while in awards manager because you don't have to set up a filter for each DXCC entity. While in awards manager, they are all there.

No! I am talking about TrueTTY :-)

To add modes to AALog list, just edit MODES.AAL file.
It is simple text file.

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

1981. TrueTTY 2.10 is released

Yahoo group: dxsoft
Date: 2003-06-26 13:43:41 UTC
From: Sergei Podstrigailo
Topic: 1981 Message: 1981

Hello All,

I just have uploaded TrueTTY 2.10 to the main site and mirror:

http://www.dxsoft.com/truetty.zip
http://www.truetty.com/truetty.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========

TrueTTY Versions History

V2.10
The documentation was updated.
Auto-recognizing of callsigns and control numbers was improved
in contest mode.
Some minor bugs were fixed.
V2.09
BPSK-31 decoder was changed again.
V2.08
PSK-31 filter bandwidth was changed again.
Phase indicator maximum width is limited to 92 pixels now.
Waterfall colors can be customized via "Setup / Waterfall" options now.
V2.06
Phase indicator was made for fine tuning in PSK-31.
It can be switched on or off via
"Setup / View / Show phase indicator in PSK-31" option.
V2.05
Buttons and hotkeys for fine tuning were made:
"Alt-<" , "Alt-Left" keystrokes and "<" button
move RX frequency to 1 Hz down;
"Alt->" , "Alt-Right" keystrokes and ">" button
move RX frequency to 1 Hz up;
"Alt-Down" keystroke and "<<" button move RX frequency to 5 Hz down;
"Alt-Up" keystroke and ">>" button move RX frequency to 5 Hz up.
V2.04
BPSK-31 decoder quality was improved.
V2.03
The "Setup / View / Spectrogram as waterfall" option
or "Alt-W" hotkey switch spectrogram view to waterfall or
ordinary spectrogram now.
V2.02
A bug was fixed. COM-port speed was set incorrect when the same

port was used for PTT-control and data exchange.
Auto-recognizing of callsigns and control numbers was improved
in contest mode.

Hi:

Not sure I understand the question ..... are you saying a station using MixW2 works some of the time when in contact with a station using TrueTTY? When either one trys to contact a station using a PK232 the PK232 doesn't copy?

Are you talking about the standard RTTY mode?

In this AAlog use system settings to display date. Change short date
format in the regional settings

Best regards,
Alexander mailto:aia@...

1987. AALog "Previous contacts" window

Yahoo group: dxsoft
Date: 2003-06-29 18:50:30 UTC
From: Alexei RK3TN
Topic: 1987 Message: 1987

Hello, Alexander !

In AALog ver. 2.44 when I enter callsign in the field "Callsign" in the "New QSO" window", there is an information in the window "Previous contacts". If I then go to the main window, and return to the "New QSO" window again, the information in the window "Previous contacts" remains. I do nothing in the "New QSO" window. But when I go to the main window, and then return to the "New QSO" window the second time, the information in the window "Previous contacts" disappears.
I am using "Windows 98".

Best regards,
Alexei RK3TN mailto:rk3tn@...

1988. AA log call sign lookup

Yahoo group: dxsoft
Date: 2003-07-05 07:37:20 UTC
From: Dave Cutts
Topic: 1988 Message: 1988

Firstly, thanks for a great program well done!

Could one of you guys help me out, Ive recently started using AAlog
and would like to understand how the "call sign lookup" works. Im
based in the UK, so most of my contacts will be UK or Europe based.
Does AAlog have an internal call sign data based ?
If so does it include the UK and Europe ?
Are downloads available to refresh this databased, or would I
already have the latest version ? I have registered version 2.44.

I notice you can reference to external databases, but the only one I
have is Eurocall 2003 and I dont think this is supported by AAlog...

Any way to make this work with AAlog ?

Best regards
Dave

DC> Does AAlog have an internal call sign data based ?
Internal callbook is only database of callsigns YOU work. When you add
callsign program put it to database.

DC> If so does it include the UK and Europe ?
DC> Are downloads available to refresh this databased, or would I

Dear dxsoft users,

In the version 3.0 I will add separate field for band and for
frequency.

1. Do you need possibility for direct frequency enter in the New QSO
window to change frequency on the TRX?

2. If answer for 1st Q is YES.
what is better
a) Freq field ONLY display freq. To change freq you enter freq in the
Call field.
b) you enter freq direct in freq field.
c) press some hot-key and enter new freq in the small popup window

Best regards,
Alexander mailto:aia@...

Topic: 1990 Message: 1992

Yessss

b. you enter freq direct in freq field
Is a best way.

In the version 3.0 I will add separate field for band and for
frequency.

1. Do you need possibility for direct frequency enter in the New QSO
window to change frequency on the TRX?

2. If answer for 1st Q is YES.
what is better
a) Freq field ONLY display freq. To change freq you enter freq in the
Call field.
b) you enter freq direct in freq field.
c) press some hot-key and enter new freq in the small popup window

Best regards,
Alexander mailto:aia@...

1993. freq in 3.00

Yahoo group: dxsoft
Date: 2003-07-06 16:27:29 UTC
From: uy2uf
Topic: 1993 Message: 1993

Sorry, first letter have some mistakes.
I think "b", cause some people use hotkey and run rig from log, by written freq in field and "c", cause sometime is so comfortable run on the band, and freq in the log run automatically from rig.

From: Michael Ziebell
Topic: 1990 Message: 1994

Yes, Alexander, that would be nice. As to the second part of your question (b) would be my first choice, then (c). Also if there would be a way to copy from one to the other, would work too. Maybe a "click and drag" type thing?
Note: I'm new to this program so I haven't really explored a lot of its subtleties yet.

Thanks,
Mike - AE6MZ

I think, "b" and "c", some people use hotkeys, as I, but many peoples change
freq with mouse and keyboard.

What Windows version you have?

How many bands you have in the bands.aal file?

Best regards,

I have rig interfaced with AALog so I would prefer:

1. Press some hotkey to log receive frequency and establish
logging operation for this QSO. (Escape cancels logged frequency and
frequency floats again)
2. Once hotkey is pressed and contact log begun, either a
second hotkey or same one pressed a second time logs transmit
frequency. (Escape pressed once cancels transmit frequency, twice
cancels receive frequency as well)

Date: 2003-07-11 12:06:15 UTC
From: todd7468
Topic: 2002 Message: 2002

I have the latest version of aalog

for some reason the bottom right corner of the screen show 12. I only see 6 entries and sometimes I modify an existing entry when I create a new one. What am I doing wrong?

2003. SeaTTY 1.20 is released

Yahoo group: dxsoft
Date: 2003-07-15 14:06:40 UTC
From: Sergei Podstrigailo
Topic: 2003 Message: 2003

Hello All,

I just have uploaded SeaTTY 1.20 to the main site and mirror:

http://www.dxsoft.com/seatty.zip
http://www.hamport.com/seatty.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
SeaTTY versions history

V1.20
The documentation was updated.
V1.17
SeaTTY tries to find phasing lines and to detect LPM speed during 20 seconds
after manual start.
The program saves central frequencies for RTTY, NAVTEX and FAX separately.
"Auto S." button was made to enable/disable auto start/stop of FAX receiving.
SeaTTY can decode signals from a WAVE-file now.
See the "File->Decode From File" command.
A WAVE-file must be Windows PCM file, without compression.
A sample rate must be 11025, 22050 or 44100 Hz.
Preferred file parameters are mono, 16 bit, 11025 Hz.
V1.16
Saved images preview was made.
AFC works in FAX mode now (during "LPT speed detected" state).
Squelch prevents auto-start at noise in FAX mode now.
User can select LPM and IOC for manual start now.
V1.15
SeaTTY can receive HF-FAX now.
V1.10
A problem with scrolling of received symbols window was fixed.
The window is not scrolling down now by received symbol if
the last string is not visible.
AFC was remade. It works properly at fast AFC speed now.
[...]

2004. TrueTTY special event discount - Russian WW RTTY Contest

Yahoo group: dxsoft
Date: 2003-07-25 11:55:30 UTC
From: Sergei Podstrigailo
Topic: 2004 Message: 2004

Hello All,

You can register TrueTTY with 50% discount before
Russian WW RTTY Contest is finished (27-July-2003 23:59 UTC) .

Use this URL to purchase TrueTTY key-code for $19.50 :

https://www.regsoft.net/regsoft/vieworderpage.php3?productid=16946&pc=54Lc0

I'd suggest you to use
AALog contest module (http://www.dxsoft.com/aatest.zip)
together with TrueTTY (http://www.dxsoft.com/truetty.zip) in
this contest.

Best regards,
Sergei mailto:amx@...

From: Osborne, William P.
Topic: 2006 Message: 2008

Not easy to explain, but basically I was running True-rtty in a window and my old TNC in another and the true-rtty machine was producing garbage on rtty signals that the old machine copied fine. I had the TR machine set to rtty and 45 baud and I tried "reverse" even stopped and restarted it, but nothing I did made it copy rtty. However it did copy HF Packet (AX25)??

Thanks..Bill

Do you see signal peaks in TrueTTY oscillogram window?
Do you have receiving frequencies (vertical red lines) tuned to these peaks?

OWP> However it did copy
OWP> HF Packet (AX25)??

TrueTTY copies HF-Packet if "AX-25(HF)" mode is selected via "Mode" menu.

Topic: 2006 Message: 2012

Hello William,

Wednesday, July 30, 2003, you wrote:

OWP> Yes I see peaks and it is tuned to them

Check if
- it is really RTTY signal;
- "Mode" in TrueTTY is selected to "RTTY";
- "Speed" in TrueTTY is set up properly (45 Baud for amateur RTTY);
- "Normal/Reverse" button is set up properly.

If you receive amateur RTTY,
use "Normal" at USB or "Reverse" at LSB .

At least, try install newest sound card driver, especially if
you use motherboard built-in sound card ...

Best regards,
Sergei mailto:amx@...

2014. Setting UP CWType

Yahoo group: dxsoft
Date: 2003-07-30 12:01:24 UTC
From: Thomas, Michael L
Topic: 2014 Message: 2014

Hello all,
I'm a new user and probably overlooking the obvious. I have loaded the DXsoft suite for CW, RTTY, Voice and logging and have started to bring each package on-line. I started with CWType. I have built the interface circuit and got it working last night except for keying with the iambic key. I have checked and double checked the wiring so I think it is correct. Question: Should I be able to open CWType and begin sending with the key? Or does something have to be enabled? Sending with the function keys and keyboard is fine. I do have one question about the keyboard keying. It seems that I have enter two or more letters or numbers before the program responds, i.e. I could enter, for instance, the letter 'C' and it will just set there. If I then enter a 'Q' the program will send 'CQ'. I'm sure the answers to all this are obvious but I'd appreciate and help to get going.
Regards,
Mike

You should edit CWTYPE.INI as described in documentation.
See about

DotPort
DotXorMask
DotAndMask
DashPort
DashXorMask
DashAndMask

TML> Sending with the function keys and keyboard is
TML> fine. I do have one question about the keyboard keying. It seems that I have

TML> could enter, for instance, the letter 'C' and it will just set there. If I
TML> then enter a 'Q' the program will send 'CQ'.

It is by design. In another case CwType MOX switch transmitter on and off too
often. But if you want that transmission start at first letter, replace
"TxAtKeyNum=2" string in [MOX] section of CWTYPE.INI to "TxAtKeyNum=1"

Best regards,
Sergei mailto:amx@...

Sergei,
Thanks for the reply. I have checked the settings and they are as the documentation says. I have a LPT port (IBM ThinkPad) that is the 3BC-3BF range so I used the 3BD documentation settings. I was not sure if I needed to enable MOX or something like that in order to send with the iambic key via LPT D6, D7, PE, SELIN and GND. Thanks for any other thoughts you may have on this matter.
Regards,
Mike

TML> package on-line. I started with CWType. I have built the interface
circuit
TML> and got it working last night except for keying with the iambic key. I
have
TML> checked and double checked the wiring so I think it is correct.
Question:
TML> Should I be able to open CWType and begin sending with the key? Or does
TML> something have to be enabled?

You should edit CWTYPE.INI as described in documentation.
See about

DotPort
DotXorMask
DotAndMask
DashPort
DashXorMask
DashAndMask

TML> Sending with the function keys and keyboard is
TML> fine. I do have one question about the keyboard keying. It seems that I
have
TML> enter two or more letters or numbers before the program responds, i.e.

I
TML> could enter, for instance, the letter 'C' and it will just set there.
If I
TML> then enter a 'Q' the program will send 'CQ'.

It is by design. In another case CwType MOX switch transmitter on and off
too
often. But if you want that transmission start at first letter, replace
"TxAtKeyNum=2" string in [MOX] section of CWTYPE.INI to "TxAtKeyNum=1"

Just my $0.02 worth.
In the near future all new computers will not have serial ports unless
you specifically order them that way. Most laptops are that way now,
without serial/com ports. I think it would be more beneficial to make it
work with USB ports. That will make it possible to daisy chain as many
pieces of hardware as you want.

I agree that you can use a converter. I was only suggesting that if changes were to be made, and only one option were available, I believe that it would be best if the change was made to USB. And that is only an opinion. You know the old saying: Opinions are like --s ----s, everyone has one.

USB is much more complicated interface, than COM or LPT.
To connect _any_ device to USB, you need some kind of converter ...

So USB/Com converter is the simplest way ...

2027. AALog contest module for TARA Grid Dip

Yahoo group: dxsoft
Date: 2003-08-01 07:26:56 UTC
From: Alexander Anipkin
Topic: 2018 Message: 2027

Hello ,

I just upload new version of the AALog contest module 1.0 beta 20

This version supports "TARA Grid Dip" contest. Enter name and Grid in
the User Exchange field in the contest configuration window.

new features:
- cq/s&p autoswitch mode (Config|Properties menu)
- now you can customize how to send numbers in short form
(Config|Properties menu)
- new values for using in macroses added.
C1 - 1st sign of the callsign
...
C5 - 5th sign of callsign
C6 - 6th and more signs of callsign

This is usefull when you cq-ing. Now you can set macros for CwType
like
~[tx]`[c1]`[c2]`[c3]`[c4]`[c5]`[c6] tu ur 5nn [sNumberSend]~[rx]

and call answer macros before you enter full callsign. Press the
key and continue to enter the rest of callsign.

Please note this version has NOT network support and has NOT link from the
website. Network support will be returned soon.

2028. CwGet 1.37 is released

Yahoo group: dxsoft
Date: 2003-08-02 10:13:15 UTC
From: Sergei Podstrigailo
Topic: 2028 Message: 2028

Hello All,

I just have uploaded CwGet 1.37 to the main site and mirror:

http://www.dxsoft.com/cwget.zip
http://www.cwget.com/cwget.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
CwGet Versions History.

V1.37
CwGet removes all spaces in selected text transferred to a logger now.

The option "Setup->Catch Word by One Mouse Click" was made. When this
option is enabled, you can catch a word from RX window by single mouse
click, not double-click. But you still can select the part of the text by
a mouse dragging.

The "Setup->Catch Words in Contest Mode" option was made.
In this mode software doesn't use popup-menu to catch word to logger.
CwGet recognize callsign or control number automatically.

The "Setup->Copy Transferred Data to Clipboard" option was made.
When this option is enabled, data transferred to logger are copied to the
Windows clipboard also.
V1.36
Some minor improvements were made.
V1.35
A problem with scrolling of received symbols window was fixed.
V1.30
The documentation was update.
Some minor improvements were made.
V1.28
CwGet can decode signals from WAVE-file now.
See the "File->Decode From File" command.
WAVE-file must be Windows PCM file, without compression.
Preferred file parameters are mono, 16 bit, 11025 Hz.
[...]

Date: 2003-08-08 15:44:09 UTC
From: Karl Altmann
Topic: 2031 Message: 2033

Hi Michael

I am using CWTYPE successfully.
Follow instuctions in helpfile - connecting computer with
trx.....,and setup menue.
My rig is K2/100 and Sony Laptop, the K2 has a feature to
connect paddle and PC-keyer together. DB25 parallelport
goes to a interface like N6TR, the interface of Sergej works
ufb, but does not work with other progrmms.
In setup menue you must enable: Mox on, Mox setup as you like,
and iambic mode on.
73, Karl. oe3tl.

Alexander,

I have a question that's sort of important. If TrueTYY has good connectivity to the phone line, can it handle Baudot? Baudot, as you probably know, is the 5-bit ancestor of RTTY. For frankly stupid historical reasons, Baudot is what the TTY units used by the deaf depend on. I am not deaf, but I cannot speak except through a computer. Invariably, businesses want me to deal with them through their TTY lines, but I don't have a TTY. I don't want a TTY. I have perfectly capable computers with sound cards far smarter than the best TTY. All I need in Baudot-capable software. Hence, my question.

Scott

RTTY really uses 5-bits Baudot code.
I am not sure,
but I heard that TrueTTY was successfully used for your purpose.

Take to attention, that you MUST use isolating transformer to connect
soundcard to phone line.

2038. CWType Interface Issue

Yahoo group: dxsoft
Date: 2003-08-09 08:45:15 UTC
From: Michael L. Thomas
Topic: 2038 Message: 2038

Ladies and Gentlemen,

First of all, a big thanks to those that offered ideas of what to do, especially Sergei because he and I had gone back and forth long before I posted a general note. It was gratifying to see the spirit of amateur radio is alive and well.

Here is what I found and changed. Now all the functionality of CWType working:
1. Pin 24 & 25 of the DB25 parallel port did not provide a ground.
2. I moved the shield/gnd for the iambic key to pin 23.
3. I set the .ini file to that shown in the third column of the documentation (LPT at 3BCh)
4. Windows (2000) LPT was set to LPT1 & 03BC-03BF
5. The computer's BIOS was set to Output Only and 03BC
6. ALL SYSTEMS GO!

Thanks again.
Mike, NA5U

Hello Scott:
At one time, I was confronted with similar needs. Hr in the USA, I
think the Telephone TTY standard uses 1400 Hz and 1200 Hz as the Mark
and Space tone frequencies, but I do not recall which tone is MARK.
They do operate at 45 baud. I bought an Ultratec text telephone for my
father to use, but it does not have Baudot xmit capability. Their TTY
unit is pricey!

If you are able to couple into/from the telephone line with a suitable
interface, then you should not have any problem, if TrueTTY provides
flexibility for setting the M and S tone frequencies and option to
Reverse M and S.

RTTY really uses 5-bits Baudot code.
I am not sure,
but I heard that TrueTTY was successfully used for your purpose.

Take to attention, that you MUST use isolating transformer to connect
soundcard to phone line.

Dear Alexander,

I can not set up your new feature for contest module to work at all.

Your example macro for CwType:
~[tx]`[c1]`[c2]`[c3]`[c4]`[c5]`[c6] tu ur 5nn [sNumberSend]~[rx]

Would you or anybody else give me a short comment on that issue. The best thing is to see some tested example macros.

This macros should be run manually.
For example, type first two letters of call,
then press appropriate Fx key, then continue call typing.

Friday, August 15, 2003 , you wrote to me:

G> When using AAlog with Dxatlas it does not save your home location when running the Dxatlas you have to reset this
G> every time you start up is there anyway round this?
G> Also how do you get it to show dx stations
you need properly configure your own location.
Then select Configuration|Interface prjperties|General settings and
mark "Use DXAtlas..." check box. Now you will see DXAtlas icon in the
aalog main window panel and in the New QSO window. Click this button
to display DXAtlas. When you enter call in the New qso window or
scrolling main QSO list you will see dx location in the dxatlas.

Best regards,

Equipment: AEA PK-88 Computer Compaq 1200 lap top, Radio Shack USB to Serial converter cable. Also the floppy to install software. Anyone know why I can't get a hand shake between the TNC and the computer?. I have used Buxterm to no avail then tried Lync then pacrat. I turned the tnc on and off to see if there was any activity, none.
My tnc has a 25 pin serial RS-232 connection, I hooked up the USB to serial line but since the pin side of the cable is a 9 pin I am using an adapter for 9 pin back to a 25 pin then on into the TNC. Anyone have any Ideas as to why there is no hand shacking going on?.

Thanks for any input.

2060. Hamport with Yeasu FT-100 and AAlog with Mixw

Yahoo group: dxsoft
Date: 2003-08-28 11:53:33 UTC
From: pa4fr
Topic: 2060 Message: 2060

Hello,

I'm evaluating aalog and hamport. First of all it would be very nice if hamport would support the FT-100. I'm sure that a lot of FT-100 owners out there (including me) would welcome that. I can test beta's if you want, no problem. I can send you that CAT specs if needed. (you can find Linux C-code on the internet for CAT interfacing with FT-100)

With Aalog I would the following (small) bug/inconsistancy.

The distance as displayed on aalog is calculated using callsign(dxcc coordinates) and grid locator (if present). This works very nice and is a big pro for this program (IMHO). When using the new-QSO window, the correct location is displayed on DX-atlas, i.e. using grid locator if present. However, when editing the QSO, the location as displayed in DX-atlas is only based on dxcc coordinates, i.e. not taking the grid locator into account. (although aalog calculates on this screen the correct distance taking grid locator into account). This is not consistent with the behaviour in the new-QSO window. I estimate that this would only require a small change in the code.

Finally, an OLE interface between Mixw2 and Aalog would be great. I've found the OLE-code example but I don't have the build environment. (compiler etc.) Mixw can interface in the same way with dx-keeper, dxbase etc. so why not with Aalog.

Best 73 and good luck with AAlog rev. 3.
Frank, PA4FR

2063. TrueTTY 2.20 is released

Yahoo group: dxsoft
Date: 2003-09-02 09:57:01 UTC
From: Sergei Podstrigailo
Topic: 2063 Message: 2063

Hello All,

I just have uploaded TrueTTY 2.20 to the main site and mirror:

http://www.dxsoft.com/truetty.zip
http://www.truetty.com/truetty.zip

Best regards,
Sergei mailto:amx@...
http://www.dxsoft.com

==========
TrueTTY Versions History

V2.20
User can select optimal or wide filters via "Filters" menu in RTTY and ASCII
modes now. Wide filters can be useful to decoding signals corrupted by polar
flutter. Use optimal filters in all another cases.
V2.19
RTTY and ASCII decoder was rewritten to improve decoding quality.
V2.10
The documentation was updated.
Auto-recognizing of callsigns and control numbers was improved
in contest mode.
Some minor bugs were fixed.

2064. hamport with yaesu ft920

Yahoo group: dxsoft
Date: 2003-09-02 14:34:03 UTC
From: Dave
Topic: 2064 Message: 2064

Hi Alexander,
Im using a yaesu ft920 with hamport and getting a weird result when you start up hamport on for instance 20 mtrs. on a freqency of say 14.070.00 1t gives a read out in the hamport window of 140.70.00 have you come across this before, and is there a way to fix it? It seems as if the programme is putting the frequency digit in the wrong place and it does it on all bands.It worked fine on my kenwood 570 and only gives problems on the ft920.
Regards,
Dave gm6jua

I installed AALog and set up three logs. I entered contacts in all three. The next day I opened the program and none of the logs are there. I checked the log subdirectory and the database for each log is there. How do I make the program see the logs.

2068. Fw: Fax window of Seatty 1.20

Yahoo group: dxsoft
Date: 2003-09-03 12:34:29 UTC
From: Roger Proust
Topic: 2068 Message: 2068

Hello Sergei,

I have used during my two months sailing trip in mediterranean sea with much efficacity and pleasure, SeaTTY 1.20 associated with NavTTY of Gerard Hageman.

However, I have some improvement to ask you about SeaTTY Fax window. Effectively, the fax screen of SeaTTY 1.20 only shows a small part of the weather chart and it is not very easy to see the whole picture. I thinck it would be much better to can see the whole picture with a setting zoom button like other softwares very well known.If you do that it would be great.

Contest

Hello All,

You can register TrueTTY with 50% discount before
Russian WW RTTY Contest is finished (27-July-2003 23:59 UTC) .

Use this URL to purchase TrueTTY key-code for $19.50 :

https://www.regsoft.net/regsoft/vieworderpage.php3?productid=16946
<https://www.regsoft.net/regsoft/vieworderpage.php3?productid=16946&pc=5
4Lc0> &pc=54Lc0

I'd suggest you to use
AALog contest module (http://www.dxsoft.com/aatest.zip)
together with TrueTTY (http://www.dxsoft.com/truetty.zip) in
this contest.

Best regards,
Sergei mailto:amx@...

2072. Improvement of Fax window of Seatty 1.20

Yahoo group: dxsoft
Date: 2003-09-05 08:35:26 UTC
From: Roger Proust
Topic: 2072 Message: 2072

Good morning Sergei and all,

I appreciate very much SeaTTY what I use in priority when I am at sea, but I write you again about Fax window of SeaTTY 1.20 because I had no reponse. As I already wrote you in September and in June, it is not easy when you are in your sailing boat, at sea, to read in SeaTTY the whole Fax picture and to access directly to the picture sofware (even by calling in the explorator window the excellent Irfanwiew what I have since three years).
I thinck it would be much better to can see the whole picture with a setting zoom button like other softwares very well known (or by an other way.....).If you do that it would be great because your software is really a success .
At last, can you equally change the SeaTTY saving Fax pictures in ligther picture files (JEPG, Gif, PNG....) instead BMP which is very heavy for those who has an old lap top. I know, I can do that with Irfanview or other software, but it is too long at sea to call and modify the picture by a picture software .
Next year, I intend to go from Toulon to Turquey and Tunisia .

Thanck you for you work

Best Greatings

Hello Roger,

Wednesday, June 11, 2003, 2:59:34 AM, you wrote:

RP> Hello Sergei,

RP> Fax reception:

RP> - is it possible to have at least zoom : 1/2, 1/1, 2/1,
RP> on the Fax window and to have the possibility to call directly the memorised pictures from the tool's bar of Seatty ?

If you double-click on preview image or image name in tree,
this image will be opened in default image editor.

I'd suggest you to download and install free but excellent IrfanView editor.

Best regards,
Sergei

Because it was not question :-)
I just take you opinion in my mind ...

RP> As I already wrote you in September and in
RP> June, it is not easy when you are in your sailing boat, at sea,
RP> to read in SeaTTY the whole Fax picture and to access directly
RP> to the picture sofware (even by calling in the explorator window
RP> the excellent Irfanwiew what I have since three years).

But what is your problem with external viewer?
Just double-click on selected file in SeaTTY three and get
image opened in external image viewer ...

RP> I thinck it would be much better to can see the whole picture with a setting
RP> zoom button like other softwares very well known (or by an other way.......).If you do
that it would be great because
RP> your software is really a success .
RP> At last, can you equally change the SeaTTY saving Fax pictures in ligther picture files

Good afternoon Sergei and all,

Thanck you very much for your answer. However, I am sorry to guive you some precisions about my remarks about Fax screen :

1. But what is your problem with external viewer ?
> Just double-click on selected file in SeaTTY three and get
> image opened in external image viewer ...

R : I have well understood the procedure to read the whole picture after SeaTTY has saved it. But my remark is not here but especially during the reception of the Fax. Effectively, it would be very much comfortable if during the reception we could see the whole picture or almost on the Fax sreen of SeaTTY. Actually, with the scrolling bar we can do that, but it is not very convenient because the scale of the receiving picture is too large .
A solution, if you do not intend to add a scale button on the tool bar of the SeaTTY Fax screen, would be to reduce the actual scale of the picture receiving in the Fax screen of SeaTTY.
What do you thinck of that solution ?

2. > Yes, I intend to replace BMP format to more compact one

R : Thanck you

Current version of SeaTTY has old RTTY and NAVTEX decoders
(the same as in TrueTTY 2.10).

I plan to release new version of SeaTTY soon ...

Tnx Alexander, it works fine now...

In aalog it give the complete frequency... is it possible to change it
to see only the band... 20m or 15m?

2087. QSL service window F5

Yahoo group: dxsoft
Date: 2003-09-08 13:27:22 UTC
From: Koen
Topic: 2087 Message: 2087

Hello all,

When entering freq. of 14.027.02 or 144.325.26
and you go to qsl service, AAlog only prints 7 characters
on the label.

It becomes 14.027. or 144.325

Is this normal or what am i doing wrong?

in the version 2.x - No

this will possible in the 3.0

Hi Alexander
Wish List
When in the Pile Up New Qso (Ctrl + I)
Is there anyway in future releases to incorporate auto previous contacts (dupe check) that when you type a call in the callsign field it automatically tells you if you have worked before

From: Sergei Podstrigailo
Topic: 2092 Message: 2092

Hello All,

does anybody know e-mail of KA1BSZ, Clyde C. Blake ?

He sent me money for TrueTTY, but he didn't write his e-mail to
send reg-code ...

Best regards,
Sergei mailto:amx@...

Sergei,
All I could find was an address which you probably already have.

Callsign: KA1BSZ Class: General
Name: CLYDE C BLAKE, II
Addr1: RT 5
Addr2: FAIRLEE, VT 05045
Country: USA

Regards,
Michael L. Thomas

Good nigth Sergei and all,

Thanck you Sergei for that improvement. I' ll test it next week at see.The precedent decoder was not so bad but I imagine that new decoder is excellent.
Best greatings

From: Sergei Podstrigailo
Topic: 2095 Message: 2095

Hello All,

I just have uploaded TrueTTY 2.22 beta to the main site and mirror:

http://www.dxsoft.com/truettyb.zip
http://www.truetty.com/truettyb.zip

BPSK31 and QPSK31 decoders were rewritten.
QPSK31 decoding quality was vastly improved.

Best regards,

Topic: 2097 Message: 2097

Hi
I have been trying to log contacts from cwtype to aalog not really sure if possible

I have set a macro ~[tx]TU`[rx]`[lgts] which tells you an error qso not saved in log

have you got to manually save qso or is there a way to log automatically any help appreciated

Hi Sergei
Thanks for quick reply I was trying to log with pile up qso on view but
it works fb
with normal qso box.

2100. TrueTTY/SeaTTY program icons

Yahoo group: dxsoft
Date: 2003-09-14 17:28:11 UTC
From: John Weston
Topic: 2100 Message: 2100

A small suggestion:

Can the programs have an additional installation set-up screen to set, change or disable the locations where the program launch and other icons are created? This would allow the installer to optionally not include an icon for the help files, readme, history, etc.

I have a special program folder containing all my radio programs and folders so have put TrueTTY, SeaTTY, etc. in this folder. When upgrading the programs, I select this folder for the launch icons but the installation insists in creating additional icons on the desktop and in the general program folder which I have to delete later. Can this be modified in a future release?

Thanks

John Weston in Ayr, Scotland.
